Budget Message

By

GOVERNOR EARL WARREN

1953-1954 Budget

To the Senate and Assembly of the Legislature of California:

In conformity with Section 34 of Article IV of the Constitution, I submit to you the Budget for the State of California for the fiscal year ending June 30, 1954, together with my recommendations regarding financing it.

California State Government today is in an excellent financial position. We will finish the present fiscal year with our budget in balance and with our vital reserves intact, but as we look into the future we find difficulties in maintaining such a balance under present tax levels because of expense incurred by direct action of the people. The recent action of the voters in adopting a constitutional amendment substantially increasing state support of public schools added a burden to state finances which were already under the strains of inflation, increasing population, still greater school enrollment growth, shifting of obligations from local government to the State, and public demands for more and better services. This increase in school support is almost $70,000,000 for the budget year, 1953-54, and will mount as the number of youngsters in our schools continues to grow.

Total expenditure requirements for the 1953-54 Fiscal Year are estimated at $1,326,851,805. This represents an increase of $82,787,967, or 6.7 percent, over the current year, most of which is for the increased school payment of almost $70,000,000. Special funds account for $492,389,017 of these expenditures; $834,462,788 must be met from taxes and other revenues available to the General Fund.

Inflation in recent years has swelled our revenues as well as increased our costs. Prudent fiscal policies have left us with a $66,000,000 surplus and have enabled us to put aside some reserve funds for the purpose of liquidating long-term indebtedness and providing for certain future requirements that should reasonably be anticipated. It can be seen plainly, however, that revenues under present law will be short of financing the expenditures we are called upon to meet, regardless of how economically we plan our future. As is the case in many situations, there is an easy and a hard way of deciding a difficult issue, but the hard way is usually the right way. It would be easy to use up reserve funds for current expenses without regard for the soundness of these funds and without considering how great the future need for them may be. For a year or so we could consume these reserves, as an improvident farmer would eat up his seed corn, and then face a certain deficit—even a crisis if we should have a slight business depression. The hard way is to face the facts as we see them now and as we reasonably forecast them to be in the future. The following are estimates on the State General Fund for the next three years. The figures are on the assumption that there will be no recession during these years, that inflation will be halted at its present level, that our revenues and state operating expenses will increase only at the rate of growth in state population, and that capital outlays can be held to $40,000,000 per year as a minimum amount to keep abreast of needs.

ESTIMATED FINANCIAL OPERATIONS OF THE STATE GENERAL FUND

Fiscal Years 1953 through 1956
(in millions of dollars)

	1953-54	*1954-55*	*1955-56*
General Fund revenue	$801.9	$825.0	$850.0
General Fund obligations:			
Current expense	$269.3	$275.0	$285.0
Capital outlay	53.6	40.0	40.0
Local assistance	570.4*	621.0	657.0
Total expenditures	$893.3*	$936.0	$982.0
Current operating deficiency	$91.4*	$111.0	$132.0
Carry-over surplus July 1, 1953	$66.2	-----	-----
Accumulated deficit June 30th	$25.2*	$136.2	$268.2

---

* Including 5.5 million dollars for the initial year of Aid to the Needy Permanently Disabled, not included in budget totals since the program has not yet been authorized by law.

Even under these moderately optimistic assumptions revenues are $91,400,000 short of meeting expenditures for 1953-54, the shortage is $111,000,000 for 1954-55 and $132,000,000 for 1955-56. A business slump which would cut our receipts by as much as 10 percent would increase the accumulated deficit at June 30, 1955, to $218,000,000 and to $435,000,000 at June 30, 1956, if no new revenue measures are taken. We have prided ourselves for 10 years on a balanced pay-as-you-go budget because a solvent State Government is all-important to the welfare of the people of this State.

The present state tax system was enacted nearly 20 years ago. Except for an adjustment in levies for highway purposes there has been no extension of the tax base and no increase in rates since that time. On the contrary, from 1943 to 1949 we reduced taxes by 15 percent for a total saving to the taxpayers of 561 million dollars. At the present time our people are paying 18 cents less per hundred dollars of income for state taxes than in pre-World War II years. Meanwhile the State has taken on additional burdens which amount to many millions of dollars at present cost levels. Most of these added burdens are in the form of greater assistance to local government. The new rate for state support for public schools is $180 per pupil compared to the $60 rate for elementary schools, which did not then include kindergarten, and $90 for high schools and junior colleges in 1942-43. The State's share of aid to the aged is now six-sevenths of state and local contributions and for blind, three-fourths—in contrast with the former fifty-fifty sharing. Moreover, the average amount of aid paid to the aged, the blind, and to needy children has been approximately doubled in the intervening years. The counties and cities now get the entire proceeds from liquor licenses and the share of motor vehicle in lieu tax to the extent of $20,000,000 formerly state revenue sources. Truck tax proceeds amounting to $12,635,000, now going to highway use, were also a General Fund tax source. There are now heavier subsidies for local health departments, for aid to crippled children, for child care centers, and for debt service on the school building bonds.

During the last 10 years we have set aside certain moneys in reserve funds and special appropriations as a means either of funding existing obligations or making provision for future exigencies. A review of these reserves, together with their balances as of the beginning of next fiscal year, is enlightening.

Bond Sinking Fund of 1943 $8,103,521

This fund was established in 1943 and augmented in 1945 with the amount necessary to meet interest and retirement charges on all outstanding state bonds except those which were self-liquidating or which had special liquidating measures. When this fund was established the State became, in effect, debt free. It remained so until the State lent its credit for the school building bond program. Any diversion from this fund would be a form of deficit financing.

Teachers' Retirement Fund Special Deposit $36,853,000

The amount of $30,000,000 was transferred to the Teachers' Retirement Fund in 1944 as a partial funding of the accumulated deficit in the Teachers' Retirement System. Interest accrued by next June 30th will be $6,853,000. Here, again, is a fund which might be diverted for meeting current expenses, but to do so would be to increase this deficit and the need for heavier outlays from current revenues in future years.

Flood Control Fund of 1946 $16,020,339

This is the cash balance of the $25,000,000 set aside in 1946 and 1947 to finance local governments' shares of federal flood control projects extending over a period of years. Unfortunately, this balance is insufficient to meet the projects which have already been authorized by law as the amount originally reserved was not sufficient for increasing requirements and because of the subsequent great increase in costs over the original estimates. Dissipation of this reserve would jeopardize the orderly development of flood control projects which are so vital to the people of our State.

Postwar Unemployment and Construction Fund $6,907,413

This is the balance of the $90,000,000 appropriated in 1946 for postwar construction by cities and counties. All but $580,061 of this balance is allocated to particular counties or cities. The remainder was earmarked in 1951 for water pollution control work vitally needed for the purification of our streams.

Revenue Deficiency Reserve $75,000,000

This reserve (the so-called Rainy Day Fund) was established as a cushion against a drop in revenues below budget estimates which a business depression would produce. It was also made available for disaster relief in case of an extreme national emergency such as an atomic attack. To dissipate this fund would not only weaken the financial stability of the State but would trifle with the life of every man, woman and child in our State. If it is ever needed in time of national disaster, it will be all too small.

Capital Outlay and Savings Fund $31,785,612

This is a carry-over of funds reserved for capital outlay needs. This budget will require every dollar of this amount to meet absolutely urgent hospital, correctional and educational building needs.

Civil Defense Outlay $5,434,752

This represents the remainder of the $12,000,000 set aside in 1951 for civil defense outlays such as fire fighting equipment, rescue equipment, sirens and warning systems, and medical and first aid stockpiles. It is likely that an expanded civil defense program would require the entire amount as originally reserved and this balance should, therefore, be retained at least until we know what the civil defense program of the new national administration will be.

School Bond Retirement Fund $49,200,000

The voters have now authorized a total of $435,000,000 in state bonds for the purpose of advancing money to school districts to build school buildings in districts where the school population has so far outstripped the rise in assessed value of taxable property that the individual districts cannot finance the buildings without state aid. It is estimated that the school districts will be able to meet approximately two-thirds of the debt service on these bonds, that the remainder will be a net obligation of the State. As a partial funding of this state obligation, $50,000,000 was placed in this retirement fund. Actually if the State were completely to fund its full share of this obligation approximately $90,000,000 additional should be placed in this bond retirement fund. As long as the State is obligated to repay a portion of these bonds, this money cannot be considered a surplus and it seems only reasonable that if inflation has been largely responsible for this obligation, revenues obtained during inflationary times should be used to amortize the obligation. Here again is a fund which could be drawn upon to meet the current revenue deficiency, but to do so would mean only adding to future deficits.

In addition to the $50,000,000 set aside in this fund $20,000,000 was appropriated this year from the General Fund for school building construction to be advanced to the school districts in the same manner as the bond funds, with the same repayment requirements by the districts. The $185,000,000 bond issue approved by the voters last November includes authorization for $20,000,000 in bonds to repay the General Fund if the repayment is necessary to maintain the General Fund with a surplus of at least $5,000,000 at June 30, 1953. Since the repayment to the General Fund will not be required, under present law this $20,000,000 in bonds will not need to be sold. A change in law, however, could make this amount available. Such a change would have the result of increasing the State's long-term debt.

Central Valley Acquisition	$9,593,919

This is what will remain of the $10,000,000 appropriation made in the 1952 Budget for plans and "down payment" for the proposed acquisition of the Central Valley Project from the Federal Government. It is probably unnecessary to reserve the entire $9,594,000 since any purchase arrangement would call for payment out of revenue bond proceeds. The above balance could be used for related water project plans such as the Feather River Project.

As indicated earlier, General Fund expenditures for the 1953-54 Fiscal Year will exceed the revenues of the year by more than $91,000,000. (The deficiency would be greater by $31,800,000 were it not for the unappropriated balance of that sum in the Capital Outlay and Savings Fund which will be used to supplement current funds for this budget's proposed capital outlay expenditures.) Against this deficiency we can apply a carry-over surplus of $66,200,000, giving us a net deficit of $25,200,000. We could draw upon one or more of the above reserve funds to meet this deficit. That would be the easy way so far as the immediate year is concerned, but there would be another day of reckoning in 1954. In that year our revenue deficiency would be more than $111,000,000; the surplus would be gone and the reserves diminished.

I repeat, the above forecast is an optimistic one. If, as some economists predict, a business recession occurs after the peak of defense spending in late 1953 causing our revenues to decline, we would be short many millions more. At the same time, decreases in employment opportunities would multiply our expenditure needs for social welfare. Then there would be the inescapable necessity of drastic tax increases at a time when the State's economy could stand it the least.

The question arises as to whether the budget can be balanced solely by reducing expenditures. I believe no one would seriously contend that state expenditures can be reduced 90 to 120 millions of dollars per year without seriously crippling the services State Government renders to our people.

More than 65 percent of the State's expenditures are in the form of fixed charges under continuing appropriations and formulas established in the Constitution and permanent laws. They are not subject to ordinary budget control. They are mostly for schools and social welfare. The people have time and time again voted to increase and extend these costs rather than reduce them.

Of the remaining 35 percent, $58,600,000 represents additional subventions to local communities and $95,800,000 is for capital outlay, particularly for hospitals, colleges, the university, youth facilities, and correctional institutions. The remainder of $309,400,000 is for state expenditures which are subject to budgetary control, the greater part of which are in the fields of mental hygiene, corrections, higher education and protection of natural resources. The expenditure requirements in this budget have been carefully reviewed; the recommended amounts are, in my opinion, minimum requirements for effective performance of necessary services. This State can well be proud of its record of efficient, honest and forward-looking State Government. I offer my full cooperation and the assistance of the personnel of our state departments in your consideration of this budget with the objective of further economies if any can be accomplished. I urge, however, that we avoid false economies. It would be false economy, for example, to cut the appropriations for the Department of Mental Hygiene in such amounts that it could not proceed with its program of modern medical and psychiatric treatment which restores so many patients to useful lives. To compel it to go back to a program of mere custody would, in the long run, cost more money and fail miserably to meet the human needs. It would not be sound economy to cut our correctional system to the point where the gains in rehabilitating youthful and adult offenders would be lost. It is not good economy to continue with an understaffed Highway Patrol; a moderate increase which will serve to reduce our motor vehicle accident rate is surely good dollars-and-cents economy as well as economy in human life and limb. It would be wasteful to cut the Forestry Division below amounts needed to maintain its splendid record of low fire losses. It is not sound economy to withhold funds for the construction of needed hospitals, college classrooms, and other buildings where the need cannot be denied. Postponement only adds to future budgets.

The budget document presents a complete and fair picture of our financial situation and full information on the requirements for all state departments and functions. Your attention is invited to the major expenditures under each of the three main sections, State Operations, Capital Outlay, and Local Assistance.

STATE OPERATIONS

As compared to Local Assistance the amounts required for all of the operating expenses of the many agencies and activities of the State Government account for the smaller part of the total budget and a much smaller part of the total increase in expenditures. Most of the increase which is recommended is for putting into operation previously authorized and newly built facilities for educational, hospital and correctional use.

The new Deuel Vocational Institution at Tracy with a capacity for 1,200 inmates will be first occupied in July, 1953. This, in addition to general improvements in parole, feeding and medical care, accounts for most of the increase for the Department of Corrections. Provision is made in the *Youth Authority* section of the department for starting the new Reception Center for Northern California which will be ready in March, 1954.

In the Department of Education the new School for Deaf in Riverside will begin its first year of operation. There will be substantial increases in enrollment at the new state colleges at Long Beach and Sacramento, and moderate increases in the other colleges.

The *University of California* will need a considerable increase for the new Medical School in Los Angeles and the new colleges of letters and sciences at Riverside and Davis.

The *Department of Mental Hygiene* requires funds to operate the new hospital for mental defectives at Porterville for the full budget year, the new hospital for maximum security cases at Atascadero for the latter part of the year, and the new receiving and treatment units at Napa and Stockton soon to be completed. Provision is made for some improvement in feeding, occupational therapies, and social service work.

An augmentation of 180 officers is recommended for the *Highway Patrol* as a further step toward meeting the full need for an adequate policing of highway traffic. A still larger force is badly needed. The proposed increase is limited to the number which can be recruited and trained during the year. This agency is, as you know, supported from the Motor Vehicle Fund.

In conformity with the recommendation of the Personnel Board in its annual report there is included a provision for an increase in the *pay of state employees* which would average 5 percent of present rates. As you will see from a reading of the board's report, a survey of pay increases granted by private industry since the last general increase would justify at least half that amount now and there is a strong likelihood that the full 5 percent will be justified by the beginning of the budget year under our long standing policy of maintaining state pay equal to that in private employment and other governmental units. I call your attention to the fact that the Personnel Board has been conservative in granting pay increases and will turn back unspent approximately $1,977,716 of the amount you appropriated last year.

These items make up the greater part of the increase under State Operations.

CAPITAL OUTLAY

This section of the budget deals with all of the State's capital outlay needs, including highways. The amount allocated for highway construction and improvements is limited in this document in accordance with the budget provisions of the Streets and Highways Code to estimates of the receipts which existing laws will yield for this purpose. The recent studies of your Joint Fact-Finding Committee on Highways have shown that present highway revenue measures, in these days of inflated costs, are far short of meeting deficiencies in our highway system. The terrible toll of injuries and deaths caused by overcrowded highways cannot be allowed to go on. The highway construction problem must be dealt with separately and I shall give you my full cooperation in finding a sound solution without further delay.

A careful review has been made of the construction needs for correctional, educational, and hospital uses. Only the most urgent projects have been included. At present day costs, however, they require a large sum of money and any postponement of them would neither be honest budgeting nor sound economy. For many years during the prewar depression hardly any funds were appropriated for the then growing capital outlay needs. During the war years, no construction work could be undertaken. In the postwar period we have devoted our efforts to catching up with these long years of neglect. Good progress has been made, but cost increases have almost trebled the amounts required for a given project as compared with prewar levels. To be specific, before World War II we could have constructed the buildings herein recommended for approximately $33,000,000 instead of the $90,000,000 we must pay for them at current prices.

We must build to meet the tremendously growing needs of our expanding population. Having grown by almost 4,000,000 in the last 10 years, our population is continuing to increase by approximately 370,000 annually. This means 150,000 new school children, 250,000 more automobiles, 1,500 more patients in our state hospitals and homes, 1,000 more inmates in correctional institutions, and so on, with all of our institutions presently overcrowded.

The largest project for the *Department of Corrections* is the completion of the Medical Facility at Vacaville which will provide additional capacity there and permit some relief of overcrowding at other institutions.

There is included for the *state colleges* and the *University of California* the most urgently needed additional classrooms and service facilities.

Most of the capital outlay budget for the *Department of Mental Hygiene* is for hospitals for mental defectives. The largest single item is for a start on the new institution near Costa Mesa and more buildings are included for the hospitals at Porterville, Pacific Colony and Sonoma. You know, I am sure, of the thousands of cases of mentally deficient children on waiting lists which the Department of Mental Hygiene has been unable to accept because of the lack of beds. It is difficult to appraise the hardship and heartache caused to thousands of homes by the failure to take these cases, and the tragedy that many may lose their chances for useful and happy lives because they could not be given early care and treatment under advanced medical methods.

I am happy to say that the brand new hospital for mental defectives at Porterville will be ready to take its first patients in May of this year, but this is only meeting a portion of the shortage. The completion of our entire program for mental defectives will permit the State to meet its responsibility in this field for the first time in its history.

The total of the recommended appropriations from the Capital Outlay and Savings Fund amounts to more than $83,700,000, including minor construction items and an allotment of $8,500,000 to meet rises in cost which will have occurred since earlier appropriations were made. This program contemplates appropriating the entire amount of the carry-forward balance of $31,800,000 in the Capital Outlay and Savings Fund and a transfer of $51,700,000 from the General Fund. There are large projects of capital outlay yet to be financed. A new campus for the Los Angeles State College of Applied Arts and Sciences, an additional prison and an additional Youth Authority school have been authorized and heavy outlays will be required to begin construction on these new institutions within the next few years.

I recommend that there be placed in the Capital Outlay and Savings Fund as a partial financing of these outlays the State's share of the impounded oil royalty funds amounting to approximately $35,000,000 which would otherwise be paid into the General Fund, if and when title to these funds is recovered by the State.

The proposed program still leaves untouched the very serious shortage of office space at the State Capital and in the principal cities where branch offices are maintained. The present overcrowded condition of many departments is a handicap to efficient operation, and it is poor business to be spending the millions now required for rented quarters. I trust that a means of financing at least a major part of the required office building needs can be developed at this session.

LOCAL ASSISTANCE

Excluding capital outlay items, two-thirds of the State's normal, day-to-day expenditure program for 1953-54 is represented in the $744,069,000 earmarked for assistance to local governments. The outstanding feature of these payments is their fixed nature. More than 9 out of each $10 in local assistance is fixed by provisions of the Constitution or statutes; less than $1 is subject to control in preparation of the budget. These fixed, continuing appropriations, which for the most part are computed by specified formulas, will increase $100,647,000 during the budget year as compared with 1952-53. This change is partially offset by a decline in controllable costs resulting chiefly from the nonrecurrence of the $20,000,000 appropriation for building loans to distressed school districts. Consequently, the net increase in appropriation requirements for local assistance is $88,009,000.

Three basic factors account for this multimillion-dollar increase: (1) the recent constitutional amendment which raised by nearly one-fourth the State's contribution for each pupil in the Public School System, (2) the rapid growth in school population, and (3) a continued rise in receipts from motor vehicle taxes which are shared with city and county governments. Appropriations for local school purposes during 1953-54 are estimated at $406,958,000, an increase of $75,150,000 from the current year. Shared revenues from liquor licenses, motor vehicle fees and fuel taxes going to cities and counties will total nearly $163,900,000, a gain of $10,850,000.

It is encouraging to report a decided leveling off in costs in the programs for aid to the aged, the blind, and to needy children. There will be a reduction of more than $750,000 in state costs of aid to needy children and only relatively small increases in the amounts for aged and blind. The greater opportunity in today's labor market for employment, improvement in admininstration, and heavier payments under the recent amendments to the Federal Social Security Act are the reasons for this improved situation.

This State has so far failed to avail itself fully of the advantages of the Federal Social Security Act amendments in delaying its participation in the program for aid to the needy permanently disabled. I again recommend that we amend our welfare laws so as to bring the totally and permanently disabled under a program similar to that for the aged. Certainly no group of needy persons merits consideration more than those with complete and permanent disabilities. They are less able to care for themselves than most others whose needs have been recognized for years. Most of them now receive some assistance through county general relief, but their needs could be much more adequately met through this program of joint federal, state and local aid.

You will remember I recommended the establishment of such a program in 1951 soon after this category was included by Congress in the Federal Social Security Act. In the meantime 38 states and territories have adopted programs and we have had an opportunity to study the experience of such states as New York, Pennsylvania, Ohio, Massachusetts, Illinois and New Jersey. Experience in these states has demonstrated that the cost estimates which I presented to you at the last regular session were substantially accurate in contrast to the extravagant estimates given you by the opponents. The adoption of this addition to our social welfare program will make available to us about 5½ million dollars in federal grants in the budget year, and will permit the counties to make a saving of one and one-half million per year in their present outlays for general relief. I have accordingly included in the figures presented to you in this message on the General Fund finances an estimate of $5,500,000 as the cost of this program for the initial year, 1953-54, and $14,700,000 for the full Fiscal Year, 1954-55, when it would be on a going basis. While technically this is a new state expenditure program, the State's obligation to this very needy and deserving group of its citizens is not new, and California has already delayed too long in meeting this obligation, particularly since the Federal Government has made funds available to share the costs and has recently given substantial relief to this State through its heavier sharing of aid to the aged, by its increased grants for old age and survivors insurance.

A BALANCED BUDGET

Because of the factors mentioned, I have regretfully concluded after a thorough review of needs, that we cannot reach a sound solution of the financial problem confronting us, in any large measure, by reducing appropriations. I know that the people of the State would not agree to a reduction of state responsibilities and services in any such magnitude. The easy way, then, would be for me to submit to the temptation of piecing out our revenues by using some of the reserve funds to balance the budget this year, leaving the future to take care of itself. I dislike increasing the tax load on the people of California as much as anyone. During the 10 years I have been Governor we have had general tax reductions rather than increases. This would not be an honest budget, however, if I did not lay the full problem before the Legislature and the public and point out the consequences of adopting a policy of expediency and temporizing at this time. Some will say that we have overestimated the financial problems of the future, that we underestimated revenues in the past, that future receipts will again exceed our forecasts, and that we should not cross the bridge of a big deficit until we come to it. It would be poor counsel, in my judgment, either to overestimate future income or underestimate future governmental expense. This would be gambling too heavily with the State's future and would be putting all our eggs in the basket of inflation. If we cannot finance ourselves on a pay-as-you-go basis without using up essential reserves while we are at the peak of prosperity and employment, when can we do it? We have not gambled in estimating revenues and I make no apology for that. If we had gambled, we would be in real trouble this year. Certainly, duty should impel us always to be conservative in fixing our spending limits.

Should we ever fail in that regard, our State will be in great jeopardy.

The state spending program which we jointly developed could, in all probability, have been maintained and financed within our existing tax laws, but the heavy increase in state school support adopted by the voters in passing Initiative Measure No. 2 will add more than the State's present tax system can carry. I do not quarrel with the voters in their decision to increase school financing, because I share their desire for a good school system. I merely say that it will be necessary to raise revenues to pay for it. Accordingly, if the Legislature determines, as I believe it should, to continue State Government on a pay-as-you-go basis it will be necessary to have more revenue and, in my opinion, the least objectionable revenue measures it could adopt to accomplish that result would be a new cigarette tax and increased levies on liquor and horse racing. Most states have had cigarette taxes for a good many years. California is one of the seven which so far has not used this form of tax. California's tax rate on distilled spirits is one of the lowest in the Nation at the present rate of 80 cents a gallon. The national average of such state taxes is $1.60 a gallon. I have, for some time, felt that an adjustment should be made in the license tax on pari-mutuel betting on horse racing to place a heavier levy on the highest brackets of wagering receipts which bring the largest track operators excess profits beyond reasonable returns.

Following are the calculations of yields which can be derived from such measures:

	Estimated yields	
	1953-54	*Full year 1954-55*
Cigarette tax		
At rate of 2 cents per package	$26,500,000	$30,200,000
Liquor excise tax		
Increase tax on distilled spirits from 80 cents per gallon to $1.50 per gallon	12,500,000	13,600,000
Additional 2 cents per gallon on beer	3,600,000	4,000,000
Additional license fees on horse racing		
Excess profits	1,000,000	2,000,000

A combination of these levies can be enacted at this session in such way as to produce sufficient revenues to meet the deficiency for 1953-54 with a margin of safety and to make a substantial start in meeting the much greater deficiency in the year to follow.

In conclusion and by way of summary, I repeat what has been stated in other parts of this message. First, that the current budget will be in balance at the end of the present fiscal year. We will have, in addition, a surplus of $66,000,000, but due largely to the passage of Proposition 2, at a cost of $67,000,000, this proposed budget will be out of balance next year unless we obtain additional revenue. Second, it would be possible to supply this deficit by raiding one or more of our funds reserved for vital purposes. This would appear to be the easiest method, but it would, in my opinion, be unwise from at least two viewpoints: (1) the practice thus established would be used as a precedent for continued raiding until these necessary reserves would be exhausted, and (2) because it would eventually leave our State on the ragged edge of insolvency. I recommend against such action. The only other way of providing funds after we have reduced spending to a minimum, as we have done in this budget, is by increasing taxes in some form. I dislike raising the tax load of the people. I have never done it. We have always lived within our means and have reduced taxes whenever possible, but if we must increase taxes, I believe the best way to do it is by imposing levies on liquor, cigarettes, and horse racing comparable to the average state levies throughout the Nation. This can be accomplished by the schedule above set out, and I so recommend to you.

While I present these measures as the least objectionable means of raising the necessary funds, I realize that it is the prerogative of the Legislature to determine the tax structure of our State and I will welcome any alternative plan which would maintain an equitable revenue system and keep the State Government in a sound financial condition.

Respectfully submitted,

Earl Warren

Governor

January 12, 1953

Letter of Transmittal

HONORABLE EARL WARREN, *Governor of California*
State Capitol, Sacramento, California

DEAR GOVERNOR WARREN: Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year July 1, 1953, to June 30, 1954, compiled in accordance with your policies and instructions.

The revenue estimates presented in this budget are based on the assumption that there will be no material increase in war activities and the defense program will be continued as now planned. The amounts shown have been determined after a careful appraisal of trends and after consultation with national and state economists. They have been reviewed with the staffs of the State Controller and the administrators of the principal tax laws, who are in substantial agreement.

Again we have had excellent cooperation from department heads and staff members in determining expenditure requirements.

Respectfully yours,

James S. Dean
Director of Finance

January 12, 1953

Summary Statements

Schedule 1. General Budget Summary.

Schedule 1-A. Reconciliation of General Fund Accumulated Surplus as of June 30, 1953, as Estimated in the 1952-53 Budget with the Amount Estimated in the 1953-54 Budget.

Explanation of Budget Revenue Estimates

Schedule 2. Comparative Statement of Revenues for the Fiscal Years 1951-52, 1952-53, and 1953-54.

Analysis of Expenditure Requirements

Schedule 3. Comparative Statement of Expenditures by Character, Function, Organization Unit and Fund for the Fiscal Years 1951-52, 1952-53, and 1953-54.

Schedule 4. General Fund, Statement of Financial Condition, June 30, 1952.

Schedule 5. Summary of Fund Condition by Funds as of June 30, 1952, June 30, 1953, and June 30, 1954.

Schedule 6. Statement of Balances in Other Treasury Funds Not Included in Budget Totals as of June 30, 1952, June 30, 1953, and June 30, 1954.

Schedule 7. Comparative Statement of Contributions and Expenditures of Federal Aid Granted to the State of California for the Fiscal Years 1951-52, 1952-53, and 1953-54.

Schedule 8. Schedule of Proposed Expenditures by Method of Appropriation for the Fiscal Year 1953-54.

Schedule 9. Comparative Statement of Fixed Charges and Controllable Expenditures for the Fiscal Years 1951-52, 1952-53, and 1953-54.

Schedule 10. Reconciliation of the 1952-53 Budget with the Estimated Expenditures for 1952-53 as Presented in the 1953-54 Budget.

Schedule 11. Statement of Bonded Debt of the State of California as of November 30, 1952.

Schedule 1

GENERAL BUDGET SUMMARY

---

[a] If the extraordinary withdrawals for School Bond Retirement Fund, $50,000,000; School Building Loan Fund, $20,000,000; and civil defense capital outlay, $5,434,752; totaling $75,434,752, be considered to have been withdrawn from the surplus accumulated in prior years, the beginning Adjusted Surplus at July 1, 1952 is $84,951,749.

[b] In addition, Aid to the Needy Permanently Disabled will require $5,500,000 for 1953-54. This amount has not been included in these totals under the long standing practice of not including in the budget schedules expenditures which have not yet been authorized by basic laws. If this program is authorized, Local Assistance would be $570,412,834, total General Fund outgo would be $893,353,209, and the accumulated deficit would be $25,221,329, recommended to be met by increased revenues.

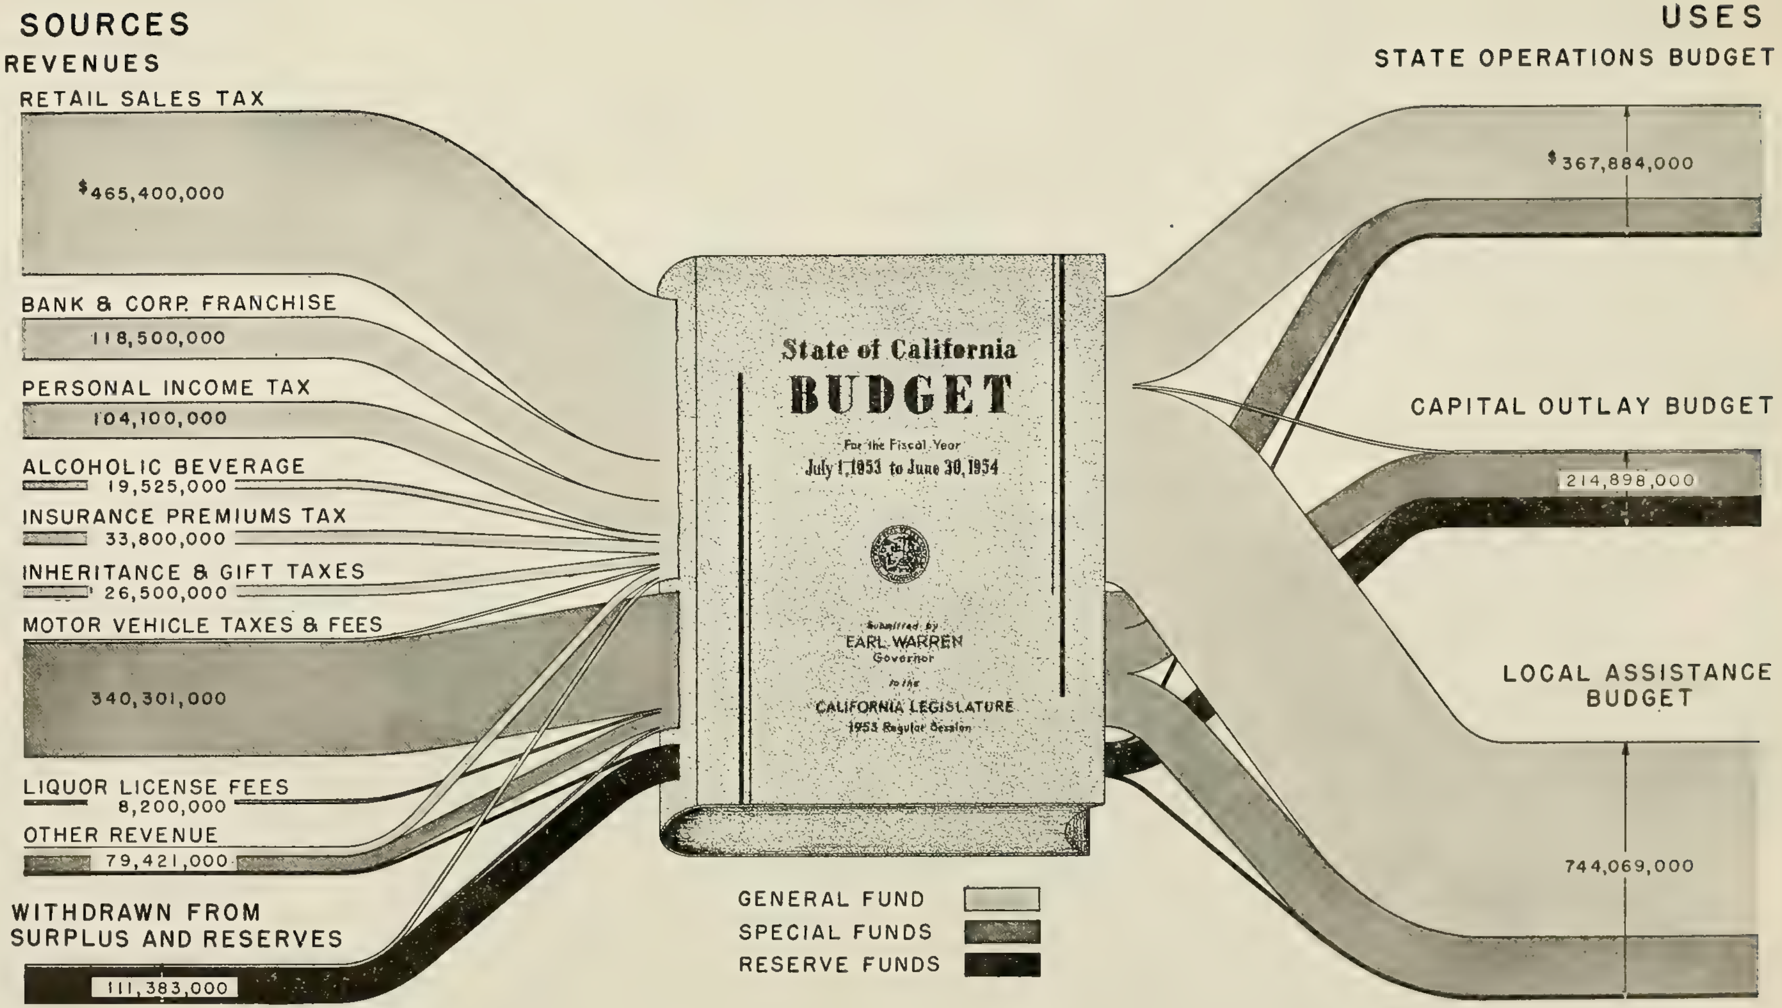
Schedule 1-A

RECONCILIATION OF GENERAL FUND ACCUMULATED SURPLUS AS OF JUNE 30, 1953 AS ESTIMATED IN THE 1952-53 BUDGET WITH THE AMOUNT ESTIMATED IN THE 1953-54 BUDGET

ACCUMULATED SURPLUS, JUNE 30, 1953, as estimated in the 1952-53 Budget		$69,854,841
Effect of Legislative Action on the Budget Bill and Special Appropriation Measures Enacted:		
Provided funds for acquisition of the Central Valley Project	—$10,000,000	
Increased amount available for salary increases	—1,633,735	
Additional amount made available for school apportionments	—11,000,000	
Provided for transfer to School Bond Retirement Fund the amount to be loaned to the Veterans Farm and Home Building Fund	—50,000,000	
Decreased amount of transfer to the Capital Outlay and Savings Fund	+7,834,456	
Other net changes	+77,226	—64,722,053
ACCUMULATED SURPLUS, as reported on April 18, 1952		$5,132,788
Effect of Revised Estimate of Revenues and Special Appropriation Measures Enacted at the 1952 2nd Extraordinary Session:		
Increase in estimated revenues for 1951-52:		
1952 Budget estimate	$712,382,021	
Revised estimate	732,298,541	+19,916,520
Special Appropriations:		
Savings in Social Welfare Aid payments		+4,531,200
State operations		—107,711
Earthquake damage repair		—3,000,000
School building construction		—20,000,000
ACCUMULATED SURPLUS, after action at the 1952 2nd Extraordinary Session		$6,472,797
Effect of Revised Estimates of Revenues and Expenditures as Presented in the 1953-54 Budget:		
Increase in estimated revenues for 1951-52 and 1952-53:		
1951-52 Actual Revenues	$734,025,725	
Previous estimate	732,298,541	+1,727,184
1952-53 Revenues per 1953 Budget	776,304,538	
1952-53 Revenues per 1952 Budget	743,294,513	+33,010,025
Revised expenditures for 1951-52 and 1952-53:		
Savings in State operations for 1951-52		+5,186,881
Savings in State operations for 1952-53		+3,758,232
Savings in Salary Increase fund for 1951-52		+1,891,384
Savings in Salary Increase fund for 1952-53		+1,977,716
Changes in capital outlay program		—187,723
Savings in local assistance for 1951-52		+3,655,906
Savings in local assistance for 1952-53		+7,467,478
Prior year surplus asjustment		+1,269,474
ACCUMULATED SURPLUS, JUNE 30, 1953, as estimated in the 1953-54 Budget		$66,229,354

SOURCES AND USES OF STATE FUNDS

1953-1954 FISCAL YEAR



Budget Revenue Estimates

For the third successive year, it is necessary to emphasize the uncertainties introduced into any revenue forecast by international conflict and political unrest in many parts of the world. Contingencies, ranging from the possibility of peace to the chance of intensified and spreading war, could set in motion forces having a tremendous effect upon the nation's economy, and in turn, upon State revenue receipts. New policies are being formulated to govern this country's foreign affairs and its prosecution of the Korean war. The direction these will take, the degree of success to be achieved, and the counter-moves by communist powers cannot be known at this time. The revenue estimates for the next eighteen months, presented in this budget, rest upon the two basic assumptions: (1) the Korean war will not be materially intensified nor spread to new areas, and (2) the national defense program will not be diminished by an uneasy peace.

State tax collections have clearly reflected the price inflation and business volume generated by the national defense program. With the prospect of a further moderate rise in expenditures for national security and with a continued high level of civilian activity, State revenues are expected to reach a new record total of $1,195,747,023 during the 1953-54 Fiscal Year, an increase of $46,319,983 over the current period and $109,403,287 above actual receipts during the year which closed last June 30th. Of this total, $801,902,526 will accrue to the General Fund, while $393,844,497 will be deposited in the various special funds. Comparative data showing the amounts received from principal sources during 1951-52, together with estimates for the year in progress and the budget period, are shown in the following table:[1]

COMPARISON OF STATE REVENUES
(Thousands of dollars)

General Fund:	*Actual 1951-52*	*Estimated 1952-53*	*Estimated 1953-54*
Sales and Use Taxes	$417,693	$451,800	$465,400
Franchise Tax	120,127	118,300	118,500
Personal Income Tax	90,914	100,100	104,100
Insurance Tax	25,732	29,770	33,800
Inheritance and Gift Taxes	29,165	24,500	26,500
Alcoholic Beverage Taxes	18,160	19,240	19,525
Other Revenues	32,236	32,595	34,078
Total, General Fund	$734,026	$776,305	$801,903
Special Funds and Reserves:			
Motor Vehicle Fuel Taxes	$162,076	$173,045	$182,550
Motor Vehicle Fees	136,382	144,795	155,164
Other Revenues	53,859	55,282	56,131
Total, Special Funds	$352,318	$373,123	$393,844
Grand Totals, Revenue	$1,086,344	$1,149,427	$1,195,747

Current Year Receipts

The revenue forecasts presented a year ago were predicated upon a controlled national economy, with major emphasis on defense production and a moderate scarcity of civilian durable goods. Developments within the last year have changed these conditions materially and have altered the present revenue outlook. A stretch-out of the national security program has allowed a larger volume of production for civilian needs than seemed probable a year ago. As a result, allocations of raw materials have been liberalized and most controls over production and prices have been discarded. With the exception of new car purchases, consumer expenditures for durable goods in California during 1952 exceeded the record volume registered during the previous year. Aggregate personal income increased more rapidly than anticipated, particularly wage and salary receipts. Profits during 1951 were somewhat larger than indicated in preliminary reports obtained from corporations operating in this State, but corporate earnings in 1952 appear to have been at the level forecast a year ago.

Each of these developments has contributed to the yield from principal taxes. Although the revised estimates of receipts from several levies fall below the projections made in the 1952-53 Budget, total revenues during the current year are now estimated at $1,149,427,040, an increase of $46,956,957, or 4.3 percent, over the amount shown in the previous budget. General Fund collections, which are especially sensitive to changes in income and spending, will reach $776,304,538, a gain of 4.4 percent over the original estimate, while special fund receipts of $373,122,502 will exceed the original estimate by 3.9 percent. A comparison of the original and revised estimates is given below:

ESTIMATED REVENUE, 1952-53
(Millions of dollars)

Source	*Original*	*Revised*	*Change*	*Percent change*
Sales and Use Taxes	$427.1	$451.8	$24.7	5.8
Franchise Tax	118.5	118.3	—0.2	—0.2
Personal Income Tax	91.5	100.1	8.6	9.4
Insurance Tax	30.3	29.8	—0.5	—1.8
Inheritance and Gift Taxes	26.6	24.5	—2.1	—7.9
Alcoholic Beverage Taxes	27.9	27.8	—0.1	—0.2
Motor Vehicle Fuel Taxes	168.0	173.0	5.0	3.0
Other Motor Vehicle Levies	142.7	147.5	4.8	3.3
Other Revenues	69.9	76.7	6.8	9.7
Totals	$1,102.5	$1,149.4	$47.0	4.3

THE 1953 OUTLOOK

Several of the most important factors contributing to the high level of economic activity in the United States during the past year will continue to exercise a vital influence in 1953. Chief among these is the increasing volume of defense expenditures. Investment in commercial and industrial facilities will be large, although possibly under the total for 1952, while residential construction will be well sustained. With greater income, demand for consumer goods will increase. Some concern has been expressed regarding business trends in the latter part of the year, but recently there has been a tendency among business commentators to move the critical period into 1954. The revenue estimates here presented assume a leveling off in business activity in the early months of that year.

Although temporary and artificial in nature, the national defense program is scheduled to be at or near the maximum effort now contemplated and will provide the basic support for large scale economic operations. According to the Office of Defense Mobilization, appropriations for military procurement and construction have totalled $129 billion since Korea. Items worth $41 billion have been delivered or constructed, $58 billion are in process or on order, and contracts covering the $30 billion balance will be let before July, 1953.[2] Allowing for some further stretchout of the program, expenditures for national security in 1953 have been estimated at $56.5 billion. While estimates range from $50 to $62 billion, this figure represents a concensus of opinion. Economies are likely to be effected in certain other Federal costs, but these may be offset by an increase in parity payments, with only a minor net change in the total of nondefense expenditures. Outlays by State and local governments are expected to increase as these agencies continue to bite into the backlog of need for highways, schools, and other facilities. In the aggregate, governmental expenditures for goods and services during 1953 are estimated at $86.0 billion, a gain of $8 billion over the total for the previous year, with most of the change centered in defense payments. Of the several factors affecting the short-term outlook, this increase seems to be the most certain and measurable.

---

[1] Amounts in the following tables may not add to the totals shown, due to rounding.

In contrast with this relative degree of certainty, the outlook for private investment in industrial plants, commercial establishments, equipment, inventories, and residential property during 1953 is somewhat uncertain. A decline in total expenditures for these purposes was registered last year, as inventory accumulation dropped sharply from the peak reached in 1951. However, industrial expansion was continued at the high rate which has characterized most of the postwar years and residential building, although substantially below the record established in 1950, exceeded expectations by a wide margin.

Recent surveys of the building outlook for 1953 indicate an increase in the volume of private construction.[3] While these reports are encouraging and there are several indications that operations will be large, some restraint must be exercised in appraising the probable building situation during the new year. Industrial expansion has been maintained at a very high volume for several years, with an increase of nearly 50 per cent in the nation's factory capacity since World War II.[4] This is substantially above both the rate of population growth and the rate of expansion normally used in projecting productive capacity. A reduction in expenditures for defense plants is anticipated during the year[5] and, although the volume of commercial building may increase, there is room for considerable doubt that gains in the light construction field will completely offset the decline in heavy building. For purposes of the budget revenue estimates, it has been assumed that private investment in physical plant and other facilities will decline approximately 10 percent for the nation as a whole. However, the exigencies of continued population growth should result in a smaller decrease so far as building operations in California are concerned.

Consumer Expenditures

A number of important elements in the current outlook combine to indicate an increase in personal consumption expenditures during 1953. Employment is likely to be sustained at, or above, the 1952 level by the larger output of defense materials. There has been a resurgence of demand for clothing and textile products. Motor vehicle production will be increased as controls are relaxed in the coming months. Dollar volume of spendable income will be greater as a result of wage increases for workers in several important segments of the economy. Elimination of credit controls should contribute moderately to the volume of business transactions. Although consumer credit is currently high in terms of aggregate dollars, it is not out of line in relation to total personal income. Finally, ample raw materials and a large productive capacity indicate that demand rather than supply will be the determining factor in the 1953 markets. Therefore, greater attention will be focused upon design, styling, improvement of products, and more aggressive selling methods.

Personal consumption expenditures in the nation during the year are estimated to total $223.5 billion—an increase of $7.5 billion over 1952 and approximately equal to the gain registered between 1951 and 1952. This increase will be divided almost evenly among the three major classifications: nondurables, services, and durable goods, with the prospect of larger unit sales of automobiles particularly important in the last class.

Except for the expected termination of the excess profits tax on June 30, no changes are anticipated in Federal tax levies during 1953. It is assumed that the large volume of defense expenditures will prevent an adjustment in other levies before the expiration of the present temporary rates on December 31, 1953, and March 31, 1954.

Fiscal transactions of the Federal Government may result in a moderate cash deficit, but this is not likely to be an influential factor in the price situation. Adequate productive capacity and increased efficiency resulting from the large outlays for plant modernization in recent years are expected to dampen any inflationary trend. Food indexes, both wholesale and retail, are expected to decline slightly, but indications point to relative stability in other prices. No change is anticipated in the wholesale price index, while the consumers' price index should show a fractional rise, due chiefly to upward adjustments in rents and the cost of utility services.

Under these conditions, the gross value of goods and services produced by the nation's economy is expected to reach $355 billion—an increase of $10 billion over the previous year, or approximately two-thirds of the advance scored in 1952. Personal income is estimated at $274 billion, compared to $268 billion in 1952, with a major part of the change attributable to larger salary and wage payments. Corporate profits and proprietors' income are expected to remain substantially the same as in 1952 under the impact of a more competitive market. Dividend payments should increase somewhat as the tax on excess profits is eliminated and a larger share of earnings is distributed to stockholders. Interest and rental income may increase, but the changes are not likely to be significant in the income total.

It is believed that economic activity in California will be better than in the nation and the proportionate gains scored in recent years will be extended. In 1947, the people of this State accounted for 8.66 percent of the income payments in the country as a whole. By 1951, this ratio had advanced to 8.77 percent, and preliminary estimates for 1952 indicate a further gain—at least 9.14 percent of the total. Projections for 1953 show a total income volume of $24.4 billion for California residents, representing another advance in the relative position of this State in the national economy.

Population Growth

Population growth during the budget period is expected to follow the general trend of recent years. From a census total of 10,586,223 on April 1, 1950, the number of California residents increased to an estimated 11,500,000 on July 1, 1952. Projections to the corresponding dates in 1953 and 1954 show totals of 11,870,000 and 12,190,000, respectively. Incomplete reports on births and deaths during 1952 indicate that last year may have set a new record for natural increase. If the previous high of 156,000 established in 1951 is not exceeded, the margin of difference will be narrow. Available indicators point to a continued net in-migration of new residents from other areas.

Economic Data

The forecasts of production, income, expenditures, prices, and population in 1953, necessary to form a consistent background for the budget revenue estimates, are summarized in the accompanying table. Values have been estimated on the basis of a careful appraisal of trends and with the advice of national economists and economic analysts familiar with California conditions. As indicated at the outset of this statement, they rest upon the two fundamental assumptions that this nation will not become involved in an intense war and that the defense program will be prosecuted at the degree now scheduled.

GENERAL FUND REVENUE

The direct relationship between business activity and General Fund revenue receipts has been emphasized on many occasions in the past. The three major levies, accounting for 86 percent of the total, are directly geared to individual income, volume of spending, and corporate earnings. A change in retail trade is reflected in sales tax receipts within four months. Improvement or reduction in corporate profits affects tax collections three months after the close of corporate accounts, while fluctuations in personal income during a calendar year influence State revenues within the first few months of the succeeding year. Such subordinate taxes as those on alcoholic beverages, insurance, and inheritances are indirectly related to economic conditions and income, with receipts from these sources fluctuating through a narrower range but following the underlying trends. The precarious balance between revenue and business transactions was amply demonstrated in the minor recession of 1949, when taxable sales and income declined and a $22,000,000 drop in General Fund revenue was avoided only by the automatic termination of the temporary tax reductions enacted during World War II.

ECONOMIC DATA
(Dollar amounts in billions)

	1951 Actual	*1952 Preliminary*	*1953 Estimated*
Gross National Product	$329.2	$345.0	$355.0

California Population July 1 (thousands)	11,100.0	11,500.0	11,870.0

* Spendable resources include allowances for change in short-term consumer credit and change in liquid asset holdings of individuals, such as money, bank accounts, and savings bonds. Amounts are estimated by the State Department of Finance.

Source: Data for 1951 compiled by Federal and State agencies; 1952 partially estimated on the basis of official data; 1953 estimated by State Department of Finance, Division of Budgets and Accounts.

Under the economic pattern forecast for 1953, General Fund revenues to be received in the 1953-54 Fiscal Year are estimated at $801,902,526. This represents an increase of $25,597,988 over the indicated total for the current year and $67,876,801 more than actual receipts during the period which closed June 30, 1952. Although increased yields are anticipated from most sources, a great part of the gain can be traced to the sales tax. Larger personal incomes will generate an increase in receipts from personal income tax, while relative stability in corporate profits will hold the bank and corporation franchise tax close to current levels.

Sales Tax—$465,400,000

Sales and use tax collections during 1953-54 are estimated at $465,300,000, and permit fees at $100,000. The total of these two amounts compares with $451,800,000 expected during the current year and $417,692,523 received during 1951-52. This forecast allows for an increase in the volume of expenditures by individuals under the impact of larger personal incomes and population growth, but a slight decline in sales of building materials and industrial equipment, particularly in the last quarter of 1953 and early months of the following year.

The California tax applies to retail sales of tangible personal property and sales by wholesalers, manufacturers, and similar vendors where the property will be used or consumed by the purchaser. Industrial and commercial machinery and equipment, and the supplies used in production are taxable to the agency which purchases and consumes them. Sales for resale, including raw materials to be processed, are exempt. Approximately half of the tax is generated by transactions involving nondurable goods which have a limited useful life and are frequently replaced. To this extent the tax base should be reasonably stable. Half of the tax comes from sales of durable goods used by consumers and industry, usually involving the expenditure of relatively large sums of money per unit purchased, hence generating a substantial amount of tax at the time of purchase. Since these items have a longer useful life, replacement is not as frequent and is postponable. This half of the tax base may be highly unstable and subject to wide fluctuations during the business cycle. This characteristic of the sales tax must be kept in mind in estimating its yield, in appraising the validity of an estimate, and in financial planning for the future.

Two methods have been employed to estimate taxable sales of tangible personal property during the period covered by this budget.[6] One is based upon the average relationship between taxable sales and the estimated spendable income of civilians in California during the 17 years 1935 through 1951.[7] Based on this relationship, estimated civilian spendable resources of $19.8 billion during 1953 should result in taxable sales of $14.9 billion.

The second method of estimation, on which principal reliance is placed, involves an analysis of sales in the 44 trade and industrial classifications reported by the State Board of Equalization. Under this method, taxable sales in 1953 are estimated to reach $14,974,000,000, only slightly more than the total obtained on the basis of probable civilian spending.

Most of the increase in revenue from this source during 1953 is expected to result from greater sales of new motor vehicles, which have been depressed during the last two years by restricted production. Car, truck, and trailer sales in California reached a postwar peak in 1950, with the distribution of 633,000 vehicles. The volume dropped to 510,000 units in 1951 and is estimated at 462,000 in 1952. Unit volume in 1953 is forecast at 567,000 with most of the improvement centered in passenger cars. Average vehicle prices have increased about 15 percent in the last two years and are expected to rise about 2.5 percent more in 1953, largely as the result of the trend toward the purchase of cars carrying optional equipment at an additional cost. Sales value of new vehicles in the year is estimated at $1,416,600,000, against an indicated $1,123,100,000 in 1952 and a previous high of $1,316,000,000 in 1950. Taxable sales of motor vehicle equipment, parts, and supplies are expected to continue the gradual rise shown throughout the postwar years, paralleling the growth in vehicle registrations. Total taxable sales of motor vehicles, parts, and supplies are estimated at $3,222,600,000 for the new year, compared with $2,825,700,000 in 1952 and $2,648,700,000 during 1951.

As indicated earlier, the level of building operations is one of the most uncertain aspects in the 1953 outlook. Heavy industrial construction is likely to drop as this preliminary phase of the defense build-up draws to completion. There are indications that residential construction may be nearing the end of its large volume operations which have provided approximately 500,000 new dwelling units since the census of 1950—an increase of 15 percent—compared with a 10 percent growth in population. In view of this possible weakness in the residential building outlook, this type of construction has been estimated to decline 10 percent in 1953. Commercial and other private nonresidential building, restricted during most of the last two years, should be larger. Public construction is virtually certain to be greater. Taxable sales of building materials are estimated to be 2 percent less than in 1952.

Sales of producers' goods—the machinery, equipment, and other facilities of factories and processing plants—are expected to decline approximately 3.3 percent from the total of 1952. This net change is the product of conflicting trends in the many lines which comprise this group. Where it has been possible to do so, advice has been obtained from leading establishments in the various fields. Some of these anticipate further gains while others suggest a moderate slide from current levels. The principal decrease anticipated is in heavy industrial machinery, and the allowance made at this point is largely a concession to the probable slowing down in the construction and equipment of defense plants. Taxable sales of producers' goods are estimated at $2,404,600,000 for 1953, against an indicated total of $2,487,600,000 in 1952 and actual sales of $2,401,700,000 a year earlier.

Supply of consumers' durables (other than automobiles) has been adequate during the defense build-up despite the earlier threat of shortages in important metals. It is probable no great backlog of demand exists and future sales are likely to be determined by replacement needs and the construction of new homes. Improvement of products and restyling are particularly important in these items, and it is probable that aggressive selling methods will uncover a substantial replacement demand. With the establishment of television stations in new areas and assignment of additional channels to places already served, sales of television sets are likely to increase. Taxable transactions of consumers' durables totaling $1,362,000,000 are forecast, compared to $1,290,700,000 estimated for 1952 and $1,177,300,000 reported in 1951.

Sales of apparel, meals, household supplies, drug store items, and other nondurable goods during 1953 are estimated at $6,204,400,000, an increase of 5.2 percent over the total indicated in the previous year, and substantially above the $5,485,100,000 recorded in 1951. The estimate is predicated upon per capita consumption trends since 1949 and the increase in State population projected for the ensuing period.

A summary of estimated taxable sales in these broad groups during calendar year 1953, together with corresponding amounts for 1952 and 1951, is provided in the following table:

---

[6] In preparing revenue estimates, calendar year data are used almost exclusively in order to take full advantage of such related material as census reports, income payments, and other economic data. All estimates include assessments of additional tax, interest, and penalties as a result of the audit programs of tax administering agencies. Calendar year estimates are apportioned to fiscal years on the basis of ratios during recent years.

[7] The correlation equation: Taxable sales equal —.895 plus .797 times spendable resources. As used in this formula, spendable resources include civilian income less federal and state income taxes plus or minus the increase or decrease in short-term consumer credit, minus or plus the increase or decrease in liquid assets. Civilian income is used in order to avoid as much as possible of the distortion during the war years.

	Taxable sales (Millions of dollars)			*Percent change 1952 to 1953*
	1951	*Est. 1952 **	*Est. 1953*	
Nondurable goods	$5,485.1	$5,896.6	$6,204.4	5.2
Consumer durables †	1,177.3	1,290.7	1,362.0	5.5
Motor vehicles—new	1,155.6	1,123.1	1,416.6	26.1
Motor vehicles—used, supplies, and parts	1,493.1	1,702.6	1.806.0	6.1
Building materials	1,652.3	1,667.6	1.635.1	—2.0

Unallocated	124.4	142.4	145.0	1.8
Totals	$13,489.5	$14,310.6	$14,973.7	4.6

* Three quarters actual and one quarter estimated.
† Other than motor vehicles and building materials.

Franchise Tax—$118,500,000

Bank and corporation franchise tax collections in 1952 were determined primarily by profits during the calendar year 1951. Therefore, collections in the six months, July through December, were relatively certain when the budget estimates were prepared. Receipts in the first six months of 1953 (last half of the current fiscal year) and the July-December period (first half of fiscal 1954) will reflect taxable earnings during 1952. In an effort to pin down 1952 profits as accurately as possible, preliminary reports were obtained from 323 firms in a carefully selected and weighted sample of the corporations and financial institutions subject to the State tax.

Results of this survey indicate wide variations in profits among the various segments of industry last year, with an over-all decrease of 3.5 percent. Consequently, the base is expected to decline from $2.77 billion reported for purposes of the 1952 tax to $2.67 billion in the 1953 returns—a reduction of approximately $4,000,000 in terms of the 4 percent tax. Although the sample involves comparatively few firms, the corporations reporting account for approximately half of the tax base. A similar study conducted last year made it possible to forecast collections during calendar year 1952 within a margin of 3.3 percent.

Corporate profits during 1953, on which taxes will be paid in the last half of fiscal 1954, are expected to remain fairly stable. A slight drop in manufacturing, trade, and service industries, resulting from more competitive markets, should be more than offset by a continued moderate rise in the earnings of utilities and financial corporations. Because the California levy applies to profits before payment of the Federal tax on corporate incomes, termination of the excess profits tax next June would have no effect upon State receipts.

Revenues from the bank and corporation franchise tax and the supplementary corporation income tax are estimated to total $118,500,000 during the 1953-54 Fiscal Year—only fractionally above the current period. The revised estimate of $118,300,000 this year may be compared with the budget forecast of $118,500,000 made a year ago, and actual receipts of $120,126,645 during 1951-52.

Personal Income Tax—$104,100,000

The income received by Californians in the form of salaries and wages, proprietors' profits, dividends, interest, rent, capital gains, and other miscellaneous sources determines the amount of tax revenue which will be collected from the personal income tax. Consequently, the tax attributed to each of the various sources of income has been related to its counterpart in the income payment series published by the United States Department of Commerce. Using available data and general assumptions outlined earlier, the Department of Finance has prepared estimates of income of California residents for 1952 and 1953.

Estimates of revenue from this tax have been made by using the established relationships and projecting the trends. The following table presents the estimates of income payments upon which the forecast of personal income tax revenue has been based.

	Income payments (millions of dollars)		
	1951	*1952*	*1953*
Salaries and wages	$14,044	$15,711	$16,600
Proprietors' income	3,610	3,818	3,850
Property income	2,292	2,571	2,600
Other income	1,260	1,300	1,350
Totals	$21,306	$23,400	$24,400

Two sources of income which generate tax revenues have no strict counterpart in the income payment series. These are receipts from net capital gain and other miscellaneous income. No satisfactory method has been discovered for estimating the former and a slight reduction has been assumed in income from this source for 1952 and 1953. The second source mentioned above consists of income from fiduciaries and other miscellaneous taxable income which cannot be classified in the broad groups mentioned earlier. Tax receipts from this source have been held at the 1951 level.

Based upon the relationship between the aggregate income of California residents, as estimated in the table above, and State tax derived from these several types of income as shown by tax returns for previous years, revenue from the personal income tax during 1953-54 is estimated at $104,100,000. This may be compared with $100,100,000 indicated for the current fiscal year and $90,914,286 collected in 1951-52.

Insurance Tax—$33,800,000

Collections under the State tax on insurance premiums, including those written by Compensation Insurance Fund, have shown a gradual increase over a period of several years, reflecting growth in business activity, higher values, increases in some premium rates, and population gains. The budget estimate of revenue from this source is based upon reports obtained from a sample of 122 insurance companies accounting for 68 percent of the tax base.

On the basis of this information, gross premiums (less dividends to policyholders) on which the 1953-54 tax will be levied are estimated to reach a total of $1,485,300,000, an increase of 13.2 percent over the previous year. The tax on this volume will be $34,904,000, and approximately $125,000 will be received from ocean marine insurance profits. Other adjustments have been estimated to increase revenues by $210,000. Deductions for local property taxes paid on principal business offices in California are estimated at $1,439,000, leaving net receipts of $33,800,000. Corresponding totals for the current year and for 1951-52 are $29,769,569 and $25,731,960, respectively.

Inheritance and Gift Taxes—$26,500,000

Revenue yield from the inheritance tax depends upon the number and size of bequests and the relationship between beneficiaries and decedents. The variability inherent in this type of levy was demonstrated during 1951-52, when one estate contributed $4,500,000 to the total received from this source. With six months of the current fiscal period complete, collections are averaging less than $2,000,000 monthly and have been estimated at $23,000,000 for the year as a whole. Although settlement of another large estate is pending, the amount of tax cannot be determined at this time, and final payment is likely to be delayed by litigation. Some increase in yield may be expected as settlements reflect the current higher security values. For this reason, the estimate for 1953-54 is placed at $25,000,000.

Gift tax receipts, also subject to wide variations, have averaged $1,526,000 annually in the last three years. Because most of the revenue from this source is received during the months of February through May, there is no reliable indication of the trend in the current fiscal year. The estimate has been carried at $1,500,000 for both the present period and 1953-54.

Alcoholic Beverages—$19,525,000

Revenue returns from the excise taxes on distilled spirits, beer, and wine have followed the growth in numbers of the State's adult population during recent years. Collections in 1952-53 appear to be falling slightly behind the forecasts made a year ago, and the estimates presented in this budget have been revised accordingly.

In terms of the State's 8,000,000 adult population, annual consumption of distilled spirits is estimated at 2.43 gallons per capita, beer 22.1 gallons, dry wine 0.97, sweet wine 1.92, and sparkling varieties 0.04 gallon. Of the $4,000,000 estimated for beer and wine during 1953-54, approximately $3,540,000 will be derived from sales of beer, $305,000 from sweet wine, $75,000 from dry, and $80,000 from sparkling beverages.

Comparative collections for the budget years are shown below:

	Alcoholic beverage taxes		
	Actual 1951-52	*Estimated 1952-53*	*Estimated 1953-54*
Distilled spirits	$14.429,563	$15,270,000	$15,525,000
Beer and wine	3,730,045	3,970,000	4,000,000
Totals	$18,159,608	$19,240,000	$19,525,000

Private Car Tax—$1,225,000

In order to avoid the administrative difficulties involved in local assessment, railroad cars owned by companies other than railroads are taxed by the State. The number of units operated in California during 1951 continued the decline which started three years ago, but assessed value per car rose to a new high. As a result, the total assessment rolls increased to more than $23.5 million, compared with a little less than $22 million in 1950. With an average rate of $4.79 per $100 of assessed value, the tax to be paid in 1952-53 will be $1,127,000, compared with $1,088,988 last fiscal year. Unit values should be somewhat higher next year and the tax rate should not change. Therefore, receipts from this source are estimated at $1,225,000 for the coming fiscal year.

Other General Fund Revenue—$32,853,000

Interest on investments is expected to reach $9,268,488 during 1953-54, an increase of $753,000 over the current year due largely to the fact that the surplus will be liquidated and the interest on these investments will accrue at the time the bondholdings are sold. Charges for care and treatment of patients at State hospitals is estimated at $7,006,394, up $775,000 from the present year. The General Fund share of horse racing revenue is placed at $4,252,714, while $2,587,375 will be transferred from motor vehicle license fee receipts to pay highway debt charges. Student fees at educational institutions will amount to $2,450,546. Other charges shown in detail in Schedule 2 total $7,287,009 for the year in prospect.

SPECIAL FUND REVENUES [8]

Though there are some borderline items, special fund revenues can be classified into three categories: (1) the receipts from broad tax levies which are dedicated to specific purposes; (2) charges made for special governmental services to specific groups or individuals; and (3) certain rentals, royalties, and other revenues earmarked for particular purposes. Motor vehicle taxes and fees which must be used for highways, roads, and streets illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while the third includes royalties devoted to beach and park development and school support. Interest earned on the investment of special fund money usually accrues to the fund invested. One characteristic is common to all—the restriction against diversion of these funds to other uses without a change in the Constitution or the statutes, and in some instances a change in both.

Approximately one-third of all State governmental revenues accrue to special funds and are thus restricted as to use. Principal among these are the levies imposed in connection with the ownership and operation of motor vehicles—the fuel taxes, registration and weight fees, the tax on companies transporting persons and property for hire over State highways, drivers' licenses, fees on the transfer of vehicle ownership, and other minor charges. Together with the license fee levied in lieu of local property taxes on motor vehicles, these revenues are estimated to return $337,713,625 during the 1953-54 Fiscal Year, or 86 percent of the special fund total.

Fees and charges for regulatory services and special assistance to various sections of industry, business, and the professions are the second largest source of income to these accounts. These are followed in fiscal importance by horse racing license fees, which are divided between the General Fund, the Fair and Exposition Fund, and other funds, with most of the revenue deposited in the Fair and Exposition Fund and used for support of agricultural fairs and agricultural education. In addition, it is estimated the State will collect $8,200,000 in liquor license fees which will be returned to local governments. It will receive $3,592,567 in interest on investments for special funds and will obtain $2,800,000 as the State's share of oil and mineral royalties.

Motor Vehicle Registration Fees—$145,116,000

Fee-paid registrations of automobiles, trucks, buses, motorcycles, and trailers numbered approximately

---

[8] Trust funds, such as contributions to the various retirement plans; bond funds, such as receipts from the sale of school building bonds; sinking funds for bond interest and redemption; working revolving funds; utility funds, such as the Veterans Farm and Home Building Fund of 1943; and assessment funds, are not government cost funds and are not included in the general category of special funds. State payments to any of these noncost funds are, of course, regarded as an expenditure and reported as such.

5,556,000 units during 1952. Under the assumption of increased vehicle production and continued migration to this State, registrations are expected to reach 5,864,000 by December 31, 1953, and 6,125,000 on the same date a year later. In addition, there will be more than 70,000 exempt units, making a total of nearly 6,200,000 vehicles on the State's highways by the end of 1954.

Current registration and weight fees were established in 1947, and averages have stabilized within a narrow range. Including penalties, interest, and other charges, registration fees on cars and light trucks averaged $6.38 in 1952, within a fraction of a cent of the corresponding ratios for the two previous years. Truck fees were $34.36—58 cents below the average for 1951. Motorcycle registration fees amounted to $6.50, and trailers averaged $15.88 per registered unit.

Receipts from the vehicle license fee (in lieu tax) have shown a substantial increase during recent years as a growing number of new, higher priced units appear in the registration records. Revenue from this source, amounting to $64,325,176 in 1951-52, is estimated to reach $76,000,000 during 1953-54. With the exception of appropriations to meet highway bond charges and administrative cost, this money is returned to city and county governments for expenditure.

Suit to determine the legality of caravan fees was decided in favor of the State, resulting in the collection of $2,000,000 in impounded revenue from this source during 1951-52. Normal receipts are estimated at $1,000,000 annually for the next two years.

A summary of actual and estimated collections under each of the several vehicle fees during the period covered by this budget is shown below:

Motor Vehicle Fees
(Millions of dollars)

	Actual 1951-52	*Estimated 1952-53*	*Estimated 1953-54*
Registration and weight fees	$55.6	$58.9	$61.6
License (in lieu) fees*	64.3	69.2	76.0
Drivers' license fees	3.2	3.1	3.7
Transfer fees and penalties	2.4	2.6	2.6
Caravan fees	2.0	1.0	1.0
Other revenues	0.2	0.2	0.2
Totals	$127.7	$135.0	$145.1

* Includes approximately $2.6 million each year transferred to the General Fund for highway bond interest and redemption. See Schedule 2 for detailed amounts.

Motor Vehicle Fuel Taxes—$182,550,000

State-levied taxes on motor vehicle fuels will return the sum of $182,550,000 during 1953-54, according to the estimates here presented. Of this amount, $174,000,000 will be derived from the gasoline tax of 4½ cents per gallon, $8,530,000 from the same rate of tax on diesel and similar fuels, and $20,000 from license fees required in the administration of these laws. After several years of decline, average gasoline consumption per vehicle increased during 1951-52 and appears to be rising further in the current fiscal year. A greater volume of tourist traffic and a higher level of employment during the last two years undoubtedly contributed to this reversal of trend. The combined effect of greater consumption and larger registrations has carried gasoline tax receipts from $155,266,952 in 1951-52 to an estimated $165,500,000 this year, and will add to the total again during the coming period. Consumption of diesel fuel per vehicle has moved in the opposite direction, however. The number of diesel powered units has more than doubled since 1948, but consumption per vehicle has declined throughout the postwar period.

Comparative revenues for the three budget years are:

Motor Vehicle Fuel Taxes
(Millions of dollars)

	Actual 1951-52	*Estimated 1952-53*	*Estimated 1953-54*
Gasoline	$155.3	$165.5	$174.0
Diesel fuel	6.8	7.6	8.5
Totals	$162.1	$173.1	$182.5

Motor Transportation Tax—$12,635,000

Analysis of taxable receipts of highway transportation companies shows a very close relationship between the aggregate volume of business done and the disposable income of California residents. With income at $20.2 billion in 1952, and $21.0 billion in 1953, gross receipts of for-hire carriers is estimated at $487 million in the current fiscal year and $497 million in 1953-54. The 3 percent tax will result in a gross assessment of $14,600,000 this year and $14,900,000 in the ensuing fiscal period. Against these amounts, the law allows operators to claim an offset in the amount of one-third of the motor vehicle weight fees paid in connection with taxable operations, estimated at $2,180,000 for 1952-53 and $2,300,000 in 1953-54. Net revenues, including $35,000 permit fees each year, are therefore estimated at $12,635,000 in the coming year, compared with $12,455,000 in 1952-53 and actual payments of $11,311,989 in 1951-52.

Horse Racing Fees—$22,221,314

It is estimated that a total of $393 million will be wagered in the pari-mutuel pools at California horse racing meets during 1953-54, compared with $358 million indicated this year and $358 million in 1951-52. The State's license fee at each race meet is 4 percent of the first $10 million wagered, 5 percent of the next $10 million wagered, and 6 percent of all amounts wagered in excess of $20 million, plus the "breakage" after the amount wagered exceeds $27 million. In addition, the State receives miscellaneous license fees from owners, trainers, jockeys and others and the amounts payable to winning pari-mutuel ticket holders remaining unclaimed 90 days after the close of a race meet. Receipts from these sources are shown in the table below:

Horse Racing Fees
(Thousands of dollars)

	1951-52 Actual	*1952-53 Estimated*	*1953-54 Estimated*
Pari-mutuel pools	$18,565	$18,953	$20,585
Breakage	1,080	1,250	1,200
Miscellaneous license fees	32	32	32
Unclaimed pari-mutuel tickets	365	301	404
Totals	$20,042	$20,536	$22,221

The sums of $3.6 million in 1951-52, $3.9 million in 1952-53 and $4.3 million in 1953-54, included in the above table, accrue to the General Fund. Of these amounts, one million dollars annually is transferred to the Capital Outlay and Savings Fund.

Liquor License Fees—$8,200,000

Liquor license fee receipts are estimated at $8,200,000, compared to $8,550,000 expected in the current fiscal year and actual receipts of $7,827,214 during 1951-52. Variations in the date of issuing licenses, which will pyramid an additional $400,000 into the present year, account for the wide fluctuation in these amounts. Aside from these random changes, license fee revenue has been relatively stable during the last five years, with a persistent though slight drop in on-sale fees. Revenue from this source is returned to cities and counties on the basis of the value of licenses issued in each jurisdiction, without deduction of State administrative costs.

RECENT TAX TRENDS

Basically the State tax structure has not been changed in the last 17 years. With two general exceptions, the tax rates which are estimated to produce more than $1,139,800,000 yielded less than $250,000,000 annually in the five years before World War II. This phenomenal growth without an increase in the burden of taxes in relation to income is further proof of the direct relationship between taxes and the aggregate volume of business activity in the State. The two exceptions are in opposite directions, so far as tax yield is concerned. The State income tax at the present time is lighter than it was prewar: exemptions are $1,000 higher for both individuals and families, and the maximum tax rate is now 6 percent on taxable income in excess of $25,000 compared to 15 percent above $250,000 prior to 1944. In contrast to this relief, motor vehicle taxes were increased substantially in 1947, as part of an effort to solve State and local highway problems. The motor vehicle fuel tax was raised 50 percent (from 3 cents to 4.5 cents per gallon), registration fees were doubled, weight fees were increased almost 100 percent, and a driver's license fee was imposed. These two changes did not offset each other, however. The added motor vehicle revenue exceeded the reduction in personal income tax by a wide margin.

State tax revenue per $100 of income received by the people of California is lower today than during prewar years. Under the estimates presented here, tax receipts from all sources in 1952-53 will amount to $4.68 per one hundred dollars of income received by the people of California last year, and this ratio will drop to $4.67 next fiscal year.[9] This compares with an average of $4.86 in the five prewar years and a high of $5.07 in 1950-51, when two waves of scare buying inflated the ratio substantially above other postwar years.

State tax payments for support of General Fund activities next year will be 7 percent below prewar in relation to income of individuals. Receipts of $3.18 per $100 of individual income are 25 cents under the prewar average. In addition to the personal income tax reduction, this change is the result of a shifting within the tax system. Certain levies formerly used for general support are now dedicated to special activities. For example, the motor vehicle transportation tax was deposited in the General Fund until the law was changed in 1947. This money is now used for highway construction and maintenance. The State formerly received a share of liquor license fees which now goes entirely to cities and counties. There has been a similar shift in motor vehicle license fee receipts. All told, approximately $33,000,000 of current revenue which formerly went to the General Fund is now specifically earmarked for special purposes.

A summary of income payments to individuals in California, State tax collections, per capita taxes, and tax payments per $100 of individual income is shown in the following table.

---

[9] These comparisons are made between taxes received by the State during a fiscal year and income received by California residents in the preceding calendar year. Data on income payments to individuals are available only on a calendar year basis. Since there is a slight lag between the taxable event and receipt of tax revenue by the State, the comparison is believed to be valid.

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

Population data, 1936 through 1939, are based on United States Census Bureau estimates; population, 1940 to date, estimated by the State Department of Finance. (*Provisional Annual Estimates of the Population of California, 1940-1953*, Nov. 1951, and *California's Population, 1948-1954*, July, 1952.)

Income of individuals, 1936 through 1951, from United States Department of Commerce estimates. *Survey of Current Business*, Aug. 1952. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1952 and 1953 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

NOTE: Detail may not add to totals, due to rounding.

[a] Amounts are not comparable, since the sums shown for 1952-53 represent only the unallocated balance of similar provisions made for salary adjustments and price increases approved in connection with the current budget.

* Credits to the General Fund for overhead charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown.

Expenditure Requirements, 1953-54

State expenditures in the fiscal year beginning July 1, 1953, and running through June 30, 1954, are estimated at $1,326,851,805. Of this amount, $863,021,962 represents payments required under existing law and $463,829,843 comprises the controllable costs which are subject to determination by the Governor in preparing his budget recommendations.

The expenditure budget for the coming fiscal year is $82,787,967, or 6.7 percent above the estimated total for 1952-53 and $258,780,295 more than actual payments in 1951-52.

Both for convenience and a better presentation of the amounts involved, expenditures are scheduled in the budget under three headings: State operations, capital outlay, and local assistance. The first of these includes the current cost of operating the agencies of State government—the Legislature, courts, executive offices, administrative departments, and the various boards, commissions, and other units. Expenditures for structures and other permanent improvements, including highway construction, are set forth in the capital outlay section. State payments to local governments for schools, social welfare, public health, and other purposes, as well as apportionments of State-collected revenues for expenditure by cities and counties, are detailed under the local assistance category. A summary of the amounts involved in each of these classes during the three fiscal years covered by this budget is shown below:[1]

(Millions of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
State operations	$294.5	$331.6	$367.9	$36.3	11.0
Capital outlay	181.0	256.4	214.9	—41.5	—16.2
Local assistance	592.6	656.1	744.1	88.0	13.4
Totals	$1,068.1	$1,244.1	$1,326.9	$82.8	6.7

As indicated in these data, $744,069,344 of the State's expenditures during 1953-54 will be directed toward the assistance of local governments, $214,898,124 will be devoted to permanent improvements, and $367,884,337 will be used in day-to-day operation of educational centers, hospitals, correctional facilities, and the many other activities ordinarily considered as State government. The amounts making up the totals in each of these three sections are shown in the accompanying table (Page A-22) and are detailed in Schedule 3.

Although the activities of State government and the purposes for which assistance is granted to local agencies vary widely, expenditures can be classified into seven general groups. The most important of these from the budget viewpoint is education, which will take approximately 39.7 percent of the aggregate outgo in 1953-54. This includes the administrative services of the State Department of Education, maintenance of the State Library, the support of the University, colleges, and special schools, apportionments for public schools, contributions to the teachers' retirement system, free textbooks, child care centers, and capital outlay for educational institutions. The second largest category, accounting for 20.0 percent of the total, involves the expenditures for highways, roads, streets, and services to motorists. Payments for social welfare and public health are third in order of fiscal importance with 13.7 percent of the total. These are followed by expenditures for mental hygiene and corrections (9.7 percent of the total), where capital outlay items are particularly important, and development and conservation of natural resources (5.1 percent). Fiscal management—including tax collection, auditing of disbursements, central purchasing, the custody and maintenance of general facilities, and construction of general purpose facilities—ranks sixth in magnitude with 2.4 percent of the total. All other expenses, including general administration, regulation of business, industry, and the professions, support of the judiciary and the Legislature, and the subventions to local governments for general government, account for 9.4 percent of the expenditure budget. Amounts provided for each of these seven categories in 1953-54, together with the change from the current year totals and the proportion of the total cost attributable to each broad function, are given in the table below:

	Estimated expenditures 1953-54 (millions)	Change from 1952-53 Amount (millions)	Change from 1952-53 Percent	Percent of total
Education	$527.0	$71.9	15.8	39.7
Highways and vehicle regulation	265.3	3.1	1.2	20.0
Social welfare and health	181.7	2.0	1.1	13.7
Mental hygiene and corrections	129.2	5.6	4.5	9.7
Conservation of natural resources	67.3	1.0	1.5	5.1
Fiscal affairs	31.3	—1.2	—3.7	2.4
All other	124.9	0.4	0.3	9.4
Totals	$1,326.9	$82.8	6.7	100.0

STATE OPERATIONS

The program of State operations recommended in this budget for 1953-54 involves expenditures of $367,884,337, an increase of $36,313,505, or 11.0 percent over the total for the current year. This total includes the current operating expense of the three major branches of government—the legislative, judicial, and executive, with the last unit comprehending the nineteen administrative departments, the several boards and commissions, and all independent offices. Debt service on obligations issued to finance the construction of facilities related to State operations is classified as current operating cost.[2] In addition, the total includes funds for a 5 percent increase in the salaries of State employees, as recommended by the State Personnel Board, and a reserve of $2,500,000 to meet emergencies and unforeseen developments which may arise during the course of the next fiscal year. The salary increase fund is provided upon a contingent basis, pending further determination by the Personnel Board that adjustments are necessary to bring State pay-schedules into line with those of private industry and other governmental jurisdictions.

---

[1] In all of the text tables amounts have been rounded to the nearest thousand dollars. In some instances this results in an apparent error in addition or subtraction. In all cases, however, totals are correct to the nearest thousand.

[2] Interest on and redemption of these State obligations, which were issued between 1911 and 1929, will be paid from the Bond Sinking Fund of 1943 and from motor vehicle license fees earmarked for highway bonds. Debt service on the more recent issues authorized to assist distressed school districts in meeting their building problems is classified as local assistance.

California budget procedure has been recognized as one which relates appropriation requirements to the work program.[3] This concept of performance budgeting —the bringing together of allied activities under general headings in terms of the work to be done—is helpful in analyzing the State's expenditure needs and in emphasizing the trends underlying the several hundred separate appropriations which must be made in each annual budget bill.

In preparing the following material, all current expense has been classified into seven functional categories — education, mental hygiene and corrections, highways and vehicle regulation, conservation of resources, social welfare and health, fiscal affairs, and all other. In making these combinations, budget data have been adjusted in four respects: (1) the $14,169,954 proposed for salary adjustments has been distributed among operating agencies by increasing salary and wage expenditures 5 percent; (2) the contribution from the General Fund for employees' retirement, budgeted in a lump sum, has been allocated among departments on the basis of salary and wage payments from the General Fund; (3) debt service has been attributed to the function (e.g., highways, education, conservation, etc.) for which the proceeds of the bond issues were spent; and (4) in some instances expenditures of a single agency have been divided between two or more broad functions, as in the case of the Department of Public Works, where the money spent has been divided between highways, conservation, and all other.

As a result of these combinations and adjustments, amounts shown in the following text tables do not agree with those given in the summary on page A-22 or in Schedule 3. However, it is believed that this procedure not only provides a more convenient basis for summarizing current operating expenditures but also presents a more complete picture of State operations than can be obtained from the organizational basis required for budget administration. It must be noted, however, that the controlling factor in expenditures is the legislative authorization given in the budget bill and other appropriations which may be approved. Allocation of the salary increase fund to the various agencies for purpose of this presentation does not augment the separate appropriations. This can only be done after legislative approval of the lump sum budgeted for this purpose. It must be emphasized, too, that the total of $367,884,337 for State operations detailed in the following tables is identical with the amount shown in the budget summary schedules.

Education—$91,751,000

Educational activities include support of the University, State colleges and technical colleges, special schools, administrative offices of the Department of Education, and the State Library. As a group, these comprise the largest item of expenditures in the State operations budget. With $91,750,537 provided for this purpose in 1953-54, expenditures will increase $12,735,409, or 16.1 percent over 1952-53, due primarily to the growth of newly established institutions, curricula development, and expanded enrollments at established State colleges.

Two-thirds of this educational cost involves State support of the University, and over one-half of the 1953-54 increase is represented here. Proposed expenditures from the General Fund for the University in the coming year total $59,482,698, or $7,772,412 above the estimated expenditures for 1952-53. Although enrollment is expected to increase only slightly, greater emphasis will be placed upon a number of activities conducted on the eight campuses of this institution. These include the new colleges of letters and science at Davis and Riverside, the expanded program of medical education at San Francisco and Los Angeles, and additional research on problems of agriculture. Approximately half of the increase in the appropriation recommended for next year may be traced to these and similar items. The remainder is attributable to salary adjustments and a strengthening of such established projects as the agricultural extension service, programs of organized research, improvements in library services, and instruction.

Support of State colleges and technical colleges in the amount of $23,709,969 is proposed for 1953-54, an increase of $3,702,684 over the current year. Expanding enrollments, already being felt in the current year, will bring an estimated record number of 29,113 students at these schools.[4] This upswing of 2,362 students, reflecting both the heavier attendance at the older colleges and the proposal to offer lower division work at the new centers in Long Beach and Sacramento, accounts for a major part of the larger appropriations recommended for 1953-54. Other factors contributing to the gain are the operation of facilities to house additional students, the added costs of operating new campuses at four of the colleges, and a $954,217 increase in State support for all colleges due to a decline in veteran tuition payments by the Veterans Administration.

Completion of the first unit of the School for the Deaf at Riverside, permitting residential training for 225 children, accounts for the principal change in expenditures for special schools. A minor increase is also occasioned by continued expansion of the new intensive treatment center for the blind in Oakland. No change in the level of activity is anticipated for the three blind workshops, but rather severe shifts to commercial products must be made to offset declining Federal orders.

Some additional assistance will be needed by administrative bureaus of the Department of Education in fulfilling their advisory and regulatory responsibilities to school districts. Increased State support of vocational rehabilitation is also proposed as a means of directing this program to the better economic advantage of the State.

A summary of all current expense for education is given in the following table:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
Department of Education	$3,744	$4,463	$5,031	$568	12.7
State colleges and technical colleges	16,924	20,007	23,710	3,703	18.5
Special schools and blind centers	2,217	2,661	3,345	684	25.7
University	45,818	51,710	59,483	7,773	15.0
Other	149	174	181	7	4.0
Totals	$68,853	$79,015	$91,751	$12,736	16.1

---

[3] The Hoover Commission *Task Force Report on Fiscal, Budgeting, and Accounting Activities*, page 75, notes " . . . Some of the States have also developed programming in connection with their budgeting. A good example is the California State budget, where the program idea is definitely carried into the appropriations."

[4] Total enrollment of full-time and part-time students is adjusted to a full-time basis for each institution in analyzing budget needs.

Mental Hygiene and Corrections—$85,622,000

One of the most important goals in the State's postwar building program has been the provision of adequate facilities at State hospitals and correctional centers. The coming fiscal year will show several important steps toward realization of this goal, with the opening of two new mental hospitals, additional units at the older institutions, a new prison, and larger facilities at the correctional schools. Completion of these projects will make it possible to relieve overcrowding, increasing the opportunity for proper treatment and lessening the dangers which always accompany the confinement of a large number of wards in limited areas. It will permit a more complete segregation of prisoners at penal institutions, allowing the assignment of inmates to facilities designed and operated to achieve a maximum rate of rehabilitation and release. It will provide the Youth Authority with a physical plant more nearly in keeping with its responsibilities for the care and correction of young offenders.

During recent years, California's program for mental hygiene and corrections has been increasingly focused upon the economies to be achieved by the return of patients and inmates to a place in society. In the mental hygiene budget for 1953-54 this objective finds further expression in the recommendations for continued research in the treatment of mental disorders, alcoholism, and sex crime, in outpatient and pre-admission clinics, in the community education program, and in the increased emphasis upon the assignment of patients to family care outside the hospitals wherever possible. Following the recommendations which resulted from a study of feeding practices and procedures, provision is made for an improvement in food rations and an increase in the kitchen staff at mental hospitals.

The budget for corrections reflects these basic economies in the additional attention given to parole problems—one objective of which is the earlier release of eligible prisoners, the proposal to expand the inmate pay programs, the intensified in-service training of prison employees, and the modest expansion in culinary, medical, and camp personnel. The same objective underlies the recommendations for better classification and supervision at the correctional schools and youth camps. While these improvements require increased expenditures at the moment, experience has repeatedly demonstrated the fundamental economy of rehabilitation as compared to the constant financial drain involved in mere confinement and custody.

Expenditures for maintenance and operation of mental institutions during 1953-54 total $60,674,005 under the recommendations presented in this budget, an increase of $8,443,588 over the amount required in the current year. Approximately $1,150,000 of this latter amount can be attributed to the opening of a new home for the mentally defective at Porterville, providing relief from the overcrowding at other homes and allowing the State to discharge its responsibility to 1,500 defectives who cannot be accepted in these institutions at present.

An increase of $3,921,154 in expenditures for corrections will carry the total for this purpose to $24,948,429 during 1953-54. Of this amount, $18,544,045 will be required for adult corrections, and $6,404,384 for the maintenance of facilities operated by the Youth Authority.

A summary of recommended appropriations for these activities, estimated requirements during the current year, and actual expenditures during 1951-52 is given below:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
Mental hygiene	$45,585	$52,230	$60,674	$8,444	16.2
Corrections:					
Adult facilities	14,188	15,660	18,544	2,884	18.4
Youth Authority	4,862	5,367	6,404	1,037	19.3
Totals	$64,635	$73,258	$85,622	$12,364	16.9

Highways, Traffic Law Enforcement and Regulation of Motor Vehicles—$66,556,000

For services to motorists during the 1953-54 Fiscal Year, the State government will spend $66,556,025. This amount includes the planning, administering, and maintaining of State highways, enforcement of traffic laws and the registration of motor vehicles, licensing of motor vehicle operators, and administration of the financial responsibility law. It does not include the cost of highway construction for which a substantially larger sum is scheduled.

While expenditures in this broad field concern every motorist, one proposal in particular is of vital interest. As an immediate attack upon the toll of highway deaths and accidents, the budget proposes the addition of 180 uniformed positions to strengthen the Highway Patrol. This represents an increase of 12 percent over the present roll, and is equivalent to one additional officer for each 75 miles of State highway. The cost of this improvement will be approximately $1,074,000. With this additional strength there will be one uniformed officer for each 3,875 vehicles registered in the State, contrasted with a ratio of one officer for each 3,521 vehicles in 1948.

The increases in the budget of the Department of Motor Vehicles result primarily from increases in workload, intensification of the driver education program, and provision for additional field services. The increase in current expense for State highways is attributable primarily to the cost of maintenance necessary in conjunction with the construction of new and modern highways and the preservation of the existing highway system.

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
Traffic law enforcement	$11,891	$13,584	$15,476	$1,892	13.9
Regulation of motor vehicles	11,880	13,466	16,260	2,794	20.7
State highways	34,788	33,709	34,820	1,111	3.3
Totals	$58,559	$60,758	$66,556	$5,798	9.5

Conservation and Development of Natural Resources—$45,157,000

Under this classification are included the several agencies of State Government whose activities are directed toward improved utilization and conservation of the State's natural resources. The group includes the Departments of Agriculture and Fish and Game, the Division of Water Resources, and related sections in the Department of Public Works, the Reclamation Board, and the Division of Fairs and Expositions in the Department of Finance. The combined expenditures of these agencies on the various phases of resource conservation and development will be $45,156,878. Of these agencies, the largest and most diversified is the Department of Natural Resources, which is charged with the operation of State beaches and parks, the protection of forest and watershed areas, the supervision of mining and oil field activities, and with assistance in the formation of soil conservation districts. During 1953-54 more than $17,045,883 will be spent on this work. The principal changes include an augmentation of fire crew strength to provide for better supervision and full seven-day staffing in key positions, a rounding out of the equipment complement, and the reactivation of the Whitmore work camp by the Division of Forestry. In the Division of Beaches and Parks, the recommended program provides for improvement in the planning for park and beach development, the operation of newly developed recreational areas, and additional personnel at several of the State beaches and parks. Principal changes in the program of the Department of Fish and Game include conversion to a decentralized regional organization, and internal adjustments incidental to the status of this agency as an independent department of State Government. With the exception of the Hall scale eradication program to be initiated by the Department of Agriculture, and additional emphasis upon water problems, the budget recommendations for support of other conservation agencies are geared primarily to workload requirements. It is of interest that the preliminary work on the Feather River project initiated this year is continued into 1953-54 at an estimated cost of $750,000.

The following data summarize the current expense for conservation and development of natural resources:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
Agriculture	$9,654	$10,446	$10,967	$521	5.0
Fish and Game	5,858	7,094	7,313	219	3.1
Beaches and parks	2,454	2,788	3,043	255	9.1
Forestry	10,408	11,823	12,659	836	7.1
Mining, gas and oil	839	914	985	71	7.8
Water resources	3,296	4,014	4,310	296	7.4
Fairs and expositions	5,097	5,542	5,521	—21	—0.4
Other	267	307	358	51	16.6
Totals	$37,871	$42,928	$45,157	$2,229	5.2

Fiscal Affairs—$29,216,000

Expenditures for administration of the State's tax laws, financial management, and fiscal control during 1953-54 are budgeted at $29,216,487, an increase of $2,165,981 over the comparable total for the current year. About half of this change is accounted for in the proposed 5 percent adjustment in salary scales, and the remainder represents a realignment of operations to meet expanding work load.

As here classified, fiscal affairs include the tax collection activities of the State Board of Equalization, the Franchise Tax Board, and the Controller's Office, the management and control operations of the Finance Department, the Controller's duties with respect to the verifying and reporting of receipts and disbursements, and the responsibilities of the State Treasurer in the custody and investment of funds.[5] Completion of additional office buildings during the current year and in 1953-54 will increase substantially the custodial duties of the Department of Finance. An unexpectedly large volume of personal income tax returns in 1952, with a further increase anticipated in 1953-54, necessitates a revision of the review and audit activities of the Franchise Tax Board, with an increase of $594,273 in the expenditure requests for that agency.

A summary of the totals provided for each of the agencies in this field is given in the following table:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
Control and management:					
Board of Control	$19	$23	$24	$1	4.3
Controller [a]	1,455	1,736	1,806	70	4.0
Dept. of Finance [b]	5,237	6,424	7,057	633	9.8
Treasurer	211	230	234	4	1.7
Subtotals	$6,921	$8,414	$9,122	$708	8.4
Tax collection:					
Board of Equalization	12,986	14,089	14,883	794	5.6
Controller [c]	727	790	859	69	8.7
Franchise Tax Board	3,217	3,758	4,352	594	15.8
Subtotals	$16,930	$18,637	$20,095	$1,458	7.8
Totals, fiscal affairs [d]	$23,852	$27,051	$29,216	$2,165	8.0

[a] Excluding tax collection divisions of the Controller's Office.

[b] Excluding Division of Fairs and Expositions and Division of State Lands (see Conservation of Natural Resources).

[c] Tax collection divisions only.

[d] After credits to the General Fund for overhead services charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown.

Welfare and Public Health—$20,353,000

The activities classified under the heading of welfare and health include State administration of the public assistance programs, regulation of health matters, assistance to war veterans, and safeguarding the welfare of workers in the industrial, commercial, and service establishments throughout the State. In the first two of these functions the State's role is largely that of supervising and coordinating the work of local agencies, though a considerable volume of research and investigation of health matters is conducted by the State in addition to its responsibility for local health activities. In the latter two fields—veterans' assistance and industrial welfare—the programs are almost entirely State-administered and State-operated.

In total, current expenses for health and welfare in the 1953-54 budget amount to $20,352,611.[6] Expenditure programs presented are geared directly to the immediate needs in each field. The Department of Public Health is intensifying its program of maternal and child care, particularly in the control and prevention of diarrheal diseases, infant mortality, and premature births. Funds are provided to investigate problems relating to the disposal of radio-active materials, with particular emphasis upon development of an over-all State policy in this new field. In comparing the 1953-54 budget with total costs in 1952-53, the effect of these developments is obscured by the abnormally high expenditures related to the encephalitis epidemic in 1952. Funds for encephalitis control resume normal proportions in the budget for the coming year.

A major reorganization proposed for the Department of Social Welfare in 1953-54, adding to the current operating expense of this agency, will provide better administrative control over the large subvention expenditures with an accompanying saving in aid payments. The $223,684 increase shown in the recommended expenditure of this department is traceable to the proposed reorganization and general salary adjustment and to a moderate increase in work load.

---

[5] Collection activities of other agencies are, for the most part, incidental to their regulatory duties and are not included in fiscal affairs for that reason. The most important of these are the Department of Motor Vehicles, which collects motor vehicle registration and weight fees, vehicle license fees and other similar charges, and the Department of Insurance, which receives reports essential to administration of the insurance gross premiums tax.

[6] Excluding $158,677,698 in subventions for these activities, shown under Local Assistance.

Administrative expense in connection with veterans' affairs, relatively stable during recent years, will continue at essentially the same level. The opening of new barracks at the Veterans' Home in 1953 will contribute slightly to the support requirement for this center.

Expenditures recommended for the Department of Industrial Relations are influenced by the State's expanded labor force and high level of employment. These factors are reflected in a direct work load increase, plus the need to intensify enforcement of safety regulations, the compensation insurance laws, and the statutes governing employment of women.

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
Industrial relations	$4,943	$5,548	$6,255	$707	12.7
Public health	4,725	5,289	5,327	38	0.7
Social welfare	1,961	2,099	2,323	224	10.7
Veterans' affairs	6,301	6,306	6,377	71	1.1
Other	59	67	71	4	6.0
Totals	$17,989	$19,310	$20,353	$1,043	5.4

Other Expense—$29,229,000

This miscellaneous category of current expense comprises most of the general government functions in the State's program, as distinguished from the service and fiscal management activities outlined above. The expenditure total includes support of the Legislature, courts, executive offices, general administrative agencies,[7] regulatory bodies, and the contingency reserve which cannot be allocated to specific uses at this time.

The regulatory agencies, such as the Public Utilities Commission, the six offices which deal with the general subjects of banking and investment,[8] and the 28 boards, bureaus, and commissions regulating the professions and vocations,[9] contribute the principal items of expense in this group. In total, these account for $10,407,831, approximately one-third of the total. Expenditure recommendations of $1,888,287 are made for general administration, including the Personnel Board, the State Employees' Retirement System, the Office of the Secretary of State, and the Commission on Interstate Cooperation.

With the exception of a decline in expenditure requirements for the Legislature, arising chiefly by reason of the shorter legislative session to be held next year, there are no outstanding developments in this field of miscellaneous expense. Amounts budgeted for each of the component groups in 1953-54, together with comparative totals for the current year and for 1951-52, are shown in the following table:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
Legislative	$2,430	$3,726	$2,800	—$926	—24.8
Judicial	1,299	1,390	1,460	70	5.0
Executive and civil defense	1,802	1,794	1,971	177	9.9
General administrative [a]	1,675	2,010	1,888	—122	—6.1
Regulative	8,646	9,507	10,408	901	9.5
Other [b]	6,873	10,216	8,202	—2,014	—19.7
Reserve for contingencies [c]	—	608	2,500	1,892	311.2
Totals	$22,726	$29,252	$29,229	—$23	—0.1

[a] After credits to the General Fund for overhead services charged to agencies supported from special funds. The adjustment is necessary to avoid duplication of the amounts shown.

[b] Including the Departments of Justice, Military Affairs, and Public Works (other than expenditures for highways and water resources), and miscellaneous expenses.

[c] The amount shown for 1952-53 represents the unallocated balance of $2,500,000 emergency and price increase fund provided for the current year. The $2,500,000 given for 1953-54 is the total emergency fund requested for the coming fiscal year.

CAPITAL OUTLAY

Aside from the normal utilization of motor vehicle revenue available for highway construction, the capital outlay expenditures recommended in this budget are focused upon the most urgently needed facilities at State hospitals and homes, prisons, correctional schools, and educational centers. Of the $214,898,124 earmarked for permanent improvements, $114,353,157 will be used for highway construction and activities related to motor vehicle regulation, $42,816,100 for mental and correctional institutions, and $28,252,079 for special schools, State colleges, and the University. Other capital outlay recommendations amount to $29,476,788, including an unallocated fund of nine million dollars to meet price adjustments and other contingencies in the building program.

While the State's building program still contains a large element of catching up with war and postwar deficiencies, emphasis is gradually shifting to the problem of keeping up to date with current population growth. California, with a present population of nearly twelve million people, must look forward to a 1960 total of more than fourteen million. This means a population growth of one-third during this decade. The State's facilities—its hospitals, prisons, schools, and colleges—must keep pace. It is this basic need, priced at a cost level nearly three times that of prewar years, which sets the pattern for the capital outlay recommendations for 1953-54.

A summary of expenditures classified by principal governmental functions is given below:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Change from 1952-53 Pct.
Highways and vehicle regulation	$113,505	$121,652	$114,353	—$7,299	—6.0
Mental hygiene and corrections	31,328	49,665	42,816	—6,849	—13.8
Education	19,660	44,235	28,252	—15,983	—36.1
Conservation of natural resources	8,779	17,756	12,881	—4,875	—27.5
Social welfare and health	2,289	3,279	2,716	—563	—17.2
All other	5,427	19,845	13,879	—5,966	—30.1
Totals	$180,989	$256,432	$214,898	—$41,534	—16.2

Highways, Traffic Law Enforcement and Regulation of Motor Vehicles—$114,353,000

It is not possible to summarize here the multitude of items entering into the capital outlay budget for highways. A complete statement of the program approved by the State Highway Commission is provided in the body of this budget and may be referred to for detailed information on the projects involved. It may be observed, however, that the decline in highway investment indicated for 1953-54 results from the $10,000,000 fund for acquisition of rights-of-way created by Chapter 20 of the Statutes of 1952, Second Extraordinary Session. This fund is budgeted for expenditure in the current year and has no counterpart in the 1953-54 total.

---

[7] General administrative agencies include the State Employees' Retirement System, the Commission on Interstate Cooperation, the Personnel Board, and the Secretary of State's Office.

[8] Divisions of Banking, Building and Loan, Corporations, and Real Estate; the Department of Insurance; and the District Securities Commission. Regulatory expense incurred by other departments incidental to their principal functions are not included in the totals presented here.

[9] See Budget Schedule 3 for a list of these agencies.

Expenditure recommendations for the Highway Patrol and the Department of Motor Vehicles cover acquisition of local office building sites and improvements at the Patrol academy.

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
State highways	$112,779	$121,416	$113,929	—$7,487	—6.2
Highway patrol	162	105	316	211	200.6
Motor vehicle regulation	564	131	108	—23	—17.6
Totals	$113,505	$121,652	$114,353	—$7,299	—6.0

Mental Hygiene and Corrections—$42,816,000

Nearly half of the budget appropriation recommended for capital outlay other than highways will be found in the proposed improvements at mental hospitals and correctional facilities. Of the $42,816,100 total for this group, $25,767,767 has been allocated to meet hospital needs, $12,763,706 for the adult prisons, and $4,284,627 for the centers operated by the Youth Authority.

Major projects of the Department of Mental Hygiene for the care of mental defectives include a new home at Costa Mesa in Southern California, designed to care for 990 patients and estimated to cost more than eleven million dollars, additional facilities at the Porterville mental home to provide 490 beds, a receiving hospital and ward buildings at Sonoma to house 800, and an additional ward capacity of 234 at Pacific Colony. In addition, special urgency legislation will be presented to authorize immediate construction of a hospital annex at Pacific Colony to accommodate 314 patients. A coordinated attack upon the problem of adequate facilities to discharge the State's responsibility for the mentally defective is being made in this phase of the 1953-54 capital outlay program.

In the field of adult corrections, a 580 capacity reception-guidance center and recreation facilities are proposed for the new Medical Center at Vacaville. New commissary and laundry buildings are planned at Folsom and San Quentin and a new main entrance and parking area at Chino.

The Youth Authority program includes site purchase for the 600-boy capacity Youth Training School, construction of auditoriums at Los Guilucos and Paso Robles, building of detention units at Paso Robles and the Fred C. Nelles School, and replacement of old structures at Preston, including two dormitories, administration, commissary, vocational trades buildings, and baking addition.

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
Mental hygiene	$17,383	$30,009	$25,768	—$4,241	—14.1
Corrections:					
Adult facilities	7,661	11,993	12,764	771	6.4
Youth facilities	6,284	7,663	4,285	—3,378	—44.1
Totals	$31,328	$49,665	$42,816	—$6,849	—13.8

Education—$28,252,000

The total of $28,252,079 budgeted for construction at educational centers in 1953-54 includes $11,642,054 for State colleges and schools, $16,601,775 for the University of California, and $8,250 for the Department of Education.

At the State colleges, major emphasis is on construction of classroom and gymnasium facilities for established colleges at San Jose, San Diego, and San Luis Obispo, where enrollment threatens to exceed current capacity. Second units of permanent buildings are also provided at Long Beach State College and the School for the Deaf at Riverside, where presently funded construction programs permit only partial operation of newly-established facilities.

The major units comprised within the $16,601,775 budgeted for the University include an anthropology building and a soils and plant nutrition building at Berkeley, a horticulture building at Davis, a life sciences building at Los Angeles, a residence hall at San Francisco, and a music building at Santa Barbara. Provision is made for the acquisition of more land needed at the Berkeley and Riverside campuses. Additional supplies and equipment are provided for the new medical facilities at Los Angeles and San Francisco, the life sciences building at Los Angeles, the 120 inch telescope at Mt. Hamilton, the new college at Riverside, and the new campus at Santa Barbara.

Expenditure recommendations are classified by principal types of institutions in the following table:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53	
				Amount	Pct.
State colleges	$6,520	$19,602	$8,342	—$11,260	—57.4
Technical colleges	983	4,680	2,275	—2,405	—51.4
Special schools and blind centers	973	1,040	1,024	—15	—1.4
University	11,184	18,666	16,602	—2,064	—11.0
Other	---	247	8	—238	—96.6
Totals	$19,660	$44,235	$28,252	—$15,983	—36.1

Conservation and Development of Natural Resources—$12,881,000

With a constantly growing population, conservation of natural resources becomes increasingly important in the State's development. The budget for 1953-54 provides $12,881,392 for capital outlay improvement of recreational areas, forest protection, reclamation, the promotion of agriculture, and water conservation. This represents a decrease of $4,875,033 from the total for the current year, with most of this change to be found in reduced expenditures for improvements at agricultural fairs and in beach and park development.

Purchases of new beach and park areas are budgeted at $2,057,000, while construction of facilities in connection with this activity is scheduled at $1,155,000. Acquisition of forest lands, construction of fire control stations, and improvement of forestry camps comprise the principal items in a $2,076,000 program of capital outlay to protect forest, range, and brush lands. Fish and game development, including the activities of the Wildlife Conservation Board, will require capital investments of $2,980,600.

Expenditures for capital outlay at agricultural fairs are budgeted at $2,832,291, a decrease of $3,356,754 from the current year's level. This change may be traced largely to the fact that expenditures for improvements at district agricultural fairs are unusually large in the current year and will be at a more normal level in 1953-54. Capital outlay for other agricultural activities, including border inspection stations, the poultry improvement project, reclamation, and water investigations total $1,780,131, or approximately $400,000 less than during the current period. Virtually all of this decline is accounted for in the reduced appropriation for border stations, as the work of rebuilding these structures draws to a close.

Capital outlay expenditures classified by principal functions are given below:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Pct.
Agriculture	$209	$671	$278	—$393	—58.5
Fairs and expositions	1,962	6,189	2,832	—3,357	—54.2
Beaches and parks	1,610	5,644	3,212	—2,432	—43.1
Forestry	737	1,625	2,076	451	27.8
Fish and game	3,660	2,114	2,981	866	41.0
Reclamation	602	1,339	1,270	—69	—5.2
Water resources	---	174	232	58	33.5
Totals	$8,779	$17,756	$12,881	—$4,875	—27.5

Social Welfare and Health—$2,716,000

Projects at the Veterans' Home and the construction of employment offices in various localities throughout the State constitute the permanent improvement program recommended in the welfare area. Provision is made for a 120-bed addition to the hospital at the Veterans' Home, a new residence for the Commandant, and minor items, costing in total $1,689,770. Under the long-term program of local office construction for the Department of Employment, appropriation of $371,332 is recommended for the purchase of sites for future buildings, $16,300 for planning, and $639,000 for new structures.

Capital outlay expenditures for these functions in 1951-52, including public health offices, amounted to $2,289,429, and are estimated at $3,278,902 for the current year.

All Other—$13,879,000

The principal item included in this miscellaneous capital outlay category is the unallocated fund provided to meet price contingencies in the building program as a whole. Experience during recent years has repeatedly demonstrated the necessity for a reserve of this kind, and the amount recommended has been determined after an analysis of the price factors involved.

Capital outlay appropriations for general purposes, including allotments for the reconstruction and renovation of office structures, amount to $2,128,000, a decline of nearly $3,373,000 from the corresponding total for the current year. The new appropriation provides for the acquisition of office building sites in certain of the major cities and for the construction of a textbook warehouse adjoining the new printing plant.

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Proposed 1953-54	Change from 1952-53 Amount	Pct.
General government	$1,633	$5,501	$2,128	—$3,373	—61.3
Military affairs	337	3,260	1,269	—1,991	—61.1
Civil defense	3,442	2,791	532	—2,259	—80.9
Other	15	---	---		---
Unallocated	---	8,294	9,950	1,656	20.0
Totals	$5,427	$19,845	$13,879	—$5,966	—30.1

LOCAL ASSISTANCE

State payments to local units of government during 1953-54 are expected to reach the record total of $744,069,344. This is $88,008,739 above the estimated total for the current year, due chiefly to the increase in State support of public schools, larger apportionments of revenue for roads and streets, and a greater return from the license fee levied in lieu of local property taxes on motor vehicles. Appropriations fixed by provisions of the Constitution or statutes will increase $100,646,765 over the total of such charges in the current year, but items subject to direct control will decrease $12,638,026. The latter change is due entirely to the elimination of the current $20,000,000 non-recurring appropriation for local school buildings. Other controllable expenditures for local assistance will increase approximately $7,000,000.

In terms of the six broad governmental functions outlined above, approximately fifty-five cents of each local assistance dollar goes to education, nineteen cents to social welfare, eleven cents to roads and streets, and fifteen cents to other governmental activities. There are no subventions for mental hygiene, and the amount for corrections is negligible in the over-all total. A summary of payments estimated for 1953-54, the increase in each general category, and the percentage distribution by class are shown in the table below:

	Budgeted expenditures 1953-54 (millions)	Change from 1952-53 Amount (millions)	Per-cent	Percent of total assistance
Education	$407.0	$75.1	22.6	54.7
Social welfare	144.8	1.2	0.8	19.4
Public health	13.8	0.4	2.9	1.9
Roads and streets	84.4	4.6	5.7	11.3
Conservation of resources	9.3	3.6	64.0	1.3
All other	84.7	3.1	3.8	11.4
Totals	$744.1	$88.0	13.4	100.0

Subventions for Education—$406,958,000

Payments for support of public schools and related activities will amount to $406,957,890 during the period covered by this budget—an increase of $75,156,140 over requirements in the current year. Normal, recurring expenditures for this purpose will expand by nearly one hundred million dollars, but this sum will be partially offset by a non-recurring appropriation in the current year of $20,000,000 for the construction of local school buildings. To the extent of this offset, a comparison of expenditures in the two years tends to obscure the basic change in State support for public schools which becomes effective in this budget.

Several factors contribute to this increase. The most important of these is the action of California voters last November in approving by a 2 to 1 majority a constitutional amendment which raised State support for public schools from $120 to $180 per unit of attendance. As prior legislation had already provided an average of approximately $147 per pupil for the current year—substantially more than the constitutional minimum—the actual increase amounts to $33 per pupil, but this change applied to an attendance list of 2,040,000 results in expansion in school apportionment of approximately $67,000,000. A second factor is the rapid growth in school enrollment—7.1 percent over the total for the previous year and more than twice the relative rate of increase in the total population. The wave of births which started in 1934 reached tidal proportions in the postwar years. These children are now entering the school system, carrying enrollments to new record levels each successive year, and this trend will continue for at least another decade. The estimated attendance of 2,040,000 this year, which will be the base for apportionments in 1953-54, compares with the last year's record of 1,904,926 and 1,783,637 in 1950-51. This rapid growth adds approximately $21,000,000 to State support requirements in 1953-54, resulting in a total increase of $87,435,000 over the corresponding amount for schools in the current, 1952-53, Fiscal Year.

The appropriation required to fulfill the State's obligation under the teachers' retirement program is estimated at $22,166,800, an increase of $3,644,800 over the current year. In the last two years, the State's annual appropriation for this purpose has been less than estimated expenditure requirements as a result of unexpended funds carried forward from the previous period. This situation will be reversed in 1953-54, when it will be necessary to include in the appropriation an amount of $530,000 to liquidate a deficit in the current year's allowance. This reversal, coupled with a larger number of retirements anticipated next year under the liberalized benefit program authorized in 1949, accounts for the advance in retirement contributions from the State General Fund during the coming fiscal year.

State expenditures for debt service on school building bonds will increase nearly 50 percent to reach $8,653,000 in 1953-54 as maturity dates fall due on an increasing volume of these obligations, and interest payments are required on the $415,000,000 worth of bonds authorized for issuance since the program started two years ago. The sum estimated for the coming period represents the State's fixed responsibility after deducting repayments of principal and interest by the local districts which have received loans from the State.

Appropriations for free textbooks, $3,366,832, will be fifty percent greater than in the current fiscal year, reflecting both the increasing enrollment trend and a greater number of editions due for revision and replacement.

Subventions for vocational education and child care centers will remain essentially at current levels, marking a continuation of the trends evident in recent years with regard to these items.

A summary of subventions for the educational function follows:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Estimated 1953-54	Change from 1952-53	
				Amount	Pct.
School support	$239,969	$279,747	$367,183	$87,436	31.3
Teachers' retirement	16,390	18,522	22,167	3,645	19.7
School building construction	—97	19,750*	—68	—19,818	--
Child care centers	4,802	5,357	5,357	--	--
Free textbooks	2,603	2,243	3,367	1,124	50.1
Vocational education	357	299	300	1	0.3
Cerebral palsied (Construction)	14	---	-	---	---
Debt service	2,361	5,884	8,653	2,769	47.0
Totals	$266,399	$331,802	$406,958	$75,156	22.6

* Net result of $20,000,000 current appropriation less $250,000 return of unused funds loaned from prior appropriations.

Social Welfare—$144,830,000

In sharp contrast with the upward trend in educational costs, subventions for social welfare are expected to remain relatively stable during the next year. The sum of $144,830,145 is provided for this purpose against $143,659,822 estimated for the present year and $148,445,005 actually spent in 1951-52.

Welfare grants include old age security, aid to the blind, and aid to needy children. Case loads in all three categories have shown remarkable stability during recent months, particularly when contrasted with the rapid growth which characterized some of the earlier years. Actual and estimated case loads in the major programs during the period covered by this budget are:

(Average cases during the year)

	1951-52	1952-53	1953-54
Old age security	272,860	273,880	278,600
Aid to needy blind	10,867	11,330	11,870
Aid to partially self-supporting blind	539	520	520
Aid to needy children	136,558	134,648	133,960
Totals	420,824	420,378	424,950

A tight employment situation, which has kept a greater number of the older workers in the labor force and allowed responsible relatives better opportunity to support their dependents, undoubtedly is an important element in the current case load stability. Another is the increase in Federal old age and survivors insurance benefits, which has raised individual resources and lessened the need for public assistance based on need. Both of these will continue to exercise an influence in 1953-54, but the effect may not be sufficient to balance an increase of approximately 4 percent in the State's population 65 years of age and over. Consequently, allowance has been made for a moderate rise in the aged case load next year, sufficient to carry the average to 278,600 cases. This assumption will be reviewed as additional experience is obtained. If a resumption of previous trends becomes apparent, the forecast may have to be revised upward, with an accompanying increase in the amount of money required. If present trends are maintained, or if a further decrease appears likely, the estimate will be revised accordingly.

The Social Security Act amendments of 1952 increased the benefits under the old age and survivors insurance system and provided greater Federal participation in the categorical aid payments. There resulted a net gain in the average monthly payment to the recipients of old age security and aid to needy blind as the Federal increase in these two categorical aids was passed on by State legislative action.

Due to the changes, total General Fund cost for old age security dropped from $106,145,005 for 1951-52 to $103,137,600 estimated for 1952-53, and is estimated at $104,374,700 for 1953-54.

Blind aid and payments under the program of assistance to partially self-supporting blind are expected to continue the nominal increase recorded in recent years. The number of needy children is estimated to decrease slightly, as greater emphasis upon rehabilitation of parents through vocational training and the expansion of job opportunities achieves a better balance between the number of new cases accepted and the number closed. The General Fund cost is less for 1953-54 as a result of the greater Federal participation, even though an increase in the cost of living has raised the amount of the average payment.

Payments for medical care of aged and blind after the first two months of confinement in county hospitals are estimated at $1,334,800, compared with $1,311,600 in the current year and $1,267,705 in 1951-52. Reimbursement to counties for the expense of licensing and inspecting boarding homes for aged and children and for administrative cost of the adoption program will show a moderate increase.

Amounts provided for each of the social welfare subventions are summarized in the following table:

(Thousands of dollars)

	Actual 1951-52	Estimated 1952-53	Estimated 1953-54	Change from 1952-53	
				Amount	Pct.
Old age security	$106,145	$103,138	$104,375	$1,237	1.2
Security for the blind	5,077	5,261	5,507	246	4.7
Aid to partially self-supporting blind	453	457	464	7	1.5
Aid to needy children	33,836	31,385	30,625	—759	—2.4
County hospital care	1,268	1,312	1,335	23	1.8
Subtotals	$146,779	$141,552	$142,306	$754	0.5
Reimbursement for:					
Inspections	632	694	740	46	6.6
Adoptions	709	1,064	1,435	371	34.8
Veterans' service	325	350	350	---	---
Totals	$148,445	$143,660	$144,830	$1,170	0.8

Roads and Streets—$84,413,000

A gain in motor vehicle registrations and the rising volume of motor fuel consumption for the coming fiscal year will result in a $4,568,856 increase in the State-collected funds for local roads and streets. Apportionments for this purpose are estimated at $84,412,630, of which $60,757,567 will go to counties as their share of fuel tax and registration fee receipts, while $23,655,063 will become available to municipalities for maintenance and construction of city streets not in the State highway system. These amounts are predicated upon continuance of the present 4½ cents per gallon gasoline tax and the existing sharing provision which gives one and three-eighths cents to counties and five-eighths of a cent to cities. In addition, county governments receive a specified share of motor vehicle registration and weight fees, based partially upon the trend in vehicle registrations. Amounts for each purpose are shown below:

(Thousands of dollars)

	Actual	Estimated	Estimated	Change from 1952-53	
	1951-52	1952-53	1953-54	Amount	Pct.
For county roads:					
Fuel tax	$45,710	$49,183	$52,041	$2,859	5.8
Registration fees	7,804	8,305	8,716	411	4.9
Subtotals	$53,514	$57,488	$60,758	$3,270	5.7
For city streets:					
Fuel tax	20,777	22,356	23,655	1,299	5.8
Totals	$74,292	$79,844	$84,413	$4,569	5.7

Public Health—$13,848,000

Grants to local governments for public health purposes, which were among the most rapidly expanding services of government a few years ago, have recently stabilized at a level of approximately $13,000,000 annually. Appropriations for this purpose are entirely controllable in the budget making process. There are no fixed or mandatory charges, although the formulas for distribution of tuberculosis subsidies and aid to crippled children tend essentially to fix the amounts to be provided for these purposes.

In total, the $13,847,553 recommended for health subventions in 1953-54 represents a gain of 2.9 percent over the current amount, an increase paralleling annual population growth. Most of the change occurs in the items of State aid for the support of local health departments. Minor increases are shown in payments for tuberculosis care and the care of crippled children, while a small decrease is anticipated in the apportionment of aid for local hospital construction.

(Thousands of dollars)

	Actual	Estimated	Estimated	Change from 1952-53	
	1951-52	1952-53	1953-54	Amount	Pct.
Local health departments	$2,761	$2,872	$3,202	$303	11.5
Tuberculosis subsidies	4,937	5,188	5,266	79	1.5
Crippled children *	1,531	3,375	3,440	65	1.9
Mosquito and gnat control	398	400	400	----	---
Hospital construction	2,542	1,624	1,540	—84	—5.2
Totals	$12,168	$13,459	$13,848	$389	2.9

* Including assistance to school districts for the treatment of cerebral palsied children.

Conservation of Natural Resources—$9,305,000

Two items dominate the State's subventions for conservation and development of natural resources—the apportionments of horse racing revenue for support of county agricultural fairs, and grants for flood control. The former involves estimated payments of $3,085,360 in the coming year, approximately $1,172,000 below the corresponding amount for 1952-53. The decline results from an increase in other appropriations having a prior claim upon the Fair and Exposition Fund and from a drop in unexpended balances carried forward from the previous year. The latter—flood control—will increase materially in 1953-54 when further reimbursement for expenditures on a major project in the Los Angeles-San Gabriel area, approved in 1948, will be due.

The sum of $3,000,000 appropriated in 1952 for earthquake damage will be entirely allocated in the current fiscal year and no corresponding payment is contemplated in 1953-54.

A summary of expenditure items comprising the subventions for conservation and resource development follows:

(Thousands of dollars)

	Actual	Estimated	Estimated	Change from 1952-53	
	1951-52	1952-53	1953-54	Amount	Pct.
Aid to fairs	$2,224	$4,258	$3,085	—$1,172	—27.5
Flood control	1,902	352	5,088	4,735	1,345.2
Agricultural commissioners	114	123	132	9	7.3
Other	702	939	1,000	61	6.5
Totals	$4,942	$5,672	$9,305	$3,633	64.0

Other Assistance—$84,716,000

Miscellaneous subventions and shared revenues have been budgeted at $84,716,000 for the ensuing fiscal year. The total includes amounts to be apportioned from the State-collected liquor license fees, the assessment upon motor vehicles levied in lieu of property taxes, subventions for local public works under the $90,000,000 appropriation authorized in 1946, contributions toward the compensation of superior court judges, the retirement fund provided for judges of superior and municipal courts, and other general purpose grants from the State to local units of government.

Principal developments under this heading involve a substantially larger apportionment from the motor vehicle in lieu tax, generated by the increasing volume of new, higher priced vehicles in the registration structure. Distributions of this money and apportionments of liquor license fees, which were accelerated in 1951-52 by legislative direction, will reflect the normal outflow of revenue collections in the present year and in 1953-54. It is expected that subventions for local public works will continue to decline as the 1946 appropriation is gradually exhausted.

Amounts estimated to be distributed during fiscal 1954 under each of the several items comprising this group, together with corresponding amounts for the two previous years, are shown below:

(Thousands of dollars)

	Actual	Estimated	Estimated	Change from 1952-53	
	1951-52	1952-53	1953-54	Amount	Pct.
Vehicle license fees	$72,793	$64,684	$70,989	$6,305	9.7
Liquor license fees	8,216	8,171	8,182	11	0.1
Postwar public works	2,670	2,990	2,700	—290	—9.7
Judges' salaries and retirement	1,572	1,681	1,727	46	2.7
Earthquake damage	---	3,000	---	—3,000	—100.0
Aid for juvenile homes and camps	713	745	793	48	6.4
All other *	390	354	325	—29	—8.2
Totals	$86,354	$81,625	$84,716	$3,091	3.8

* Includes apportionment of unrefunded gasoline tax on aircraft fuel and workmen's compensation insurance for disaster service workers.

Schedule 4

GENERAL FUND—STATEMENT OF FINANCIAL CONDITION, JUNE 30, 1952

ASSETS

Cash		
In State Treasury	$35,256,275	
In Transit From Agencies	4,341,440	
Agency Accounts	1,774,420	
Total Cash		$41,372,135
Less: Reserve for Uncleared Collections		514,035
Net Total Cash		$40,858.100
Agency Revolving Funds		7,844,576
Investments		
Bonds at Par	$96,185,000	
U. S. Treasury Notes, at Cost	9,501,637	
Unamortized Premium and Accrued Interest, Less Discount	295	
Total Bond Investments		105,686,932
Accounts Receivable—Current		
Due From Other Funds	$3,886,753	
Equity in Feeder Funds	8,386,380	
Abatements and Reimbursements	4,908,081	
Advances to Counties for Aid to Aged, Blind, and Needy Children:		
State's Share	13,122,809	
Federal Share	21,123,693	
Sundry Accounts Receivable	1,299	
Total Accounts Receivable, Current		51,429,015
Accounts Receivable—Other (Fully Reserved)		
Revenue Receivable	$5,812,726	
Toll Bridge Authority	1,605,596	
Sixth District Agricultural Association	1,238,745	
Unreimbursed Debt Service—Public School Building Loan Fund	3,178,883	
Due From Agriculture Fund	7,169	
Advance to Business and Professions Building	160,908	
Flood Control Project Maintenance Revolving Fund	93,588	
Due From School Districts for Apportionment Adjustment Pursuant to Correction in Reported Local Tax Rate	68,787	
Sundry Accounts Receivable	554,492	
Total	$12,720,894	
Less: Reserve for Uncollected Accounts Receivable	12,720,894	
TOTAL ASSETS		$205,818,623

LIABILITIES AND RESERVES

Liabilities		
Claims Payable Filed	$4,224,473	
Accounts Payable	30,388,514	
Due to Other Funds	310,754	
TOTAL LIABILITIES		$34,923,741
Reserves		
Reserve for Prepaid Appropriation Reimbursements and Deferred Abatements of Expenditures for 1952-53 F.Y.		914,462

SURPLUS

Unappropriated Surplus, June 30, 1952	$143,153,793	
Unencumbered Appropriation Balances Estimated to Revert	14,927,397	
Unencumbered Appropriation Balances Chargeable to Subsequent Fiscal Years	11,899,230	
Accumulated Surplus Available for Expenditure		169,980,420
TOTAL LIABILITIES, RESERVES AND SURPLUS		$205,818,623

Less: Amounts in Sinking Funds, November 30, 1951, Available for Payment of Principal						*13,120,466*	
NET BONDED DEBT						$498,584,534	

---

[1] Chapter 611, Statutes 1943, and Chapter 1492, Statutes 1945, appropriated $26,239,738.75 to the Bond Sinking Fund of 1943 for the purpose of paying the principal and interest on these issues to final maturity.

[2] In addition there is $26,399 in the Olympic Bond Fund and $3,713,063 in the Bond Sinking Fund of 1943 which is available for payment of interest, and $84,253 in the Sacramento State Building Sinking and Interest Fund in excess of the amount required to retire outstanding bonds.

[3] The servicing of these bonds is primarily the obligation of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund; however, in last analysis they are general obligation bonds.

[4] In addition there is $203,481 in the Seawall Sinking Funds and $5,973 in the India Basin Sinking Fund of 1909 which is available for payment of interest.

[5] Callable on or after January 2, 1951, in the amount available in the sinking fund.

[6] Callable on or after January 2, 1955, in the amount available in the sinking fund.

[7] $500,000 callable on or after March 1, 1971.

[8] Callable on or after January 2, 1941, in the amount available in the sinking fund.

[9] Budget Act of 1952 provides $50,000,000 to be set aside in the School Bond Retirement Fund, which will be available in March, 1953, for retirement of school building bonds.

DEBT SERVICE

RESERVES FOR CONTINGENCIES

Salaries and Wages

Position Titles

In the detailed departmental and agency budgets, positions included in the state civil service have been set forth under the official class titles established therefor by the Personnel Board. Positions exempt from civil service have been listed by their departmental titles, as set forth on the official roster of employees maintained by the Personnel Board, or as maintained by the State Controller under the central pay installation.

Positions Now Authorized

In general, the positions included under this heading are those which were established as of July 1, 1952, together with those for which funds were provided in the 1952-53 Fiscal Year Budget or otherwise authorized as of that date and authorized revisions thereof. Amounts shown for positions now authorized represent actual salary payments for 1951-52 and estimated salary payments during 1952-53 and 1953-54, assuming full year employment, unless the position is estimated to be established materially later than July 1, 1952. In such cases only the cost from date of establishment is shown.

Replacement of positions at a higher level either (a) upon completion of a training period or (b) after temporarily ''down grading'' are included under this heading. Such transactions are indicated by showing both class titles on the same line, with a salary range of the minimum salary of the lower class and the maximum of the higher class. Examples: (a) administrative trainee-junior staff analyst, $281-395, (b) junior-intermediate clerk, $200-268.

Continuation during 1953-54 of positions authorized temporarily until June 30, 1953, are included under ''Positions Now Authorized.'' These positions may be identified by an explanation in parenthesis indicating the extent of the continuation, such as: (extended to December 31, 1953) or (extended to permanent).

Proposed New Positions

Proposed positions for the budget year which have not yet been established or authorized have been listed under this heading. Proposed increases in time of part-time positions are also listed under this heading, if the increase amounts to one-half time or more; otherwise the position is shown under ''Positions Now Authorized'' on the increased time basis.

Proposed new positions include upward replacement of positions only to extent that they involve major organizational changes.

Estimated Salary Savings

Unless indicated to the contrary by experience and anticipated conditions, a lump sum deduction is made from each group total of salaries and wages in anticipation of savings which are estimated to accrue because of temporarily vacant positions, and the lower entrance rates of salary at which replacement personnel are paid.

The amounts of such estimated savings may not correspond to the number of positions deducted because of adjustments to the latter for positions authorized to start after July 1. The amounts shown opposite such positions are for the estimated costs for the period of occupancy only and, therefore, there is no money savings to be anticipated.

Number of Positions

Filled positions in 1951-52 are counted to the nearest tenth of full-time and full-year employment, except for members of boards and commissions, temporary help, etc.

Authorized positions for 1952-53 and 1953-54 are counted to the nearest tenth of full time. Full-time positions authorized to start later than July 1st are counted as full positions, but the totals are adjusted for the unused time by a deduction under estimated salary savings.

Where more than one part-time position of the same class appears under a single function, the number of separate part-time positions is indicated opposite the word ''Individuals.'' Such items and all other items enclosed in parentheses in the number of positions columns are excluded from position totals.

Salary Range

Rates of pay listed under this heading represent salary ranges established by the State Personnel Board for civil service classifications, or fixed by statute or by the appointing authority and approved by the Director of Finance for each class of exempt position.

The amounts shown indicate (1) the minimum rate and (2) the maximum rate. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate payable to an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board on July 25, 1947, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than $10. This plan is used also for many salaries fixed for exempt positions. A table of salary ranges in the state service is included at the end of this section. Thus, $220–268 indicates a monthly salary range having steps of $220–$231–$243–$255–$268. Salary ranges for instructional positions in the state colleges and in other state agencies are set forth below.

EXTENT OF PROFESSIONAL PREPARATION

CLASS I	Persons whose academic or professional preparation is deemed equivalent to four years beyond high school graduation or holders of recognized Bachelor's degrees.
CLASS II	Persons whose academic or professional preparation is deemed equivalent to five years beyond high school graduation or holders of recognized Master's degrees.
CLASS III	Persons whose academic or professional preparation is deemed equivalent to six years beyond high school graduation.
CLASS IV	Persons whose academic or professional preparation is deemed equivalent to seven years beyond high school graduation or holders of recognized Doctor's degrees.

---

[a] Based on salaries effective October 1, 1951, for classifications used at state colleges, and September 1, 1952, for classifications used at California Polytechnic College and the Division of Agriculture at Fresno State College.

[b] Limited to persons holding this class and rank prior to adoption of salary schedule—therefore maximum only is paid.

[c] The positions for C. P. C. (California Polytechnic College) and the Agriculture Division of Fresno State College receive, in addition to the above schedule, three steps, or approximately 15 percent, if employed for 12 months instead of the normal 10-month teaching period.

Salary Schedule for Instructional Positions—Other State Agencies

(Ranges and Criteria of Application for Teachers)

Range	Steps				
A	$310	$325	$341	$358	$376
B	325	341	358	376	395
C	341	358	376	395	415
D	358	376	395	415	436
E	376	395	415	436	458
F	395	415	436	458	481

CRITERIA FOR RANGE DETERMINATION	ACADEMIC (Preparation)	VOCATIONAL (Preparation)
Range A	Emergency or special credential, without bachelor's degree.	–
Range B	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential.	–
Range C	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential: plus 12 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential.	Three years experience as journeyman craftsman.
Range D	Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential: plus 24 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential or regular general secondary credential.	Qualification for special secondary vocational Class A Credential in T and I and PS Education.

Merit Salary Adjustments

Subject to availability of funds, Section 18856 of the Government Code requires that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in which his service rating is equal to or above a reasonable minimum, which has been fixed by the Personnel Board as "Standard."

Employees in salary ranges with a maximum step of $395 and below may receive an increase from the first step to the second step of their salary range upon satisfactorily completing their probationary period (six months).

Provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions. Inasmuch as turnover of personnel generally results in replacement at a lower step in the salary range, the amount budgeted for salary adjustment opposite each position is offset by a lump sum deduction for downward adjustments included in the deduction for "estimated salary savings."

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty and responsibility of the work.
3. Conditions of work in the class.
4. The adequacy of existing appropriations which may be used for salary increase purposes.

The rates of pay of a group of approximately 1,000 laborers, workmen, and mechanics in the state service are established at the hourly wage rates negotiated with private contractors in the county in which they are employed. They receive all the collateral benefits, such as premium pay for night work, travel time, and overtime received by employees in private industry and, in addition, they receive the added state benefits of vacation and sick leave with pay, plus 5 cents and 10 cents an hour increase after one and two years' employment with the State.

The salary ranges shown are those in effect on July 1, 1952, and salaries and wages expenditures for both the 1952-53 and 1953-54 Fiscal Years reflect rates of pay then in effect. Statutory salaries are provided for at rates inclusive of enactment by the 1951 Legislature (Chapter 1613, Statutory Salary Equalization Plan, and other special enactments).

Further anticipated special salary range revisions by the Personnel Board after July 1, 1952, and the cost of continuing these adjustments during 1953-54 is included under the heading "Provision for Salary Increases."

TOTAL EXPENDITURES FOR SUPPORT	$249,823	$357,451	$279,572	—$77,879 (—21.8%)
GENERAL ANALYSIS				
Number of positions	*48.3*	*47.8*	*47.8*	–

The decrease in net appropriation results from a decrease in the number of days in the legislative session. The 1951-52 Fiscal Year is a more comparable year with the 1953-54 Fiscal Year. Provision is made to purchase additional books to keep the present library in a current condition.

The amount of estimated reimbursements to be received from the Code Commission is based on furnishing approximately the same services as in the 1951-52 Fiscal Year.

CODE COMMISSION

To revise and codify the statutes of the State. The Legislative Counsel Bureau is the staff agency for the commission. The commission consists of nine members appointed by the Governor.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

TOTAL EXPENDITURES FOR SUPPORT	$28,203	$20,250	$30,250	$10,000 (49%)

GENERAL ANALYSIS

The increase in the proposed budget reflects an estimate of the amount of work to be performed by the Legislative Counsel Bureau in accordance with experience during the 1951-52 Fiscal Year. The original program of the Code Commission should be complete with the 1953 Session of the Legislature. Thereafter work will consist of checking all statutes to ascertain if they have been codified or should be repealed, revision of codes, codification of 1953 Statutes, and technical work of nonsubstantive needed revision.

Number of positions	*0.5*	*1*	–	*—1*

The decrease in this budget results from the elimination of the deputy counsel II and related expenses provided to represent the commission in matters relating to the proposed Uniform Commercial Code to be submitted to the 1953 Session of the Legislature. The amount budgeted is to provide for attendance of the commissioners at meetings of the national conference and California's contribution to that conference.

JUDICIAL COUNCIL

The Judicial Council surveys the conditions of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. It also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.

Governor's Office

OFFICE OF CIVIL DEFENSE

Pursuant to Chapter 1, Division 7, Military and Veterans Code, as amended (Civil Defense Act of 1950) the Governor has assigned the duties thereunder to personnel in his office, known and referred to as the Office of Civil Defense. This office is responsible for coordinating the plan and program for the civil defense of the State.

Headquarters Office at Sacramento

GENERAL ANALYSIS

Number of positions	*137.6*	*157.5*	*154.5*	*—3*

Provision is made for continuation of the existing level of service with reductions in the clerical staff, primarily in the central office clerical pool. Provision is also made for the recurring cost of maintaining regional control centers, technical and organizational equipment, and communications service charges which are currently being acquired or established.

SALARIES AND WAGES: The reduction results from the elimination of five clerical positions in the central office pool and one intermediate stenographer-clerk position in Region VII. It is intended that such clerical positions will remain unfilled as they become vacant during the current year. Provision is made for the anticipated vacancies through estimated salary savings.

OPERATING EXPENSES: The principal increase, amounting to $90,300, is due to maintenance of radio, radiological, fire and rescue equipment. Other items of recurring nature consisting of attack warning system rental in the amount of $22,903, and subsistence for command post exercises at a cost of $6,400 are reported for the 1952-53 Fiscal Year in the Capital Outlay Section of the Budget. Increased rent, janitor service, light, heat and power, maintenance of control centers, offset by minor non-recurring items constitutes the balance of the increase.

EQUIPMENT: Consists of film and film cabinet, files, and miscellaneous items.

REIMBURSEMENTS: These items result from reassignment of building space to other agencies, and payment for services in connection with a water pollution sampling program being performed for the State Water Pollution Control Board.

STATE EMPLOYEES' RETIREMENT SYSTEM

Administers the State Employees' Retirement System and the Legislators' Retirement System. This involves determination of membership, computation, collection, and recording of employer contributions and member contributions, service and compensation; the computation and payment of withdrawals of member contributions and death and retirement benefits, including retirement for service, ordinary and industrial disability and industrial death; the investment of funds; the preparation of periodic and special valuations.

Members of the State Employees' Retirement System consist of state employees (including most University employees) and employees of local governmental agencies participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

Records pay roll deductions for state employees who request deductions for the purchase of United States Defense Savings Bonds; registers and issues bonds so purchased to employees.

Office at Sacramento

ADMINISTRATION

Analysis

SALARIES AND WAGES: One additional clerical position is proposed for the Central Files Section due to the increased work load. Three positions are being eliminated in the Accounting Division and temporary help for the annual closing of member accounts is reduced in the amount of $4,475 due to the elimination of accounting backlog and improvements in procedures. $5,800 is provided for temporary help for processing ballots in the election of a board member during 1953-54.

OPERATING EXPENSES: The increase of $5,315 is due to increases in work load and additional office space required.

EQUIPMENT: The amount of $13,549 provides for additional files for expansion of membership, a postage meter and the replacement of worn out furniture and equipment.

REIMBURSEMENTS: The increase of $16,512 is due to the estimated increase in contracting public agency members plus the increase in the unit cost per member for administrative expenses.

---

[a] Composed of savings in salaries and wages, $1,961; operating expenses, $724; equipment, $16; and excess reimbursements, $1,770.

[b] Composed of savings in salaries and wages, $38; operating expenses, $82; and equipment, $334.

SPECIAL SERVICES

Analysis

The amount of $15,000 for salaries and wages and operating expenses is provided to perform preparatory work in the accumulation of data for the quadrennial actuarial valuation at June 30, 1954. The contracting public agencies will reimburse the State for their pro rata share of this expenditure. The amount of $500 is provided for special valuation work to be performed for contracting public agencies on a reimbursable basis.

U. S. DEFENSE SAVINGS BONDS

Analysis

This unit records the funds deducted from salaries of state officers and employees for the purchase of U. S. Defense Savings Bonds. It purchases bonds from the United States Federal Reserve Bank, registers and issues such bonds to the purchaser in accordance with State Board of Control rules and the provisions of Section 20122 of the Government Code.

On October 1, 1952, there were 3,000 monthly pay roll deductions authorized by state employees for the purchase of bonds. It is estimated that the number of deductions will increase to 4,000 during 1953-54.

The increase in cost is due to the estimated increase in work load.

Unexpended balance, estimated savings	—230	–	–	
TOTAL EXPENDITURES FOR SUPPORT	$26,460	$26,532	$27,105	$573 (2.2%)

GENERAL ANALYSIS

The increase is made up of a $600 increase for traveling offset by minor differences totaling $27.

The principal item of expenditure is $25,000 which is the same amount that has been paid each year since 1948-49 for a contract with the Council of State Governments.

The Council of State Governments is a research and service agency serving the over-all legislative, administrative, and judicial agencies of state government such as state legislatures, the Governors' conference, the Conference of State Chief Justices, the National Associations of Attorneys General, Secretaries of State, Budget Officers, and Purchasing Officials.

GENERAL ANALYSIS

Number of positions	*324.3*	*326.9*	*330.3*	*3.4*

Provision is made for continuation of the existing level of service with increases provided for work load and a change in the salary survey program. Two additional junior analyst positions are included to provide for an independent salary survey to be made exclusively by members of the Personnel Board staff in lieu of participating in a cooperative survey with other governmental jurisdictions. A graphic artist position is added to relieve the analysts and examiners of chart work to provide time to devote to the increased work load.

CLASSIFICATION

Analysis

This division classifies positions in accordance with duties performed and maintains a roster of all state employees.

OPERATING EXPENSES: An increase in telephone exchange charges is due to provision for two additional telephones.

EQUIPMENT: Includes replacement of worn out furniture, additional filing equipment for expansion, and stands for two typewriters and one dictating machine.

EXAMINING AND RECRUITING

Analysis

This division recruits and examines qualified personnel for state service, maintains employment lists, and conducts certification and placement activities.

SALARIES AND WAGES: A reduction of $2,000 in temporary help for hearing reporters results from provision for recording equipment to be used in qualification appraisal board interviews in lieu of reporters. An increase of $1,024 in proctors temporary help results from increased work load.

OPERATING EXPENSES: An increase in telephone exchange charges results from provision for two additional telephones, additional traveling and automobile costs due to increased work load. Additional funds are provided for out-of-state expert examiners to improve the nation-wide recruitment activities in medical and related classes. Other increases are due to price changes.

EQUIPMENT: Provision is made for replacement of worn out furniture and typewriters and two double mandril dictating machines to be used in lieu of hearing reporters.

OFFICE SERVICES

Analysis

This division performs clerical work; processes applications; arranges, administers, scores, and processes examinations; establishes eligible lists and maintains statistical data.

SALARIES AND WAGES: The increase is due primarily to the proposed new graphic artist position plus an increase in temporary help for training time in the clerical pool.

EQUIPMENT: The major items consists of replacement of addressing, duplicating and dictating machines, typewriters and transfer cases with Grade A files for current material; additional items for the new position, a collator and additional filing equipment.

COOPERATIVE PERSONNEL SERVICES

Analysis

The operations of this division are governed by requests of local agencies for personnel services which are performed on a contractual basis by which the cost of such services is repaid to the State. The total cost is to be reimbursed and therefore no increase in the net appropriation is required for this function.

Provision is made for an additional dictating machine and replacement of broken chairs.

ADMINISTRATION

Analysis

SALARIES AND WAGES: The decrease of $2,597 is due primarily to a reduction in temporary help allotments for employing election clerks. This reduction is possible because the work relating to the 1952 elections will be completed during the 1952-53 Fiscal Year.

OPERATING EXPENSES: The increase of $1,545 is due to (1) the inclusion of $4,500 for the cost of printing the Roster of Public Officials which has been reported in the budget for Other Current Expenses in the current and past years; (2) an increase in traveling expenses in the amount of $216 results from an out-of-state trip for the Secretary of State to attend the convention of Secretaries of State. The expenses relating to the 1952 convention were incurred in the 1951-52 Fiscal Year. The increases are partially offset by (1) a reduction in printing costs relating to election activities; (2) reduced postage resulting from provision for one instead of two revisions of the Roster of Public Officials; and (3) the nonrecurring item for purchase of file guides.

EQUIPMENT: The amount of $790 provides for replacement of worn out borrowed furniture, law books and miscellaneous items.

CENTRAL RECORDS DEPOSITORY

Analysis

This bureau was established in accordance with the provisions of Section 12260 of the Government Code for the receipt and custody of all records required or permitted by law to be deposited in the office of the Secretary of State.

The increase in operating expenses results primarily from the cost of microfilming notary public applications in order that the original documents may be destroyed.

COLLECTION AGENCY DIVISION						

Analysis

This division licenses and supervises collection agencies in accordance with the provisions of the Collection Agencies Act, Act 1460 of the General Laws of California.

The principal increase in operating expenses results from the cost of reprinting the Collection Agency Law. Provision is made for the replacement of one light automobile.

DEPARTMENT OF AGRICULTURE

Administers and enforces the provisions of the Agricultural Code and related statutes. These laws call for regulatory and service activities dealing with the protection of plantings and livestock from infectious diseases, pest animals, weeds and injurious insects, and with aids to insure the marketing of quality agricultural products. In this broad field of activity the department cooperates extensively with the United States Department of Agriculture on the one hand and with county agricultural services on the other. The General Fund finances activities which are of general public benefit and the Department of Agriculture Fund finances other activities for which the beneficiaries are charged.

DIVISION OF PLANT INDUSTRY

ADMINISTRATION

Analysis

The functions and duties of the Chief of the Division of Plant Industry are to supervise, administer, and correlate the office and field activities of the six bureaus comprising the division. Detail of the functions of these bureaus appears preceding the budget requests of the several bureaus.

GENERAL ENTOMOLOGY

Analysis

This function includes all administrative activities of the bureau, including planning and general supervision of major insect eradication-control programs which are otherwise budgeted as separate projects. It also includes direct responsibility for insect pest survey; insect identification; conduct of minor insect eradication-control programs, not of sufficient size to merit separate budgetary consideration; apiary inspection; development of commodity treatments to alleviate quarantine restrictions; and advice to county agricultural commissioners in regulatory matters involving pest control.

A reduction results from transferring one employee and seasonal help from a small program for Hall Scale Eradication to a separate function for a more intensive program.

BUREAU OF ENTOMOLOGY

DESTRUCTION AND CONTROL OF BEET LEAFHOPPERS AND HOST PLANTS

Analysis

The work in the budget year is a continuation of the program of the current year. A decrease of $6,651 in the budget year is due primarily to less need for materials and in their applications in covering the reduced acreage of the Russian thistle estimated as coming under treatment.

GRAPE LEAF SKELETONIZER ERADICATION

Analysis

An increase of $13,778 in the budget year results from the need of resuming treatment of all domestic grapes in the major part of the control area to permit the establishment of parasites. Such treatment had been waived during the past year but resulted in an increase in infestation presenting hazards of carryout which have had to be safeguarded against while developing a biological control program.

CHERRY FRUIT FLY ERADICATION

Analysis

An increase of $5.405 in the budget year is due to the need of two additional automobiles to be used in survey replacing similar equipment on loan from another function which loan could not be continued and to the replacement of a third automobile as used on the project.

HALL SCALE ERADICATION

Analysis

This program has been carried on in cooperation with the Federal Government, the State's share being included in the General Entomology function. The State's contributions have averaged $9,000 while those of the federal agency have averaged $70,000 annually. Inspection has proved ineffective in promptly locating infestation and it is now requested to treat exposed as well as known infested properties. The interest of the State in protecting over half a million acres of deciduous fruit hosts warrants an increase in eradication effort. The modified program should make more certain the successful completion of this project as well as advancing the date of such completion.

BUREAU OF PLANT QUARANTINE

Analysis

This bureau enforces state and federal quarantine laws, rules, and regulations. Headquarters office is maintained at Sacramento, and in addition the bureau maintains maritime inspection stations at San Francisco, San Pedro, and San Diego, and 18 border agricultural inspection stations on the principal interstate highways. Maritime shipping and airplane arrivals is holding steady whereas border travel shows a 10 percent increase by actual count during the first seven months of 1952 over the same period a year ago. The program is therefore projected at the same level during the current and budget years.

BUREAU OF PLANT PATHOLOGY

Analysis

The work of the Bureau of Plant Pathology concerns the detection, control, suppression, eradication and prevention of the introduction and spread of serious and destructive plant diseases. The bureau deals with infectious and contagious diseases of plants as distinguished from insect pests. Those diseases which are caused by plant viruses and by plant parasitic nematodes in particular have added greatly in recent years to the need for constant vigilance and action for the protection of our agricultural and horticultural industries against plant diseases. The program for this function in the budget year is planned on substantially the same basis as for the current year, except for one proposed new position in the classification of associate plant pathologist which is needed to meet the increased work load in diseases caused by plant parasitic nematodes.

QUICK DECLINE OF CITRUS

Analysis

The work of this function of the Bureau of Plant Pathology is to control and prevent the spreading of the virus disease of citrus trees known as "Quick Decline." The program for the budget year is planned on a reduced basis in comparison to the current year by reason of the discontinuance of two regular positions.

BUREAU OF RODENT AND WEED CONTROL AND SEED INSPECTION

Analysis

This function is concerned with the eradication and control of noxious weeds and poisonous plants where found to be detrimental to agriculture or livestock; the control of field rodents to reduce the destruction of crops and the control of rodents which are known to harbor disease transmissible to humans; also seed inspectors work for the enforcement of the California Seed Law and in cooperation with the Federal Government for the enforcement of the Federal Seed Act. The program is projected on an expanded scale by the addition of four positions for increased volume of seed tests and seed business, however, most of the increased cost of these positions will be offset by reimbursements from the special fund functions of this bureau.

PREDATORY ANIMAL CONTROL

Analysis

This program is concerned with the control of wild predatory animals such as coyotes, bobcats, mountain lions, and bears for the protection of sheep, cattle, poultry and certain types of crops. It is a three-way activity in cooperation with the Federal Government, various counties and the State. The budget is predicated upon a continuation of the existing level of service.

SPRAY RESIDUE AND INJURIOUS MATERIALS ENFORCEMENT

Analysis

This function enforces provisions of the Agricultural Code which protect consumers from poisonous spray residue on fresh and dried fruits and vegetables. Also it administers regulations concerning the use and application of injurious materials, which is a relatively new function added to the Agricultural Code by Chapter 1295, Statutes of 1949.

BUREAU OF LIVESTOCK DISEASE CONTROL

Analysis

This function is concerned with the control of infectious and contagious diseases of livestock and poultry; the operation of the statewide bovine brucellosis and bovine tuberculosis programs; the operation of diagnostic laboratories at Sacramento, San Gabriel, Petaluma, Turlock and Fresno.

One additional veterinarian and one building maintenance man for the new Petaluma laboratory, and one laboratory technician for the San Gabriel laboratory are recommended for increased work load.

BUREAU OF MEAT INSPECTION

Analysis

This bureau conducts inspection of animals and meat products in slaughtering and meat processing establishments, for the purpose of protecting the public from unwholesome or otherwise objectionable meat products. The bureau also inspects foreign cold storage meat and enforces laws prohibiting sale of uninspected meat in the State. The program is projected at the present level.

GENERAL MARKETING SERVICE

Analysis

This service consists of the following: (1) assistance in the solution of marketing problems of agricultural groups which are no organized under formal marketing laws; (2) assistance to new industries in formulating and obtaining marketing program under the general marketing laws, and (3) administration of the marketing programs formulated under general marketing law The General Fund is reimbursed for all expenditures for the latter two types of services from deposits received and assessment collected. Three new positions are recommended; one marketing economist, one auditor III, and one district supervisor of marketin enforcement. These positions are requested to handle the increased work load resulting from the formulation of additional marketin programs and the enlargement by amendment of existing programs. Included in operating expense and equipment is provisio for additional travel and automobiles which these positions will require.

BUREAU OF MARKET NEWS

Analysis

The Bureau of Market News operates in California as the Federal-State Market News Service. Daily reports are published on the marketing of agricultural commodities in intrastate, interstate and foreign markets, containing data on prices, market conditions, demand, supply, truck and carlot movements, truck unloads, cold storage holdings and other related information. Commodity groups included in this service are fresh fruits and vegetables; livestock and dressed meats; dairy and poultry products; hay, grain and feedstuffs; dried fruits, bulk wine, honey, dried edible beans, and other miscellaneous products. Included in operating expenses and equipment is provision for the final phases of the program of modernization and mechanization of the Market News Service radiotelegraph network. This mechanization program provides for the changeover during a four-year period of a manually operated system. It will increase the traffic carrying capacity needed as a result of the new commodities and offices added by legislative action during the past few years. Such improvement was further made necessary since manual operation is fast becoming obsolete and qualified operators increasingly difficult to find.

BUREAU OF AGRICULTURAL STATISTICS

Analysis

The Bureau of Agricultural Statistics functions as a cooperative agency of the State and Federal Departments of Agriculture. Its duties are to prepare and publish the official estimates pertaining to agriculture for both departments, and to otherwise collect, develop, maintain, publish and disseminate systematic statistical and similar information relating to the agriculture of California. Activities are continued at the same level of service.

DIVISION OF PLANT INDUSTRY

NURSERY SERVICE

Analysis

This service is charged with the regulation of the movement of nursery stock to prevent the distribution of pests; the licensing of persons engaged in the nursery business; the registry and certification of trees and plants as to freedom from pests; and the identification of fruit and nut tree root and top stock. The increase from the current year includes one additional district nursery inspector for increased volume of inspections and provision for the printing of the biennial directory of nurserymen.

BUREAU OF FIELD CROPS						

Analysis

This Bureau is charged with inspection and registration of public grain warehouses, primarily for control of insects of stored grain; enforcement of the labeling of commercial feeding stuffs through inspection, sampling, and analysis of feeds and feed materials; optional licensing, filing of bond and inspection of warehouses storing agricultural products; and upon application the inspection and grade certification under United States standards of such field crops and by-products as grain, flaxseed, rough and milled rice, beans, peas, hay, castor beans, sunflower seed, safflower seed, and hops. No change is contemplated in operations from the current year.

SEED TESTING AND CERTIFICATION SERVICE

Analysis

This self-supporting function became operative July 4, 1950, to meet the increased demand for certification of seed. It is an optional service performed for the industry in connection with production of certified seed. The current year program is projected into the budget year at the current level.

DIVISION OF MARKETING

BUREAU OF MARKETS

Analysis

This function relates to self-supporting marketing programs operating under the Agricultural Producers Marketing Act, the California Agricultural Products Marketing Act and the Processed Foodstuffs Marketing Act. No increase in level of activity is contemplated.

BUREAU OF MARKET ENFORCEMENT

Analysis

The Bureau of Market Enforcement enforces the provisions of Chapters 6 and 9 of Division 6 of the Agricultural Code, commonly referred to as the Produce Dealers Act and the Processors Law. These laws afford protection to farmers against financial loss in the sale or consignment of their produce to dealers, commission merchants, brokers, cash buyers and processors. These laws provide means for the adjustment of disputes between the parties, and are effective in securing settlement for amounts due producers for farm products.

License fees filed by handlers of agricultural products support the activities of this agency. No change in the level of service is proposed.

BUREAU OF MILK CONTROL

Analysis

This bureau administers and enforces the laws relating to the establishment of the price for fluid milk which distributors pay to producers and minimum wholesale and minimum retail prices. There are 34 separate marketing areas in the State where producer and resale prices are established. The bureau also licenses and bonds market milk distributors, establishes minimum refrigeration rental schedules, and enforces the unfair trade practice provisions as they relate to the dairy industry.

No change in program is anticipated.

CANNING TOMATO INSPECTION

Analysis

This service involves the compulsory inspection of all loads of canning tomatoes received by processors and delivered by growers. This activity is governed by the tonnage of tomatoes marketed by growers to canners. It is an annual crop and there has been planted for harvest and inspection in the current year less acres than were harvested and inspected in the past year. It is estimated that the budget year will be approximately the same as the current year—1,500,000 tons.

BUREAU OF SHIPPING POINT INSPECTION

Analysis

This bureau, in cooperation with the United States Department of Agriculture, makes inspections and issues federal-state certificates covering pack, size, quality, condition and grade of fruits, nuts, and vegetables based on United States or other recognized standards. This service is furnished at requests of shippers, growers or other financially interested parties. It is also required by certain marketing control boards, to show compliance with established standards. The income and expenditures are governed by the volume of products offered for inspection. It is expected that the volume of work will continue at approximately the same level as the current year. Seasonal help has been reduced to offset the establishment of two full time clerical positions.

BUREAU OF WEIGHTS AND MEASURES

Gasoline, Distillate, and Oil Inspection, and Antifreeze Registration

Analysis

This service issues motor fuel pump license tags, handles registration and issuance of permits to sell antifreeze and enforces the laws aimed to prevent misrepresentation and adulteration of gasoline and motor oils. The budget is based upon continuation of the present level of activity.

Department of Agriculture

CALIFORNIA DAIRY INDUSTRY ADVISORY BOARD

he California Dairy Industry Advisory Board provides the means for the dairy industry to develop, maintain and expand markets for California dairy products. The board, made up of industry representatives, acts in an advisory capacity to the Director of the California Department of Agriculture who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14 of the Agricultural Code. The cost of this program is defrayed entirely from fees paid by producers and handlers of dairy products.

GENERAL ANALYSIS

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
Number of positions	*10.7*	*10.8*	*10.8*

The 1953-54 program is based on continuation of the standard or official egg laying test and the random sample meat bird test at the current year level of service. The random sample egg laying test program is continued with the same number of entries planned as in the current year; however, the number of chicks taken with each entry is being increased to provide a more representative sample of the participating hatcheries entries. Operating expense and revenues have been adjusted to reflect the revised testing program.

DEPARTMENT OF CORRECTIONS

he department has been established to integrate and correlate the correctional activities of the State. It is responsible for the administrative control and operation of all state institutions for adult felons. The department also inspects prisons and jails and makes recommendations on plans and specifications of facilities costing $1,500 or more.

GENERAL ANALYSIS

The Department of Corrections 1953-54 budget provides for the opening and staffing of the new 1,200-capacity Deuel Vocational Institution at Tracy, an expanded inmate pay program, a special intensive parole unit and parole out-patient clinic under the Adult Authority, two additional state forest camps, and staffs to handle increased work load and to provide moderate improvement in service for a population of 13,853, an increase of 1,371 or 11 percent over the 1952-53 Governor's Budget.

DEPARTMENTAL ADMINISTRATION, ADULT AUTHORITY, AND BOARD OF TRUSTEES—INSTITUTION FOR WOMEN

The analysis and expenditures for these agencies will be found under their respective budgets.

STATE PRISONS AND INSTITUTIONS

In this group are the following:

Medical Facility
Institution for Men, Chino
State Prison at Folsom
State Prison at San Quentin
State Prison at Soledad
Deuel Vocational Institution
Institution for Women, Corona

The total increase of $2,172,542 (14.4%) over the 1952-53 Governor's Budget is composed in part of the following items, which are common to all or several institutions, and are discussed in groups below rather than individually under each institution.

SALARIES AND WAGES: The increase of $1,581,949 includes the following 162.3 new positions common to all or several institutions at a cost of $614,919:

4 Personnel Clerks		$11,844
1 Senior account clerk—Folsom	$3,294	
1 Intermediate typist-clerk—Soledad	2,706	
1 Intermediate typist-clerk—Deuel	2,706	
1 Senior typist-clerk—Corona	3,138	

To provide approximately one personnel clerk per 200 positions, a yardstick applied to other state agencies.

12 Culinary Positions		$46,872

The additional positions are requested in the several institutions as follows:

	Medical Facility	*Chino*	*Folsom*	*San Quentin*	*Soledad*	*Deuel*	*Corona*
Estimated institution population	1,100	1,500	2,200	4,370	1,950	1,150 [b]	473
Supervising cook II	1	–	–	–	–	–	–

Employees Kitchen (7 days) employees served	(100)	(125)	(125)	(150)	(100)	(50)
Supervising cook I (early shift)	–	1	1 *	1	1	1 *
Supervising cook I (late shift)	–	–	–	1	0.2	1 *
(One per 150 meals)						
Relief	–	–	–	1	–	0.6
Bakery (6 days)						
Instructor in baking	1	1	1	1	1	1
Baker	–	–	–	1 *	–	–
(One per 1,500 or more meals)						
Butcher Shop (6 days)						
Instructor in meat cutting—butcher	1 *	1	1	1	1	1
Totals	7	10	9	17	12	13

In general, the proposed positions are below the ultimate required, especially when relief needs are considered. They represent, however, the most urgent requirements at the present time.

Medical Facility:

The three proposed positions will bring the staffing more in line with that already established at the other facilities. There will be 1,100 inmates in 1953-54, an increase of 100 over 1952-53. The supervising cook II will be responsible for the many special diets and relieve the food manager on days off. The supervising cook I will provide partial cook relief in the main kitchen. The instructor in meat cutting is required for supervision and instruction of inmates in this operation.

Chino:

The supervising cook I is to be in charge of food dispensing and distribution at the main kitchen for the 400 Reception-Guidance Center inmates and the 75 hospital and ambulatory patients.

Folsom:

The supervising cook I will provide an employee to be responsible for meal preparation in the employees' kitchen, serving 125 employees.

San Quentin:

The baker is required to provide supervision and relief in the two-floor bakery employing 27 inmates and operating seven days per week. The 4,370 institution population for 1953-54 is 588 over the 1952-53 Governor's Budget estimate and will increase the overload.

Soledad:

The supervising cook I will provide two-shift coverage in the ranch mess.

Deuel:

The four supervising cooks I are required to provide two-shift supervision in the new employees' mess (not operated at Lancaster) and adequate relief in the new main kitchen. This institution houses inmates in the most difficult age group for operational purposes and will double its population in 1953-54.

Corona:

The instructor in cooking under the food manager, replacing a home economics teacher, will act as a "floating supervisor and instructor" over the supervisor-counselors and inmate cooks in the several cottage kitchens. This position will also provide seven-day management by relieving the food manager on days off.

2 Assistant Laundry Supervisor $6,588

(1 Chino, 1 Soledad)

The following is a comparison of present institution laundry staffs:

	Medical facility	*Chino*	*Folsom*	*San Quentin*	*Soledad*	*Deuel*
Laundry supervisor	1	1	1	1	1	1
Laundryman	–	1	1	–	–	–
Instructor in laundry and dry cleaning	–	–	–	1	–	1
Correctional officer	1	–	1	1	–	–
Totals	2	2	3	3	1	2

The positions are proposed to assist the laundry supervisor in the operation of the laundry and dry cleaning plant and relieve him on vacation and sick leave. The Soledad position is proposed on the basis of population served; the Chino position is proposed on the basis of population and facilities served, including the institution, reception-guidance center and camps.

---

* Proposed new position.

[a] June 30, 1954 estimate.

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND INSTITUTIONS—Continued

In-service Training—Culinary ---------- $5,108

In-service training for culinary employees on the basis of 53 hours for new personnel and 36 hours per year for existing personnel is included to develop in the culinary personnel the knowledge, skills, and habits necessary to satisfactorily perform their responsibilities, and to study and improve the details of kitchen operation. Subject matter to be covered includes, for new employees, (1) food handling and sanitation, (2) supervisory techniques, (3) classification and treatment, and (4) business procedures. The refresher training for other employees substitutes instruction and teaching methods for the latter two. The cost of this program should eventually pay for itself.

4 Correctional Lieutenants (Inmate Assignment Officers) ---------- $18,048

One is proposed for each men's institution, except medical facility. Chino already has such a position. The position will maintain the proper assignment of inmates, which is vitally important if the rehabilitation program is to be wholly successful. It cannot be properly handled by the associate warden-custody who is responsible for custodial planning and must attend many top level conferences, or by the correctional captain who must daily direct the operations of the custodial staff.

In-service Training—Custodial ---------- $86,216

In-service training in the amount of 53 hours for new employees and 36 hours per year refresher training for other employees, on state time, has been recommended in a special state-wide survey on the subject. This represents an increase of 18 hours per year refresher training over the currently authorized level. Generally, the training may be divided into (1) subject matter relating to custodial duties and classification and treatment responsibilities, (2) physical conditioning and self-defense, and (3) instruction and practice in firearms and chemical equipment.

36.5 Additional Medical and Nursing Positions ---------- $170,702

The following additional medical and nursing positions are requested in the several institutions:

	Medical Facility	*Chino*	*Folsom*	*San Quentin*	*Soledad*	*Deuel*	*Corona*
Psychiatrist II	–	–	–	–	–	1	0.5
Physician and surgeon II	1	–	–	–	1	1	–
Senior dentist	–	–	–	1	2	1	1
Electroencephalographic technician	1	–	–	–	–	–	–

Totals	23.5	21.2	39.5	19	20	12

---

* Proposed new positions.

[a] Staffed for estimated June 30, 1954, population of 1,150.

[b] One position 24 hours, seven days on each floor of hospital requested; Folsom, two floors, 10 positions; San Quentin, three floors, 15 positions.

[c] Guidance Center—maximum security area in hospital.

[d] Women nurses, professional supervision of inmate nurses, and instruction.

[e] Two shifts, seven days, required because of activity in this age group.

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND INSTITUTIONS—Continued

In the several institutions, the additional positions are requested specifically as follows:

Medical Facility—Psychiatric and Medical Institution:

1 Physician and surgeon

To provide third physician and surgeon for 1,100 population. Position will function on surgery, large number of tubercular cases and 400-capacity old men's area population.

3 Supervising nurse

1 Graduate nurse

These positions are necessary to provide 24-hour technical supervision over the 47 medical technical assistants throughout the institution, with double coverage on the day shift.

1 Electroencephalographic technician

This position is requested to provide a qualified technician to operate a technical machine necessary in the diagnosis of mental disorders in the inmate population.

Chino:

3 Medical technical assistants

One position will provide additional relief for 24-hour, seven-day coverage in the inpatient department. Two positions are needed to provide for eight-hour, seven-day coverage in the outpatient department.

Folsom:

1 Surgical nurse

This position is proposed to supervise the inmate nurses in the surgery.

3 Medical technical assistant

Two positions are to provide seven-day, 24-hour coverage on the two inpatient floors of the hospital, where serious incidents have occurred. One position is required to provide seven-day, eight-hour coverage in the outpatient department.

San Quentin:

1 Senior dentist

This position is to increase to five the dental staff for 4,370 inmates including the Reception-Guidance Center.

3 Medical technical assistant

Two positions are to provide seven-day, 24-hour supervision over the three inpatient floors of the hospital. One position will provide relief for 7-day, 8-hour coverage in the outpatient department.

Soledad:

1 Physician and surgeon II

2 Senior dentist

These positions are to provide two physicians and surgeons (excluding the chief medical officer), and three dentists for the 1950 institution population.

1 Surgical nurse to provide qualified nurse in surgery.

2 Medical technical assistants to provide a free person in charge of clinical laboratory work and relief for outpatient department.

Deuel:

1 Psychiatrist II

1 Physician and surgeon II

1 Senior dentist

These positions will provide one psychiatrist, two physicians and surgeons, and two dentists for the 1,150 population.

1 Laboratory technician

This position will provide a civil service position in charge of clinical laboratory work.

3 Medical technical assistant

These positions will provide 16-hour, 7-day coverage in the outpatient department. The work is expected to be heavy because of the activity in this age group.

1 Intermediate stenographer-clerk

This position will provide two civil service clerks in the medical records section. Inmate clerks cannot be used because of their age, type, and shorter incarceration.

1 Correctional sergeant will provide custodial head of hospital

Corona:

0.5 Physician and surgeon II

1 Senior dentist

These positions will provide one full-time physician and surgeon and one full-time dentist for a 473 population. Most medical and dental work will now be done at the Corona hospital.

1 Surgical nurse

3 Graduate nurse

These positions will provide nursing staff for surgery to be undertaken at Corona, 24-hour, 7-day coverage in the inpatient department, and 8-hour, 7-day coverage in the outpatient department.

37 Additional Classification and Parole Positions ---------- $112,272

Additional positions proposed by class are as follows:

	Chino	*Folsom*	*San Quentin*	*Soledad*	*Medical Facility*	*Deuel*	*Corona*
Technical:							
Parole officer	–	–	2	–	1	1	–
Clerical:

Other release	0.49	0.40

20 Inmate Counselor Positions		$74,005
11 Parole officer I—San Quentin	$53,197	
3 Intermediate typist-clerk—San Quentin	8,532	
6 Parole officers I—Deuel (effective January 1, 1954)	12,276	

This service is proposed on a two-year basis for San Quentin, the largest prison with long-term inmates, and at Deuel, which houses the youngest short-term offenders, on a 1 to 300 basis and 1 to 150 basis, respectively. The positions at Deuel are effective January 1, 1954, at which time that institution should be stabilized and reach normal capacity. This service will provide individual and group counseling to inmates at periodic intervals, thus aiding in their rehabilitation, the basic aim of the Department of Corrections program. The three typist-clerk at San Quentin are to maintain case records and information on results achieved.

3 Education Interne $7,200

One position is for Medical Facility, one for Corona, and one for San Quentin. These institutions are located near metropolitan areas and major universities where recruiting should be possible. This would establish the following staffing pattern in the several institutions:

	Med. Fac.	*Chino*	*S. Q.*	*Corona*
Present Staff:				
Institution	–	1	–	–
Reception-Guidance Center	–	1	1	–

Institution	1 (Med.)	–	1 (Cl. & Par.)	1 (Cl. & Par.)
Totals	1	2	2	1

The new positions make a work contribution of approximately half-time for approximately eight months per year, involve only a minimum cost, and provide a potential future professional staff, when trained. The requested positions will provide one position in the occupational therapy section at the Medical Facility, one position in the classification and parole section at San Quentin as presently at Chino, and one position for classification and parole at Corona.

---

* Plus five additional approved to June 30, 1953 only.

[a] Includes parole officers, sociologist, psychologist, vocational counselors, and prison record officers.

[b] Includes approximately 10 percent for administrative clerical duties and consists of the following average hours per case.

[c] Number of positions based on 1,824 hours per employee per year.

[d] Adjusted for 1952-53 revised intake.

[f] Medical Facility technical positions are requested in accordance with total intake and release with special allowance for difficult mental and physical cases and recalcitrant tuberculers.

[g] Total request is comparatively high as the Tracy institution will be double the size of Lancaster and because Youth Authority inmates appear before Youth Authority Board much more frequently and spend less time in the institution prior to parole than Adult Authority wards.

[h] No unit time study has been developed. Positions are requested in accordance with total intake and release and with allowance for Reception-Guidance Center function for women.

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND INSTITUTIONS—Continued

Fire Protection Staff:

4 Correctional Sergeant (Fire Chief and Sanitarian) $15,984

One position is proposed at Chino, Folsom, Soledad, and Deuel. The Medical Facility, which is in a metropolitan fire district, and Corona, which can be served by Chino, will not require such a position. San Quentin now has five posts, one correctional sergeant and two correctional officers plus full relief, assigned to the firehouse. Four of these five positions will be abolished; therefore, no additional over-all cost is involved. This position will plan, supervise, direct, and train personnel and inmates in fire fighting techniques, including evacuation of inmates, periodically inspect fire department equipment and look for fire hazards and report thereon. It will also investigate sanitary conditions throughout the institutions, recommend prevention, control, and corrective measures of health hazards, conduct rodent and pest control, train employees and inmates in proper sanitation, and coordinate activities with the chief medical officer. This staffing pattern is recommended by the Fire Marshal.

Institution Firefighter, 28—(part time) $10,080

Twenty-eight intermittent, $30 per month each, positions are requested in the several institutions to provide 11 at each institution, except Medical Facility and Corona. One will be quartered at the firehouse every 10th night and one is for vacation relief of the 10 (150 days). These positions will provide fire protection at night, maintain the fire fighting equipment, and instruct personnel and inmates in fire fighting.

This staffing is recommended by the State Fire Marshal.

The above positions will provide the following staffing:

Fire Protection Staff:	*Medical Facility*	*Chino*	*Folsom*	*San Quentin*	*Soledad*	*Deuel*	*Corona*
Correctional sergeant (fire chief and sanitarian)							
Existing positions	–	–	–	5	–	–	–
Additional positions	–	1	1	—4	1	1	–
Institution firefighters (part time)							
Existing positions	7	8	9	–	6	8	–
Additional positions	4	3	2	11	5	3	–

13 Additional Reception-Guidance Center Positions $59,436
(less three existing positions to be abolished, —$12,804)

Subject positions are proposed in accordance with the following work load table based on estimated number of inmates to be received for the 1953-54 Fiscal Year on the basis of actual time required per case in accordance with an actual time study in the San Quentin Reception-Guidance Center.

		1953-54 Estimates					
	Work load standard	*Chino*		*San Quentin*		***Deuel***	
		Annual Intake	*Staff Req.*[a]	*Annual Intake*[b]	*Staff Req.*[a]	*Annual Intake*	*Staff Req.*[a]

	Chino	*San Quentin*	*Deuel*
1952-53 estimated intake (revised)	2,500	2,650	–

Additional direct work load positions:	
Deuel:	
3 Senior sociologists	$14,940
2 Vocational counselor	9,960
1 Senior clinical psychologist	5,496
1 Senior typist-clerk	3,138
2 Intermediate typist-clerk	5,688
1 Intermediate stenographer-clerk	2,844
1 Intermediate file clerk	2,706
Existing direct work load positions to be abolished:	
Chino:	
—1 Vocational counselor	$4,980
—1 Senior sociologist	4,980
San Quentin:	
—1 Intermediate typist-clerk	$2,844
In addition to direct work load positions, the following additional positions are proposed:	
Deuel:	
1 Chief psychiatrist	$9,852
1 Instructor in general shop	4,512

The chief psychiatrist is requested for the 130-capacity new clinic at Deuel to plan, direct, and coordinate its operations as well as to handle the diagnostic and treatment work on the most seriously disturbed cases. The instructor in General Shop will explore the potential mechanical aptitudes and abilities of the new inmates for later training and future employment possibilities.

---

[a] Based on 228 annual working days.

[b] Includes 1,000 parole violators returned.

[c] Adjusted to revised 1952-53 intake.

DEPARTMENT OF CORRECTIONS—Continued

STATE PRISONS AND INSTITUTIONS—Continued

10 Positions—Two Additional State Forestry Camps $36,672

(One at Chino; one at San Quentin)

2 Prison camp supervisors II	$9,024
8 Correctional officers	27,648

To provide approved 24-hour coverage at two additional camps, jointly requested by Division of Forestry and Department of Corrections to afford better state-wide forest protection.

16 Correctional Officer—Sixth Custodial Position, State and Federal Forestry Camps $55,296

Correctional officers (10, for 12-months camp)	$34,560
Correctional officers (10, for 8-months camp)	20,736

Present staff of one prison camp supervisor and four correctional officers provides minimum coverage with one on shift 24 hours per day, 7 days per week plus relief. Both Division of Forestry and Department of Corrections propose this additional post for administrative duties, to take inmates to the hospital in emergency cases, attend meetings, make inspections, and to provide a Department of Corrections officer-in-charge at the camp at all times so that dual responsibility may be properly discharged. Part of this added cost will be financed from Federal Funds. The staffing would still be a minimum when compared with Youth Authority Camps.

OPERATING EXPENSES: The increase of $583,026 is explained in the analysis of each institution. Generally it is due to an average population increase of 728 (5.5 percent) over 1952-53 (revised). This increase will be shared in the several institutions as follows:

Medical Facility (+100)
Chino (+60—one additional state forestry camp)
Folsom (+110—three forestry camps transferred from San Quentin; one from Soledad)
San Quentin (—20, one additional state forestry camp; three camps transferred to Folsom)
Soledad (+130—one federal forestry camp transferred to Soledad)
Deuel (+285—new institution at Tracy)
Corona (+63)

Operating Charges Incorporated in 1953-54:

1. The issue of shoes, socks, and underwear complements to the new inmates at the reception-guidance centers will be transferred with the inmates to the institution. Any differential in over-all operating costs is expected to be insignificant.
2. Inclusion of certain special repair projects previously charged to minor construction.

EQUIPMENT: Equipment items totaling $301,479 are requested for 1953-54, an increase of $13,031. Equipment is explained under the analysis of each institution. Original complements of equipment for two new state forestry camps are included herein. The total equipment requests are abnormally low because much original complement equipment has been or will be purchased from Capital Outlay funds for new institutions such as Medical Facility, Soledad, Deuel, and Corona.

INMATE PAY-WORK PROJECTS: An increase of $25,103 is due to establishment of additional forestry camps.

REIMBURSEMENTS: An increase of $134,497. These increases are mainly the result of two additional state forestry camps; one at Chino, one at San Quentin. A partial offsetting decrease is due to a fiscal change of accounting the entire rental charge on buildings used by correctional industries as revenue in 1953-54, rather than 42 percent as revenue and 58 percent as a reimbursement to support, as previously.

Department of Corrections

DEPARTMENTAL ADMINISTRATION

Central administrative office for all Department of Corrections facilities. Over-all supervision and coordination is provided by this agency.

Office at Sacramento

GENERAL ANALYSIS				
Number of positions	*51*	*57*	*63*	6

The increase is primarily due to proposed new positions and is partially offset by discontinuance of the Special Commission Studying Crime Conditions in the 1952-53 Fiscal Year.

---

[a] Composed of savings in salaries and wages, $1,486; operating expense, $3,073; and equipment, $656.

[b] Composed of savings in salaries and wages, $7,870.

Department of Corrections

DEPARTMENTAL ADMINISTRATION—Continued

ADMINISTRATION

The administrative staff supervises and coordinates the following functions: (1) accounting, budgeting and business management; (2) personnel and in-service training of employees; (3) maintenance and upkeep of plant and construction; (4) feeding and nutrition; (5) custody and treatment; (6) prison industries; (7) compilation and dissemination of crime study data.

Analysis

SALARIES AND WAGES: The increase of $15,093 is primarily due to the following proposed new positions:

1 Associate administrative analyst ---------- $5,772

This staff position is proposed to independently plan, guide, and make organizational, systems, and procedural studies in the interests of efficiency and economy. The time and technical analysis required for necessary studies is such that it cannot be accomplished with existing personnel.

1 Intermediate stenographer-clerk ---------- 2,844

This position is necessary to provide clerical staff on a pool basis to serve the part time needs of the associate administrative analyst, the junior staff analyst (medical), the semisenior accountant, and an architectural designer to be financed from capital outlay funds.

1 Intermediate typist-clerk (teletype operator) ---------- 2,706

This position will operate the teletype machine serving the Adult Authority as well as the department. Work load data of estimated 15,765 messages transmitted and 18,838 received for 1953-54 justifies a full time position with primary assignment, rather than the inefficient secondary assignment to various clerical personnel as at present.

1 Senior account clerk ---------- 3,294

This position is proposed for the increasing work load in the accounting office. The last permanent position was added in 1950-51. The large expansion in the Adult Authority since that time, especially the proposed Outpatient Parole Clinic and the Special Intensive Parole Unit proposed for 1953-54, will greatly increase the volume of the work in the accounting office.

1 Intermediate typist-clerk ---------- 2,706

This position is proposed as a permanent extension of a limited term position for culling old inmate files in the Records Office. The large increase anticipated in 1953-54 prison and parole populations will increase the work load in this office.

1 Junior staff analyst ---------- 3,996

This position is proposed to relieve the medical consultant of administrative details, thereby permitting the latter more time for policy matters, staff consultations, and more frequent inspections in the expanding Department of Corrections and Youth Authority facilities.

OPERATING EXPENSES: The decrease of $2,170 is primarily due to discontinuance of the Crime Commission and printing the biennial report in the 1952-53 Fiscal Year.

EQUIPMENT: The total of $7,631 represents an increase of $2,012 over the current year. Major items include replacement and additional files, $2,737; in-service training equipment, $1,280; and equipment for new positions.

Department of Corrections

BOARD OF CORRECTIONS

A special crime commission was established in the 1951-52 Fiscal Year to assist the Board of Corrections in the study of organized crime conditions in California. Publication of the report and completing miscellaneous activities of the crime commission are included in the Departmental Administration budget for the 1952-53 Fiscal Year.

Other Board of Corrections expenditures are budgeted in Departmental Administration beginning with the 1951-52 Fiscal Year.

Department of Corrections

MEDICAL FACILITY

This institution cares for and treats inmates that are mentally ill, including psychopaths and sex offenders, and those suffering from chronic diseases. The permanent site will be at Vacaville in Solano County.

Temporarily Located at Terminal Island in the Los Angeles Harbor

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS

Total Expenditures for Initial Operating Inventories	$19,641	–	–	–
TOTAL EXPENDITURES	$1,164,313	$1,259,280	$1,420,918	$161,638 (12.8%)
GENERAL ANALYSIS				
Number of positions	*190*	*194*	*220.5*	*26.5*
POPULATION AND UNIT COSTS				
Average inmate population	932	1,000	1,100	100
(1952-53 G. B.)	(963)	(1,000)	–	(10%)
Cost per inmate	$1,228	$1,259	$1,292	$33 (2.6%)
Inmate Movement:				
Received	599	400	490	90
Released	299	400	390	—10
Total	$898	$800	$880	$80 (10%)

The increase is primarily due to increased population, and 26.5 proposed new positions.

SALARIES AND WAGES: The increase of $133,394 is due principally to 26.5 new positions. Complement positions affecting several institutions are explained under "State Prisons and Institutions" following the departmental summary. The 13.5 miscellaneous positions are individually explained below:

1 Storekeeper I	$3,456
This position is proposed to assist and relieve the one present storekeeper in the receipt and storage of supplies, including a large amount of drugs in the medical storeroom which must be kept under strict control. A population increase from 1,000 to 1,100 is anticipated for 1953-54. All other institutions except Corona require at least two storekeepers.	
9 Correctional officer	31,104
Five positions are required for 24-hour, 7-day coverage for the 100 additional older inmates to be housed in an additional cottage in the annex area. Three positions are proposed to provide two-shift, seven-day coverage of meal service supervision in the mess hall as at other prisons. The equivalent of one position is proposed to provide eight-hour, double coverage, at the inspectroscope on Saturdays and Sundays when heavy weekend visiting takes place, and to provide regular day off relief for the present inspectroscope operator.	
Overtime (escapes)	500
To provide funds to finance payment for overtime incurred in searching for escapees and hideouts within and about the institution.	
Overtime (night school area)	750
To provide necessary custodial supervision in the night school area.	
1 Senior sociologist (expires June 30, 1954)	4,980
This position is required for a one-year period to plan, direct, and coordinate the total program of the annex area which will house 400 older or crippled inmates in the 1953-54 Fiscal Year. This trial period is expected to reveal that individual counseling and group programs will increase rehabilitation and possible paroles among these older men.	
1 Senior stenographer-clerk	3,294
This position will serve the associate warden-custody who performs a dual function inasmuch as there is no associate warden-care and treatment at this institution. Inadequate clerical pool service is available at present. Most other institutions now have a correctional officer or stenographer for this purpose.	

---

[a] Composed of savings in salaries and wages, $5,977; operating expenses, $16,193; equipment, $405; and loss in reimbursements, $7,285.

[b] Composed of savings in salaries and wages, $987; and operating expenses, $13,909.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	52-53 (Auth.)	53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54

SALARIES AND WAGES—Continued

1 Painter foreman $4,296

This position will supervise an inmate paint crew to properly maintain the institution, annex, and residences, about 60 buildings in all. These should all be painted in the next three years as proper protection to state and federal property.

0.5 Locksmith (half time) 1,998

This half time position is required to inspect and service restraint equipment, firearms, tear-gas guns, and maintain all locks in the institution. Folsom and San Quentin each have a locksmith and one is proposed for Soledad.

OPERATING EXPENSES: The increase of $38,955 is primarily due to increased population and expanded facilities.

EQUIPMENT: The total of $8,821 represents an increase of $2,349 over the current year. The only major item is replacement of mattresses, $4,200.

Department of Corrections

INSTITUTION FOR MEN, CHINO

A minimum custody facility for adult offenders who are expected to profit from agricultural and vocational training. An extensive ranch is operated on a 2,600-acre tract of land. A reception-guidance center processes new offenders from Southern California. A new state forestry camp will be opened July 1, 1953.

Located near Chino, San Bernardino County

SUMMARY

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS				
Number of positions	*364.2*	*369.5*	*390.7*	*21.2*
POPULATION AND UNIT COSTS				
Institution Operations:				
Average Inmate Population:				
Prison	1,435	1,500	1,500	–
Reception-guidance center [d]	199	400	400	–
Total	1,634	1,900	1,900	–
(1952-53 GB)	(1,671)	(1,880)	–	–
Cost per inmate [e]	$1,238	$1,162	$1,198	$36 (3.1%)
Federal Forestry Camp Operations:				
Average inmate population	34	35	35	–
Cost per inmate (excluding inmate pay)	$1,277	$1,127	$1,232	$105 (9.3%)
State Forestry Camp Operations:				
Average inmate population	173	180	240	60 (33.3%)
Cost per inmate (excluding inmate pay)	$957	$969	$1,004	$35 (3.6%)
Inmate Movement:				
Institution:				
Received	1,480	2,340	2,340	–
Released	1,464	2,245	2,280	35
Total	2,944	4,585	4,620	35 (1.5%)
Reception-Guidance Center:				
Received	2,340	2,600	2,160	—440 (—17%)

The increase is primarily due to:

SALARIES AND WAGES: The increase of $97,890 is primarily due to 23.2 new positions. Complement positions affecting several institutions are explained under "STATE PRISONS AND INSTITUTIONS" following the departmental summary. The four miscellaneous positions are individually explained below.

4 Correctional officer	$13,824

Two posts are required to provide 7-day double coverage activity on the 8 a.m.-4 p.m. and 4 p.m.-12 p.m. hour shifts in 102 capacity Sycamore Hall in the Reception-Guidance Center, which includes 12 segregation and 5 isolation cells, 5 tiers, day and reading rooms, and a lobby. Supervision by one officer is especially difficult, particularly because of the suicidal, destructive type of inmates in the isolation-segregation areas, who must be observed every half hour, while considerable movement and activity is taking place among the other inmates in the 5 tier block. One post is proposed for custodial supervision in the 6 school room and 3 vocational shops area in the reception-guidance center, to assist the instructors in custodial problems, check inmates in and out of the shops and classrooms including search for dangerous tools and contraband. One position is required for relief of the above three.

Overtime (transportation)—camps	100
Overtime (firefighting)—camps	100

These amounts finance overtime due to transportation and firefighting at the new camp.

OPERATING EXPENSES: The increase of $50,468 is primarily due to increased population and establishment of the new State forestry camp.

EQUIPMENT: The total of $31,227 represents a decrease of $21,868 from the current year. Major items include replacement of mattresses, $2,100; additional barber equipment, $1,224; replacement of textbooks, $1,200; additional electrical equipment, $1,935; replacement of a truck, $2,550; replacement of two automobiles, $3,800; additional equipment for the new camp, $4,874.

INMATE PAY: The increase of $13,223 is due to the establishment of the new State forestry camp.

REIMBURSEMENTS: The increase of $73,540 is primarily due to establishment of the new State forestry camp partially offset by a decrease in services to correctional industries due to accounting maintenance services as revenues in the 1953-54 Fiscal Year.

[k] Established because of the earthquake emergency in the Tehachapi area, under Chapter 14, Statutes of 1952.

Department of Corrections

STATE PRISON AT FOLSOM

A maximum security prison for inmates who are dangerous escape risks, recidivists, habitual criminals, or who are serving long sentences. A wide variety of educational courses are available.

Two state forestry camps are being transferred from San Quentin effective January 1, 1953. One federal forestry camp is being transferred from San Quentin and one from Soledad effective April 1, 1953.

Located near Folsom, Sacramento County

OTHER CURRENT EXPENSES				
Replacement of Fire Loss—Trades Building:				
Allocations from Emergency Fund	$1,400	–	–	
Unexpended balances, estimated savings	—18	–	–	
	$1,382	–	–	
TOTAL EXPENDITURES	$2,316,978	$2,319,419	$2,444,867	
GENERAL ANALYSIS				
Number of positions	*326.3*	*325.4*	*354.3*	*28.9*
POPULATION AND UNIT COSTS				
Institution Operations:				
Average inmate population	2,415	2,180	2,200	20
(1952-53 G.B.)	(2,459)	(2,100)	–	(0.9%)
Cost per inmate [b]	$957	$1,041	$1,084	$43 (4.1%)
Federal Forestry Camp Operations:				
Average inmate population	–	10	40	30
Cost per inmate (excluding inmate pay)	–	$1,758	$1,446	—$312 (—17.7%)
State Forestry Camp Operations:				
Average inmate population	–	60	120	60 (100%)
Cost per inmate (excluding inmate pay)	–	$1,063	$1,159	$96 (9%)
Inmate Movement:				
Received	1,441	1,760	1,410	—350
Released	1,991	1,460	1,410	—50
Total	3,432	3,220	2,820	—400 (—12.4%)

The increase is primarily due to the 1953-54 total population of 2,360, including 4 new camps (transferred from San Quentin and Soledad) compared with the revised estimate of 2,250 for 1952-53 and 2,100 in the 1952-53 Governor's Budget, or an increase of 12.4 percent over the latter, and 24.4 proposed new positions.

---

[a] Composed of savings in salaries and wages, $3,899; operating expenses, $22,423; equipment, $5,099; and loss in reimbursements, $1,044.

[b] Excludes emergency forest fire suppression and expenditures for services performed for the entire prison system of transporting inmates and returning parole violators.

STATE PRISON AT FOLSOM—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The increase of $114,429 is chiefly accounted for by 24.4 new positions and full operation of four camps transferred to Folsom during the 1952-53 Fiscal Year. Complement positions affecting several institutions are explained under "State Prisons and Institutions" following the departmental summary. The 11 miscellaneous positions are individually explained below:

10 Correctional officers ---------- $34,560

One position is proposed to provide custodial supervision in the vocational shop area, adjacent to the main yard, to provide custodial supervision over the classes conducted by A.D.A. instructors, and to prevent passage of contraband and weapons which has resulted in several serious incidents. One position is proposed to provide custodial coverage in Tower 17 during the day shift overlooking the yard between Cell Block 2 and the new segregation and isolation unit. Maximum security men using this yard are very dangerous and must be under constant surveillance. It cannot be adequately covered by the officers in the 136 capacity segregation unit.

Two positions are proposed for Tower 6, overlooking the canal on the first and third shifts, seven days per week. Day shift coverage only is presently provided. Since the construction of the Folsom Dam, the power house gates have been opened and the canal is either dry or has a maximum water depth of two feet, compared with 12 feet previously. The inmate escape barrier has been removed and the manning of Tower 6, 24 hours per day is necessary as a protective measure against attempted escapes.

One position is proposed to act as state agent to return parole violators. In 1951-52, 1,041 man days were required for this work. Four previous positions were reduced to two in 1952-53 as a result of a ratio reduction with an estimated population decrease. In 1953-54 the population is expected to again increase and the man hours required will justify three positions. The position is requested at Folsom rather than San Quentin, where parole violators are now received, because of the work with the Sacramento office on extradition papers and travel information.

Five relief positions are proposed to provide necessary relief for the new custodial positions, increase over-all sick leave relief from six to seven days (7.35 days per actual 1951-52 experience).

1 Arts and craft teacher ---------- 4,512

This position is to provide guidance and instruction to the 138 inmates in the new segregation unit, approximately 80 chronic disciplinary problems, to the end of developing constructive interest and attitude in these men. This position will also assist in screening inmates for aptitudes in technical and industries assignments.

Positions for the four camps have been transferred in the 1952-53 Fiscal Year from San Quentin and Soledad. These positions are continued during the budget year at an estimated increased cost over the current year of $41,426.

OPERATING EXPENSES: The increase of $91,205 is primarily due to full year operation of the forestry camps and increased population.

EQUIPMENT: The total of $64,774 represents a decrease of $1,856 from the current year. Major items include replacement of a milling machine, $1,994; replacement of a departmental bus, $19,000; and additional forestry camp equipment, $3,314.

INMATE PAY-WORK PROJECTS: The total of $36,600 is an increase of $20,600 over the current year and is due to full year operation of the four forestry camps transferred from San Quentin and Soledad.

REIMBURSEMENTS: The increase in reimbursements is due to full year operation of the forestry camps, partially offset by a decrease in reimbursements from correctional industries due to accounting maintenance services as revenues in the 1953-54 Fiscal Year.

---

[a] Composed of savings in operating expenses, $95,985; and equipment, $3,783.

[b] These inmates are fed, housed, and otherwise cared for at San Quentin Prison.

[c] Excluding cost of operating reception-guidance center.

Department of Corrections

STATE PRISON AT SAN QUENTIN—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS—Continued				
POPULATION AND UNIT COSTS—Continued				
Inmate Movement:				
Institution:				
Received	3,616	3,690	3,600	—90
Released	3,807	3,235	3,565	330
Total	7,423	6,925	7,165	240 (3.5%)
Reception-Guidance Center:				
Received	2,827	2,750	2,600	—150 (5.5%)

The increase is generally due to an institutional population increase of 588 (15.5%) over the 1952-53 Governor's Budget and 65.4 proposed new positions. One additional State Forestry Camp is planned and the transfer of three camps to Folsom.

SALARIES AND WAGES: The increase of $186,864 is due principally to 65.4 new positions. Complement positions affecting several institutions are explained under "State Prisons and Institutions" following the departmental summary. 24 miscellaneous positions are individually explained below:

3 Correctional sergeant	$11,988
18 Correctional officer	62,208

The above positions are requested to fill additional posts as outlined below and are in part required because of the 15.5 percent population increase since the last budget.

	SHIFTS 12m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.
Bath Officer (South, North, and East Blocks):			
Correctional officers	–	3 2[a]	–
South Cell Block (1,419 inmates)[b]:			
Correctional sergeant	1[a]	1	1[a]
Correctional officer (floor)	4	4	4
Correctional officer (gun walks)	–	2	2
East Cell Block (1,050 inmates)[b]:			
Correctional sergeant	–	1	–
Correctional officer (floor)	1	–	2
Correctional officer (gun walks)	1[a]	–	2[a]

	SHIFTS 12m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.
Isolation (50 inmates):			
Correctional officer (floor)	1 1[a]	1 –	1 1[a]
Correctional officer (gun walks)	1	1	1
Segregation Unit (93 inmates)[b]:			
Correctional officer (floor)	1[a]	1	1[a]
Education Building (1,100 enrollment, three floors):			
Correctional officer	–	1	2
Post 13 Reception Center Yard	–	1[a]	1[a]
Relief—correctional sergeant	–	1[a]	–
Relief—correctional officer	–	7[a]	–

The sergeants are requested to supervise correctional officers in the South Cell Block (988 normal capacity) which has four sections, is double celled, has many maximum security and some psychiatric and convalescent inmates, has much inmate movement and is an access to the hospital. One position is for relief.

Two posts are proposed to supervise bathing, handle unlock and lockup, clothing and linen issue, and assist on evening mess, requiring full 8-hour shift, to supplement four half-time positions allowed in 1952-53.

Three posts are requested to provide gun walk patrol in the East Cell Block to oversee inmates, prevent fights, thwart attempted escapes, protect the floor officer during cell inspection, unlock periods for meals, work and school assignments.

Two posts are proposed to supplement present coverage in the Isolation Unit, housing 20 condemned men and 30 chronic disciplinary cases, requiring maximum supervision because of attempted acts of violence. This old unit lacks custodial security requiring frequent inspections. Two posts are requested for the Old Prison Segregation Unit which was to be abandoned in 1952-53 with the estimated population decrease but which must now be reactivated because of the increase. The inmates are of the maximum security, obstreperous type, prone to attempt escapes, fights, and suicides and require continuous inspection.

One post is proposed to supplement the evening coverage in the Education Building where 1,100 men attend classes on three floors. Frequent inspections of the hobby room, band room, and other points by one officer leave the entire three floors to be covered by only one other officer, which have led to several serious incidents. Seven positions are for relief of the above.

1 Supervising parole officer $5,232

This position will act as an assistant to the associate warden, care and treatment, to relieve the latter from much detail, and committee work and to provide more time for supervising the activities for which he is responsible. Preparation for and attendance at Adult Authority meetings requires the equivalent of approximately one position at this level.

1 Supervising clerk I $3,810

This position is requested under the Chief of Institution Maintenance to supervise 12-18 inmate clerks and draftsmen in the maintenance office. This institution undertakes much minor construction and maintenance on its own, with inmate labor, and many plans, material purchases and disposition records, and work project reports are maintained in this office. Supervision of inmates on routine matters by this clerk would relieve the Chief of Institution Maintenance for more over-all planning and project supervision.

1 Electrician foreman $4,512

This second electrician foreman is requested to properly instruct and supervise some 50 inmates doing electrical work in the institution. This position is recommended in the Division of Architecture report on maintenance at San Quentin which mentions deplorable condition of electrical work, infraction of safety rules, need for supervision of job "layout," procurement of materials, and inspection of completed work. Better current maintenance should curtail future large deferred maintenance.

OPERATING EXPENSES, EQUIPMENT, INMATE PAY-WORK PROJECTS, AND REIMBURSEMENTS: The combined n increase in these several categories is $61,276, and is primarily due to one less federal forestry camp and one less state forestr camp in 1953-54, and the consequent loss of excess reimbursements in the former. The 1953-54 equipment request includes th following significant items: replacement of printing press ($1,700), 3,000 blankets ($17,100), 1,000 mattresses ($15,000), tracto and two trucks ($8,780) to replace highway use trucks, which will replace old low annual mileage institution trucks, which wi be sold or traded in, office equipment for additional classification and parole positions ($8,421), and equipment for new state forestr camp ($5,939).

---

[a] Proposed new positions.

[b] Population on April 21, 1951.

POPULATION AND UNIT COSTS				
Institution Operations:				
Average inmate population	969	1,810	1,950	140 (7.71%)
1952-53 GB	(900)	(1,844)	–	
Cost per inmate	$1,382	$1,118	$1,176	$58 (5.2%)
Federal Forestry Camp Operations:				
Average inmate population	67	70	60	—10 (—14.3%)
Cost per inmate (excluding inmate pay)	$1,182	$1,197	$1,320	$123 (10.3%)
State Forestry Camp Operations:				
Average inmate population	118	120	120	–
Cost per inmate (excluding inmate pay)	$939	$948	$1,014	$66 (7%)
Inmate Movement:				
Institution:				
Received	2,081	1,710	1,920	–
Released	956	1,680	1,820	–
Total	3,037	3,390	3,740	350 (10.3%)

The increase of $293,586 is due primarily to the increased population, 38.5 proposed new positions, increased operating expenses and more accurate estimates on the operation of the new institution.

The camp program consists of two state forestry camps and three federal forestry camps. The entire costs of camp operations are reimbursed by the United States Forest Service and the State Division of Forestry.

---

[a] Composed of savings in salaries and wages, $122,525; operating expenses, $1,578; equipment, $3,256; inmate pay work projects, $3,681; and excess reimbursements, $5,692.

Department of Corrections

STATE PRISON AT SOLEDAD—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The increase of $217,498 is primarily due to 38.5 new positions. Complement positions affecting several institutions are explained under "State Prisons and Institutions" following the departmental summary. 18.5 miscellaneous positions are explained as follows:

1 Intermediate account clerk $2,706

This position is required to assist in the trust, canteen and hobby operations, the increased work load of which can no longer be handled by the one bookkeeping machine operator presently allowed for this work, due to the proportional increase of each of the following: institution population; additional forestry camp operations; expanded hobby program; increased number of releases; and establishment of industries pay plan from which inmates will receive earnings from the farm, clothing factory and furniture factory.

1 Intermediate clerk (mail room) 2,706

This position is necessary to assist in the mail room in the handling of more than 409,000 pieces of mail per year, including censoring of incoming and outgoing mail and maintenance of records of such correspondence.

13 Correctional officer 44,928

One position is requested to provide double coverage on the 2 p.m. to 10 p.m. shift in the general supervision of the homosexual unit, Wing Z, including exercising, bathing, shakedown of cells, issuance of supplies and laundry, feeding, recreation. A large number of these inmates will not have any work assignment. The afternoon and evening is when they have their greatest freedom within the wing and double coverage is necessary with this type of inmate.

Four—two positions are proposed for the 6 a.m. to 2 p.m. shift and two positions for the 2 p.m. to 10 p.m. shift to provide coverage in the main corridor for supervision of inmate activity in this area. One position during each shift will supervise feeding, work assignment, and school traffic from the control room to the East gate, while the other position will supervise this traffic from the control room to the West gate.

Four positions required to provide adequate supervision of the following inmate work crews: plumbing, carpentry, electrical, painting, and grounds. These additional positions will assist the maintenance foremen providing custodial supervision where it is not now available, including periodic checks, reporting of infractions, etc., and will also direct inmates on work crews.

Four positions are requested to provide relief for the above post assignments.

1 Instructor in electrical work 4,512

This position is required for the establishment of two 3-hour daily classes in industrial electrical shop services and repair, consisting of 15 to 20 inmates per class. Instruction will include elements of applied electricity, household electrical repairs, motor repairs and rewinding. The establishment of this class will provide another diversified field of vocational training not now offered in the institution, and will be a valuable asset to the ultimate rehabilitation of inmates. In addition to class instruction, this position will assist in the general institutional maintenance and servicing of electrical equipment, motors, etc.

1 Assistant instructor in physical education and recreation 4,512

This position is requested again to assist in organizing and directing the recreation program. The program operates 10 hours per day, 7 days per week and encompasses three separate yard areas and a gymnasium in the new institution and the gymnasium at the barracks (temporary institution), as well as at the five forestry camps. Program direction, supervision, and normal relief require two civil service positions at this dual institution as at Chino and San Quentin, even though inmate leaders may conduct individual games.

0.5 Locksmith (half time) 1,998

An additional half time position is required to assist the half time position presently established in the servicing and maintenance of all locks and locking devices in the institution. The 841 cylinder type and 369 tumbler type locks in the institution, in addition to the hospital and large number of prison locks and the 1,300 door closing devices requiring servicing, make it impossible for a half time position to satisfactorily carry on this work.

1 Steamfitter foreman 4,296

This position is proposed for adequate servicing and maintenance by a free person of the very complex heating and steam system of the institution, including steam lines, radiators, heating units, and pumps. These facilities are located primarily in the main corridor where inmates are working who must be under constant supervision. In addition, the position will be responsible for steam facilities in barracks and farm unit.

The decrease in estimated salary savings reflects the greatly improved employment situation.

OPERATING EXPENSES: The increase of $44,370 is due to population increases.

EQUIPMENT: The total of $14,970 is an increase of $7,022 from the $7,984 allowed in the 1952-53 budget. The major items of equipment are two replacement motor vehicles costing $3,900 for institution use and one motor vehicle for camp use costing $2,300.

DEUEL VOCATIONAL INSTITUTION

A medium security institution housing young adult male offenders committed both to the Youth Authority and the Department of Corrections. The new institution will also serve as a reception-guidance center for these offenders. The institution is temporarily located near Lancaster. The new permanent 1,200-capacity facilities will be completed and occupied in July, 1953.

Located at Tracy, San Joaquin County

[c] These inmates are fed, housed and otherwise cared for by the prison.

[d] Excluding cost of operating reception-guidance center.

Department of Corrections

DEUEL VOCATIONAL INSTITUTION—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

The proposed budget reflects the opening of the new institution at Tracy in July, 1953, with an eventual population of 1,150 on June 30, 1954, compared to a 555 population at Lancaster, together with the necessary additional staff to operate the larger permanent facility.

SALARIES AND WAGES: The increase of $492,204 is primarily accounted for by proposed new positions. The basic staff is scheduled to be effective July 1, 1953, unless otherwise noted. All positions in the Work Camp (Tracy) will be absorbed into the operation of the permanent institution at Tracy. Complement positions affecting several institutions are explained under "State Prisons and Institutions" following the departmental summary. The 80 miscellaneous positions are listed and individually explained below:

1 Intermediate typist-clerk (accounting office) $2,706

This position is proposed to do general typing and assist the senior account clerk on inmate trust accounting and the cashiering operation. This position, together with the additional senior typist-clerk (second personnel clerk) recommended, will provide a total accounting staff of 11 positions, compared to 12 or more in the other larger institutions (excluding Corona and Medical Facility). This represents the minimum staff necessary, considering the fact that wards cannot be used in this office.

1 Storekeeper I 3,456

This position, together with the two present storekeepers (one to be transferred from the Work Camp—Tracy) are proposed to operate the main inside warehouse and the outside receiving warehouse, including necessary relief.

1 Correctional officer (household supply officer) 3,456

This position is to be in charge of distribution of inmate personal items, such as towels, razors, soaps, etc. One such position is necessary and included in the post assignment of most other large prisons.

2 Intermediate typist-clerk (mail clerks, one effective July 1, 1953; one effective January 1, 1954) 4,026

It is estimated that 244,000 pieces of mail will be handled per year. On the basis of Soledad ratio of 100,000 pieces per employee, these two positions, in addition to present correctional sergeant, are proposed.

Additional custodial positions are proposed to properly man the new institutions as follows:

2 Correctional lieutenant $9,024

Posts *	*Coverage*	*No. of Positions*
Training lieutenant	2d shift	1
Outside and farm lieutenant (effective 10-1-53)	2d shift	1

DEUEL VOCATIONAL INSTITUTION—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
2 Stationary fireman				$6,912
These positions are to be in charge of the high pressure boiler operation and is similar staffing as in other prisons.				
1 Steamfitter foreman				4,296
This position is similar to one proposed at Soledad to provide proper maintenance of the expensive and complex steam and refrigeration installations by a skilled, technical position.				
1 Carpenter foreman				4,296
This position is to supervise an inmate work crew on repair and minor construction projects as part of the preventive maintenance program throughout the institution.				
1 Automotive mechanic foreman				4,296
This position, together with the present instructor, will supervise inmates in maintenance and repair of state automobiles, trucks, and other mechanized equipment. The institution will operate an inside garage and outside service station. Most large prisons have two positions on this operation.				
1 Locksmith				3,996
This position is to service and maintain all of the many locks and locking devices as well as armory equipment in this new institution. A similar position is established or proposed in the other large prisons.				
1 High school teacher (commercial)				4,512
This position will instruct a class in typing, bookkeeping, stenography and allied commercial subjects.				
1 Instructor in general shop				4,512
This position will conduct vocational orientation and small maintenance projects for 48 problem cases in the segregation unit.				
7 Vocational instructor (three effective July 1, 1953, two effective October 1, 1953, and two effective January 1, 1954)				24,816
These positions, in addition to the present 22 instructors, are a minimum staff, on a staggered basis, to serve the population increase to 1,150, until determination can be made as to the number and type of local school district instructors available in the Tracy area.				

OPERATING EXPENSES: The increase of $242,470 is due to increased population and expanded facilities.

EQUIPMENT: The total of $8,713 represents a decrease of $8,109 from the current year. The larger items include replacement of office furniture, $1,852; replacement of three barber chairs, $675; replacement of textbooks, $1,150.

REIMBURSEMENTS: The increase is due to increased employees and expanded correctional industries.

INSTITUTION FOR WOMEN

Receives and houses all female felons committed to prison. Academic and limited vocational training and a sewing industry are available. The institution was formerly located near Tehachapi, Kern County. The new institution was opened in August, 1952.

Located Near Corona, San Bernardino County

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$401,702	$463,244	$625,197	
Allocations from Salary Increase Fund	24,220	14,375	–	
Allocations from Price Increase Fund	26,861	–	–	
Allocations from Emergency Fund	9,855	–	–	
Total Available	$462,638	$477,619	$625,197	
Unexpended balance, estimated savings	—14,235 [a]	—16,464 [b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$448,403	$461,155	$625,197	$164,042 (35.6%)
OTHER CURRENT EXPENSES				
Expense of Moving from Tehachapi to Corona:				
Budget Act appropriation	–	$30,000	–	—$30,000
TOTAL EXPENDITURES	$448,403	$491,155	$625,197	$134,042 (27.3%)
GENERAL ANALYSIS				
Number of positions	*56.9*	*65*	*108*	*43*
POPULATION AND UNIT COSTS				
Average inmate population				
(1952-53 Governor's Budget)	393 (374)	410 (386)	473 –	63 (15.4%)
Cost per inmate	$1,141	$1,125	$1,322	$197 (17.5%)
Inmate Movement:				
Received	205	180	195	–
Released	152	150	155	–
Total	357	330	350	20

The proposed budget reflects a full years operation of this institution on the new site at Corona. The increase in expenditures reflects occupancy of the new institution in a more favorable employment situation than at Tehachapi which precluded the employment of persons necessary to properly supervise and operate the institution. Additional positions are proposed to provide more adequate staffing for the new institution.

SALARIES AND WAGES: The increase of $152,287 is accounted for as follows:

10½ new positions at a cost of $40,426 are complement positions affecting several institutions and are explained under "State Prisons and Institutions," following the departmental summary. 24.5 miscellaneous positions are individually explained below:

0.5 Accounting technician II (increase from half to full time) $1,647

A full-time property clerk is necessary to provide proper control of equipment in an institution of this size.

1 Intermediate typist-clerk (switchboard and information) 2,706

The large number of visitors and telephone calls, together with the arrangement of the building at the Corona location makes this position mandatory if the control room post is to function adequately. Any free time will be used for miscellaneous clerical work.

1 Supervisor-counselor III 4,512

This position will be responsible for direction of the custodial program and will be in charge of the institution when both the superintendent and assistant superintendent are absent. The position will be comparable to the correctional captain in the men's institutions. It will permit the assistant superintendent to head up the educational program.

4 Supervisor-counselor II 15,984

These positions are required as follows:
Custodial charge on 2 p.m. to 10 p.m. shift—1 position.
Custodial charge on 10 p.m. to 6 a.m. shift—1 position.
Relief for above assignments and the supervisor-counselor III—2 positions.
These positions are comparable to correctional lieutenant in the men's prisons.

14 Supervisor-counselor 22,984

These positions are required as follows:
Provide double coverage 8 a.m.-4 p.m. shift in existing 100-inmate cottages with two 50-inmate wings with separate dining rooms and day rooms—3 positions.
Clothing distribution officer for a problem common to all prisons and located in new commitment wing —1 position.
Provide 24-hour coverage with double coverage on first and second shifts in 100-inmate Cottage 4. This is a new unit—5 positions, effective June 1, 1954.
Relief for above assignments—5 positions, 3 effective June 1, 1954.

---

[a] Composed of savings in salaries and wages, $4,958; operating expenses, $7,154; equipment, $2,508; and loss in reimbursements, $385.

[b] Composed of savings in salaries and wages, $16,540; operating expenses, $2,745; and loss in reimbursements, $2,821.

Department of Corrections

INSTITUTION FOR WOMEN—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
1 Chaplain (increase from half to full time) The increase in time is necessary in order to provide an adequate religious program as a vital part of the rehabilitation program of this growing institution.				$4,980
1 Supervising groundsman This position is required to plan landscaping maintenance and to supervise inmates engaged in handling lawns, plants, shrubs, and trees. Will also order supplies and keep records of production.				3,810
1 Electrician This position is necessary to properly service the many complex electrical systems and devices at this institution.				3,996
1 Plumber This position will maintain the sewage disposal plant and all other fixtures requiring a plumber's attention.				3,996

The balance of the increase reflects an anticipated improvement in the employment situation, thus reducing salary savings.

OPERATING EXPENSES: The increase of $11,290 reflects population increases offset in part by decreases in medical, dental, and psychiatric contractual services.

EQUIPMENT: The total of $4,555 is a decrease of $389 from the amount provided in the 1952-53 Fiscal Year. Replacement of four sewing machines, $1,225, is the major item.

OTHER CURRENT EXPENSES: $30,000 was provided in the 1952-53 Fiscal Year to move the institution from Tehachapi to Corona.

ADULT AUTHORITY

This is the paroling agency for adult male prisoners of the State. As such, it issues and revokes paroles, fixes and refixes terms of imprisonment, classifies and determines punishment of prisoners. The Bureau of Paroles supervises all adult male parolees within the State. In the 1953-54 Fiscal Year a new special intensive parole unit and a parole outpatient clinic are planned to permit early release of certain prisoners and to offer psychotherapy to certain parolees, respectively.

Main Office at Sacramento

GENERAL ANALYSIS				
Number of positions	*118.1*	*125*	*162.5*	*37.5*
PAROLEE RATIOS AND UNIT COSTS				
Number of parolees supervised end of year	4,199	4,558	4,968	410 (9.9%)
Number of Parole Officers end of year	69	76	83	7 (9.2%)
Ratio of parolees to Parole Officers end of year	61	60	60	–
Average number of parolees supervised	3,988	4,436	4,777	341 (7.7%)
Cost per parolee	$135	$136	$142	$6 (4.4%)

Analysis

The increase is due to the continuing increase in total case load in the Bureau of Paroles, with an increase in number of parole officers and other expenses related thereto, the establishment of a Special Intensive Parole Unit to permit the early release of 800 additional prisoners or an average of 200 for a 90 day period, reduced from prison population, and placed under special parole, and the establishment of one parole outpatient clinic to offer group and individual psychotherapy to an average of 300 parole cases.

SALARIES AND WAGES: The increase of $169,085 is primarily due to proposed new positions for increased case load in the Bureau of Paroles, the new Special Intensive Parole Unit, and the new Parole Outpatient Clinic detailed as follows:

Bureau of Paroles:	
1 Parole officer II (effective January 1, 1954)	$2,256
4 Parole officer I (one each effective September 1, 1953, April 1, 1954, May 1, 1954, and June 1, 1954)	5,456
4 Educational interne (eight individuals—half time—effective August 1, 1953)	9,000
2 Intermediate stenographer-clerk (one each effective August 1, 1953 and April 1, 1954)	3,294
These positions will maintain a ratio of one parole officer to 60 parolees based on an increased parole population. The educational internes carry one-half of normal case load, thus offsetting two parole officers.	
1 Supervising clerk I	3,810
This position is proposed to re-establish a position transferred to the Department of Corrections, Departmental Administration in the 1952-53 Budget. The duties of this position consist of maintaining administrative statistics and controls on operating expenditures in accordance with the policies of the Adult Authority, an independent administrative board.	
Special Intensive Parole Unit:	
3 Parole officer II	$13,536
14 Parole officer I	57,288
5 Intermediate stenographer-clerk	14,220
These positions will provide staff for a ratio of one parole officer I to each 15 parolees for a 90-day period for an average of 200 parolees. Necessary supervision and clerical staff are also provided.	
Outpatient Parole Clinic:	
1 Chief psychiatrist	9,852
1 Senior clinical psychologist	5,496
1 Senior sociologist	4,980
1 Senior psychiatric social worker	4,512
1 Senior stenographer-clerk	3,294
Temporary help (clerical)	200
These positions will provide a professional working head, clinical team, and clerical help to conduct group and individual psychotherapy to an average of 300 parole cases.	

---

[a] Composed of savings in salaries and wages, $865; operating expenses, $9,352; equipment, $332; and excess reimbursements, $84.
[b] Composed of savings in operating expenses, $415.

Department of Corrections

ADULT AUTHORITY—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: The increase of $91,430 is due to increased case load in the Bureau of Paroles; the new Special Intensive Parole Unit, including $30 per week for two weeks' assistance to special parolees partially offset by increased reimbursements; and the new Parole Outpatient Clinic.

EQUIPMENT: The increase of $91,430 is chiefly due to additional automobiles and equipment in the Special Intensive Parole Unit and additional office equipment in the Parole Outpatient Clinic.

REIMBURSEMENTS: The increase of $26,115 is primarily due to an estimated 50 percent recovery of advances to parolees in the new Special Intensive Parole Unit.

Total Available	$61,586	$70,954	$72,862	
Unexpended balances, estimated savings	—3,819[a]	–	–	
TOTAL EXPENDITURES FOR SUPPORT	$57,767	$70,954	$72,862	$1,908 (2.7%)
GENERAL ANALYSIS				
Number of positions	*7.9*	*9*	*9*	–
PAROLE RATIOS				
Average number of paroles supervised	221	268	296	28 (10.4%)
Average number of parole officers	3.9	4.5	5	0.5 (11.1%)
Average case load per parole officer	57	60	59	—1 (—1.7%)

In general. the increase in expenditures is due to the increase in parole population.

SALARIES AND WAGES: The increase of $3.205 is chiefly due the full-year cost of one additional parole officer established January 1, 1953, on the basis of increased work load.

OPERATING EXPENSES: The increase of $1,005 reflects increased expenditures of the additional parole officer and includes out-of-state travel for one board member to attend the American Prison Congress.

EQUIPMENT: The total of $732 includes three additional files for increased parole population.

Department of Corrections

YOUTH AUTHORITY

The Youth Authority has the responsibility for classification, segregation, and parole of all young offenders committed to it. It exercises over-all supervision of the various correctional facilities for young offenders including custody and rehabilitation. It also administers the parole program.

Consultant services are provided to judges, probation officers, juvenile halls, and law enforcement bureaus. Regular inspections of county-operated camps are made and standards set for payment of subsidies. Advisory services are rendered to community agencies interested in youth welfare and delinquency prevention.

Department of Corrections—Youth Authority

DEPARTMENTAL ADMINISTRATION

Departmental Administration includes a number of divisions supervising or exercising centralized control over all phases of the Youth Authority program. Included are Authority in which is budgeted the expenses of two members of the three-member board, the chairman being the director who is included in the Division of Administration. The Division of Administration provides central control and unified management of the several divisions and facilities, maintains central case files, and provides transportation of wards between the facilities and deportations. The Bureau of Delinquency Prevention functions in direct contact with community agencies interested in youth welfare and delinquency prevention and includes the expenses of the interstate probation compact. The Bureau of Paroles provides parole supervision of wards released on parole after a training period in the various schools and camps. The Division of Diagnosis and Classification is responsible for making a clinical study of each youth at the time of commitment to aid in the best possible assignment for training. The Division of Training and Treatment supervises the operation of the schools and camps and is responsible for the continuing re-evaluation and development of their programs.

TOTAL EXPENDITURES	$1,164,326	$1,309,111	$1,396,612	

GENERAL ANALYSIS

In general the support increases are based on increases in parole and institutional population and improvement in ratios of parolees to placement officers. The increase is partially offset by the transfer of positions in the Bureau of Paroles and the Division of Diagnosis and Classification to other facilities.

Girls case load	727	816	892	76
Totals	4,383	4,800	5,250	450 (9.4%)
Number of Parole Officers End of Year:				
Boys	49	55	64	9
Girls	13	15	18	3
Totals	62	70	82	12 (17.1%)
Ratio of Parolees to Parole Officers:				
Boys	75	72	68	—4
Girls	56	54	51	—3
Over-all ratio of parolees to parole officers	71	69	64	—5
Average number of parolees supervised	4,188	4,610	5,044	434 (9.4%)
Cost per parolee	$126	$133	$136	$3 (2.3%)

SALARIES AND WAGES: The increase of $40,018 is primarily due to the following:

Proposed New Positions:

1 Junior staff analyst	$4,440
This position is to provide administrative assistance to the director and the administrative officer in making special investigations, analyses, and surveys caused by the continuing growth of the Youth Authority and its program.	
1 Intermediate typist-clerk	2,706
This position is required in the personnel section to handle increased work load resulting from the increased number of Youth Authority employees, especially at Paso Robles, Los Guilucos, and the new reception center at Sacramento.	
1 Field representative	4,980
1 Intermediate stenographer-clerk	2,844
These positions provide the necessary staff for the work of the interstate probation compact which has previously been absorbed but has grown to the point where this is no longer possible.	
3 Supervising placement officer (two effective July 1, 1953, and one September 1, 1953)	14,824
3 Placement officer II (one effective July 1, 1953, one October 1, 1953, and one March 1, 1954)	9,400
6 Placement officer I (two effective July 1, 1953, one November 1, 1953, one January 1, 1954, one May 1, 1954, and one June 1, 1954)	13,981
4 Intermediate stenographer-clerk (two effective July 1, 1953, one October 1, 1953, and one March 1, 1954)	8,727

These positions provide for the continued increase in parole population and include a new work load ratio of parolees to placement officers which is proposed in order to provide a case load per officer in actual contact with the parolees of 80 to 1 for boys and 60 to 1 for girls. A revision in ratio of supervising placement officers to placement officers II and I from 10 to 1 to 8 to 1 is also provided. In arriving at the over-all ratios used in computing placement officer requirements, the assistant chief, placement, two placement officers II (serving forestry camps and Department of Corrections facilities on preparole work) and a placement officer II (assigned to deportations) are excluded and the two Youth Authority trainees are allowed on a half case load basis.

The ratio of officers to boys is a continuation of the ratio originally authorized several years ago. The ratio as assigned by the Bureau of Paroles in carying out its function has actually been higher than this because of the greater degree of parole supervision required for girl parolees. This increased supervision has resulted in a larger case load for the other placement officers. Staff is budgeted on the basis of a lower ratio for girl parolees, so that the original ratio of officers to boys may be restored.

The ratio of supervising placement officers to other placement officers is being reduced to provide better supervision and training of the placement officers and better review of parolee case records. This is also necessitated, at least in part, by the girl parolee problem.

Department of Corrections—Youth Authority

DEPARTMENTAL ADMINISTRATION—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
1 Supervisor of education				$7,008
This position centralizes the supervision of the schools important educational programs in one position and relieves the chief of the division from over-emphasis in this one area.				
Positions Now Authorized:				
3 Placement officers II				—15,842
2.5 Senior clinical psychologist				—15,286
4 Intermediate stenographer-clerk				—12,680
These positions are being transferred to various institutions' classification and counseling units.				
1 Supervisor of clinical psychology				—2,704
2 Senior clinical psychologist				—3,566
2 Educational interne				—1,760
1 Senior clerk				—1,240
4 Intermediate stenographer-clerk				—2,602
These positions are being transferred to the Reception Center at Sacramento effective on various dates beginning March 1, 1954.				
Positions Being Abolished:				
1 Intermediate typist-clerk				—2,988
This position is abolished effective October 31, 1952 as the function previously performed is now being handled by the Department of Justice.				
1 Senior clinical psychologist				–
This position is being abolished effective June 30, 1954 as it will no longer be necessary with the opening of the Reception Center at Sacramento.				

OPERATING EXPENSES: The increase of $23,627 is primarily due to the increased parole and institutional population.

EQUIPMENT: The total of $37,004 represents an increase of $4,911 over the current year. Major items include replacement of automobiles, $5,750; additional automobiles for proposed new placement officers, $9,600; four additional automobiles for low mileage placement officers on a pool basis, $6,400.

NORTHERN CALIFORNIA RECEPTION CENTER AND CLINIC

A reception center for boys received from Northern California and all girls from the entire State. The major purpose of this facility will be to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological, and psychiatric treatment will be given. Serious medical and psychiatric cases developing in the schools will also be treated. Approximately 1,350 boys and girls will be processed each year.

The new institution will be completed in February, 1954, with a capacity of 150. The first wards will be received March 1, 1954. The ultimate planned capacity is 250.

Located Near Sacramento

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
SUPPORT				
Budget Act appropriation	–	–	$231,731	
OTHER CURRENT EXPENSES				
Initial Inventory and Supplies and Employees' Moving Expenses:				
Budget Act appropriation	–	–	16,000	
TOTAL EXPENDITURES	–	–	$247,731	
GENERAL ANALYSIS				
Number of positions	–	–	*120.5*	
WARDS RECEIVED AND UNIT COSTS				
Total wards received	–	–	360	
Cost per ward received	–	–	$644	

Per capita cost is based on the number of wards received rather than average population as this facility is primarily engaged in the reception process rather than domiciliary care and treatment. The cost per ward received is higher the first fiscal year because, of necessity, several positions are established prior to the actual opening of the institution and overhead costs are distributed to a lower number received.

SALARIES AND WAGES: The total of $182,221 includes the following:

Proposed New Positions:

1 Superintendent (effective September 1, 1953)	$7,820
1 Senior stenographer-clerk (effective September 1, 1953)	2,732
These positions provide over-all administrative supervision of the institution and provide necessary clerical assistance.	
2 Intermediate typist-clerk (information and switchboard) effective March 1, 1954	1,760
These positions provide seven-day per week information and switchboard coverage.	
1 Business manager I (effective September 1, 1953)	4,580
This position supervises the business activities of the institution.	
1 Storekeeper I (effective December 1, 1953)	1,981
This position is in charge of receiving and issuing stores and maintaining an inventory and control of stock on hand.	
1 Intermediate stenographer-clerk (effective March 1, 1954)	924
This provision provides clerical assistance to the business office.	
Temporary help	1,000
This finances preparation of initial equipment records, installation of equipment, and other temporary help which may be required in the business office.	
1 Supervising cook I (effective February 1, 1954)	1,475
4 Cook (two effective February 15, 1954, and two March 1, 1954)	4,556
4 Kitchen helper (effective March 1, 1954)	3,200
4 Dining room assistant (three effective February 15, 1954, and one March 1, 1954)	3,500
Temporary help	6,000
These positions together with temporary help staff the kitchen, mess halls, and hospital diet kitchen as required on a post assignment basis. Temporary help is equivalent to the salary costs of 4.5 kitchen helpers and 3 dining room assistants and is included in the event experience proves that inmate labor cannot be used in the culinary operations.	
1 Head janitor (effective February 15, 1954)	1,265
5 Janitor (effective February 15, 1954)	4,950
These positions provide janitor service on a 7-day per week basis in the hospital and recreation buildings and on a 5-day per week schedule in the administration and education buildings.	
1 Boys' group supervisor (effective February 1, 1954)	1,405
This position will handle clothing and laundry distribution.	
1 Head boys' group supervisor (effective February 1, 1954)	1,975
5 Assistant head boys' group supervisor (effective February 15, 1954)	7,673
3 Assistant head girls' group supervisor (effective February 15, 1954)	4,605
2 Senior boys' group supervisor (effective February 15, 1954)	2,790
1 Senior girls' group supervisor (effective February 15, 1954)	1,395
31 Boys' group supervisor (effective February 15, 1954)	39,215
9 Girls' group supervisor (effective February 15, 1954)	11,385
The above custodial positions are required on a post assignment basis to cover a minimum number of custodial posts.	
1 Intermediate stenographer-clerk (effective February 1, 1954)	1,155
This position provides clerical coverage in the custodial section.	
1 Director of clinical services (effective September 1, 1953)	10,000
1 Senior stenographer-clerk (effective December 1, 1953)	1,876
These positions provide supervision of the clinical diagnosis and treatment activities of the institution together with necessary clerical assistance.	
1 Physician and surgeon II	3,042
0.5 Physician and surgeon II (half time)	1,521

SALARIES AND WAGES—Continued				
Proposed New Positions—Continued				
2 Senior dentist				$5,796
1 Dental hygienist				1,395
1 Clinical laboratory technician				1,265
1 Supervising nurse I				1,395
4 Graduate nurse				5,060
1 Surgical nurse				1,328
Temporary help (graduate nurse)				250
Temporary help (medical consultant)				1,000
These positions are effective February 15, 1954, and provide the necessary medical and dental staff to process the wards received and will care for serious medical cases developing in the other schools.				
1 Intermediate stenographer-clerk (effective February 15, 1954)				1,040
This position will provide clerical assistance to the medical, dental, and hospital staff.				
2 Senior psychiatric social worker (effective February 15, 1954)				3,384
These positions will do psychiatric social work with emotionally disturbed wards.				
1 Supervisor of clinical (special) education (effective February 15, 1954)				2,385
5 Youth Authority teacher (three effective February 15, 1954, one April 1, 1954, and one May 1, 1954)				6,956
1 Instructor in general shop (effective February 15, 1954)				1,692
1 Home economics teacher (effective February 15, 1954)				1,692
2 Recreational therapist (effective February 15, 1954)				2,790
These positions provide personnel for a school program of group testing, orientation, observation of handicaps, group counseling and guidance rather than academic training.				
1 Intermediate stenographer-clerk (effective February 15, 1954)				1,040
This position provides clerical assistance to the education section.				
Chaplain—Protestant (intermittent) effective March 1, 1954				270
Chaplain—Catholic (intermittent) effective March 1, 1954				270
These provide one religious service per week for each major faith.				
1 Chief of institution maintenance (effective December 1, 1953)				2,905
1 Carpenter (effective March 1, 1954)				1,300
1 Painter (effective March 1, 1954)				1,300
1 Plumber (effective March 1, 1954)				1,300
1 Building maintenance man (effective March 1, 1954)				1,072
1 Groundsman and flower gardener (effective March 1, 1954)				924
1 Electrician (effective March 1, 1954)				1,300
Institution firefighter (8 intermittent)				384
These positions provide necessary maintenance and fire protection staff.				
Temporary help				200
This provides assistance in installing the original landscaping.				
1 Automotive equipment operator (effective December 1, 1953)				1,876
This position will act as institution truck driver and will primarily deliver supplies and laundry.				
Positions Now Authorized:				
1 Supervisor of clinical psychology (effective March 1, 1954)				2,704
1 Senior clinical psychologist (one effective March 1, 1954, and one May 1, 1954)				3,566
2 Interne in clinical psychology (effective March 1, 1954)				1,760
1 Senior typist-clerk (effective March 1, 1954)				1,240
4 Intermediate typist-clerk (two effective March 1, 1954, one May 1, 1954, and one June 30, 1954)				2,602
These positions are transferred from the Division of Diagnosis and Classification and provide the psychology professional staff, in addition to the two senior psychiatric social workers, and the clerical case work section.				
Estimated salary savings				*—15,000*
Impossibility to fill positions as budgeted will result in substantial salary savings partially offset by transfers of positions from other facilities at higher than minimum salary levels as budgeted.				

OPERATING EXPENSES: The total of $56,970 includes the expenses of operating the institution after March 1, 1954 and initial costs incurred by several key positions established in advance of the institutions' opening. The adequacy of the amount budgeted for laundry, $3,500, on a contract basis, will be further reviewed to determine actual requirements.

Department of Corrections—Youth Authority

SOUTHERN CALIFORNIA RECEPTION CENTER AND CLINIC

A reception center for boys received from Southern California. The major purpose of this facility will be to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological, and psychiatric treatment will be given. Approximately 1,650 boys will be processed each year.

The new facility will be completed in July, 1954, with a capacity of 250. The ultimate planned capacity is 350.

Located Near Norwalk

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
SUPPORT				
Budget Act appropriation	–	–	$21,767	
GENERAL ANALYSIS				
Number of positions	–	–	*6*	–

This budget includes establishment of certain key positions prior to the opening date of the institution in order to provide time to prepare the institution for opening, plan operating procedures, and recruiting.

SALARIES AND WAGES: The total of $18,097 includes the following proposed new positions:

1 Superintendent (effective January 1, 1954)	$4,692
1 Senior stenographer-clerk (effective January 1, 1954)	1,608
These positions provide over-all administrative supervision and planning for the institution and necessary clerical assistance.	
1 Business manager I (effective January 1, 1954)	2,748
This position will provide supervision of the business affairs of the institution.	
Temporary help	1,000
This amount finances temporary help as required for installation of equipment, establishing initial equipment records, and other duties in the business office.	
1 Director of clinical services (effective January 1, 1954)	6,000
1 Senior stenographer-clerk (effective April 1, 1954)	804
These positions provide supervision of the clinical staff and necessary clerical assistance.	
1 Chief of institution maintenance I (effective April 1, 1954)	1,245
This position provides supervision of the maintenance staff and will also perform some maintenance work.	

OPERATING EXPENSES: The total of $3,670 is entirely due to the costs incurred by the positions established in advance of opening.

FORESTRY CAMPS FOR BOYS

These are correctional facilities for boys in the 17 to 21 age group. On-the-job training in fire prevention and suppression, and other work are carried on under the direction of the Division of Forestry. The Youth Authority also carries on a program of education, recreation, and religious training.

The Whitmore Camp was closed permanently in January, 1952. An additional spike camp was opened at Blaisingame and is operated out of Coarsegold.

Pine Grove Camp is located 10 miles north of Jackson, Amador County.
Ben Lomond Camp is located 10 miles northeast of Santa Cruz, Santa Cruz County.
Whitmore Camp was located 38 miles east of Redding, Shasta County.
Coarsegold Camp is located 35 miles east of Fresno, Fresno County.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY				
General Fund				
SUPPORT				
Camp Supervision	$7,605	$8,983	$8,331	—$652
Pine Grove	146,033	178,356	166,372	—11,984
Whitmore	66,394	–	–	–
Coarsegold	201,259	254,237	256,208	1,971
Ben Lomond	110,854	127,666	130,172	2,506
Totals, Camp Operations	$532,145	$569,242	$561,083	—$8,159
Payments from Division of Forestry	—532,145	—569,242	—561,083	8,159
NET TOTAL EXPENDITURES FOR SUPPORT	–	–	–	–
RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation (advance from Division of Forestry) [a]	$80,000	$80,000	$100,000	
Return of advance from Division of Forestry	—80,000	—80,000	—100,000	
NET TOTAL EXPENDITURES	–	–	–	
GENERAL ANALYSIS				
Number of positions	*73.9*	*65.8*	*65.8*	–
POPULATION AND UNIT COSTS				
Average Inmate Population:				
Pine Grove Camp	77	100	90	—10
Whitmore Camp	50	–	–	–
Coarsegold Camp	92	131	125	—6
Ben Lomond Camp	61	69	70	1
TOTALS, ALL CAMPS	280	300	285	—15 (5%)
Average Cost per Inmate (Excluding Inmate Pay)	$1,777	$1,754	$1,826	$72 (4.1%)

The decrease in expenditures is due to returning to the normal population level of 285 in the budget year after a temporary increase in the budget year to relieve the county jails.

SALARIES AND WAGES: The increase of $3,993 is partly due to the following:
Proposed New Positions (four spike camps):

Senior boys' group supervisor (replacing four boys' group supervisors)	$816

These replacements are to provide better supervision and establish responsibility in each of the spike camps.

OPERATING EXPENSES: Decrease of $8,400 is due to the decrease in population.

EQUIPMENT: The total of $10,833 represents a decrease of $1,612 from the current year. Major items include replacement of a refrigerator, $2,000, at Pine Grove; replacement of an automobile, $1,050, at Coarsegold; and replacement of feeding and housekeeping equipment, $3,235.

INMATE PAY-WORK PROJECTS: The total of $42,895 represents a decrease of $2,140 from the current year. This decrease is due to the population decrease.

FRICOT RANCH SCHOOL FOR BOYS

minimum security correctional school for boys in the 8 to 15 age group. The school program embraces academic and prevocational instruction, and limited agricultural and work projects.

Located 11 miles east of San Andreas, Calaveras County

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$239,336	$284,892	$327,052	
Allocations from Salary Increase Fund	18,810	14,790	–	
Allocations from Emergency Fund	1,500	4,168	–	
Allocations from Price Increase Fund	3,075	–	–	
Transferred from another institution	1,500	–	–	
Total Available	$264,221	$303,850	$327,052	
Unexpended balance, estimated savings	—1,100 a	—29 b	–	
TOTAL EXPENDITURES FOR SUPPORT	$263,121	$303,821	$327,052	$23,231 (7.6%)
GENERAL ANALYSIS				
Number of positions	*46*	*52.3*	*56.3*	*4*
POPULATION AND UNIT COSTS				
Average pupil population	140	140	140	–
Average cost per pupil	1,870	2,170	2,336	166 (7.6%)

In general the increase in per capita costs is due to occupancy of new facilities and additional positions.

SALARIES AND WAGES: The increase of $22,021 is largely due to the following:

Proposed New Positions:		
1	Boys' group supervisor	$3,456
	This position is to provide for transportation of wards, emergency trips, and to provide necessary relief on a post assignment basis.	
	Senior boys' group supervisors (replacing three boys' group supervisors)	612
	These replacements are to provide better supervision and establish responsibility in each cottage.	
0.5	Senior clinical psychologist (increase to full time)	3,117
1	Placement officer II	4,512
1	Intermediate stenographer-clerk	2,844
	These positions, together with a half-time senior clinical psychologist being transferred from the Division of Diagnosis and Classification, form a classification and counseling unit which will provide professional guidance on an individual ward basis.	
Positions Now Authorized:		
0.5	Senior clinical psychologist	3,118
	This position is being transferred from the Division of Diagnosis and Classification, Departmental Administration, as part of the classification and counseling unit.	

OPERATING EXPENSES: Increase of $1,380 is due to price changes and the occupancy of additional buildings.

EQUIPMENT: The total of $4,753 represents an increase of $1,630 over the current year. The only major item included is the replacement of a truck, $2,300.

Average pupil population	310	310	310	–
Cost per pupil	$2,294	$2,456	$2,540	$84 (3.3%)

SALARIES AND WAGES: The increase of $16,232 results primarily from the following:

Proposed New Positions:

1 Senior typist-clerk	$3,138
This position will provide a personnel clerk, thus relieving the superintendent's secretary of these duties, and allowing time for typing discipline reports, minutes, and other material as recommended by the Board of Corrections and will also provide some vacation relief.	
Senior boys' group supervisors (replacing 10 boys' group supervisors)	2,040
These replacements are to provide better supervision and establish responsibility in each cottage.	
1 Placement officer II	4,512
0.5 Placement officer II (increase to full time)	2,256
1 Intermediate stenographer-clerk	2,844
These positions, together with existing positions and positions being transferred from the Bureau of Paroles, form a classification and counseling unit which will provide professional guidance on an individual ward basis.	
Positions Now Authorized:	
0.5 Placement officer II (half time)	2,256
0.5 Intermediate stenographer-clerk (half time)	1,679
These positions are being transferred from the Bureau of Paroles, Departmental Administration, as part of the proposed classification and counseling unit.	
Positions To Be Abolished:	
2 Telephone operators	—6,432
These positions are being abolished effective March 31, 1953 as a new automatic switchboard is being installed. The remaining two positions will provide 12-hour per day coverage.	

OPERATING EXPENSES: The increase of $3,420 is primarily due to installation of automatic switchboard.

EQUIPMENT: The total of $17,728 represents an increase of $4,.414. Major items include cottage furniture, $1,950; motion picture amplifier, $2,800; fuel oil pumps, $1,250; motor vehicle equipment, $1,775, and an additional draft gauge and oil meter, $1,000.

PASO ROBLES SCHOOL FOR BOYS

correctional school for boys in the 14 to 16 age group. The program is primarily prevocational and academic education. Limited agricultural instruction is also given. The new permanent facilities with 375 capacity will be completed in October, 1953.

Located near Paso Robles, San Luis Obispo County.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$281,573	$307,114	$509,057	
Allocations from Salary Increase Fund	20,618	14,308	–	
Allocations from Price Increase Fund	6,885	–	–	
Allocations from Emergency Fund	–	2,945	–	
Total Available	$309,076	$324,367	$509,057	
Unexpended balance, estimated savings	—2,895 a	—45 b	–	
TOTAL EXPENDITURES FOR SUPPORT	$306,181	$324,322	$509,057	$184,735 (57%)
GENERAL ANALYSIS				
Number of positions	*54*	*55*	*112.3*	*57.3*
POPULATION AND UNIT COSTS				
Average pupil population	137	135	210	75 (55.6%)
Cost per pupil	$2,247	$2,402	$2,424	$22 (0.9%)

The increase in per capita cost is due to proposed new positions and operation of the expanded plant. In the subsequent fiscal year the per capita cost should decrease as the full population of 335 will be maintained for a complete fiscal year.

SALARIES AND WAGES: The increase of $121,942 is primarily due to staff for the new expanded school and includes the following:

Proposed New Positions:

	Assistant superintendent (replacing supervisor of academic instruction—effective October 1, 1953)	$234
	This position is to strengthen top level supervision with particular emphasis on the educational, counseling, and in-service training programs.	
1	Senior account clerk	3,138
	This position will act as property clerk and will also assist on inmate trust accounts and other accounting work.	
1	Intermediate stenographer-clerk (effective October 1, 1953)	2,115
	This position will provide clerical assistance to the business manager and storekeeper who are located in the commissary building.	
2	Intermediate typist-clerk (effective November 1, 1953)	3,564
	These positions establish 11-hour per day telephone switchboard and receptionist coverage and will do miscellaneous typing as time permits.	
1	Supervising cook II (effective November 1, 1953)	2,728
1	Cook (effective November 1, 1953)	2,170
3	Dining room assistant (effective November 1, 1953)	4,860
1	Baker (effective November 1, 1953)	2,170
	These positions, together with existing positions, will provide the following coverage: Supervising cook II—Eight hours per day, seven days per week. Kitchen—One cook on two shifts per day, seven days per week. Wards' and employees' dining room and scullery—12 hours per day, seven days per week. Baker—Five days per week. Meat cutting will also be done by the cooks.	
1	Seamstress (effective January 1, 1954)	1,608
1	Shoemaker (effective January 1, 1954)	1,950
	These positions will provide shoe and clothing repairs and vocational training and some manufacture of clothing.	
–	Janitor (replacing one housemother—effective November 1, 1953)	251
	To provide janitor service in the school principal's office, library and workshop, and 12 classrooms.	
1	Laundry supervisor (effective November 1, 1953)	2,632
	This position will supervise the operation of the new laundry.	
2	Assistant head boys' group supervisors (effective November 1, 1953)	5,264
	Together with existing positions, these positions will provide 24-hour, seven day per week supervisory coverage.	
4	Senior boys' group supervisors (one effective July 1, 1953, one November 1, 1953, one April 1, 1954, and one June 1, 1954)	7,560
	Senior boys' group supervisor (replacing three boys' group supervisors)	612
21	Boys' group supervisors (10 effective November 1, 1953, five April 1, 1954, and six June 1, 1954)	28,662
	Together with existing positions to provide around-the-clock coverage at six new cottages, the segregation unit, and the receiving unit, with the senior positions providing an additional post to provide supervision and responsibility in each cottage and the detention unit.	
1	Barber (effective January 1, 1954)	1,458
	This position is to provide barbering services for the increased population.	
0.7	Physician and surgeon II (increase to full time—effective November 1, 1953)	3,787
0.2	Senior dentist (increase to half time—effective November 1, 1953, expires June 30, 1954)	785
	These positions will provide necessary medical and dental services for the increased population.	
1	Surgical nurse (effective October 1, 1953)	2,700

---

a Composed of savings in salaries and wages, $1,138; operating expenses, $1,093; equipment, $2,132; and a loss in reimbursements, $1,468.

b Composed of savings in salaries and wages, $45.

Department of Corrections—Youth Authority

PASO ROBLES SCHOOL FOR BOYS—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SALARIES AND WAGES—Continued				
2 Graduate nurse (effective November 1, 1953)				$4,552
Together with an existing position, these positions will provide 16-hour, seven-day per week graduate nurse coverage. The surgical nurse will assist in surgery and supervise the other nurses.				
4 Youth Authority teachers (one effective December 1, 1953, one March 1, 1954, one April 1, 1954, and one June 1, 1954)				5,640
1 Instructor in general shop (effective October 1, 1953)				3,384
1 Music teacher (effective November 1, 1953)				1,860
These positions, together with existing positions, will provide classroom instruction on a ratio of full time equivalent students to teachers of 15 to 1.				
1 Librarian (effective November 1, 1953)				2,066
This position will supervise the new library.				
0.7 Chaplain—Catholic (increase to full time—effective November 1, 1953)				2,213
0.7 Chaplain—Protestant (increase to full time—effective November 1, 1953)				2,089
These positions will provide full time chaplain service for the increased population.				
1 Intermediate stenographer-clerk (effective November 1, 1953)				1,872
To provide stenographic service for the school.				
0.1 Motion picture operator (overtime)				280
Required to operate the motion picture projector for inmate movies.				
1 Senior clinical psychologist				5,496
0.5 Placement officer II (increase to full time)				2,748
0.5 Intermediate stenographer-clerk (increase to full time)				1,686
Together with positions being transferred from Departmental Administration, these positions form the classification and counseling unit, which will provide professional guidance on an individual ward basis.				
1 Electrician (effective November 1, 1953)				3,282
1 Automobile mechanic (effective November 1, 1953)				2,634
1 Painter (effective April 1, 1954)				975
These positions provide necessary additional staff to maintain the expanded facilities and the automotive equipment.				
1 Stationary engineer (effective October 1, 1953)				2,973
2 Stationary firemen (effective October 1, 1953)				5,142
These positions provide 16-hour per day, seven day per week coverage on new high pressure boilers.				
Positions Now Authorized:				
0.5 Placement officer II (half time)				2,748
0.5 Intermediate stenographer-clerk (half time)				1,686
These positions are being transferred from the Bureau of Paroles, Departmental Administration, and with the proposed new positions form the classification and counseling unit.				

OPERATING EXPENSES: The increase of $63,870 is due to increased population and expanded facilities.

EQUIPMENT: The total of $9,560 represents an increase of $3,473 over the current year. Major items include an additional truck $1,525; a used bus, $1,250; and band instruments, $4,015, to organize a 35-boy school band.

Department of Corrections—Youth Authority

PRESTON SCHOOL OF INDUSTRY

A correctional school for boys in the 15 to 21 age group. The training program consists of classroom instruction, shop classes and apprenticeship training in more than 25 trades and occupations.

Located Near Ione, Amador County

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$1,241,908	$1,382,443	$1,477,910	
Allocations from Salary Increase Fund	100,880	65,040	–	
Allocations from Price Increase Fund	25,380	–	–	
Allocations from Emergency Fund	15,479	15,600	–	
Transferred from another institution	5,600	–	–	
Total Available	$1,389,247	$1,463,083	$1,477,910	
Unexpended balance, estimated savings	—1,552 [a]	—2,146 [b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$1,387,695	$1,460,937	$1,477,910	$16,973 (1.2%)
OTHER CURRENT EXPENSES				
Replacement of Fire Loss—Laundry:				
Allocations from Emergency Fund	–	$1,700	–	—$1,700
TOTAL EXPENDITURES	$1,387,695	$1,462,637	$1,477,910	$15,273 (1%)
GENERAL ANALYSIS				
Number of positions	*257.9*	*258.5*	*262.5*	*4*
POPULATION AND UNIT COSTS				
Average Pupil Population:				
At school	525	525	556	
At diagnostic clinic [c]	125	125	94	
Total	650	650	650	
Average institutional cost per pupil [d]	$2,134	$2,248	$2,274	$26 (1.2%)

SALARIES AND WAGES: The increase of $20,698 is largely due to the following:

Proposed New Positions:	
1 Painter	$3,996
1 Building maintenance man	3,294
These positions are required to properly maintain buildings and equipment added in recent years and to help keep maintenance on a current basis.	
Senior boys' group supervisor (replacing 15 boys' group supervisors)	3,060
These replacements are to provide better supervision and establish responsibility in each dormitory.	
Positions Now Authorized:	
1 Placement officer II	5,452
1 Intermediate stenographer-clerk	3,372
These positions are transferred from the Bureau of Paroles, Departmental Administration and together with positions already established at the institution form the classification and counseling unit.	

OPERATING EXPENSES: The increase of $9,045 is primarily due to increased farm activities and increased maintenance of structures.

EQUIPMENT: The total of $31,665 represents a decrease of $1,945 from the current year. Major items include a replacement carryall, $1,700; a replacement truck, $3,850; replacement laundry equipment, $6,620; replacement poultry, $1,100; and replacement cattle, $4,000.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	52-53 (Auth.)	53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
ADMINISTRATION						
SALARIES AND WAGES						
Executive:				SALARY RANGE		
Superintendent	1	1	1	$782–950	$11,400	$11,400
Senior stenographer-clerk	1	1	1	268–325	3,900	3,900
General Office:

LOS GUILUCOS SCHOOL FOR GIRLS

A correctional school for girls in the 8 to 15 age group. The program consists of academic training, domestic arts, and a rounded recreation program. The new permanent facilities are scheduled for completion in October, 1953.

Located near Santa Rosa, Sonoma County

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$286,604	$430,121	$543,208	
Transferred from Budget Act Appropriation to other institutions	—18,600	–	–	
Allocations from Salary Increase Fund	20,358	19,067	–	
Allocations from Price Increase Fund	8,002	–	–	
Total Available	$296,364	$449,188	$543,208	
Unexpended Balance, estimated savings	—12,739 [a]	—34,851 [b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$283,625	$414,337	$543,208	$128,871 (31.1%)
GENERAL ANALYSIS				
Number of positions	*52.9*	*72.6*	*104.3*	*31.7*
POPULATION AND UNIT COSTS				
Average pupil population	116	155	199	44 (28.4%)
Average cost per pupil	$2,396	$2,673	$2,730	$57 (2.1%)

The increase in per capita cost is due to the expanded plant and new positions. In the subsequent fiscal year per capita costs should decrease because the maximum population (240) will be maintained for the entire year.

SALARIES AND WAGES: The increase of $97,582 is primarily due to the following:

Proposed New Positions:

1 Assistant superintendent (replacing supervisor of academic instruction—effective September 1, 1953)	$260
This position is to strengthen top level supervision with particular emphasis on the educational, counseling, and in-service training programs.	
1 Accounting officer I (effective January 1, 1954)	2,046
1 Senior account clerk (effective January 1, 1954)	1,608
1 Intermediate account clerk (effective January 1, 1954)	1,320
1 Bookkeeper machine operator (effective January 1, 1954)	1,386
These positions are to establish an accounting office at the institution rather than in Departmental Administration as at present.	
1 Senior typist-clerk	3,138
This position will provide a personnel clerk and will also do miscellaneous typing as time permits.	
1 Intermediate typist-clerk	2,706
This position will provide necessary switchboard and information desk relief and vacation relief for the stenographers.	
1 Supervising cook I	3,630
1 Dining room assistant	2,460
0.1 Butcher-meat cutter I (part time)	485
These positions are to provide necessary culinary relief on a post assignment basis and to provide meat cutting service.	
1 Housekeeper	2,706
In addition to the existing position this will provide seven-day per week coverage in the administration building and hospital and five-day coverage in the school.	
3 Assistant head girls' group supervisors (one effective July 1, 1953, and two effective October 1, 1953)	9,942
These positions are to provide 24-hour coverage, seven days per week.	
Senior girls' group supervisor (replacing five girls' group supervisors)	1,020
These replacements are to provide better supervision and establish responsibility in each cottage and the restricted unit.	
2 Senior girls' group supervisors (one effective December 1, 1953, and one January 1, 1954)	4,045
8 Girls' group supervisors (two effective December 1, 1953, and six effective January 1, 1954)	14,078
Together with existing positions, these positions will staff five new cottages, a restricted unit, and one old dormitory on a 24-hour basis and the admissions unit on a two-shift per day basis. One shift double coverage, provided by senior girls' group supervisors, is provided the five new cottages and the restricted unit.	
1 Youth Authority teacher (effective January 1, 1954)	2,148
1 Music teacher (effective January 1, 1954)	2,148
These positions, together with existing positions, will provide classroom instruction on a ratio of full time equivalent students to teachers of 15 to 1.	
0.3 Chaplain—Catholic (increase to half time)	1,755
0.3 Chaplain—Protestant (increase to half time)	1,755
These positions provide chaplain service for the increased population.	
1 Chief engineer I	4,296
This position is to supervise the increased maintenance program brought about by the expanded facilities	
1 Plumber	3,996
This position will operate the new sewage disposal plant and the expanded water system.	

---

[a] Composed of savings in salaries and wages, $3,778; operating expenses, $9,707; equipment, $614; and a loss in reimbursements, $1,360.

[b] Composed of savings in salaries and wages, $19,323; and operating expenses, $15,528.

VENTURA SCHOOL FOR GIRLS

correctional school for girls in the 15 to 21 age group. The program centers around the homemaking skills, commercial training and academic instruction. The recreation program consists of sports, dancing, music and reading.

Located near Ventura

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$452,092	$508,752	$545,148	
Transferred from another institution	11,500	–	–	
Allocations from Salary Increase Fund	36,804	24,150	–	
Allocations from Emergency Fund	74	–	–	
Allocations from Price Increase Fund	6,578	–	–	
Total Available	$507,048	$532,902	$545,148	
Unexpended balance, estimated savings	—$4,499[a]	—$4,274[b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$502,549	$528,628	$545,148	$16,520 (3.1%)
GENERAL ANALYSIS				
Number of positions	*97.3*	*95.5*	*97*	*1.5*
POPULATION AND UNIT COSTS				
Average pupil population	179	180	180	–
Cost per pupil	$2,855	$2,937	$3,029	$92 (3.1%)

SALARIES AND WAGES: The increase of $12,101 is primarily accounted for by:

Proposed New Positions:

Senior girls' group supervisors (replacing seven girls' group supervisors) $1,428

These replacements are to provide better supervision and establish responsibility in each cottage.

Placement officer II (replacing junior psychiatric social worker) $532

To revise the position to a class more in accord with the duties of the proposed classification and counseling unit.

Temporary help (transportation) $200

For transportation of wards to public transportation facilities who are being paroled and emergency trips to town.

Positions Now Authorized:

Senior clinical psychologist $5,496

Intermediate stenographer-clerk 2,844

These two positions are being transferred from the Division of Diagnosis and Classification, Departmental Administration, and will, together with the placement officer, form the classification and counseling unit to provide professional guidance on an individual ward basis.

OPERATING EXPENSES: The increase of $1,700 is primarily due to the cost of repairing inmate cottage furniture.

EQUIPMENT: The total of $10,235 represents an increase of $2,719. Major items include an additional used bus, $1,250; replacement of household furniture, $1,375; and replacement of a truck, $1,250.

DEPARTMENT OF EDUCATION

General Activities

Performs administrative, supervisorial, and advisory functions for the Public School System under the general direction of the State Board of Education. Also responsible for the administration of 10 state colleges, eight special schools for physically handicapped children, three workshops for the blind, and the state-federal program of vocational rehabilitation. These activities are carried on through the Division of Departmental Administration, School Administration, Instruction, State Colleges and Teachers Education, Special Schools and Services, and Library.

GENERAL ANALYSIS

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
Number of positions	*337.3*	*367.7*	*387.6*	*19.9*

The budget proposal reflects a growth in the Department of Education parallel to the growth of the Public School System and the State as a whole. Budgeted increases are mainly based on work load. In the Division of Public School Administration, the Bureau of School Accounts and Records and the School Lunch Program will require additional personnel to perform their functions effectively during the budget year. Particular attention is directed to strengthening the consultant and advisory services of the Division of Instruction. Addition of a personnel technician to the Division of State Colleges and Teachers Education is expected to lead to more uniformity in handling personnel matters in the state colleges, while new regulations in regard to issuance of child care permits require additional personnel in the Credentials Office. Completion of the three-year expansion of the Field Rehabilitation Services for the Blind is anticipated in this budget.

Provision for continuance of the Child Care Program is made, with the transfer of the apportionment function to the Bureau of School Accounts and Records and the dropping of the auditing of school districts.

---

[a] Composed of savings in salaries and wages, $56,293; operating expenses, $143,680; equipment, $2,758; and loss of reimbursements, $10,363.

[b] Nonscheduled appropriations. No reversion by categories.

DEPARTMENT OF EDUCATION

General Activities—Continued

DIVISION OF DEPARTMENTAL ADMINISTRATION

Administrative Unit

Includes the Office of the Superintendent of Public Instruction and other general administrative, fiscal, personnel, and legal activities.

Analysis

An administrative assistant with clerical assistance is provided in the director's office to prepare the monthly reports to the Governor's staff and to assist in administrative details in connection with programs carried on by the department. A position to do collating, assembling, and folding of mimeographed materials and a storekeeper I based on work load increases are provided for the shipping section. Part-time assistance of a junior counsel is also provided to meet a temporary peak load of hearings on credentials revocations resulting from fingerprinting of credential applicants.

Education Research

Provides general research information regarding curricula evaluation and testing and other educational measurements to the staff of the Department of Education and to the public schools.

Analysis

One additional key punch operator II is proposed to displace recurring overloads in temporary help and overtime, and for work load increased by recent legislation.

DIVISION OF SCHOOL ADMINISTRATION—Continued

School Planning

Assists and advises school districts and state colleges in regard to acquisition of sites and construction of school buildings.

Analysis

One additional field representative with corresponding clerical assistance is proposed to provide planning analysis for the state college and special school construction programs.

The level of other activities remains constant, with continued work load of approvals for federal aid in meeting the requirements of Public Laws 815 and 874.

School District Organization

Assists local survey committees with local district organizations in conformity with population, transportation, economic conditions and school building facilities.

Analysis

The services of a delineator for a one-year term is proposed for revision of inaccurate and obsolete county maps which are the basic tools of operation for this unit.

Administrative Services—Field Records Unit

Provides consultative and advisory services to districts on matters of school records, accounts and reports.

Analysis

Discontinuance of services to Child Care Centers in 1953-54 will result in the abolishment of one position of Auditor II with corresponding decreases in expenditures and reimbursements.

Administrative Services—Child Welfare and Attendance

Administers school attendance laws, including work permits for school age children.

Analysis

Level of activities for this unit remains unchanged. Transfer of one Intermediate Account Clerk to School Accounts and Records decreases expenditures for the current and budget year.

Administrative Services—School Lunch Program

Provides administration of the federal school lunch program, consults and advises local school districts on nutritional problems and apportions federal grants to districts for school lunches.

Analysis

Participating schools have increased to an extent sufficient to warrant re-inclusion of a position of nutritionist previously authorized but never filled.

Administrative Services—School Accounts and Records

Apportions the State School Fund, verifies reports of school districts and analyzes financial data for departmental and public school use.

Analysis

Complexity of changing apportionment laws and new legislation, both State and Federal, have placed such work load burdens on this bureau that it was found necessary to add three positions during the current year: a field representative, a senior account clerk, and an intermediate stenographer-clerk. Temporary help was also added, which the unit proposes to displace with one position of intermediate account clerk. With work load continuing, all current positions are included in the budget year, and, in addition, one senior typist-clerk is proposed, to complete proper staffing.

Readjustment Education

Approves and supervises public and private institutions for training and education of veterans.

Analysis

Approval of institutions for Korean Veteran Training is estimated to be completed in 1952-1953; accordingly, temporary help added in the current year is not continued in the budget year.

DIVISION OF INSTRUCTION

Administrative Unit

Includes the office of the Associate Superintendent of Public Instruction responsible for state consultative and advisory services provided to public schools in the field of instruction.

Analysis

The increase in expense for this unit is, in major part, attributable to the proposed publication of a bulletin on minimum standards for courses of study in grades 7-8, and other printing costs. Completion of the adult education survey has the effect of partially offsetting the increases due to the expanded printing program.

DEPARTMENT OF EDUCATION

General Activities—Continued

DIVISION OF INSTRUCTION—Continued

Secondary Education

Provides consultative and advisory services in the instructional field to junior high schools, high schools, and junior colleges.

Analysis

School growth has advanced well beyond the physical ability of this bureau to provide necessary services. An additional consultant is proposed to help keep pace with school development, particularly at the junior college level.

Elementary Education

Provides consultative and advisory services in the field of instruction to the public elementary schools.

Analysis

With current requests for services of this bureau being only partly met by existing staff personnel due to growth problems, it is expected that new needs will be expressed during the budget year. One additional consultant, with stenographic help, is proposed in order to meet at least a portion of the above needs.

Vocational Education

Provides consultative services in those vocational fields which cannot be supported under the joint state-federal program for vocational education. All equipment for the Vocational Education Fund except for teacher training is budgeted here.

Analysis

It is proposed to extend guidance services to provide effective supervision and assistance not possible with present staff. Requests for services of this bureau increase with school enrollments and with the attempt of public schools to strengthen guidance programs. For these basic reasons, an additional consultant in guidance is proposed.

DIVISION OF STATE COLLEGES AND TEACHER EDUCATION—Continued

Credentials

Evaluates transcripts and issues teacher credentials for certificated employees of the Public School System.

Analysis

Changes in requirements for child care permits and emergency credentials increase work load to such an extent as to require an additional assistant technician. An intermediate stenographer-clerk is proposed, for a two-year term, to assist in processing fingerprint records. During 1952-53, one field representative, with clerical assistance, was added to aid with the greatly increased investigative functions of this program.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

Administrative Unit

Provides administrative control over the state special schools for the deaf, blind, and cerebral palsied children and blind adults; coordinates the operations of the three workshops for the adult blind; and administers the State-Federal Program for Vocational Rehabilitation.

Analysis

Activation of the new School for the Deaf at Riverside accounts partially for the increased expenditures of this unit. The expense of a more vigorous sales campaign for the products of the Workshops for the Blind is offset by increased reimbursements from the workshops.

Field Rehabilitation Services for the Blind

Acquaints newly blinded persons with the opportunities available to them, trains the blind in the making of handicraft articles and arranges sale of such articles on a consignment basis.

Analysis

Completing the plan to meet existing case loads as initiated in the 1951-52 Budget, three positions of field worker for the blind are proposed. This augmentation will complete the strengthening of the staff.

SUPERVISION OF CHILD CARE CENTER PROGRAM

Includes state-level supervision and advisory services on Child Care Centers.

Analysis

Transfer of the apportionment function to school accounts and records and savings in rent because of moving the unit to Sacramento result in decreased costs of this unit. Additional savings are realized by discontinuance of the audit program.

MOVING EXPENSE

Analysis

Completion of the new Education Building in early 1953 will permit consolidation of all local bureaus of the Department of Education, and centralization of some offices now located in other areas. In connection with occupancy of this building it is planned to repaint and refinish some furniture in order to prolong its useful life.

Department of Education

VOCATIONAL EDUCATION

The state program for vocational education is based upon a cooperative plan between the Federal Government and the State Department of Education. Acceptance of the federal vocational education acts requires certain matching amounts of state or local funds to augment federal grants-in-aid in this field. These funds are expended for state level supervision and teacher training, with any remaining balances distributed to 300 public secondary schools as partial reimbursement for their participation in the program. The program is administered through the Bureaus of Agricultural Education, Business and Distributive Education, Guidance, Homemaking Education, and Industrial Education, under the Division of Instruction in the Department of Education.

---

[a] Does not include reimbursements to school districts maintaining approved vocational instruction. See Local Assistance Budget.

[b] Neither federal aid revenues, nor the expenditures therefrom, are included in the over-all budget totals.

[c] These state appropriations, together with all federal grants, are deposited in the Vocational Education Fund, from which expenditures are made.

VOCATIONAL EDUCATION—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
Number of positions	*89.4*	*86*	*83*	*3*

GENERAL ANALYSIS

Increase in federal grants of $202,096 in the current year will permit higher payments to local school districts in support of vocational classes, and provide a slight expansion in peace officers training to meet growing demand. As no change is anticipated in the remainder of the program, a slight reduction in State General Fund support will be possible by shifting certain expenditures to the increased federal grant. Specialized activity in agricultural on-farm training and apprenticeship training will continue to be curtailed to conform to decreasing veteran enrollment and completion of original instructional manuals for apprentices in the major trades.

SUPERVISION AND TEACHER TRAINING

Provides state-level supervision of vocational education programs in the public schools. Adequate supervision of vocational courses, as well as teacher training programs, are required under the federal acts. Fifty percent of the costs of this state-level program are normally met from federal funds.

Analysis

Curtailment of specialized activities in agricultural and industrial education will permit a net decrease of $6,864, or 1 percent over 1952-53 in this function. Increased federal grants of $202,096 will permit a slight expansion of one traveling instructor for peace officers training, and provide sufficient funds to purchase teacher-training equipment for this program (formerly purchased from funds provided in Department of Education General Activities budget).

A reduction of $9,121 in the General Fund appropriation for this function is also made possible by increased federal grants, as rental charges heretofore carried entirely by the General Fund will now be asborbed within the federal funds.

AGRICULTURAL ON-FARM TRAINING

Provides state supervision and direction of on-farm training classes in the public schools, completely reimbursed through payments from the Veterans Administration for instructional expenses.

Analysis

Continued decreases in veteran enrollment will permit a reduction in state supervision costs of $16,330, or 26.8 percent over 1952-53. Concurrent loss in reimbursements from the Veterans Administration of $15,030 will result in a net decrease of $1,300 in the General Fund appropriation for this purpose.

INSTRUCTIONAL MATERIALS FOR APPRENTICES

Develops instructional materials for classes given in conjunction with on-the-job training of apprentices.

Analysis

Completion of instructional manuals for all major trades has permitted a shift to reprints and revisions of manuals already in use. Equalization between developmental costs and manual sales will permit operation of this function within reimbursements in the budget year.

BUSINESS EDUCATION TEACHER TRAINING

Provides impetus for teacher training programs in the field of business education.

Analysis

As the need for intensive teacher training activities has declined with the drop in veteran enrollments, expenditures for this function will terminate at the conclusion of the 1952-53 Fiscal Year.

FIRE TRAINING AND INSTITUTES

Promotes fire training through in-service training supervised and conducted by itinerant instructors assigned to eight geographic areas in the State, and through a series of institutes held in the northern and southern sections of the State.

Analysis

No change is contemplated over the 1952-53 level of operations in this training program.

Vending stands	—3,116 [d]	—500 [d]	–	
TOTAL EXPENDITURES	$2,374,044	$2,555,151	$2,846,000	
GENERAL ANALYSIS				
Number of positions	*177.7*	*173*	*194*	*21*

From 1921 until 1943, state participation in the Vocational Rehabilitation program was on a dollar for dollar matching basis with federal appropriations. From 1943 to 1950, the State provided $30 for every $70 of federal funds. Since 1950, however, federal policy has shifted to require greater state support of the program, which in California may result in approximately 50 percent state support.

As federal grants tend to carry a smaller portion of these costs, and state appropriations increase, the Bureau of Vocational Rehabilitation is shifting its basic services from the old policy of "take them as they come" to a new basis of case acceptance which creates priorities for those cases most clearly in need, most clearly representing an economic liability to the State, to the industrially injured, and to persons with dependents. Continuing this new policy, the 1953-54 Budget reflects a strengthening to allow a start for more adequate coverage in the following areas of operation:

1. Cases referred from Aid to Needy Children rolls
2. Cases referred by the Industrial Accident Commission
3. Specialized assistance offered blinded persons
4. Other cases on public assistance or relief, or persons who would be reduced to this category if not aided by vocational rehabilitation
5. Person with dependents.

In addition to these areas, a few specialized pilot studies and reimbursed services will be continued, principally with referrals from mental hospitals.

To meet known work loads in the above areas, it will be necessary to restore the reductions in working staff made in 1951-52, and provide additional funds for medical care, training, and other purchased services, at an additional cost to the General Fund during 1953-54 of $231,403, as follows:

ADMINISTRATION: Includes administrative staff of central office and proportionate administrative costs of all district offices. An increase over 1952-53 of $11,440 results mainly from addition of one associate statistician and necessary clerical assistance to establish and maintain significant and reliable cost and performance data to measure the value of specific rehabilitation areas to the State.

---

[a] Federal aid receipts and the expenditures therefrom are not included in the over-all budget totals.

[b] Expenditures for Administration of Vending Stands for the Blind are contained in the regular support appropriation for vocational rehabilitation in 1953-54.

[c] Composed of savings in salaries and wages, $3,448; operating expenses, $59,306; equipment, $546; and excess reimbursements, $61.

[d] Nonscheduled appropriations. No reversion by categories.

VOCATIONAL REHABILITATION—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

VOCATIONAL GUIDANCE AND PLACEMENT: Includes all field rehabilitation staff and expenses except actual case service costs. Restoration of staff to the 1951-52 level results in an increase of $93,603, which includes primarily 11 new vocational rehabilitation officers and related clerical assistance of five intermediate stenographers. This provides a total of 90 rehabilitation officers, the number required to adequately cover the five basic areas of operation listed above. Proper handling of these specialized work loads necessitates the addition of part-time physicians to all seven district offices, equivalent to two man-years in total. A supervising account clerk is also included to provide clerical supervision, particularly in accounting for case service expenditures, in the Los Angeles office. Remaining increases are caused by travel expenses and furniture for new positions.

CASE SERVICES—OTHER THAN WAR DISABLED: Includes all costs of regular civilian rehabilitation cases handled, and represents the costs of purchased services for clients. An increase of $166,425 is based upon a standard of $20,000 per experienced rehabilitation officer, and $8,000 per new rehabilitation officer, or a total of $1,668,000 based upon budgeted positions for 1953-54. These standards are considered optimum amounts to meet the requirements of the specialized fields of rehabilitation services upon which personnel allowances are based, and would provide $1,800,000 of purchased services in subsequent years after new personnel have become more experienced.

CASE SERVICES—WAR DISABLED CIVILIANS: Includes all case service costs for rehabilitation of certain persons disabled during the periods of active war effort. These include members of aircraft warning service, members of civil air patrol, civilians engaged in activities prescribed by the Director of the Office of Civilian Defense, the Merchant Marine personnel. No change in the level of activity is anticipated during 1953-54 for this minor function. Total costs are paid from federal grants.

VENDING STANDS FOR THE BLIND: Includes administration and supervision of vending stand operations, as well as funds to purchase vending stands for blind clients. The entire cost of this function has been paid from the General Fund, and is not matched by federal grants, although a supplemental program does receive federal participation as shown under case service expenditures. An increase of $19,381 over 1952-53 results from the addition of two vocational rehabilitation officers to supervise the growing number of vending stands throughout the State. Approximately 160 stands will be in operation by the end of 1953-54, several of which have recently been developed into cafeteria-type installations employing several handicapped persons. Clerical allowances have been provided equal to professional personnel because of heavier clerical loads in this work and because of shifting assignments and areas of coverage involved. Remaining increases are for travel expense of new positions and a slight price adjustment for new stands.

DIVISION OF LIBRARIES

Provides library facilities for state legislators, employees and agencies. Maintains state-wide library services for the blind, including loans of talking book machines. Assists in establishing public libraries in those parts of the State without such service. Lends books not available locally and does reference work requiring materials not in smaller libraries. Collects library statistics, acts as a clearing house for library information and supervises, inspects, and advises county libraries.

GENERAL ANALYSIS				
Number of positions	*87.3*	*93*	*100*	*7*

The State Library's field services to county free libraries to make optimum use of existing local financing, and to provide services in areas not now served by libraries, will continue to be emphasized in the budget year. To facilitate the discharge of these and other library functions in a most efficient and economical manner, modernization of the existing internal organization of the library will also be initiated. The additional staff and accompanying expenses necessary to augment these projects will result in an increase of $36,387, or 7.8 percent over 1952-53 as follows:

SALARIES AND WAGES: An increase of $36,538, or 10.4 percent results from the addition of three professional librarians, five clerical positions, and three positions of temporary clerical help in the 1953-1954 Fiscal Year.

One field representative and one intermediate stenographer-clerk are provided to intensify the program of rehabilitating and strengthening the county free library system. A principal librarian is required to provide an essential level of supervision which will permit needed reorganization along functional lines and assure a more workable span of control. A senior librarian and an intermediate file clerk are requested on a permanent basis, and three temporary clerical positions are proposed for one year only, to rehabilitate the Union Catalog, which is essential to the continuation of the Inter-Library Loan Service. Two intermediate clerks are also needed on a work load basis, one for the loan desk, the other to meet the sharp increase in circulation and borrowers in the books for the blind section. A storekeeper I is also added to handle the shipping load of blind books and record players.

OPERATING EXPENSES: An increase of $1,368 is mainly attributable to intensified activities of the library planned in the budget year. A decrease in printing, representing elimination of the handbook of information for the Legislature, partially offsets this increase.

EQUIPMENT: A total of $51,544, or $1,519 under 1952-1953, consists primarily of library books ($40,300). Furniture and office equipment are also included for new positions and renovation ($10,325), and additional microfilm cabinets are provided for expansion of this new type of material ($2,310).

[a] Student enrollments for colleges represent full time equivalent students, which are computed on the basis of 15 semester units of instruction representing one student equivalent.

STATE COLLEGES, TECHNICAL COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

STATE COLLEGES

The primary function of state colleges is the training of teachers. They may also offer courses appropriate for a general or liberal arts education; offer vocational training in such fields as business, industry, public service, homemaking, and social service; and offer the preprofessional courses needed by students who plan to transfer to universities for advanced professional study. The 1949 Legislature authorized the colleges to grant the master's degree. At present, such degrees are being limited to individuals who meet the State's requirement for one of the various teaching credentials, except for those students who are preparing to teach in a foreign country, those students who hold a license to teach in another state, or students preparing to teach in institutions not requiring teaching credentials.

Analysis

As a more drastic teacher shortage faces California's public schools in the next few years than has been previously experienced, the state colleges must continue to emphasize and encourage teacher training as their most important function. This renewed demand for teachers, plus the development of a few new curricular programs to meet regional needs, and the reshaping of course offerings to fit new instructional facilities and buildings, dictate the direction of the instructional program at the state colleges during the budget year. Major factors of change influencing most or all of the colleges during 1953-54 are:

1. Growth of regular session enrollment to an all-time peak of 25,050 full-time equivalent students represents an increase of 1,990 students over the 23,060 F. T. E. for 1952-53, predicated on actual fall semester experience. Continued recovery from the 1950-51 decline caused by the Korean situation can logically be anticipated for several years. As the three new state colleges attain permanent facilities and extend their curricular offerings, particularly into lower division courses, growth will be almost automatic from these newly tapped population centers. Statewide long range forecasts based on birth rate and immigration factors indicate an upswing in both high school graduates and attendance at higher education institutions starting with, or shortly after 1953-54. Over-all population in the rural areas, particularly in the valley region, are beginning to pick up after a two-year decline which saw most population increases confined to coastal defense areas. Draft deferment policies are not anticipated to change radically, and new R. O. T. C. units at four colleges indicate a strengthening of the deferment situation at these schools. In addition, the drop in World War II veteran enrollment is now being offset by Korean veterans attending school under Public Law 550, who will be influenced into enrolling at public colleges and universities because of the financial incentive of low tuition fees. For these reasons, enrollment increases are anticipated to be moderate at the colleges in rural areas, continued strong in metropolitan areas, and heavy at the three newer schools at Long Beach, Los Angeles, and Sacramento.
2. Teaching allowances, formerly determined by a given ratio of teachers to students, are provided for the first time by a new budgetary concept of a faculty staffing work-load formula. For 1953-54, this formula calls for 142.5 additional teachers, or 31.4 more than would have been provided under present student-teacher ratio as follows:

	Student-Teacher Ratios	*Teachers Added Per Ratios*	*Teachers Added Per Formula*	*Increase Over Ratio*
Chico State College	Minimum courses	3.2	11.3	8.1
Fresno State College	18–1	8.3	13.4	5.1
Humboldt State College	Minimum courses	3	10	7
Long Beach State College	15–1	10.4	15	4.6
Los Angeles State College	16–1	18.9	11	—7.9
Sacramento State College	15–1	15.2	15.1	—0.1
San Diego State College	19–1	18.7	14.1	—4.6
San Francisco State College	19–1	8.4	14.9	6.5
San Jose State College	19–1	25	37.7	12.7
Totals		111.1	142.5	31.4

The principle of the faculty staffing formula is simply a recognition of the amount of work which any one instructor should accomplish, equated to the total instructional and noninstructional work load at any college. Basic weighting of the work load of one instructor is derived from a 45-hour work week in which 36 hours are devoted to class teaching and nine hours are spent in noninstructional duties such as office hours for students, counseling, committee work, and special activities. As the formula application is primarily for budgetary purposes, uniform standards for equivalent courses, class sizes, and minimum number of students per class have been applied to all colleges equally, thereby tending to recognize a more even teaching load among all teachers at all colleges. Naturally, in colleges which have been given only enough instructors to provide minimum course offerings, the faculty work load formula yields more new teaching positions because noninstructional loads are recognized for the first time. Also in colleges with expanded enrollments and little curricular change, fewer teachers would be provided as the only extra positions would be for extra sections of the established classes. The two new colleges at Long Beach and Sacramento are exceptions to this application as new lower division curricular patterns are being added for the first time at each school. At San Jose, also, above-normal allowances are temporarily necessary to permit more orderly separation of the state college and junior college.

3. Additional facilities provided by the present college construction program will be occupied at practically all colleges during 1953-54. Sacramento moves to its new campus in the current year, anticipating full-year operation in the budget year. Fresno will occupy the first four buildings on its new campus, and San Francisco will be able to operate most of its new campus structures, creating additional costs of two-campus operation at both colleges. These facilities, together with additional buildings at Humboldt, San Diego, and San Jose, result in the provision for 58 additional maintenance positions, plus $84,885 increased cost of operating these structures, primarily for utilities. Special additional plant maintenance items not carried in the support budgets of recent years account for an additional $66,268 above normal maintenance costs.
4. State college libraries, like instructional positions, have not been budgeted in past years in accordance with any accepted work measurement. After thorough study, a library staffing formula has been adopted to permit measurement of work load in the staffing areas of administration, technical services, public services, clerical services, and student assistant coverage. In addition to this formula, an organizational pattern is recognized to permit subdivision of work into logical functions, patterned in part from the new organizational structure of the State Library. Application of this new staffing pattern results in the addition of 11 professional, 23.5 clerical, and five student assistant positions, caused almost entirely from opening of new library facilities at Humboldt, Los Angeles, Sacramento, and San Francisco, and recognition of overloads on existing personnel at Fresno and San Jose.
5. Augmentation of administrative staffing is confined largely to new and rapidly enlarging schools where growth demands the addition of 16.8 new personnel. These increased administrative and instructional supervision positions are all within the basic organizational framework for state colleges, and merely represent allowances for size and needs.

Department of Education

STATE COLLEGES, TECHNICAL COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

STATE COLLEGES—Continued

Analysis—Continued

6. Clerical and technical staffing is necessarily provided in conjunction with professional positions and new building operations, resulting in 48.5 new positions during 1953-54. Of these allowances, seven are in recognition of a new classification of evaluation technician, while the majority are provided for instructional assistance and student personnel needs. Several stock clerks have also been added for operation of new buildings.

In addition to the above factors, individual allowances in positions, specialized operations, and equipment needs are provided at each school to meet special problems and substandard conditions. Over-all expenditures also include programs for summer sessions and extension, which are wholly offset by student fees for such purposes.

Although not affecting over-all expenditures for the colleges, the continued decline in veteran enrollment will cause a sharp shift in financing from federal tuition payments to the State General Fund amounting to $730,684 in 1953-54.

TECHNICAL COLLEGES

Three technical schools are administered by the Department of Education: California State Polytechnic College, which offers occupational training in agriculture, engineering and industry, plus limited courses in the liberal arts; Fresno State College Division of Agriculture, patterned after the agricultural instruction program at California State Polytechnic College, but specializing in problems affecting the central valleys; and the California Maritime Academy, which trains officers for the Merchant Marine and the Naval Reserve. Because of their vocational nature, instructional costs and equipment allowances of these schools are normally greater than at the liberal arts type state colleges.

Analysis

The only major change within the technical schools is anticipated at California State Polytechnic College, where additional housing facilities and heavy enrollments have boosted present student population almost to pre-Korean levels. A projected increase of 340 full time equivalent students to the college's present practical maximum of 3,713 F.T.E. results in seven additional teachers being added at Voorhis campus on the basis of the faculty staffing formula which was applied to the other state colleges (or a net increase of 3.1 teachers above the regular ratio as the allowance at San Luis Obispo campus decreased).

Allowances for other positions based upon staffing patterns at all State colleges also provide additional personnel in clerical, maintenance, library, and student health.

Enrollment at the Fresno Division of Agriculture is anticipated to increease 30 F. T. E. to 150 equated students (representing perhaps double that number of individuals majoring in agricultural subjects). As the instructional program is geared to a minimum number of teachers because of low enrollment, no additional faculty is required. Establishment of farming operations on the new 720-acre campus will permit expansion in basic field and orchard crops and herds. Maintenance costs will also rise due to operation of both the old Hammer Field campus and the new site.

Capacity enrollment of 200 midshipmen is contemplated at the California Maritime Academy during 1953-54 by extensive use of the training ship for living quarters. Provision for an annual cruise of 9,500 miles has been made, in keeping with the 3-year cruise cycle recommended by the Board of Governors of the Academy.

SPECIAL SCHOOLS FOR PHYSICALLY HANDICAPPED CHILDREN

Five special schools for the education of blind, deaf, and cerebral palsied children will be in operation during 1953-54. Residential care and treatment needed for the proper training of these handicapped children is provided. The two schools for the deaf and the school for the blind provide educational facilities from the primary grades through high school. The schools for the deaf also give extensive vocational training. Education and medical treatment are provided for children afflicted with cerebral palsy. The average student is enrolled for a period of from 3 to 15 months and is then returned to the local district facilities for continued medical supervision and treatment and for special education in the local district schools. Outpatient clinics are also operated in conjunction with both the Northern and Southern California State Schools.

Analysis

Principal change in the programs of the special schools is the completion of the first unit of the School for the Deaf at Riverside, with a resultant increase in enrollment from the initial 50 students of the current year to a plant capacity of 225 children in 1953-54. Addition of 80.7 new positions is necessary for comparable staffing with the northern school at this enrollment. Only children in the kindergarten and elementary grades will be accepted in this first unit.

At the School for the Deaf in Berkeley, enrollment is expected to fall slightly below capacity because approximately 60 students now in residence will transfer to the new Riverside school. The only significant increase in this school is the strengthening of the maintenance function by three tradesmen to enable the agency to do its own maintenance work.

The School for the Blind, with capacity enrollments, is shifting a great many of its high school students into the regular public schools, thus freeing more residence space for younger blind children. As younger children require more care, additional counselor and teacher assistance is provided. Two additional teachers for preschool blind children are also needed to handle increased cases in the Southern California area.

No change in program is anticipated at the two schools for cerebral palsied children in Northern and Southern California. Rented facilities prevent the addition of more children than are presently in residence at these schools.

ORIENTATION CENTER FOR THE ADULT BLIND

The Oakland Orientation Center admits blind persons as residents and trainees in an intensive orientation program whose aim is maximum vocational and personal rehabilitation of blind persons in preparation for useful and remunerative employployment. The program of the orientation center is closely coordinated with the services of the Bureau of Vocational Rehabilitation, with the home teacher and field service programs, and with programs for training teachers and other personnel directed toward serving the blind.

Analysis

Legislation effective September 22, 1951, converted the Training Center for the Adult Blind to the Oakland Center, California Industries for the Blind, and transferred the residential facilities to the Oakland Orientation Center. Residential facilities (now occupied by approximately 80 residents) vacated hereafter will be devoted to the use of the training program of the Orientation Center. During 1953-54, it is anticipated that room for 20 students will be available. An additional four teachers will be necessary to permit the very intensive training program required to meet the highly individualized needs of these handicapped students.

STATE COLLEGES, TECHNICAL COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

CALIFORNIA INDUSTRIES FOR THE BLIND

The California Industries for the Blind consist of three production centers, located at Los Angeles, Oakland, and San Diego. These centers, previously known as workshops, supply sheltered factory employment to blind and partially sighted persons who are unable to obtain or retain jobs in private industry. Activities in the production centers are many and varied, and include such items as manufacture of brooms, mops, pillowcases, surgical drapes and wrappers, aprons, rugs, brushes, rubber mats, and leather goods, in addition to fabrication and assembly of many products on a subcontract basis.

This program provides some training and work experience for persons who are placed in gainful employment outside the production centers, with particular coordination in this respect with the Bureau of Vocational Rehabilitation. The production center program is not to be considered, however, as one of the sequential steps for the placement of blind persons in industry.

The educational and training activities of the centers are a direct charge against the General Fund. The manufacturing activities are financed from working capital supplied by the Workshops for the Blind Manufacturing Fund into which the proceeds of sales of products are deposited.

Analysis

No major program change is anticipated for these industrial workshops during the 1953-54 Fiscal Year, although a slight cutback in production due to lessening Federal Government orders will necessitate curtailment of at least one position in the San Diego shop, and commercial sales will have to be intensified to maintain factory employment. At the Oakland Center, completion of the new factory trades building will permit modernization of production methods, and provide needed expansion at both this center and the adjacent Orientation Center by freeing the old sewing building for the latter agency. The Los Angeles Center is budgeted at a continuation of the 1952-53 level of activities.

Department of Education

CHICO STATE COLLEGE

A four-year liberal arts college specializing in teacher training curricula. This college serves the northeastern section of the State, and provides some courses of a terminal nature to meet the junior college needs of the Chico area.

Located at Chico, California

Extension:				
Enrollment (units)	939	1,167	1,250	83 (7.1%)
Cost per unit	$5	$6	$6	–

Continuance of the present upward trend of enrollment to 1,300 full time equivalent students in the budget year will return this college to the level existing prior to the Korean enrollment slump. More adequate faculty staffing at this enrollment, operation of the campus laboratory elementary school completely at state expense, and the provision for additional maintenance items are the principal factors creating an increase in operating costs of $166,723, or 15.9% over 1952-53 as follows:

SALARIES AND WAGES: An increase of $72,143, or 10.1% over 1952-53, is caused principally by inclusion of 11.3 additional teaching positions in recognition of faculty overload and increased enrollments. Additional clerical coverage is provided for faculty assistance, one maintenance position is added for care of newly-developed grounds, and an Evaluations Technician and a quarter time Coordinator of Graduate Studies are included in recognition of problems common to all state colleges.

OPERATING EXPENSES: An increase of $26,121, or 22.2% over 1952-53 primarily reflects the provisions for special maintenance items ($11,300). Other costs of operating the college plant ($4,570), installation of a dial telephone system ($3,600), and instructional expenses for additional enrollment ($4,150) are other factors of increase over the current fiscal year.

---

[a] Composed of savings in salaries and wages, $207; operating expenses, $8,239; equipment, $2,175; and excess in reimbursements, $582.
[b] Composed of savings in salaries and wages, $3,209; and excess in reimbursements, $445.
[c] Special additional plant maintenance items account for $9 of this per student cost increase.

CHICO STATE COLLEGE—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

EQUIPMENT: A total of $70,248, or $98 over 1952-53, is composed principally of instructional equipment for classrooms and laboratories ($42,612) and library books and furniture ($15,309). Other items include maintenance equipment for plant upkeep ($7,559), replacement of one pickup truck ($1,575), and furniture needs for new positions and renovation.

REIMBURSEMENTS: A decrease of $48,411 represents termination of the Chico School District's participation in expenses of the campus elementary school, in conjunction with full state operation of this laboratory school. A one-year recovery of state apportionments for public school support from the Chico School District is anticipated for the 1952-53 year. For the 1953-54 and subsequent years, offsetting costs will be reflected in less subventions for ADA to the school district.

General and Professional Divisions

This unit of Fresno State College corresponds with the other liberal arts type State Colleges, as compared with the function of the Division of Agriculture which more nearly resembles the instructional methods of California State Polytechnic College. Steady enrollment increases, plus the necessity of operating at both old and new campus sites, result in an increase of $207,146, or 11.1 percent over 1952-53, as follows:

SALARIES AND WAGES: An increase of $142,136, or 8.8 percent is caused by the addition of 13.4 teachers to meet faculty requirements and increased enrollments, and four technical and clerical positions to conform to growth patterns coincident with enrollment and faculty expansion. Five clerical positions are also included for proper library staffing to meet personnel standards at State Colleges, and two maintenance positions are added for basic upkeep of grounds and structures. Student assistant funds equivalent to seven student firemen are also included to man the new fire house at the new campus.

OPERATING EXPENSES: An increase of $57,959 or 31 percent is accounted for principally by added costs of new campus operation for telephones ($3,500), moving expense ($8,000), bus rental ($9,020), and maintenance charges ($24,355). Remaining increases are for instructional supplies ($7,800), and other teaching and library services.

EQUIPMENT: A total of $87,591, or a decrease of $11,935 under 1952-53 is composed of teaching equipment for classrooms and laboratories ($49,466), library books ($23,000), automotive and maintenance equipment for the new campus ($8,965), and furniture and office equipment for new positions.

REIMBURSEMENTS: A decrease of $19,014 represents termination of the Fresno School District's participation in expenses of the campus elementary laboratory school, in conjunction with full state operation of this school. A one-year recovery of state apportionments for public school support from the Fresno School District is anticipated for the 1952-53 year. For the 1953-54 and subsequent years, offsetting costs will be reflected in less subventions for ADA to the school district.

Division of Agriculture

Expenditures for the agricultural unit are budgeted at the same level of instructional program as the current year, but farm operations have been established as a separate function to include student projects and basic field and orchard crops and herds. Approximately one-half of the $47,821 increase in the Division of Agriculture is contained in this new function, where planting of new fruit trees and field crops, and equipment for farming operations is expanded $23,478. Remaining expenditure increases are contained in maintenance costs for upkeep of the new 720-acre farm.

Cost per unit	$6	$6	$6	–

Enrollment deficiencies created by the Korean situation have been especially severe at Humboldt State College, where a drop below 500 full-time equivalent students in 1951-52 has made necessary the establishment of a basic faculty allowance to permit minimum course offerings regardless of enrollment size. Although this teacher allowance has been sufficient to meet bare standards for degree and teacher credential requirements, overloads of administrative and supervisory assignments have been inevitable with such a minimum teaching staff. As a gradual upswing in enrollment will not alleviate this situation sufficiently in the budget year, more adequate faculty staffing is provided to equate the teaching load more nearly to that of other State colleges. This factor, together with operation and maintenance of three new buildings (library, science, and corporation yard), and assumption of full cost of the campus elementary school will provide an increase in operating costs of the college for 1953-54 of $169,719, or 25 percent above the current year, as follows:

SALARIES AND WAGES: An increase of $114,777, or 20.5 percent is caused primarily by the inclusion of 10 teachers in recognition of faculty overload and increased enrollment, and the addition of nine maintenance positions to properly operate and keep up new buildings and surrounding areas. One librarian and two clerks are also included for proper library staffing to meet accreditation requirements, and two part time laboratory school positions provide a full-time principal and a half-time nurse which were erroneously omitted from the 1952–53 budget. Three clerical and 1.4 administrative positions complement the faculty increase and alleviate overloads in placement and evaluation work.

OPERATING EXPENSES: An increase of $23,455, or 29.2 percent is accounted for primarily by inclusion of certain maintenance items formerly carried under Capital Outlay ($7,850), regular utility and maintenance costs of operating new facilities ($7,820), and teaching supplies and services ($5,530). The cost of moving to new quarters ($1,000) is added for one year only, and price adjustments for administrative supplies ($1,500) are also provided.

---

[a] Composed of savings in salaries and wages, $1,608; operating expenses, $5,539; equipment, $3,954; and excess reimbursements, $4,294.

[b] Special additional plant, maintenance items account for $13 of this per student cost increase.

HUMBOLDT STATE COLLEGE—Continued

LINE	EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

EQUIPMENT: A total of $71,454, or $3,240 over 1952-53, includes instructional equipment for classrooms and laboratory facilities ($34,638), library books ($16,000), teaching equipment and furniture for the campus elementary school ($4,225), automotive and maintenance equipment necessary for proper care of additional grounds and structures ($8,833), and office furniture and machines for the student personnel and business offices ($6,868).

REIMBURSEMENTS: A decrease of $28,247 represents termination of the Arcata School District's participation in expenses of the campus elementary school, in conjunction with full state operation of the laboratory school. A one-year recovery of state apportionments for public school support from the Arcata School District for students enrolled in the laboratory school is anticipated for the 1952-53 year. For the 1953-54 and subsequent years, offsetting costs will be reflected in less subventions for ADA to the school district.

Department of Education

LONG BEACH STATE COLLEGE

four-year liberal arts college with a primary function of teacher training. This school was established in the fall of 1949 in temporary quarters near the City of Long Beach, and was temporarily designated the Los Angeles-Orange County State College. On June 7, 1950, the Director of Education officially named the school the Long Beach State College, and accepted a gift of 316 acres of land from the City of Long Beach for a permanent campus site. The college is now being operated at that new location in temporary facilities, pending completion of its first permanent buildings.

Located at Long Beach

Occupancy of temporary facilities at its new campus will permit Long Beach State College to initiate a lower division program for 150 students in 1953-54 which will integrate with the present two-year upper division curricular offerings. Expansion of upper division and graduate enrollment to 1,650 full time equivalent students in 1953-54, together with new lower division enrollment, will result in an increase over the current year of $312,212, or 29.7%, as follows:

SALARIES AND WAGES: An increase of $192,294, or 20.7% over 1952-53 is caused by the addition of 15 teachers to meet faculty requirements of increased enrollments, and 2.8 administrative and four clerical positions to conform to growth patterns coincident with enrollment and faculty expansion. Two clerical positions are also included for proper library staffing to meet accreditation requirements, and six watchmen and other maintenance jobs are added for basic upkeep of grounds and structures.

OPERATING EXPENSES: An increase of $18,250, or 15.3% over 1952-53 results entirely from additional instructional expense of increased enrollments ($16,200), and normal maintenance costs of temporary structures ($2,400).

EQUIPMENT: A total of $104,168 is requested to supplement initial complements of equipment formerly provided in capital outlay appropriations. As occupancy of the new campus buildings now provides a basic equipment structure in several divisions, augmentations for growth and teaching needs, as well as library book accessions, will be provided in the support budget of this college. The budget year request consists principally of class teaching items ($47,709) and library book purchases ($35,000). Provision is also made for necessary automotive and maintenance equipment for the new campus ($15,924), and furniture and office equipment for new positions.

---

[a] Composed of savings in salaries and wages, $18,201; operating expenses, $11,130; and excess reimbursements, $1,536.

[b] Composed of deficit in salaries and wages, $32,886; and savings in operating expenses, $20,700.

[c] Includes $58 per student cost for regular equipment needs. The initial complements for equipping this new college have been budgeted as part of the Capital Outlay program.

LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES

A two-year upper division college with two primary functions: First, the training of students for gainful occupations in arts and sciences as related to business and industry; and second, the training of students for teaching in the public schools. Courses appropriate for a liberal arts education are also offered in fields normally given at other state colleges. The college is at present temporarily located on the campus of the Los Angeles City College under rental agreement with the Los Angeles City School District, but a new 145-acre campus has been selected in the Baldwin Hills area and preliminary plans are now being formulated for construction of permanent facilities at the new site.

Despite overcrowded conditions in temporary rented quarters, enrollments at Los Angeles State College of Applied Arts and Sciences continue to rise rapidly, with a predicted increase to 3,000 full-time equivalent students in 1953-54. Complementing student population growth, the college will offer a graduate program of study, and will intensify courses in the applied arts and sciences at a new downtown campus building. These factors, together with purchase of equipment as a normal operating cost rather than as initial complements from capital outlay appropriations, result in an increase over the 1952-53 Fiscal Year of $323,749, or 19.3 percent, as follows:

SALARIES AND WAGES: An increase of $176,667, or 13.5 percent provides 11 new teachers to meet faculty requirements for increased enrollments, and 3.3 division chairmen and instructional supervisors in keeping with faculty staffing needs. In recognition of one primary purpose of this college, a dean of applied arts and sciences is added to the instructional function, responsible for the development of applied science curricula and the present work-study program. Four librarian and two clerical positions are required for expansion of library facilities to meet enrollment needs, and particularly to meet accreditation requirements. An additional two administrative and 6.5 clerical positions are also proposed for assistance to faculty members, and for student activities and evaluation work.

---

[a] Composed of savings in salaries and wages, $61,413; operating expenses, $34,930; and loss of reimbursements, $3,090.

[b] Composed of savings in salaries and wages, $25,574; and excess reimbursements, $176.

[c] Includes $35 per student cost for regular equipment needs. The initial complements for equipping this new college have been budgeted as part of the capital outlay program.

Department of Education

LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: An increase of $43,708, or 11.2 percent is accounted for primarily by $22,500 increased rental costs for plant facilities at the Los Angeles City College, and $14,350 additional cost of instructional supplies and services, both factors directly related to increased enrollment needs. Minor increases of $4,640 for junior college instructors, $2,000 for physicians' services for health examinations, and $2,000 for additional administrative costs make up the balance of this increase.

EQUIPMENT: A total of $103,561 is requested to supplement initial complements of equipment formerly provided through capital outlay appropriations. Until new and expanded facilities are provided at a permanent campus, equipment needs for enrollment growth and curricular expansion will be provided in the support budget of this college. The 1953-54 request consists principally of teaching items for classrooms and laboratories ($55,791), and library books ($40,000). Additional automotive equipment needs for the college ($2,600), and office furniture and equipment for administrative needs and new positions ($5,170), are also included.

SACRAMENTO STATE COLLEGE

liberal arts college with the primary function of teacher training. It is contemplated that Sacramento State College will move to its permanent campus early in 1953. Facilities available will include an administration building, a library (partial), a classroom building (partial), science buildings (partial), a cafeteria, and 13 temporary structures for classroom use.

Located at Sacramento

In conjunction with its move to new campus facilities, Sacramento State College will initiate a lower division program of course offerings for approximately 200 full time equivalent students in the 1953-54 Fiscal Year. This development will aid in a rounded program of undergraduate instruction, in keeping with patterns at other four-year state colleges. Operation of the new campus on a full-year basis, plus an increase of 400 F. T. E. students in the budget year, results in an increase of $236,545, or 24.1 percent over 1952-53, as follows:

SALARIES AND WAGES: An increase of $190,802, or 23.8 percent over 1952-53 is composed principally of 15 teachers added to meet lower division needs and expanded enrollments, and seven maintenance positions to permit proper upkeep and repair of new campus facilities. In addition, two library positions complement the basic organizational structure of the new college library. Eight other administrative and clerical positions are also included to meet normal staffing and work load requirements caused by growth.

OPERATING EXPENSES: A decrease of $46,650, or 26 percent under 1952-53, is accounted for by drop in rental charges of $58,250 occasioned by moving to the new campus, and savings in moving expenses of $15,000 and in lower division tuition charges of $3,500. New campus added costs for telephone service ($3,600) and maintenance charges ($14,000), and increased costs of instructional supplies for expanded enrollments offset this decrease to some extent.

EQUIPMENT: A total of $92,393 is requested to augment initial complements of equipment formerly provided in capital outlay appropriations. As many new buildings will be furnished and occupied by 1953-54, augmentations for normal growth and teaching needs, as well as library book accessions are now to be furnished in the support budget of this college. This request consists principally of class teaching items ($46,312) and library book purchases ($32,500). Provision is also made for necessary automotive and maintenance equipment for the new campus ($7,450), and furniture and office machines for new positions.

---

[a] Composed of savings in salaries and wages, $27,827; operating expenses, $22,723; equipment, $794; and loss in reimbursements, $6,435.

[b] Composed of savings in salaries and wages, $15,971; operating expenses, $5,550; and loss in reimbursements, $19,350.

[c] Includes $66 per student cost for regular equipment needs. The initial complements for equipping this new college have been budgeted as part of the Capital Outlay program.

Department of Education

SAN DIEGO STATE COLLEGE

A four-year liberal arts college with a primary purpose of teacher training. Preparation of students for community occupational pursuits is especially important in an area particularly affected by defense industry and military expansion.

Located at San Diego

ENROLLMENT AND UNIT COSTS				
Regular Session:				
Enrollment (full time equivalent students)	3,262	3,550	3,750	200 (5.6%)
Cost per student	$591	$597	$618[c]	$21[c] (3.5%)
Summer Session:				
Enrollment (individuals)	2,060	2,580	2,950	370 (14.3%)
Cost per student	$42	$39	$39	–
Extension:				
Enrollment (units)	1,960	2,717	3,000	283 (10.4%)
Cost per unit	$6	$7.50	$7.50	–

Expansion of instructional facilities, stabilization of the defense industry labor market, and growth of the newly-established R. O. T. C. unit have contributed to a sharp upswing in enrollments in the current year, reversing the post-Korean drop off. Continuation of this trend to an estimated 3,750 full time equivalent students in the budget year, plus fuller use of new buildings, will result in an increase of $216,220, or 9.6 percent over 1952-53, as follows:

SALARIES AND WAGES: An increase of $164,126, or 8.6 percent over 1952-53 is caused primarily by the inclusion of 14 teachers in recognition of faculty overload and increasing enrollments, and six clerical positions required for administrative and instructional workload needs related to this enrollment and faculty expansion. Five additional maintenance positions are provided for operation of new facilities and normal recurring maintenance work. One librarian and two clerks are also added to provide proper library staffing to meet accreditation requirements.

OPERATING EXPENSES: An increase of $49,730, or 20.8 percent over 1952-53 is accounted for by inclusion of certain maintenance items formerly carried under capital outlay ($24,390), regular utility and maintenance costs of operating new facilities ($8,000), and instructional supplies and services ($12,200). Minor price adjustments compose the balance.

EQUIPMENT: A total of $107,883, or $2,364 over 1952-53, consists principally of class teaching items needed for classrooms and laboratory facilities ($68,608), and library book accessions ($25,000). Other items include maintenance equipment for plant upkeep ($5,595), campus laboratory school needs ($2,138), and furniture and office needs for new positions.

---

[a] Composed of savings in salaries and wages, $14,433; operating expenses, $35,479; equipment, $3,254; and excess reimbursements, $1,217.

[b] Composed of savings in salaries and wages, $14,776; operating expenses, $1,874; and equipment, $1,000.

[c] Special additional plant maintenance items account for $7 of this per student cost increase.

Student population at San Francisco State College continues to exceed previous estimates for growth, with over 4,250 full time equivalent students enrolled during the current year, and 4,400 full time equivalent students anticipated in 1953-54. With five new buildings to be ready for occupancy at the new campus, highest costs of two-campus operation will be reached during the budget year, after which rented facilities and portions of the old campus will be abandoned in keeping with eventual disposition of the old property. These two factors of enrollment growth and costs of operating both the old and new campuses create an increase in total college operating costs of $254,779, or 9.3 percent over 1952-53, as follows:

---

[a] Composed of savings in salaries and wages, $53,271; operating expense, $26,500; equipment, $6,439; and loss of reimbursements, $54,846.

[b] Composed of savings in salaries and wages, $39,212.

[c] Nonscheduled appropriation. No reversion by category.

SAN FRANCISCO STATE COLLEGE—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: An increase of $214,382, or 9.6 percent results primarily from 15 teachers to meet faculty work load requirements based upon increased enrollments, and eight maintenance positions for upkeep of new campus buildings and grounds areas. Additional instructional supervisors (2.4 man years) are included in keeping with faculty and enrollment increases, and one librarian and three clerks are added to staff the new library building. An evaluations technician is added in recognition of the evaluations load in student personnel work, and two clerical positions are provided for one year to facilitate occupancy of new buildings.

OPERATING EXPENSES: An increase of $40,636, or 11.5 percent is occasioned entirely by increased teaching supplies due to enrollment growth ($11,600), and additional costs of operating and maintaining the new campus buildings and telephones ($31,282).

EQUIPMENT: A total of $119,144, or $293 less than 1952-53 allowances, is composed principally of teaching equipment for classrooms and laboratories ($72,850), and library book accessions ($30,000). Remaining amounts are for automotive and maintenance equipment needed for two-campus upkeep, teaching items for campus elementary school operation ($2,575), furniture and office equipment for new positions, and a few items for the temporary health office.

SAN JOSE STATE COLLEGE

A four-year liberal arts college with a primary function of teacher training. The state college is presently operated in conjunction with the San Jose Junior College on the state college campus, but separation of the two schools in the budget year is contemplated. At present, practice teaching is conducted entirely in the public schools, as the state college does not operate a campus elementary school for teacher training purposes.

Cost per unit	$3.79	$4.80	$4.71	—$0.09 (—1.9%)

Separation of the San Jose Junior College and the state college is contemplated in 1953-1954, necessitating quite severe adjustments in both curricular offerings and staffing patterns. Although enrollments have been set at 6,000 full-time equivalent students in the 1953-1954 Fiscal Year course offerings must necessarily permit absorption of 1952-1953 students, thereby requiring a temporary total allowance of 315 teachers during 1953-54, and until assimilation and adjustment of curricula will permit reductions more in keeping with enrollment size. Additional positions are also included to absorb a number of existing junior college employees working in clerical, library, and maintenance jobs which would normally be carried as state positions at other state colleges.

Costs incident to the above separation of junior college functions, and the opening of new building facilities during the 1953-1954 Fiscal Year, result in an increase over 1952-53 of $468,919, or 15 percent, as follows:

SALARIES AND WAGES: An increase of $414,189, or 15.7 percent, is caused primarily by 37.7 additional teachers required by increased enrollments and temporary coverage of existing curricular patterns during the period of separation from the junior college. Another major factor of increase is the necessary addition of 20 custodial and other maintenance jobs for upkeep of new buildings and for replacement of regular maintenance positions presently carried on the junior college pay roll. Three librarians and six clerks are also provided for library growth and absorption of junior college positions, an additional 10.5 clerical and technical positions are included for work load coverage in keeping with faculty expansion and enrollment increases, and one graduate nurse and one counselor are added to replace current junior college positions.

---

[a] Composed of savings in salaries and wages, $14,822; operating expenses, $37,793; equipment, $3,604; and loss in reimbursements, $6,298.

[b] Composed of savings in salaries and wages, $32,668.

[c] Special additional plant maintenance items account for $3 of this per student cost increase.

SAN JOSE STATE COLLEGE—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

OPERATING EXPENSES: An increase of $53,104, or 14.8 percent, results from costs of instructional supplies and services to meet enrollment growth ($24,998), special repair and maintenance items ($15,968), and other maintenance costs necessary to operate new buildings and meet regular upkeep expenses now paid from Junior College funds.

EQUIPMENT: A total allowance of $127,586, or $1,626 over 1952–1953 expenditures, consists of teaching equipment for classrooms and laboratories ($78,556), library books ($37,400), automotive and maintenance equipment necessary to operate and maintain expanded facilities ($6,428), and furniture and office equipment for new positions and to meet requirements of additional students.

Department of Education

CALIFORNIA STATE POLYTECHNIC COLLEGE

A technical college providing occupational training in agriculture, engineering and industry, and in selected liberal arts fields
The college grants a Bachelor of Science degree in agriculture, engineering, and liberal arts; and has been accredited for grantin a general secondary credential, a special secondary credential in vocational agriculture, a special secondary credential i physical education, and the special secondary limited credential in agriculture. In addition a program for graduate study leadin to a Master of Arts degree is provided. Two-year vocational and three-year technical curricula are offered in all agricultural an engineering majors.

The college maintains two branches in Southern California—the Voorhis Campus located at San Dimas, and the nearby Kellog Campus located at Pomona. The Voorhis Campus offers programs in agricultural inspection, citrus fruit production, an ornamental horticulture. The Kellogg Campus, consisting of 812 acres acquired by gift in 1949, is for the expansion of instructiona facilities at this branch.

Located at San Luis Obispo

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

Additional housing facilities on or adjacent to the San Luis Obispo Campus combined with the largest freshman enrollment in the history of the college result in a sharp upswing in enrollment during the current year, which should culminate in a return to pre-Korean student population figures in 1953-54. This factor, plus the shifting of some maintenance expenditures to this budget from the Capital Outlay section, result in an increase of $221,202, or 8.9 percent over 1952-53, as follows:

SALARIES AND WAGES: An increase of $161,122 or 7.6 percent over 1952-53 is caused by the addition of seven teachers at the Voorhis unit to recognize overload on existing faculty; a one-quarter time coordinator of graduate studies to cope with growing graduate enrollments; seven clerical positions required in the instructional pool, the library, and the maintenance section for work load coverage; a physician at San Luis Obispo to handle larger resident student loads in the infirmary; and a supervising groundsman at San Luis Obispo for direction of student crews working on instructional projects in ornamental horticulture. Remaining increases result from faculty upgrading and normal salary adjustments.

OPERATING EXPENSES: An increase of $58,932, or 15.3 percent over 1952-53, results from additional instructional expense of increased enrollments ($9,264), and the addition of special maintenance items ($42,715).

EQUIPMENT: A total of $128,286, or $3,504 over 1952-53, is composed of instructional items to properly operate classrooms and laboratories ($54,891), books and other library equipment ($36,053), maintenance equipment ($20,423), farm implements ($11,600), and administrative equipment for new positions and services ($5,319).

Department of Education

CALIFORNIA MARITIME ACADEMY

he academy educates and trains young men who are mentally, morally and physically qualified for entrance, to become licensed officers in the Merchant Marine. The course is three years and leads to the Bachelor of Science Degree in Nautical Science, specifying Navigation and Seamanship for those in the deck course, marine steam, diesel and electrical engineering for those in the engineering course. Prior to graduation, candidates for the degree take the U. S. Coast Guard examinations for licenses as third mates or third assistant engineers. In addition to the degree and licenses, graduates are appointed ensigns in the U. S. Maritime Service by the Federal Maritime Administration. By virtue of the technical training received, graduates are also issued appointments as ensign in the U. S. Naval Reserve, similar to those received by graduates who have taken Naval ROTC training in the 52 leading universities of the Country. The academic course leading to the above attainments is supported by training at sea approximately three months each year on the training ship Golden Bear, which is on loan to the State from the Federal Maritime Administration.

he State receives for the academy an annual subsidy (currently $25,000) for general overhead from the Federal Government, which also pays the State 68 7/10 cents per diem for subsistence of qualified Naval Reserve students, and pays up to $50,000 annually for the overhaul and drydocking of the training ship. The States of Maine, Massachusetts, and New York have similar maritime academies, similarly subsidized by the Federal Government.

Morrow Cove (Vallejo)

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$196,552	$251,373	$272,912	
Appropriated revenues from student fees, Sections 21155.1 and 21158, Education Code	98,946	101,535	103.014	
Allocations from Emergency Fund	10,128	–	–	
Allocations from Salary Increase Fund	25,967	11,574	–	
Allocations from Price Increase Fund	7,094	–	–	
Total Available	$338,687	$364,482	$375,926	
Unexpended balance, estimated savings	—7,173 [a]	—2,021 [b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$331,514	$362,461	$375,926	
Payable from federal grants [c]	25,000	25,000	25,000	
TOTAL EXPENDITURES	$356,514	$387,461	$400,926	$13,465 (3.5%)
GENERAL ANALYSIS				
Number of positions	*63.2*	*63.2*	*62.2*	*—1*
ENROLLMENT AND UNIT COSTS				
Average enrollment	185	198	200	2
Cost per student	$1,927	$1,957	$2,005 [d]	$48 [d] (2.5%)

The academy's enrollment is planned at an average 200 for the budget year, which is the maximum number that can be billeted with existing accommodations.

SALARIES AND WAGES: Student assistance, at a cost of $850, is allowed to provide needed help for the library. Deletion of the ship's carpenter position at an annual saving of $4.740 is due to a change in the work load of this position aboard the ship.

OPERATING EXPENSES: A net increase of $11,337 over that allowed in the current year is due primarily to the inclusion of $8,163 for special repairs that previously have been financed under Capital Outlay. Of this amount, $6,163 is for needed repairs to the wharf. There is an increase of $3,000 for fuel oil to allow a 9,500 mile training cruise.

EQUIPMENT: Amount requested of $2,774 represents an increase of $27 over the current year. This includes $1,150 for instructional equipment and the balance for various small items needed for operation of the academy.

---

[a] Composed of savings in salaries and wages, $873; operating expenses, $6,917; equipment, $1,012; and loss in reimbursements, $1,629.

[b] Composed of savings in operating expenses, $2,021.

[c] Grants from the Federal Government and the expenditures therefrom are not included in the over-all budget totals. See schedule 7 for summary of federal aid revenues and expenditures.

[d] Special additional plant maintenance items account for $41 of this per student cost increase.

CALIFORNIA SCHOOL FOR THE BLIND

A residential school for general education of blind, partially blind, and deaf-blind children through the elementary and secondary school levels. The education of the blind requires special equipment, particularly library and writing facilities, models for tactual study, and apparatus for corrective physical education. Guidance service is rendered to graduates and ex-pupils by the school's field service. The deaf-blind unit is the only one in the western part of the United States where these doubly handicapped children may be educated.

Analysis

The enrollment of this school for the budget year is planned at a total of 172 students which is the capacity of the school. This enrollment is composed of 160 blind students and 12 deaf-blind students. A shift in the age distribution of the children downward will establish an enrollment of 80 instead of 62 students in the age group of 6 to 10 years in the current year. This factor, plus increased services to the School for the Deaf and increased case load among preschool blind children in the Southern California area are reflected in the following proposed changes in the agency's budget:

SALARIES AND WAGES: The budget provides for 7.6 additional positions at a total cost of $22,296, as follows:

2 Kitchen helper (10 month positions costing $4,000) in order to give more assistance in necessary table service thus allowing the counselors time to supervise and correct the children's eating habits.
2 Counselor at a cost of $5,360 to provide needed coverage on a post assignment basis.
1 Teacher costing $3,760 in order to meet the teaching problems involved due to the increased enrollment among the younger children.
0.1 Senior physician and surgeon—increasing the position from 0.5 to 0.6, at a cost of $710, to meet work load increase at the hospital due to the increased enrollment at the School for the Deaf.
2 Teacher at a cost of $7,080 in order to handle the increased case load among the preschool blind children in the Southern California area.
0.5 Intermediate stenographer-clerk to provide secretarial assistance for the five preschool teachers working out of Los Angeles.

OPERATING EXPENSES: Total increase of $7,013 is due in part to price increase in light, heat, and power, and other minor operating adjustments, but is due primarily to the inclusion of $5,000 for special repairs and maintenance that formerly were financed under Capital Outlay.

EQUIPMENT: The request of $11,078 represents an increase of $4,923 over that allowed in the current year. Of this total amount, $5,180 is to provide two automobiles and necessary office equipment for the two new teachers for Field Service—Preschool Children. The balance is allowed in order to meet the operating needs of the school.

CALIFORNIA SCHOOL FOR THE DEAF, BERKELEY

A residential school admitting mentally normal deaf children 5½ to 21 years of age. Students are given elementary and high school education, training in speech development and lip reading, and an opportunity to learn the fundamentals of a trade.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund

TOTAL EXPENDITURES FOR SUPPORT	$694,190	$929,375	$999,498	$70,123 (7.5%)
GENERAL ANALYSIS				
Number of positions	*146.9*	*186.9*	*192.1*	*5.2*
ENROLLMENT AND UNIT COSTS				
Average Student Enrollment:				
Resident	398	445	440	—5
Nonresident	11	10	10	–
Cost per student	$1,684	$2,027	$2,202 [d]	$175 [d] (8.6%)
Students attending Gallaudet College	14	15	20	5
Cost per Gallaudet student	377	467	438	—29

It is estimated that there will be 440 resident students and 10 nonresident students in the budget year. The school is not expected to reach its maximum enrollment of 492 students due to the fact that approximately 60 students will be transferred to the new deaf school in Riverside in the budget year. In addition the school is lacking in classroom space, and it has been difficult to obtain teachers.

SALARIES AND WAGES: The budget provides for five additional positions at a total cost of $21,288, as follows:

1 Accounting officer I costing $4,092 to provide needed assistance for the business manager.

1 Senior clinical psychologist at a cost of $5,496 to recognize the necessary psychological and audiometric testing which the school has found necessary to provide as enrollments increase.

3 Maintenance positions—a carpenter, a plumber, and a painter, at a total cost of $11,700 are provided in order that the agency may effect savings by doing much of its own maintenance work.

OPERATING EXPENSES: Total increase of $22,650 over the current year is due primarily to the inclusion of special repair and maintenance items that formerly have been financed under Capital Outlay, in addition to other minor operating adjustments.

EQUIPMENT: The request of $17,002 which is a decrease of $12,590 over that allowed in the current year, provides $3,525 for an accounting machine which will receive additional study before purchase, $4,616 for additional teaching and recreation equipment, $1,496 for maintenance and operation equipment, plus other miscellaneous equipment needed to operate the school.

Department of Education

CALIFORNIA SCHOOL FOR THE DEAF, RIVERSIDE

A residential school admitting mentally normal deaf children 5½ to 21 years of age. Pupils are given elementary and high school education, training in speech development and lip reading, and an opportunity to learn the fundamentals of a trade.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

TOTAL EXPENDITURES FOR SUPPORT	$12,624	$132,500	$498,358	$365,858 (276.1%)

GENERAL ANALYSIS

Number of positions	*1.5*	*40*	*118.5*	*78.5*
ENROLLMENT AND UNIT COSTS				
Average student enrollment	–	50	225	175
Cost per student	–	$2,650	$2,215	—$435 (—16.4%)

Completion of initial facilities in the current year will allow a beginning enrollment of 50 students, with an expansion in the budget year to a total enrollment of 225 students. Staffing incident to this increased enrollment, and problems of operating the newly-completed plant, will cause an increase of $365,858, as follows:

SALARIES AND WAGES: The budget provides for 80.7 additional positions at a total cost of $246,651. There are 14 new positions allowed to give proper staffing for feeding operations, 24 additional teachers are included based on the ratio allowed at the northern school, and 19 additional counselors are provided on a post assignment basis. The other new positions included in the budget are allowed on the basis of similar coverage at the Berkeley school or to provide the minimum needed coverage to operate a particular function.

OPERATING EXPENSES: A total increase of $67,244 over the current year is due to the operation of the school on a full year basis for the first time, and to the expansion of enrollment by 175 students. This has brought about an increase of $41,950 in feeding costs alone.

EQUIPMENT: The total request of $2,500 is a decrease of $2,564 over the current year. Of this amount, $1,500 is for feeding equipment that will be purchased using funds provided by the school lunch program. The balance of the request is for miscellaneous items needed to operate the school.

SCHOOL FOR CEREBRAL PALSIED CHILDREN, NORTHERN CALIFORNIA

A residential school for the education and treatment of children afflicted with cerebral palsy, temporarily located at Redwood City. Students are enrolled from 3 to 12 months and are then returned to their local district facilities for continued medical supervision and treatment by the State Department of Public Health, and for special education in the local district schools. A diagnosis and treatment center is maintained through cooperation with the University of California School of Medicine, which provides diagnoses and clinical treatment for all children with cerebral palsy who are referred to the center.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$272,042	$283,410	$295,205	
Allocations from Salary Increase Fund	13,037	11,791	–	
Total Available	$285,079	$295,201	$295,205	
Unexpended balance, estimated savings	—22,568 [a]	—10,103 [b]	–	
TOTAL EXENDITURES FOR SUPPORT	$262,511	$285,098	$295,205	$10,107 (3.5%)
GENERAL ANALYSIS				
Number of positions	*48.7*	*48.6*	*48.6*	–
ENROLLMENT AND UNIT COSTS				
Average enrollment—resident students	29	32	32	–
Cost per student (excluding diagnostic and treatment costs for outside children)	$8,267	$8,140	$8,456	$316 (3.9%)

This budget proposes a continuation of the 1952-53 level of activities. All increases result from price and minor operating adjustments.

Unexpended balance, estimated savings	—869 [a]	—2,146 [b]	–	
TOTAL EXPENDITURES FOR SUPPORT	$313,265	$346,818	$349,465	$2,647 (0.8%)
GENERAL ANALYSIS				
Number of positions	*53.7*	*55.1*	*55.1*	–
ENROLLMENT AND UNIT COSTS				
Average student enrollment—resident students	28	29	30	–
Average cost per student (excluding diagnostic and treatment costs for nonresident children)	$7,878	$8,841	$8,344	—$497 (—5.6%)

The budget proposes a continuation of the 1952-53 level of activities. The increase of $8,973 in Salaries and Wages represents increased cost of existing positions. There are minor adjustments in operating expenses and equipment expenditures represent a decrease of $7,808 over that allowed in the current year in which a school bus is being purchased.

OAKLAND ORIENTATION CENTER

The Oakland Orientation Center was established September 22, 1951, by Chapter 1144 of Statutes of 1951. The orientation center shall admit blind persons as residents and trainees in an intensive program designed for the preparation of blind persons for useful and remumerative work in trades, professions, private business, private industry or public service.

Average resident population	86	89	89	–
Cost per resident member	$1,843 (9 Mo.)	$2,527	$2,785	$258 (10.2%)

The orientation phase of this agency's program as outlined by Chapter 1144, Statutes of 1951 began in the current year with 10 resident students. This enrollment will increase to approximately 20 students in the budget year. This increase in the agency's program is reflected in the following changes in this budget:

SALARIES AND WAGES: Provides for four additional teachers at a cost of $14,880 to train the students in a very intensive program that has to be highly individualized due to their handicap.

OPERATING EXPENSES: A net increase of $11,917 due primarily to maintenance functions that have been transferred from the Oakland Center, California Industries for the Blind to this agency, which will be reimbursable, and to other minor operating adjustments.

EQUIPMENT: Amount requested ($2,595) is a decrease of $1,457 over 1952-53. The request includes $955 for feeding equipment, and the balance for various small items required to operate the agency.

REIMBURSEMENTS: Of the $7,369 increase, $6,274 is for new plant maintenance and $1,095 for additional services to employees for new services to the Oakland Center, California Industries for the Blind.

LOS ANGELES CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons who are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The educational and training activities are a direct charge against the support budget. Manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund, as shown in the Appendix.

Cost per Opportunity Work Center worker	–	$309	$237	—$72 (—23.3%)

The budget proposes a continuation of the 1952-53 level of activities. Salaries and wages are increased $4,396 due to increased cost of existing positions. There are minor adjustments in operating expenses, and proposed expenditures for equipment are $616 less than the approved amount of the current year.

OAKLAND CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons who are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The educational and training activities are a direct charge against the support budget. Manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund as shown in the Appendix.

Opportunity Work Center, San Jose	141	168	259	91

The new factory trades building now under construction will be completed by the first part of the budget year. The budget provides the following changes:

SALARIES AND WAGES: The addition of one intermediate account clerk at a cost of $2,640 is allowed in order to handle the work load of the accounting office. One 0.3 position of intermediate clerk and one 0.3 position of janitor is provided for the Opportunity Work Center in San Jose to give needed assistance, at a cost of $1,584.

OPERATING EXPENSES: An increase of $11,222 over the current year is due primarily to increased costs in connection with the new Factory Trades building, and to maintenance repair items that formerly have been financed through capital outlay.

EQUIPMENT: The allowance of $5,815 is an increase of $2,476 over the current year. Of this amount $4,036 is allowed for the purchase of a replacement bookkeeping machine. Further review of this item will be given before final approval.

POPULATION AND UNIT COSTS				
Average number of workers in factory	43	45	60	15
Average number of workers in Opportunity Work Center	–	10	10	–
Cost per factory worker	$945	$934 [c]	$668	$266 (—28.5%)
Cost per Opportunity Work Center worker	–	434	434	–

This budget provides a decrease of $8,517 in cost of operations over the 1952-53 Fiscal Year. The reduction of one intermediate stenographer-clerk in the budget year is due to reduced work load resulting from curtailed manufacturing operations. Also, a reduction of $6,600 is due to replacement of fire loss in current year.

TEACHERS' RETIREMENT SYSTEM

Administers through the State Teachers' Retirement Board, the Teachers' Retirement Act. Computes, collects, records, invests, and refunds contributions, and computes and pays retirement benefits. Members of the system consist of certificated employees of the Public School System and employees of state departments holding valid teaching credentials who have elected to join the State Teachers' Retirement System.

GENERAL ANALYSIS

Number of positions	*30.4*	*32*	*33*	*1*

The Teachers' Retirement System will continue its steady growth into the budget year, with an increase of active and retired accounts of 13,500 or 9 percent over 1952-53. It is estimated that 163,500 teachers will be covered by this system by June 30, 1954.

SALARIES AND WAGES: The increase of $4,249 is occasioned primarily by salary increases and the assumption that all positions presently authorized will be completely filled in 1953-54 because of enlarged working area.

OPERATING EXPENSES: The decrease of $6,770 results from anticipated elimination of expenditures for utilities, rent, and moving expense, all due to moving of this office to the new Education Building.

EQUIPMENT: A total of $3,529 is proposed, a decrease of $2,911 from 1952-53. This amount provides normal filing and handling equipment for increased membership in the retirement system.

The operating program of the University of California for 1953-54 involves total budgetary provisions in the amount of $67,051,437 from regular state and university sources of support other than trust and contract funds. The total budget requested represents an increase of $5,130,902 over authorized expenditures for the current year, more than half of which, $2,719,195, represents a 66.1 percent increase in "new and extended" programs, and the balance of $2,411,707 constitutes a 4.2 percent larger provision for maintenance of "regular and continuing" activities.

Budget proposals for significant new activities or extensions of existing activities in 1953-54 and provisions required for recently inaugurated departments or other units whose initial development is not substantially complete are summarized in the table below; also included are provisions for special research projects undertaken by the university as a result of specific legislation.

---

[b] Represents three graduate students full year plus 625 undergraduates in College of Letters and Science, Spring Semester only.

[c] Excludes expenditures and enrollment, if any, for the following activities and functions: (1) Summer Sessions, Extension Divisions, Vocational Education, College of Letters and Science at Riverside, School of Medicine at Los Angeles and new hospitals at Los Angeles and San Francisco; (2) Organized Research Activities—such as the Scripps Institute of Oceanography at La Jolla, the Citrus Experiment Station at Riverside, Lick Observatory at Mt. Hamilton, the Institute of Experimental Biology, etc. (however, unit costs include expenditures for research and investigation carried on by academic personnel under departmental or Agricultural Experiment Station auspices. These are particularly significant in the College of Agriculture at Davis, Berkeley, and Los Angeles, and in the Medical Center at San Francisco); (3) Auxiliary Enterprises, such as dormitories and dining halls (however, unit costs include expenditures for student health service); and (4) Organized activities of educational departments such as the University Creamery at Davis, and the Optometry Clinic at Berkeley, which are supported out of their own income (however, unit costs include expenditures for the University Hospital at San Francisco in excess of its income).

State-wide:				
University Physician—Occupational Health	7,492	31,544	60,416	28,872
TOTALS, NEW AND EXTENDED ACTIVITIES	$3,058,725	$4,113,648	$6,832,843	$2,719,195

The overwhelming proportion of the increases for these new and extended activities are required by commitments already undertaken by the university to meet its responsibilities in the growing State of California, notably for establishment of schools of law, nursing and medicine on the Los Angeles campus, for expansion of the Medical Center at San Francisco and for development of new colleges of letters and science at the Davis and Riverside campuses. Four new agricultural research projects of greatest need, out of many well-supported demands for special research urged upon the university by responsible members of the industry, are recommended at a cost of some $104,000 in 1953-54. Only two new activities of a continuing nature—an Institute of Near and Middle Eastern Studies at Los Angeles and an Institute of Marine Resources at La Jolla—are proposed at a cost of $94,996 in the coming year.

The departmental budgets for salaries in 1953-54 include provisions for regular merit increases due under established academic and nonacademic salary schedules and for academic promotions normally to be expected under existing university academic personnel policies. These provisions, together with other minor adjustments for returns from leave, changes in percentage of time, etc., aggregate $1,358,000 for the budget as a whole. They constitute a virtually fixed requirement accounting for $1,193,000, or 54%, of the increase in "regular and continuing" activities budgets. The remaining $1,218,707 of increase in "regular and continuing" activities represents a 2.1% augmentation of budgeted expenditures for 1952-53 and is required for a wide variety of needs on the eight campuses of the university.

ENROLLMENT

Widespread increases in 1952 fall semester registrations support estimates of the registrars on the various campuses that enrollments in 1953-54 will equal or exceed those for the present year. Following two years of sharp decline from the postwar peak, registrations for the current year have leveled off only moderately below the number for 1951-52. The 32,669 registrations now estimated for 1952-53 are more than 1,500 above the registrars' estimates for the year made last spring. The new level of enrollment is a decrease of only 2.8 percent below the number for 1951-52, instead of an expected drop of 6.9 percent.

Barring unforeseen changes in military manpower requirements, enrollment for 1953-54 is currently estimated at an average of 33,049 students. This would represent an increase of 380 students, the first gain in over-all university enrollment since 1947-48. The increase also would mark the second year of gain in the number of lower division students and, with a slight increase, an upward reversal of trend for upper division students. However, a further minor decline is expected in the total number of graduate students. With continuation of the decline in the number of veteran students, the estimates reflect an extension of the steady increase in nonveterans. Except at Los Angeles, the estimates do not anticipate a material effect on registrations from returning Korean veterans. On that campus this factor is expected to become increasingly important, registration of 1,000 Korean veterans being forecast for the fall semester 1953 and 1,200 in the spring semester 1954. Should this factor become equally important elsewhere, general enrollment may prove even larger than now forecast.

The prospect of a leveling off and a turning point in registration trends occurring this year and next, barring increases in military manpower requirements, is in accordance with fundamental long-range factors. Outstanding among these are the gradually increasing birth rates of the late 1930's which in turn have resulted in moderate increases in the new crop of college students coming up through the high schools.

Enrollment estimates for 1953-54 show increases on all campuses except Berkeley and Santa Barbara, where the recent declines are expected to carry over into 1953-54, but at a reduced rate. At Berkeley a decrease of 4.5 percent is expected compared with 5.9 percent this year (measured from the previous year in each case). At Santa Barbara a decline of 3.3 percent for 1953-54 is forecast compared with a decrease of 4.4 percent for 1952-53. In both instances the decline in registrations this fall was sharply smaller than earlier forecasts had indicated, at Berkeley being less than half the estimated reduction and at Santa Barbara less than two-thirds. At Riverside an initial enrollment of 625 is estimated for the new College of Letters and Science which is scheduled to open in the spring semester of 1954. Similarly at Davis, further expansion of enrollment in Letters and Science, which opened in the fall of 1951, is reflected in the projected increases.

UNIVERSITY OF CALIFORNIA—Continued

INCOME AND AVAILABLE FUNDS

Total current income of the university from sources other than state support, gifts, endowments and payments under contracts is estimated at $13,549,487 in 1953-54, a net decline of only $8,999 from the current year's total of $13,558,486. Changes in estimated receipts from principal sources for the two years are described below.

Veterans' Tuition: The estimated decrease of $247,397 in revenues from veterans' tuition reflects the continued decline of veterans' entitlements under Public Laws 16 and 346. The anticipated increase of $281,697 in revenues from regular session fees is due to the expected increase in student enrollment.

Summer Sessions: Fee income from summer sessions shows a decrease of $110,742 due to an estimated decrease in enrollment from 16,232 in 1952 to 13,861 in 1953. The budgeted expenditures have been reduced accordingly, so as to keep the 1953 summer session on a self-supporting basis.

Extension: The decrease of $50,000 in fee income of the university extension anticipates a decline in enrollment in the Far East Command Program with a corresponding reduction in proposed expenditures. The estimated income from regular activities of university extension remains unchanged from the $1,700,000 budgeted for 1952-53, but the general fund subsidy for 1953-54 has been increased slightly from $512,794 to $537,931 to meet merit salary increases and a modest strengthening of administration.

Hospitals and Infirmaries: The increase of $133,913 in the income of hospitals and infirmaries in 1953-54 is accounted for mainly by anticipated new income of $75,000 from the department of radiology and $30,000 from the dietary kitchen of the new teaching hospital at Los Angeles. An additional $10,000 is expected to be earned by the dietary kitchen of the Herbert C. Moffitt Teaching Hospital at San Francisco.

Residence and Dining Halls: Revenues from operations of residence and dining halls show a decrease of $64,302. This is due chiefly to the discontinuation of university-operated meal service at the men's faculty club, Berkeley, $60,000, and minor decreases in the other units. Expenditures of residence and dining halls on all campuses are budgeted entirely from income of these operations.

Departmental Sales and Miscellaneous: The largest single item accounting for the increase of $82,806 in anticipated income under the heading of departmental sales and miscellaneous is the estimated earnings of $30,270 by the new college bookstore at Riverside. After an initial proposed subsidy of $2,275 from general university funds in 1953-54, the bookstore is expected to be entirely self-sustaining. Of the balance of the increase, $21,960 is attributable to expected additional interest on current fund investments and the remainder to increased sales returns on a variety of items.

Special State Funds: The decrease in special fund income from the State of California of $36,724 pertains entirely to funds for vocational education, as a result of the transfer of activities in connection with preparation of text materials for apprenticeship training from the university to the State Department of Education.

Federal Funds: The increase of $1,750 in receipts anticipated from the federal appropriations is applicable mainly to activities in the College of Agriculture. Allocation for current purposes out of receipts from overhead on federal contracts is expected to continue at the current year's level of $600,000.

Adjustments: In addition to current income of $13,549,487 the funds available for 1953-54 reflect the inclusion of $628,537 carried forward out of 1951-52 general university fund income, and $250,000 representing excess savings in budgeted salary provisions for 1952-53, over and above the $950,000 anticipated by the university in its budget for that year.

General Fund: For this reason, although current income for university funds is estimated to decline only $8,999 in 1953-54, it is necessary to request an increase of $4,514,302 or 9.4 percent in the state appropriation for support to meet the proposed increase in total expenditures of $5,130,902, or 8.3 percent.

PRINCIPAL ELEMENTS OF INCREASE

The principal elements of the budget increases proposed for 1953-54 are in the following areas:
Medical sciences expansion,
Development of Colleges of Letters and Science at Davis and Riverside,
Agricultural sciences,
Business office operations,
Libraries,
Development of Los Angeles campus.

MEDICAL SCIENCES EXPANSION

University programs in the fields of medical sciences and allied activities will assume even greater proportions in 1953-54. With budgets totalling nearly 10 million dollars, planned operations in these fields will take nearly 15 percent of the total university operating budget, compared with 13 percent during the current year. Recommended increases, even after deletion of more than one-third of amounts requested, will make up 36.6 percent of the increases asked for the whole university.

The coming year will see the breaking in of the two new teaching hospitals in Los Angeles and San Francisco and near-completion of the buildup of the university's second medical school at Los Angeles which is scheduled to move into its new quarters late in the year and, with but few exceptions, to round out its professional staffing. These new activities, together with a continuation of the building up of the Los Angeles School of Nursing, will require increases of $1,369,301, up 86.8 percent from 1952-53.

Activities in the other medical sciences units require an increase of $506,523, or 7.8 percent, to a total of $7,015,263.

Provisions for the various units are tabulated below followed by a brief description of the more important developments.

	ESTIMATED EXPENDITURES 1952-53	PROPOSED EXPENDITURES 1953-54	CHANGE FROM 1952-53 AMOUNT	%
State-wide units	$687,278	$705,918	$18,640	2.7
San Francisco and Berkeley:				
College of Dentistry	$515,334	$543,538	$28,204	5.5

Regular and continuing activities	$6,508,740	$7,015,263	$506,523	7.8
TOTAL	$8,084,804	$9,960,628	$1,875,824	23.2

College of Dentistry, San Francisco ____ Increase $28,204

No significant change is planned in the dentistry program for 1953-54. Classes admitted will still remain at 60 dental students and 15 dental hygiene students. However, in 1954-55, when space in the new Medical Sciences Building becomes available, expansion of the size of the classes is planned.

Of the increase, $16,482 is for merit salary increases and promotions, and $1,544 will provide for an assistant dean of the college. Modest increases in operating expenses and equipment are also provided.

School of Medicine, San Francisco ____ Increase $187,814

No major changes are planned for 1953-54; the increase will provide $63,318 for normal merit increases and promotions, as well as the rounding out of personnel, supplies and expense, and equipment in areas not up to desirable standards. The budget includes 14.2 (FTE) academic and two (FTE) nonacademic new positions.

School of Nursing, San Francisco ____ Increase $35,883

The increase in this budget is designed primarily to provide staff more nearly commensurate with the existing student load and its planned expansion. The beginning class was increased 30 students this fall, and it is planned to increase the size of the spring 1953 class by 20 additional students. Four additional instructors at $18,960 and $7,940 for additional lecturers in 1953-54 will make possible the instruction of this increased enrollment.

College of Pharmacy, San Francisco ____ Increase $21,604

The College of Pharmacy plans no major change in program, nor increase of student load. The increases cover $11,844 for merit salary increases and promotions, a secretary-stenographer at $2,772 in the dean's office, and a laboratory helper at $2,400.

Medical Center Library, San Francisco ____ Increase $22,650

This budget reflects a consolidation of the limited library facilities of the pharmacy, dentistry and nursing schools with the School of Medicine library to form a single Medical Center library with more adequate staff and facilities. Necessary provisions in the 1953-54 Budget include an additional typist-clerk, a secretary-stenographer and approximately $32,000, an increase of $12,000, for books and binding. The Medical Center Library, apart from the Stanford-Lane Library, is the only existing major collection on medical sciences on the Pacific slope.

School of Medicine, Los Angeles ____ Increase $475,016

The budget for 1953-54 carries forward the plan of progressive build-up of this new school and contemplates admission of a third entering class of 36, continuation of instruction of the 60 students in the first and second year classes and the training of some 30 to 50 graduate students. Upon full occupancy of the new hospital and medical sciences units in 1954-55, expansion of the size of entering classes to 50 per year is planned, with a resultant attainment of a full load of 200 medical students by 1956-57. At the same time it is anticipated that graduate students will increase to approximately 150.

The budget is based on the expectation of occupying part of the Medical School building by late spring of 1954 and is closely correlated also with the opening and operation of the new Teaching Hospital for patient care in July, 1954.

Provisions for 35.1 additional academic positions will allow most of the major departments to round out their key personnel roster in 1953-54. However, need will remain for some additional expansion in 1954-55 to complete the roster for fourth year class instruction. Once this senior faculty has been acquired, however, subject to limitation of physical facilities, the number of students can be increased greatly, with only a relatively small cost in additional low-rank faculty and nonacademic assistants. In the 1953-54 Budget 28.5 new nonacademic positions are also requested at a cost of $90,490, together with increases of $42,547 in General Assistance and $10,700 in Supplies and Expense. The Biomedical Library is expanded by $19,100 to provide an additional $14,000 in books and $5,000 in binding.

School of Nursing, Los Angeles ____ Increase $14,918

During 1953-54 the School of Nursing at Los Angeles will also continue the build-up program of recent years. Of the increase, $13,470 will provide two full-time-equivalent new academic positions and one new nonacademic position to meet further needs for putting the planned program into operation.

UNIVERSITY OF CALIFORNIA—Continued

PRINCIPAL ELEMENTS OF INCREASE—Continued

Teaching Hospital, Los Angeles——————Increase $480,018

The 1953-54 Budget for the Teaching Hospital, Los Angeles, is based on an expected occupancy of the new building during the January-March quarter of 1954, followed by a period of staff build-up and trial operation of approximately three months' duration. Actual operation of the 324-bed Teaching Hospital will follow immediately upon completion of the trial run, beginning July 1, 1954, so that the first provision for reasonably full operation of the facility will fall in the budget for the subsequent year, 1954-55.

New positions, which are planned to be added progressively as break in operations get under way, will cost $107,699. These will be equivalent to 25.2 man-years of service. Increase of $278,170 in General Assistance are also required to provide operating staff.

It is estimated that the hospital will produce income of approximately $105,000 during 1953-54, $75,000 from the operation of the hospital radiology department temporarily established in the Weyburn Building and $30,000 from meal service by the hospital dietary department.

Moffitt Teaching Hospital, San Francisco——————Increase $399,349

Occupancy of the new Moffitt Teaching Hospital is planned on approximately March 1, 1954, followed by a period of some four months during which furniture and equipment will be moved in, staff will be recruited, trained, and indoctrinated and equipment and procedures tested. Opening of the hospital for patient care is anticipated for July 1, 1954. Initial occupancy of 165 is planned with progressive buildup to the total capacity of 483 adult beds, and 50 bassinets.

For the preparatory and breaking-in activities falling in 1953-54, the budget proposes 77.4 full-time equivalent new positions which will cost $123,671. This will provide the balance of the key staff who will form the nucleus of experienced personnel to direct the additional staff to be added during the first four months of initial operation. In addition there are increases of $129,772 for general assistance operating personnel, and $145,549 for supplies and expense.

DEVELOPMENT OF COLLEGES OF LETTERS AND SCIENCE AT RIVERSIDE AND DAVIS

Increased expenditures for development of the new College of Letters and Science at Riverside, which is scheduled to open in the spring semester of 1954, and for further development of the college at Davis amount to $571,026 or 11.1 percent of the increase for the entire budget. Total provisions for these new colleges and their related library, administration and service units in 1953-54 are set at $1,622,267, as described below.

Davis——————Increase $158,255

Of the increase, $84,545 is recommended for the second year's operation of the College of Letters and Science at Davis, including 14.2 (FTE) new positions (12.2 academic and 2 nonacademic) with aggregate salaries of $53,298 to provide essential teaching staffs for departments inaugurated in 1952-53 and to expand curricula offerings in other departments transferred from the College of Agriculture. By 1953-54, third and fourth year courses will be needed in all departments offering majors, and a solid core of service courses will be needed in the nonmajor departments. This represents a final step in filling the necessary posts to complete what was considered to be the minimal staff with which the beginning of a letters and science college could be operated. It is anticipated that much of the 11.4 percent enrollment increase predicted for 1953-54 at Davis will occur in letters and science and home economics.

Further, an increase of $73,710 is recommended for library and research expense, of which $10,000 is for faculty research and research travel which is essential for recruitment and retention of an able academic staff and $57,390 is necessary to make reasonable progress toward building a first-class library commensurate with the needs of the College and the Davis campus. In addition $6,320 is provided for a special research project on weed control.

Riverside——————Increase $412,771

With opening of the new College of Letters and Science at Riverside scheduled for the spring semester of 1953-54, the proposed budget of $283,185, an increase of $242,250 over the 1952-53 budget, provides for a half year of instructional activity. The budget is planned to inaugurate a well-integrated liberal arts college with five major instructional divisions: Humanities, Physical Education, Life Sciences, Physical Sciences, and Social Sciences, each headed by a divisional chairman, offering instruction in 28 subject-matter fields. Emphasis is placed on recruiting a young staff; of the 60 additional academic positions provided (on a half-year basis), aside from the dean and five divisional chairmen, 10 are at the associate professor level, 29 at assistant professor, and 21 at instructor rank or lower. The registrar has estimated a student enrollment of 625 for the spring semester. A schedule of course offerings preparatory to publishing a campus announcement is now being formulated.

In addition, development of the college requires an increase of $84,664 for necessary expansion of the Letters and Science Library to provide the nucleus for work in the liberal arts and $5,000 for faculty research assistance and travel.

The seven campus-wide administrative and service departments under the provost will require increases aggregating $80,857 to provide for new offices of dean of men, dean of women, public information and student health service, as well as augmented provisions for the office of the provost and the registrar-admissions office.

DIVISION OF AGRICULTURAL SCIENCES

The proposed 1953-54 Budget provides a total of $11,810,605 for the Division of Agricultural Sciences, which includes the colleges of agriculture at Davis, Berkeley, and Los Angeles, the citrus experiment station at Riverside, and the state-wide agricultural extension service, agricultural experiment station, and Giannini Foundation for agricultural economics. As summarized below these provisions represent an increase of $837,994, or 7.1 percent over the 1952-53 budget. $163,518 of the requested increase is for new and extended activities, involving development of five departments recently established or provided with new facilities and support of special research projects inaugurated at the request of the Legislature or to meet other urgent needs. For regular and continuing operations of the division the increase aggregates $674,476 or 6.1 percent.

DIVISION OF AGRICULTURAL SCIENCES—Continued

	ESTIMATED EXPENDITURES 1952-53	PROPOSED EXPENDITURES 1953-54	CHANGE FROM 1952-53 AMOUNT	%
State-wide:				
Office of the Vice President—Agricultural Sciences	$194,116	$206,064	$11,948	6.1
Agricultural extension	2,857,422	3,089,582	232,160	7.5
Other	60,480	65,000	4,520	7.4
Total, State-wide	$3,112,018	$3,360,646	$248,628	7.4
Berkeley	2,067,752	2,174,934	107,182	4.9
Davis	3,862,768	4,113,275	250,507	6.1
Los Angeles	647,741	703,704	55,963	8
Riverside	1,282,332	1,458,046	175,714	12
Totals, Agricultural Sciences:				
New and Extended Activities (Schedule A)	627,175	790,693	163,518	20.7
Regular and Continuing Activities	10,345,436	11,019,912	674,476	6.1
Total	$10,972,611	$11,810,605	$837,994	7.1

Under Regular and Continuing Activities the largest increase is $232,160, to enable the Agricultural Extension Service to meet the more urgent requests of farm people for additional farm and home advisers and subject matter specialists. All lines of extension activity have mounted steadily since the war and more and more farmers are coming to the Agricultural Extension Service for technical advice and assistance. During 1951, the county staffs were called upon to make 106,632 farm and home visits and provided technical advice to 451,749 people who called on them at their offices. They presented information to the people of the State in 19,748 news stories and 6,964 radio talks, and distributed 803,777 bulletins. In 1951 the staff conducted 21,767 educational meetings attended by 778,699 people, as contrasted with 19,806 meetings attended by 664,589 people in 1947. Enrollment in 4-H Clubs was 56 percent higher in 1952 than in 1948. For 1953-54 five counties have already appropriated funds for the expenses of additional farm and home advisers, and four other counties have given assurance that such appropriations will be made as soon as Extension personnel can be supplied.

The increases proposed for regular and continuing departments of instruction and research on the Berkeley, Davis, Los Angeles, and Riverside campuses are almost entirely for expanded research, mainly to provide technical assistance and necessary equipment for the present staff. At Berkeley there is need to expand work on strawberry mites, control of diseases affecting flowers and ornamentals grown in the north, and basic research in the field of photosynthesis. At Davis, the proposal includes expansion of research on walnut diseases, irrigation studies on cotton and turf, and vegetable experiments at the field station recently provided by the growers of the Salinas Valley. The largest increases at Los Angeles are for maintenance and equipment of new facilities, mainly greenhouses, and for expansion in research on avocado root-rot disease and on the relation of harvest and storage practices to quality of fruit. Over half of the increase for Riverside is for maintenance of orchards. Because of lack of maintenance funds in the past, university orchards have become heavily infected with red scale and much of the equipment is old and obsolete.

New and extended activities of the division include the Forest Products Laboratory at Berkeley, whose development is at an early stage since its facilities at the Richmond Field Station will probably not be completed before mid-1954. The proposed increase of $14,060 will enable the appointment in 1953-54 of the technical director for preparatory work and developing support of the industry prior to actual research operations in 1954-55. At Davis, proper development of the departments of Food Technology for which $17,052 additional is now proposed, Home Economics with $19,060 proposed, and Poultry Husbandry with increases of $20,544, has been prevented, until recently, by lack of adequate facilities. With the availability of new buildings, the additional funds requested will make it possible to staff these departments more adequately and to provide facilities necessary for more effective operation. The Department of Floriculture and Ornamental Horticulture at Los Angeles has made marked progress since its establishment in 1946, but is still seriously handicapped by lack of necessary equipment and assistance. The increase of $16,576 will meet the more urgent needs for 1953-54.

Net increases of $76,226 for 10 special research projects are proposed, including four new research projects budgeted at $104,815 initiated to meet urgent demands:

Citrus Grove Rejuvenation, Riverside ---------- $70,044

The valuable citrus industry of California is experiencing progressively declining yields per acre and reduction in size of fruit. Unless these downward trends are checked, citrus production in this state will largely disappear, with consequent loss to growers and jeopardy to the tax base of numerous communities. To meet this urgent problem a substantial part of the resources of the Citrus Experiment Station will be mobilized for immediate expansion of specific research, but to do so will require additional funds for technical and field assistants and related expense and equipment.

Small-seeded Legume Harvest ---------- $8,070

Improvement in methods of threshing crops such as alfalfa and clover are urgently needed. Under present methods up to one third of the seed produced is lost in threshing—a loss of around five million dollars a year. Additional research on the mechanical factors of harvesting will be undertaken to obtain larger yield of seed and prevent damaging of seed in the harvesting process.

Use of Aircraft in Agriculture ---------- $5,100

This provision is made for the design and testing of special aircraft equipment to improve the efficiency of seeding and dusting by air.

Poultry Diseases Research ---------- $21,601

In order to cope with an apparently new respiratory disease which is threatening the poultry industry of the State, the above sum is being proposed for necessary nonacademic assistance to the professional staffs of the Departments of Veterinary Science and Poultry Husbandry who will cooperate in combating the disease.

A decrease of $23,355 for Oriental Fruit Fly Investigations on three campuses is possible because of the successful completion of major phases of this research, while acquisition of important units of nonrecurrent equipment in 1952-53 enables a reduction in the amount needed for Southern California Berry Investigations in the coming year.

UNIVERSITY OF CALIFORNIA—Continued

BUSINESS OFFICE OPERATIONS

Business operations for all campuses of the university, carried on through the local business offices under the state-wide coordination of the vice president-business affairs, account for $8,277,622, or 12.4 percent of the total university budget for 1953-54. These operations include maintenance and operation of physical plant facilities and planning their construction; operation of such auxiliary enterprises as residence and dining halls, etc., and central service facilities, such as purchasing, cashiering, pooled automobile and mailing services, etc.; and the general management of business affairs. The increases in the budgets for the business office for the coming year, as summarized by campus below, total $676,036 or 8.9 percent, of which approximately $87,000 is to meet the cost of normal merit salary increases, and some $150,000 is to cover wage increases granted to general assistance personnel, in line with prevailing union wages and State pay rates for corresponding crafts.

	ESTIMATED EXPENDITURES 1952-53	PROPOSED EXPENDITURES 1953-54	CHANGE FROM 1952-53 AMOUNT	%
State-wide	$568,773	$625,246	$56,473	9.9
Berkeley	3,098,608	3,113,263	14,655	0.5
Davis	1,358,733	1,459,673	100,940	7.4
La Jolla	171,669	183,306	11,637	6.8
Los Angeles	1,518,132	1,607,255	89,123	5.9
Riverside	155,732	341,235	185,503	219.1
San Francisco	279,914	495,203	215,289	76.9
Santa Barbara	450,025	452,441	2,416	0.5
Totals, Business Office:				
New and extended activities (see schedule A)	435,646	836,438	400,792	92
Regular and continuing activities	7,165,940	7,441,184	275,244	3.8
Totals	$7,601,586	$8,277,622	$676,036	8.9

Substantial additions and extensions of business office activities at Riverside and San Francisco required to serve the new developments there make up $400,792 of the increase. Almost all of the increase for "regular and continuing" activities, likewise, reflects services required for new buildings and facilities on other campuses to be brought into use during 1953-54, or for which the cost of a full year's operation will be included in the budget for the first time.

At Riverside an increase of $152,958 is primarily due to the additional service load for the five new letters and science buildings and the 53 acres of ground to be occupied by them; the weighted area of buildings to be maintained will be increased by 192,593 square feet, or 180 percent. The new college bookstore adds $32,545 to the budget total, but is covered, except for an initial subsidy of $2,275 for equipment, by estimated income from sales. Future operations will be maintained on a self-supporting basis.

At San Francisco, the increase of $215,289, likewise, is almost wholly due to the scheduled completion of new facilities—the Medical Sciences Increment No. 1, Incinerator and A.C.T.H. Laboratory buildings. These will add 168,833 square feet, or 57 percent, to the weighted building area requiring maintenance and service. In addition, the 372,600 square-foot Moffitt Hospital is scheduled for occupancy late in the year, but its maintenance will be provided in the budget for the hospital.

On the other campuses the major items of increase, aside from wage rate adjustments, are:

In the state-wide account four new positions are provided, three for purchasing and inventory work at Berkeley and Los Angeles, and one, a secretary, for the hospital director's office.

At Berkeley increases reflect higher rates for prevailing wage employees and requirements for servicing the new home economics building.

At Davis 14 new positions and related provisions are required for servicing the expanded ground areas and physical plant and a $20,000 augmentation of provision for maintenance and repair is made to meet current needs.

At La Jolla the increases are needed for janitorial and repair service for the new wing of Ritter Hall and maintenance of the recently acquired Mission Beach property.

At Los Angeles an additional policeman and increased provisions are required for enlarged areas to be served, and higher rates for prevailing wage personnel must be covered.

At Santa Barbara, the only sizable increase is for standby upkeep and maintenance of Goleta Campus buildings and facilities. The budget is presented on the basis of continued occupancy of the present Rivera and Mesa campuses during 1953-54, since completion of the new buildings at Goleta in time for the fall term 1953-54 now seems improbable. When the move to the new campus is made, additional business office budget requirements for a full year's operations on the Goleta campus are estimated at $175,000.

LIBRARIES

Library needs for 1953-54 require a $504,561 increase in support to a total of $3,447,572 for the University as a whole, up 17.1 percent over 1952-53. Very large increases are required at Riverside and Davis for the building up of libraries for the new Colleges of Letters and Sciences and at San Francisco for the development of the newly consolidated Medical Center library. At Los Angeles significant expansion of facilities is also covered, while at all campuses additional support is required to offset substantially increased prices for books, serials and binding. Library provisions for the various campuses are summarized and explained for Berkeley and Los Angeles below.

State-wide	$8,760	$9,058	$298	3.4
Berkeley	1,568,849	1,717,949	149,100	9.5
Davis	152,760	210,150	57,390	37.6
La Jolla	23,548	31,980	8,432	35.8
Los Angeles	933,733	1,110,215	176,482	18.9
Riverside	70,066	156,735	86,669	123.7
San Francisco	68,143	90,793	22,650	33.2
Santa Barbara	117,152	120,692	3,540	3.0
Totals	$2,943,011	$3,447,572	$504,561	17.1

UNIVERSITY OF CALIFORNIA—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

LIBRARIES—Continued

Berkeley

The $149,100 increase for the libraries at Berkeley is principally needed to offset increased costs and normal salary and wage adjustments. Only one and one-half full-time-equivalent new positions are provided. For the University Library an increase of $65,100 for books and binding must be given high priority in order that an adequate collection of books and serials may be maintained in the face of severe pressures on the book budget from (1) an average 10 percent increase in book prices and a 35 percent increase in the price of serial publications over 1951-52; (2) an average annual increase of 8 percent in the number of new titles published in the United States since 1946 and a somewhat greater increase of scholarly publications abroad in fields which are of interest to the university; (3) the university's expanded areas of research and scholarship. The budget request would provide an increase of $40,100, or 26.7 percent, over the 1952-53 book appropriation which totaled $150,000 and an increase of $25,000 in binding over the 1952-53 allowance of $60,000 which has proved to be inadequate in the face of the rising proportion of serials and other unbound materials purchased, and because of the increased unit costs for binding.

The balance of the increase of $32,998 required for the University Library would provide an additional librarian and a half-time library assistant, $11,818 for general assistance merit and rate increases, $5,369 for increased supplies and expense costs, and $11,083 for highest priority equipment needs such as card files, book ends, cabinets, etc., many of which have been repeatedly deferred.

For the Bancroft Library an increase of $10,946, exclusive of merit increases and promotions, is required, largely for replacement of endowment funds used temporarily to finance a librarian III position to head up the newly organized Manuscript Division.

Los Angeles

An increase of $176,482 is required at Los Angeles campus to keep pace with the expanding needs of that campus, including 14 new positions, costing $41,592, to strengthen the central library services in keeping with mounting work loads and to staff branch libraries in engineering, medicine, geology, chemistry and other departments which have occupied new quarters. The librarian reports a 28.4 percent increase in book circulation in 1951-52 over the previous year, reflecting, in part, new schools and departments, increased graduate enrollments, and expanded research activities. An increase of $20,650 in general assistance will cover $9,520 in merit and rate increases and will permit some extension of week-end service, while $15,681 more in supplies, expense and equipment is needed in 1953-54 to meet the more urgent operational needs of the main library and the new branches.

An increase of $51,250 in the book and binding budgets to a total of $225,000 is requested to maintain the program of book purchases in the face of rising costs and to permit a modest advance to be made in building up the book and serials collections at Los Angeles. In addition, a $19,000 increase is proposed in the special provisions for Biomedical Library acquisitions and binding to meet the needs of the Medical School.

GROWTH AND DEVELOPMENT OF THE LOS ANGELES CAMPUS

The 1953-54 State Budget requests for Los Angeles total $14,677,705, an increase of $2,100,889 or 16.7% above the 1952-53 Budget. This increase, nearly twice that for any other campus, reflects the costly developments in the Medical Center already described, which aggregate $969,952; however, even excluding the Medical Sciences and Hospital, the campus budget represents a 10.2% increase over the current year. The increase recommended is designed to carry forward the expanded graduate and professional programs at satisfactory levels and to make modest headway in meeting the educational deficiencies accumulated during the crowded postwar years from 1947 through 1950.

The declines in enrollment at Los Angeles since the postwar peak of three years ago have been relatively more moderate than elsewhere in the university. Overall campus enrollment is expected to average 13,200 this year, only 11% below the high point of 14,818 students reached in 1949-50. An estimated increase of 4.5% to an average of 13,800 is predicted for next year.

New and Extended Activities________________________________Increase $1,101,048 (58.9%)

In addition to the Medical Sciences program and the expansion of Floriculture and Ornamental Horticulture already described, the budget provides for two other new and extended activities on the campus which are discussed briefly below.

For the School of Law, the budget provides an increase of $63,760. This school, which for the second year is offering instruction in all three years of professional classes, is expected to substantially reach its full state of initial development in 1953-54. The addition of two new Associate Professors will round out the staff and will permit advanced degree work. Four new nonacademic positions are needed to complete the staffing of the Law Library and to give additional secretarial assistance to staff members. The budget also provides for a new item of $10,000 to initially subsidize the publication of a Law Review, considered by every first class law school to be an indispensable tool in a law training program. Development of the new Law Library to proper standards will require a $15,000 augmentation in the $45,000 appropriation made for books this year.

A new Institute of Near and Middle Eastern Studies, with a budget of $50,760, is proposed in 1953-54 to initiate a new program of studies in a hitherto neglected field of scholarship in which there is now great interest and real need for adequate training. Only Princeton and Columbia now have institutes in this field and it is expected that financial support will be received from foundations interested in the project, once a start is made. Over half of the budget, $31,340, is for building up necessary library research materials; the remainder will provide for a director, and a small amount of secretarial and research assistance, together with miscellaneous operating expenses for initiating the program.

Regular and Continuing Activities________________________________Increase $999,841 (9.3%)

Requirements of the business office for maintenance and operation of the enlarged campus plant and provision of service to the instructional and research activities, discussed earlier, account for $89,123 of this increase; an additional $39,387 is for agricultural science activities on the Los Angeles campus as listed in the discussion of that program. The other regular and continuing programs on the campus need increases of $871,331, a gain of 10.1 percent. These increases are proposed to meet the more urgent needs in areas of deficiency and to strengthen course offerings and facilities to meet growing demands, especially at the upper division and graduate levels.

In the College of Applied Arts increases of $91,062 or 7.6 percent will add 3½ new full-time-equivalent positions in the Department of Art, two each in Home Economics and Music, and 2½ in Theatre Arts. Addition of $56,452, a gain of 20.6 percent, for the School of Business Administration, where classes have been of excessive size, will permit some improvement in the quality of offerings and strengthen course work for the M.B.A. and Ph.D. degrees. Three new staff members are included for the fields of Insurance and Statistics, Production Management, and Transportation and Traffic. An increase of $53,092 or 10.7 percent is required for the School of Education, where alleviation of overcrowded classes is planned through the occupancy of expanded quarters and addition of 3½ faculty members.

UNIVERSITY OF CALIFORNIA—Continued

LINE	EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GROWTH AND DEVELOPMENT OF THE LOS ANGELES CAMPUS—Continued

Increases of $83,693 or 9.4 percent are proposed for the College of Engineering to meet urgent needs in this school which is experiencing an expanded enrollment load, especially at the lower division level, and still requires further strengthening of its facilities. The increases would provide 3½ new faculty members, 3 nonacademic employees and a $20,000 addition in the funds for equipment.

The College of Letters and Science is allocated an increase of $347,974 or 10.7 percent in the proposed budget. The increases are needed to improve general teaching standards and correct critical deficiencies in the 28 departments of the college, which last year carried 58 percent of the student-hour load on the Los Angeles campus. Increases in academic staff are asked in the Departments of Anthropology and Sociology, Bacteriology, Chemistry, English, Geology, History, Italian, Mathematics, Meteorology, Philosophy, Physics, Political Science, Slavic Languages, and Zoology.

Increases of $176,482 are provided for the libraries at Los Angeles to keep pace with campus developments and to meet higher costs.

ANALYSIS OF EXPENDITURES BY FUNCTION

In all budgets involving salaries the increases include provision for normal salary adjustments and promotions which in the aggregate account for $1,358,000 of the over-all increase of $5,130,902 requested in the new budget.

General Administration -- Increase $357,249

Additional expenditures reflect the establishment of more fully functioning offices for chancellors and provosts, and the necessary strengthening of accounting, personnel, business and student services to meet the impact of new activities whose work load in the early period of staffing and organization is out of all proportion to their operating expenditures.

Budgeted increases of $86,918 are required for the offices of chief campus administrators, almost all for the three recently established offices, with $32,332 for the chancellor at Berkeley, and $27,101 and $25,681 for the provosts at Davis and Riverside, respectively. In partial offset, there is a reduction of $21,797 in the President's Office budget, largely because of personnel transferred to the Berkeley Chancellor's Office.

Increased requirements for officers and departments of the regents total $60,728, the major portion of which is for normal salary increases. In the Controller's Office the addition of four new positions totalling $14,964 is provided to meet increased work load.

A technical increase, completely offset elsewhere, occurs in the budget of the Statewide Office of Architects and Engineers (Berkeley), to which the positions of university engineer and chief architect totalling $25,200 per year, are transferred for more appropriate budgeting. At Riverside, $17,726 is provided to set up purchasing and cashier's offices to serve the new College of Letters and Science. The various personnel offices require increases aggregating $39,808, the largest increase, $16,448, being required at Los Angeles for recruitment and other personnel services to the Medical School and other developing units on that campus; at Berkeley, two new clerical positions are added for central processing of personnel forms to eliminate errors and expedite salary payments.

Increases proposed for offices concerned with academic administration and services to students include $44,775 for Deans of Students Offices, the largest increase being $23,296 for Deans of Men and Women at Riverside; $25,471 for Registrars' Offices, largely to meet merit salary adjustments; and $12,684 for the graduate deans to cope with the larger activity in connection with research and graduate instruction.

General Expense -- Increase $132,277

Increases in general expense are predominantly in state-wide accounts for which increases of $81,179 are requested. The bulk of this is for the sanitation and safety program administered by the university physician. The three divisions of this program and their proposed budgets are summarized below.

	ESTIMATED EXPENDITURES 1952-53	PROPOSED EXPENDITURES 1953-54	CHANGE FROM 1952-53
Occupational health	$31,544	$60,416	$28,872
Sanitation	45,401	65,511	20,110
Radiological safety	60,516	71,276	10,760
Total Sanitation and Safety	$137,461	$197,203	$59,742

The occupational health program is a new activity, established in January, 1952, to determine and to prevent occupational health hazards in university laboratories and facilities due to exposure to toxic substances. The increase is largely a continuation of a supplementary appropriation of $28,672 made from the emergency fund this year for adequate staff and equipment. The increases in the other two budgets for the expanded activities and facilities requiring sanitary inspection on the southern campuses and the increased usage of radioactive substances requiring monitoring.

Other increases in state-wide general expense include $12,939 for the offices of teacher placement of which $9,857 is a transfer of the Santa Barbara office from the local campus budget to the state-wide budget. On the Los Angeles campus $20,556 additional is required, the largest items being $8,718 for the Bureau of Occupations, largely for a typist-clerk and additional general assistance, and $4,032 for mail and messenger requirements. At Berkeley the $18,566 increase is scattered, the most significant being a $5,400 augmentation in the public ceremonies budget for additional costs of holding commencement ceremonies in Memorial Stadium. At Riverside, the increase of $11,757 is largely to establish a central stenographic bureau, and to set up a mail and messenger service for the expanded campus. At San Francisco the expansion of mail and messenger and receiving department activities incident to development of the Medical Center requires an increase of $5,374. Increases on other campuses are nominal and at Santa Barbara a decrease of $7,177 is budgeted.

General Maintenance and Operation of Plant -- Increase $588,462

The increases are required for expansion of activity and facilities to serve the enlarged plant of the university. As discussed in the preceeding section on Business Office operations, nearly 2,000,000 square feet of building space will be added during 1953-54 or will require service for an entire year for the first time.

LINE	EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

ANALYSIS OF EXPENDITURES BY FUNCTION—Continued

Departments of Instruction and Research——Increase $2,878,371

Aside from the general factor of normal merit increases and academic promotions, the 9.8 percent increase in this key group of budgets for the teaching departments of the university represents largely additional requirements needed for the developing campuses at Los Angeles, $1,259,837, up 14.8 percent; Riverside, $415,959, up 31.9 percent; San Francisco, $242,470, up 11 percent; and Davis, $330,164, up 7.6 percent. Together, these campuses account for 78 percent of the increase. At Berkeley the 5.3 percent increase of $580,783 covers increases of $186,456 for the College of Letters and Science, almost entirely due to requirements for normal merit increases and routine salary adjustments and $105,832 for the College of Agriculture, whose program has been discussed earlier. Increases of $149,373 are provided for in the College of Engineering, one-third of which is for augmenting equipment provisions to more adequately cover urgent needs for replacement and new equipment; also covered are 7.2 new academic positions to cover deficiencies in civil engineering, mechanical engineering and mineral technology. An increase of $26,559 is planned for the School of Business Administration to provide two new assistant professors to reduce overload on teaching staff and to meet requirements for routine salary adjustments. Similarly, the School of Education budget is up $32,943, of which $7,410 is to provide counseling services to Education students comparable to that now provided at Los Angeles and $23,294 is required for salary adjustments. In the Law School increased enrollment has reached the point where it is necessary to sectionalize the first-year courses; for this purpose the budget provides two new associate professors and a secretary-stenographer. Also added is a special item of $7,000 to increase the number of issues of the California Law Review and to make more secure its financing.

Summer Sessions——Decrease $141,967

Reduction in Summer Session provisions results from adjustment to a somewhat lower level of enrollment expected next summer in order to maintain these sessions on a self-supporting basis.

Organized Research——Increase $311,166

Increases proposed for organized research agencies reflect addition of important new programs and needs for offsetting higher costs in carrying forward existing programs.

At La Jolla, provision for a new Institute of Marine Resources is requested to undertake a broad program of research in marine fisheries and other resources of the sea, as urged by the Marine Research Committee of the State of California and other representatives of the fishing industry. This institute would complement the more limited objectives of the Scripps Institution of Oceanography and the Marine Life Research Program, and would give special guidance to the latter program which was authorized by the Legislature in 1947, primarily to forecast the size and location of the catch of sardines and other pelogic fishes. It is contemplated that this institute will be administered at La Jolla, but will operate on a state-wide basis, with its research projects involving such other campus departments as engineering at Berkeley and Los Angeles and food technology at Davis. For full operation, an annual budget of about $120,000 will be required; for the initial year of organization $44,236 is requested to include a director, a staff of two academic and two nonacademic employees, and $10,700 in supplies and expenses and equipment.

At Los Angeles, increases of $69,077 are proposed, of which $50,760 is for the new Institute of Near and Middle Eastern Studies discussed earlier and $10,000 additional for research grants and research travel to cover higher costs and demand. At Berkeley, increases of $72,006 are provided, a major portion of which is required for normal merit increases and salary adjustments. However, the $34,195 for engineering, the largest allocation, includes $20,620 for expanded personnel and expenses at the new Richmond Field Station and $6,310 for moderately increased assistance and expense for the Sanitary Engineering Research project. Addition of $30,037 for organized research activities in the College of Letters and Science is predominantly for salary adjustment costs. A reduction of $9,000 in university funds for the radiation laboratory is included in the Berkeley provisions while increase of $8,000 for the research committee and $3,000 for research travel are proposed. Provision for research and research travel at Davis and Riverside incident to the new Colleges of Letters and Science are made for the first time, with $10,000 at Davis and $5,000 at Riverside. The Davis provision also includes $6,320 for a special study of weed control.

Extension Divisions——Increase $219,097

Increases for extension activities are centered in agricultural extension for which $232,160 additional is proposed, as discussed in the section on agricultural sciences. The university extension budgets show a net decline of $14,263 due primarily to a $50,000 reduction in the self-supporting Far East Command program. The regular budget for university extension is increased by $35,068, of which $23,368 is for normal salary increases and $11,700 provides for an assistant business manager to relieve overload on the present staff and an additional extension representative for better coverage of the expanding extension work in Business Administration.

A special legislative appropriation made in the Budget Act of 1950 has provided annually $50,000 from the State Real Estate Fund for the past three years, of which $25,000 has been allocated to off-campus extension work in real estate and $12,500 has been allocated for training and research in the field of real estate on each of the two larger campuses. Although the appropriation expires at the end of the current year, the program has been successful and its continuation at the present level is provided for in this budget request.

Libraries——Increase $504,561

Establishment of new library facilities at Riverside, Davis, and San Francisco, strengthening of the libraries at Los Angeles in line with campus development and provisions to meet higher costs, particularly at Berkeley and Los Angeles, necessitate the 17.1 percent increase in proposed library expenditures.

Organized Activities, Educational Departments——Increase $1,073,233

Expansion in this group is almost wholly a result of the buildup of the new hospitals at San Francisco and Los Angeles, with only minor changes on the other campuses.

Pensions and Retiring Annuities——Increase $63,500

The addition represents the estimated contributions applicable to the higher total of university academic salary expenditures.

UNIVERSITY OF CALIFORNIA—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

ANALYSIS OF EXPENDITURES BY FUNCTION—Continued

Auxiliary Enterprises ---------- Decrease $4,314

With the exception of student health services, the budgets of these enterprises are largely self-supporting. Although the net change in budgeted provisions is nominal, notable changes occur on the various campuses. At Berkeley a reduction of $42,168 represents the deletion of the $60,000 item for the Men's Faculty Club, henceforth to be operated under its own management, offset by scattered increases. At Riverside a new item of $32,545 for a college bookstore is offset by income except as to $2,275 for initial equipment. At Santa Barbara a reduction of $11,948 reflects expected lower levels of activity in the college cafeteria and bookstore.

Provisions for Student Health Services are increased by $33,577, or 2.3 percent, largely because of the new service to be started at Riverside coincident with opening of the new college and $8,000 additional at San Francisco to meet increased costs of hospitalization and service in accordance with actual experience. Other increases are largely to meet routine salary adjustments.

Noneducational Expense ---------- Increase $10,902

Changes in this group represent minor increases and adjustments in provisions for scholarships and student aid.

Miscellaneous ---------- Decrease $861,635

The budget for 1953-54 provides a total of $829,765 for emergency funds to meet unforeseen contingencies, of which $137,300 is provided to local campus and college administrators, $94,000 to the vice-presidents of Agricultural Sciences and Business Affairs and $335,000 to the president, all at one-half of 1 percent of the total budgets they support; $85,465 is for summer sessions emergency funds on the several campuses; and the sum of $200,000 is reserved as a Regents' Emergency Fund. In the aggregate, these emergency funds represent 1.2 percent of the total budget, the same level provided in recent state budgets. The amount is $234,610 less than the total of the current year's internal budget provisions, which reflected unallocated income from the increased student enrollment and savings made through deferral of budget requests for further study or demonstration of need. Some restorations of these items have proven to be necessary to meet enrollment increases and other substantiated needs.

The current year's budget also included a lump sum provision of $500,000 for unforeseen price rises. However, no such provision is made for 1953-54, with consequent decrease of $500,000 in the budget, in accordance the general assumption that no general price rise is likely in the period ahead.

A "Provision for 1952-53 Salary Range Increases" in the amount of $325,000 is included in the budget for the ensuing year to cover the cost of continuing in 1953-54 the salary and wage rate increases granted since the departmental budget requests were prepared. The amount is $197,025 less than the corresponding amount included in estimated expenditures in the current year because the business office and certain other departments anticipated a number of the increased rates and provided for them in their detailed budget requests.

The lump sum deduction for "estimated salary savings," to take account of lapses in salary provisions which will occur because of turnover and temporary vacancies in budgeted positions, has been computed at $1,100,000, approximately 2 percent of the total budget for salaries and general assistance.

HASTINGS COLLEGE OF LAW

The Hastings College of Law was founded in 1878 by S. C. Hastings with the grant of $100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay the sum of 7 percent interest on the grant or repay the $100,000 in full to a Hastings heir. According to the act creating the college, it is affiliated with the University of the State "and is the law department thereof."

The college offers facilities for the acquisition of learning in all branches of the law, and to this end it has established a complete curriculum of studies, and matriculates students who are granted the degree of "Bachelor of Laws" by the University of California.

Located in San Francisco

ENROLLMENT AND UNIT COSTS				
Enrollment	483	331	241	—90 (27.2%)
Expenditures per student	$323	$529	$804	$275 (51.9%)

The enrollment at the Hastings College of Law shows a continuing decline to an estimated enrollment of 241 in 1953-54, a decrease of 90 from the enrollment of the 1952-53 Fiscal Year. For the second consecutive year revenues are estimated at less than the cost of operation, reflecting the decrease in veteran entitlements. The surplus accumulated during the postwar years will be used to cover the deficit of $112,615. If this trend continues in subsequent years other sources of financing will be necessary.

EXPENDITURES: The estimated expenditures show an increase of $18,829, attributable mainly to a full year's occupancy of the new Hastings Law College building. A decrease in equipment purchases is offset by salary adjustments.

REVENUE: Estimated revenues show a decrease of $25,491, due to the termination of veterans' entitlements and a decrease in enrollments.

BOARD OF CONTROL

The board makes rules and regulations governing the presentation and audit of claims; relating to the amount and methods of traveling on official business of the State, and relating to the making of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made.

STATE CONTROLLER

The State Controller is the accounting and disbursing officer for the State and is responsible for legality of all payments and for the receipt of moneys due the State. He supervises the assessment and collection of state inheritance and gift taxes, collects the motor vehicle fuel tax, petroleum and gasoline assessments and motor transportation license taxes, assists county and city officials in maintaining required accounting and budgetary records and prepares reports of their financial transactions, makes refunds of motor vehicle fuel taxes, leases lands deeded to the State for nonpayment of taxes, and audits expenditures made by local governments under the Local Postwar Public Works, Plans and Sites Law, Local Postwar Construction Law, State School Building Loan Act, and the Collier-Burns Act.

GENERAL ANALYSIS

Number of positions	*470.3*	*491.6*	*506.5*	*14.9*

The State Controller's total program for 1953-54 shows an increase of $77,435 or 2.8% over 1952-53. This increase includes the following major changes in programs and work loads:

	NUMBER OF POSITIONS	COSTS
PROGRAM CHANGES		
(1) Expediting Controller's Annual Report	1	$4,740
(2) Publishing of Financial Transactions of All Local Districts, Chapter 1521, Statutes of 1949	2	7,990
(3) Improvement in Office Audit and Procedure, Motor Vehicle Fuel Tax Refund Division	2	6,540
(4) Improve Coordination Between Field and Office, Motor Vehicle Fuel Tax Refund Division	1	3,900
WORK LOAD CHANGES		
(1) Staff Assistance to Accounting Division	1	5,772
(2) Inheritance and Gift Tax	2	7,308
(3) Motor Vehicle Transportation Tax Collection	1	2,640

The breakdown by category of the total proposed increase may be found by reference to the analysis under each division.

---

[a] Composed of savings in salaries and wages, $1,302; operating expenses, $1; equipment, $100; and excess reimbursements, $2,601.

General Activities

ACCOUNTING DIVISION

Analysis

The principal functions of this division are to maintain the central control accounts covering the receipts, disbursements and balances of all state funds, the preparation of the various financial statements covering the State's condition and operations, the making of various apportionments of revenues to local government, and the control and administration of unclaimed bank deposits, estates of deceased persons, and other classes of unclaimed or abandoned property.

The total increase for the division over 1952-53 is $17,657 categorically as follows:

SALARIES AND WAGES: The increase of $17,009 is due to the addition of one senior accountant to June 30, 1954, as a technical staff assistant, one semisenior accountant to assist in the preparation of the State Controller's Annual Report, and an estimated decrease of 1.5 man years in vacant positions.

EQUIPMENT: The amount of $3,142, an increase of $848, consists of replacement of old equipment, $1,314; equipment for two new positions, $717; a photocopying machine, $400; and miscellaneous items.

AUDITS DIVISION

Analysis

This division reviews and determines legality of all claims submitted for payment by state and local government agencies. The total increase in this function over 1952-53 is $563.

SALARIES AND WAGES: The increase of $11,171 represents an estimated decrease of 2.5 man-years in vacant positions.

OPERATING EXPENSES: The increase of $1,452 is based primarily upon an increase of $1,552 in traveling expense.

EQUIPMENT: The total of $7,057, a decrease of $12,060, includes replacement of six automobiles at a cost of $6,300 and miscellaneous items.

DISBURSEMENTS DIVISION

Analysis

This division performs the State Controller's duties in regard to the disbursements of state funds.

The one-time expenditure in 1952-53 for equipment partially offset by a decrease in vacant positions, results in an over-all decrease of $6,692.

During the 1952-53 Fiscal Year the installation of an improved method of preparing general disbursement warrants resulted in the elimination of six clerical positions. Approximately $500,000 is budgeted for the Central Payroll System, which represents no significant increase despite the fact that there will be 29,000 more employees under the system in 1953-54 than during 1951-52. All departments authorized under the law will have been brought into the system by June 30, 1953.

INHERITANCE AND GIFT TAX DIVISION

Analysis

This division administers the state inheritance and gift tax laws.
The total increase for the division over 1952-53 is $18,198, categorically as follows:

SALARIES AND WAGES: The additional $15,909 represents an estimated decrease of two vacant positions; $7,308 for one junior counsel for the San Francisco office and one senior legal stenographer for the Los Angeles office; partially offset by a reduction in temporary help. The additional positions are required by work load.

OPERATING EXPENSES: The net increase of $1,332 is attributable to printing forms.

EQUIPMENT: The total of $8,601 is an increase of $957 over the 1952-53 Fiscal Year and includes $3,187 for files, $600 for steel shelving, $2,500 for books, and $661 for the two proposed new positions.

COUNTY BUDGETS AND REPORTS DIVISION

Analysis

This division administers the law relating to county budgets and to the reporting of county, city, and district financial transactions. This includes the review of county budgets and reports of tax levies and the preparation for publication of data on property evaluation, tax levies, etc.

The proposed net increase of $11,193 is attributable to the functions imposed upon the State Controller, under Chapter 1521, Statutes of 1949. The State Controller, under this program, is to compile and publish the financial reports of Special Districts. The cost of this program consists of two accountant-auditor positions, $7,240, and office, traveling, and automobile operating expenses, $4,633.

Audit of Special Appropriations for Aid to Local Government

Public School Building Loan Fund

SCHOOL BUILDING AID PROGRAM
(Chapter 1389, Statutes of 1949)

Analysis

The accounting and auditing of school building aid to impoverished school districts are performed by the Controller's General Activities Divisions. The increase results from a shift in emphasis from the School Building Aid program of Chapter 1575, Statutes of 1947 and the Local Postwar Public Works program to this function.

Tax Collection Division

MOTOR VEHICLE TRANSPORTATION TAX FUND

Analysis

The principal function of this division is to administer the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the tax on insurance companies, and the assessments on oil and gas operators.

The total increase over 1952-53 is $6,404, categorically as follows:

SALARIES AND WAGES: The net increase of $5,320 is composed of one additional intermediate account clerk, to June 30, 1954, to assist in the maintenance of a delinquent control file and related clerical duties, and an estimated decrease of one man year in vacant positions partially offset by a decrease of $1,920 in temporary help.

EQUIPMENT: The total of $5,119 is a net increase of $747 over 1952-53. The major item for 1953-54 is the replacement of four automobiles totaling $4,200.

MOTOR VEHICLE FUEL FUND						

Analysis

The Bureau of Highway Accounts and Reports administers provisions of the Collier-Burns Act requiring local jurisdictions to report expenditures made for street and highway improvement.

The program for 1953-54 will be same as for 1952-53. The total increase of $9,791 arises from a decrease in vacant positions and other minor adjustments.

Motor Vehicle Fuel Tax Refund Division

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	52-53 (Auth.)	53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
MOTOR VEHICLE FUEL FUND						
Analysis						

The Motor Vehicle Fuel Tax Refund Division refunds motor vehicle fuel taxes after auditing and investigating refund claims. The total increase over 1952-53 is $12,208. Categorically as follows:

SALARIES AND WAGES: The increase of $10,440 is to provide for two accountant-auditor positions and one intermediate typist-clerk, to improve the quality of auditing of tax refund claims, raise the standard of correspondence with claimants, and free the time of the supervising investigator for closer supervision of field representatives.

EQUIPMENT: The total of $5,718 is an increase of $1,768 over 1952-53. This amount includes $1,347 to equip the proposed new positions; $921 for three adding machines for field representatives; $3,150 for replacement of three automobiles, and $300 for additional miscellaneous.

Tax-deeded Lands Division

REDEMPTION TAX FUND

Analysis

The Tax-deeded Lands Division administers the general procedures for tax sales, tax deeds, and redemptions of lands deeded to the State for nonpayment of taxes; enters into leases for the rental of tax-deeded property; advises county officials regarding the levying and collection of taxes on real property; and renders service to the counties by setting up an abstract and index of tax-deeded lands.

There is no major change anticipated in the program for 1953-54.

Total number of positions				*2,575.8*	*2,577.7*	*2,581.7*	*4*

This budget provides generally for continuation of the existing level of service. The additional $158,060 for 1953-54 represents a $39,352 increase in salaries and wages for eight new positions, and a seven man-year decrease in vacant positions, offset by the elimination of 11 existing positions; a $94,499 increase in operating expenses, principally for printing and rental of office space; and a $11,307 increase for equipment. A detailed explanation of these increases may be found by reference to the analysis under each division.

GENERAL FUND

GENERAL ADMINISTRATION

Analysis

This division consists of the general administration, departmental accounting, and personnel administration functions of the Board of Equalization.

The total net increase over 1952-53 is $8,763, which provides for an additional $12,952 for the biennial printing of the 1953 Revenue Laws of California, and for minor reductions in the salaries and wages and equipment categories.

The $7,341 for equipment is a decrease of $2,551 below 1952-53, and consists of $3,850 for the replacement of three automobiles; $1,636 for the replacement of worn out and obsolete office equipment; $855 for a microfilm reader and file cabinet; and $1,000 for miscellaneous items.

DIVISION OF RESEARCH AND STATISTICS

Analysis

This division performs the research and statistical functions for the board.

The total increase over 1952-53 is $1.411. Other than a small increase in the line item for printing and the extension of one junior research technician to June 30, 1954, for the purpose of completing the property tax assessment surveys required by Sections 15640 to 15645 of the Government Code, no significant change in program is anticipated in 1953-54.

General Activities

SERVICE DIVISION

Analysis

The division, established July 1, 1951, consolidated the service functions of the board in order that economies due to centralized operations could be realized. The division has the responsibility for cashiering, mailing, addressograph, supply, tabulating, and other general services.

The increase over 1952-53 is $16,153, categorically as follows:

SALARIES AND WAGES: The total decrease in this category is $24,616, representing the elimination of nine positions in 1953-54 Six are a result of new addressing, folding, stuffing, and photographic reproduction machines installed during the 1951-52, 1952-5 and 1953-54 Fiscal Years. Three are a result of centralization of the tabulating operation and the use of the tabulating machines fo certain operations performed manually prior to the centralization.

OPERATING EXPENSES: The increase is $54,092, consisting of an increase in rent of $64,999 offset by decreases in printing an other line items. Of the increase in rent, $31,178 is for expansion and relocation of the Los Angeles district office, $12,000 is fo a new branch office in Van Nuys, $1,800 is for a new branch office in Monterey, $600 is for a new out-of-state office in Seattle, and th balance is for rate increases and extensions of space increases granted in 1952-53.

EQUIPMENT: The $19,029 provided is a decrease of $13,323 under 1952-53. The major items are $2,794 for replacement of worn-ou and obsolete equipment, $5,820 for an air-conditioner for the centralized tabulating operation, $6,000 for an envelope-insertin machine which will contribute to the six position saving discussed above, $2,000 for attachments to the board's new photostat machine that will cause savings in chemical expenses, and the balance in additional miscellaneous items.

DIVISION OF ASSESSMENT STANDARDS

Analysis

This division has the administrative responsibility of equalizing the assessment of local property between counties. To fulfill this responsibility the division is required to issue cost and other appraisal data to the county assessors, to prepare maps for county use, and in general to assist the county assessors in the performance of their duties.

The total increase over 1952-53 of $11,616 consists of two proposed new positions of associate estimator of building construction and associate auditor-appraiser. The first position will, under Section 401.5 of the Revenue and Taxation Code, compile and issue to county assessors data relating to the basic costs of various classes and kinds of property in order to promote uniformity in appraisal practices and in assessed values throughout the State. The associate auditor-appraiser is required under Section 254.5 of the Revenue and Taxation Code to review claims for property tax exemption on the ground that the claimant was operating on a nonprofit basis. The term "nonprofit" was construed broadly in the past, but in May, 1952, the State Supreme Court defined the term so as to require a much more thorough examination of such claims.

RETAIL SALES TAX DIVISION

Analysis

This division assesses and collects the retail sales and use taxes. No significant change in program is planned in 1953-54.

The increase for the entire division over 1952-53 is $73,828 of which $30,000 in salaries and wages and $9,359 in traveling and automobile mileage expenses are related to a decrease in the estimated number of vacant positions. Partly offsetting this increase is the elimination of two clerical positions on January 1, 1953, as a result of savings effected by the installation of a mechanized system of preparing audit working papers. The remainder of the total increase is caused by an amount of $90,318 in equipment proposed for 1953-54, an increase of $32,474 over 1952-53.

1. Replacement of worn-out and obsolete equipment $24,774
2. Replacement of 20 automobiles exceeding 100,000 miles 18,950
3. Additional miscellaneous equipment for work load and necessary improvements in service 28,594
4. Revision of the alphabetical file section's procedures at a total equipment cost of $30,000, to be partially funded by the abolishment of five intermediate clerk positions effective September 1, 1953 18,000

ALCOHOLIC BEVERAGE CONTROL DIVISION

Analysis

The division administers and enforces the Alcoholic Beverage Control Act, and assesses and collects the alcoholic beverage taxes.

The program for 1953-54 is based upon an 18 percent increase in number of liquor licensees since 1946, the increase being centered to great extent in the Fresno, San Bernardino, and Vallejo areas. The six proposed additional liquor control officers are for thes areas.

---

[a] In accordance with the provisions of Sections 13163, and 13164, and 13165 of the Government Code, all expenditures of the Buildings and Grounds Division are paid from the Service Revolving Fund. Collections from special fund agencies for janitor and maintenance service, and from agencies requesting other special services, are deposited in the Service Revolving Fund. After the cost of services rendered and charged to other agencies has been deducted, the remaining expenditures are charged to the support appropriation of the Buildings and Grounds Division. The "Net Total Expenditures for Support" represent such remaining expenditures.

ADMINISTRATION DIVISION

Analysis

General supervision of the department, supervision of leases and contracts of the State, investment of surplus funds, review of the agricultural policies of state agencies, fidelity bonds and insurance, construction activities, review of use of state-owned automotive equipment, and the operation of traffic management are the principal functions of this division.

SALARIES AND WAGES: The increase provides for five new positions as follows:

1 Assistant director	$12,000
1 Junior typist-clerk	2,400
1 Personnel officer I	6,060
1 Inspector of automotive equipment	5,232
1 Card punch operator (to June 30, 1953)	2,772

The assistant director will relieve the director of some of the executive work particularly in connection with the Capital Outlay Program. The position replaces the operating expense item of Services of Special Consultants—$12,000 in the 1952-53 Fiscal Year.

The junior typist-clerk will provide clerical assistance for work load increase resulting from approval of preliminary plans required under Section 7.5, Chapter 3, Statutes of 1952.

The personnel officer I is to provide staff assistance in the personnel administration of the department.

The inspector of automotive management is to provide automobile inspection service to state agencies operin the San Francisco Bay area.

The card punch operator is provided for one year to record statistical information extracted from all freight and transportation bills.

OPERATING EXPENSES: The decrease of $34,161 consists primarily of the elimination of $25,000 for services of special consultant—utilities study and $12,000 for services of special consultant—construction, offset by increases related to the new positions.

EQUIPMENT: The amount requested provides $3,570 for additional office furniture and equipment; $360 for replacement of worn out office equipment and furniture and $170 for additional drafting equipment.

ACCOUNTS AND DISBURSEMENTS DIVISION

Analysis

This division maintains the accounting, personnel, and property records of the department.

SALARIES AND WAGES: The decrease of $14,586 results primarily from elimination of six positions resulting from the mechanization of the accounting and billing operations.

EQUIPMENT: The amount budgeted consists primarily of $7,497 for the second annual payment on purchase of the tabulating installation plus an additional $1,000 for special tabulating equipment.

AUDITS DIVISION

Analysis

The primary functions of this division are the regular detailed examination of the books and records of all state agencies, auditing of school districts, and county and district fairs, and such other studies and special audits as are required.

SALARIES AND WAGES: Eight new positions are provided as follows:

3 Senior accountant	$18,180
3 Semisenior accountant	14,220
2 Junior accountant-auditor I	7,800

One senior accountant, one semisenior accountant and one junior accountant-auditor I are to provide staff for increased work load amounting to an estimated 5,500 hours of audit time resulting primarily from the new facilities of the Department of Corrections, Youth Authority and Department of Mental Hygiene requiring audits of both support activities and Capital Outlay expenditures.

One semisenior accountant and one junior accountant-auditor I are required for the increased work load related to the fair audit program. Increase in size and complexity, increase in the scope of audits of county fairs, plus special examinations and audits as well as two additional fairs make up the increase in work load.

One senior accountant is to provide services in connection with the annual audit report of the University of California, which is now prepared by public accountants. The development of more complete information for budget purposes is desirable.

One senior accountant is for the school audit program. During the current year only time saved on other activities was devoted to preliminary studies for the school audit program. It is anticipated that a great quantity of audit reports will be received from the school districts for review and follow-up.

One semisenior accountant is for audit follow-ups and preparation of suggested solutions of weaknesses which are pointed out in audit reports.

DEPARTMENT OF FINANCE—Continued

General Activities

DIVISION OF BUDGETS AND ACCOUNTS

Analysis

This division prepares and presents the Governor's Budget; reviews and approves fiscal year working budgets for each state agency; administers budgetary control, allocates the Emergency Fund and other lump sum appropriations; does research and analysis of economic conditions, revenue yields; expenditure trends and other developments affecting over-all state financial affairs and fiscal policies; designs, installs and supervises accounting systems of all state agencies; and surveys, analyzes and recommends improvements of the administrative structure and procedures of state agencies.

SALARIES AND WAGES: The following new positions are provided:

Budget Analysis Section:	
3 Administrative trainee-junior staff analyst	$10,116
Management Analysis Section:	
1 Assistant secretary, Merit Award Board	4,470
1 Intermediate typist-clerk	2,640

The three administrative trainee-junior staff analyst positions will be assigned, one to the fiscal control group, one to the corrections-mental hygiene group and one to the education-welfare group. In addition to obtaining a better work flow in the budget section these positions will permit the budget staff to spend more time in the field with the result that more realistic analysis of budget requests will be accomplished.

The assistant secretary, and the intermediate typist-clerk are provided for the Merit Award Board in order to handle more promptly the acceptance or rejection of suggestions received. An average of 132 suggestions per month has been received since the board's inception. To date $6,500 has been granted in awards and savings of $200,000, most of it recurring, has resulted.

OPERATING EXPENSES: The increase is related to the new position budgeted and the need for additional field work by staff members.

EQUIPMENT: $1,067 is provided for replacement of worn out office machines; $1,122 for office equipment for new positions; and $740 for the purchase and binding of books for the library.

DIVISION OF COMMUNICATIONS

Analysis

This division has the responsibility for improving and coordinating the use of radio and other communication facilities owned or operated by the State, cities, counties, and other political subdivisions. The division also acts as liaison and representative of the State before the Federal Communications Commission.

Expenditures for this division are proposed at the same level as in the current year. The increase in the budget is made up principally of $4,425 for replacement of motor vehicles.

PURCHASING DIVISION

Analysis

The division acts as the central purchasing agent for the State. In addition the division maintains storerooms in Sacramento, San Francisco, and Los Angeles, the expenditures for which are not included in the budget of this division.

The increase of $15,267 consists of the following:

SALARIES AND WAGES:

1 Administrative trainee	$3,456
1 Junior buyer	4,512

The administrative trainee will provide preliminary work and exploration of facts regarding expansion of the State's contract program of volume purchasing.

The junior buyer will provide assistance to the deputy purchasing agent in Los Angeles for work load increase resulting from decentralization of some purchasing operations from Sacramento to Los Angeles.

OPERATING EXPENDITURES: Increase of $1,549 results principally from a $1,500 increase in laboratory services.

EQUIPMENT: $3,263 is provided to replace worn out office equipment and machines; and $2,669 is provided for furniture for new positions, three calculating machines and a ditto machine.

LIQUIDATION OF SURPLUS EQUIPMENT AND LEASES, DEPARTMENT OF SOCIAL WELFARE

Analysis

The work of liquidating the leases and equipment acquired by the Department of Social Welfare for the administration of Article XXV of the Constitution was assigned to this unit.

The last lease under the program will expire in December, 1954, and the program is estimated to be completed during the 1954-55 Fiscal Year. Of the $704,246 budgeted, $679,996 is for rental payments.

MAINTENANCE AND OPERATION OF PROPERTY ACQUIRED FOR BUILDING SITES

Analysis

This unit manages property acquired under the provisions of the Property Acquisition Act until such time as the property is required for actual construction. The revenue received for rental is used to support the operations of this function.

The activity of this function is expected to remain at approximately the same level as in the current fiscal year.

DEPARTMENT OF FINANCE

Buildings and Grounds Division

This division maintains state-owned and leased buildings and grounds in Sacramento, San Francisco, and Los Angeles. Its staff reviews for approval all leases of real property for use by state agencies.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS				
Number of positions	*710.3*	*929.1*	*945.6*	*16.5*

The increase of $467,098 results primarily from full year maintenance and custodial costs for the new Public Works Annex, Motor Vehicle, Education, Highway Patrol, Highway Patrol Academy and Civil Defense buildings which are scheduled for completion between January 1, and May 1, 1954.

SALARIES AND WAGES: $81,947 for the following new positions:

Administration:

1 Intermediate typist-clerk	$2,640

This position will assist in handling increased work load resulting from completion of new buildings. An offsetting reduction in temporary help has been made for the position.

Sacramento Buildings:

1 Plumber	6,240
1 Electrician foreman	6,760

The plumber is required to meet demands for emergency repairs and preventive maintenance due to completion of new buildings.

The electrician foreman is to provide better supervision of the journeymen working on maintenance work of the division. This position will assist in the assignment and direction of 19 electricians.

San Francisco Buildings:

1 Painter foreman	5,678
1 Painter	5,408
1 Electrician	6,240
1 Assistant supervising telephone operator	2,916

The painter foreman and painter will offset a reduction in temporary help from which the positions are presently being funded.

The electrician is for added work load resulting from the acquisition of the California building and replacement of most of the electrical conduit and fixtures in the San Francisco State Building. An offsetting reduction in temporary help has also been made for this position.

The assistant supervising telephone operator will provide additional supervision plus vacation and sick leave relief to the present supervisor and telephone operators.

Los Angeles Buildings:

3 Stationary engineer	11,700
1 Laborer	2,772
1 Storekeeper I	3,372
1 Building maintenance man	3,216
1 Electrician	6,240
1 Carpenter	5,345
2 Painter	10,648
1 Groundsman and flower gardener	2,772

The stationary engineers will provide 24-hour coverage of the air conditioning, heating and plumbing duties in the State Building plus assistance to the Highway Patrol, Civil Defense, and Fashion League buildings.

The storekeeper I will provide physical control over maintenance materials, supplies, and tools.

The laborer, building maintenance man, electrician, carpenter, and painters are required to meet the demands for emergency repairs, minor alterations and preventive maintenance required for the Motor Vehicle Building, Compensation Insurance Fund Building, and 11th and Grand Building as well as increased demands from existing buildings.

The groundsman and flower gardener will maintain the grounds at the new Compensation Insurance Building. The cost of this position will be recovered through reimbursement from the Compensation Insurance Fund.

OPERATING EXPENSES: The increase of $138,407 is related directly to the full year operation of new buildings.

EQUIPMENT: The amount of $43,989 includes the following major classes of equipment:

Replacement Equipment:

Office furniture and equipment in poor condition	$1,320
Tools, vacuum cleaners, and equipment for maintenance purposes	6,445
Two drinking water cooling units for state office buildings in Sacramento, and one gas and oil burner for Los Angeles State Building	8,400
One light automobile for administration, one $\frac{1}{2}$-ton truck for craftsman pool, and two light passenger automobiles for building maintenance operations	5,025

Additional Equipment:

Office equipment for new employees	367
Office equipment required by increased work	1,977
Engineer, carpenter, electrician, plumber, locksmith tools and janitor carts and vacuum cleaners, etc., for maintenance of buildings and grounds	12,770
One $\frac{1}{2}$-ton truck in Sacramento and one $1\frac{1}{2}$-ton truck, plus one carryall in Los Angeles for building maintenance purposes	6,345
Office equipment for new hearing room, State Building, Los Angeles	1,340

DEPARTMENT OF FINANCE

Local Allocations Division

This division is responsible for the administration of programs involving the allocation of funds to local agencies. These include allocations from the General Fund, the Postwar Unemployment and Construction Fund, and the Public School Building Loan Fund. In addition, the division is responsible for the supervision of the managment phase of the Emergency Veterans' Housing Program.

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
GENERAL ANALYSIS				
Number of positions	*68.5*	*75*	*79*	*4*

The budget reflects the increased costs connected with the adoption and administration of the State School Building Aid Law of 1952. Work load related to the various programs administered by the division will change substantially during the 1953-54 Fiscal Year. The following tabulation shows the estimated percent of work load time which will be devoted to programs supported by the following funds:

	ESTIMATED 1952-53	ESTIMATED 1953-54
General Fund	14.2	11.8
Postwar Unemployment and Construction Fund	6.2	6.1
School Building Loan Fund	65.4	46.5
School Building Aid Fund	14.2	35.6

Principal changes in expenditures program are as follows:

SALARIES AND WAGES: The increase of $20,305 consists of $19,236 for two assistant civil engineers, one accountant auditor I, one senior account clerk and one intermediate account clerk required for administration of the State School Building Aid Law of 1952, $22,020 for three auditor II and two accountant-auditor I positions to reduce the accumulated work load in the Emergency School Building Aid Act of 1947, the Veterans' Temporary Emergency Housing Act of 1946, and the School Building Aid Act of 1949. These increases are offset by a reduction of $14,085 for positions allowed for earthquake relief in connection with Chapter 21, Statutes of 1952 (Second Extraordinary Session) and not continued in 1953-54.

OPERATING EXPENSES: The increase of $2,229 is to provide related expense items for administration of the State School Building Aid Law of 1952.

EQUIPMENT: The $5,903 provides for the following: $2.956 for office equipment for new positions; $327 for new files; $320 for replacement of office furniture and $2,100 for replacement of two automobiles.

Number of positions	*12.3*	*12.8*	*12.8*	–
WORK LOAD				
Fairs Held:				
District	49	50	50	
County	24	24	24	
Citrus	2	2	2	
Totals	75	76	76	

The decrease of $28,971 results primarily from completion of the Customer Surveys and Research project in the 1952-53 Fiscal Year. Consequently expenditures for the total program will decrease by $30,000. This decrease is offset by an increase of $1,029 made up principally of a $652 increase in the equipment category to provide permanent and temporary personnel with proper office furniture.

GENERAL ANALYSIS				
Number of positions	*74.9*	*76.3*	*78.3*	*2*

The budget provides for maintaining California State Fair activities at the 1952-53 Fiscal Year level. The increase of $18,181 is due principally to premium increases resulting from continual increases and other adjustments where required to maintain the attendance and revenue. The expenditures for 1953-54 will exceed the estimated revenue by $637,894. It is proposed that this deficiency be financed from: available surplus in the amount of $1,524; transfers from the Fair and Exposition Fund under provisions of existing law amounting to $140,000; and an additional transfer of $510,000 from the Fair and Exposition Fund.

SALARIES AND WAGES: Two positions are provided in commercial exhibits in order to provide required staff to operate this function on a year around basis. This is necessary due to construction of two new exhibit buildings. These positions were formerly hired and paid from temporary help for eight months during the year and an offsetting reduction in temporary help has been made.

OPERATING EXPENSES: The increase of $26,221 is made up principally as follows: $11,940 is for premiums in the General and Junior Division resulting from a continual increasing number of exhibitors, $10,735 is for Race Purses, and $1,399 for increased Pro rata Administrative Costs.

EQUIPMENT: The amount of $38,636 provides $1,184 for replacement of office furniture and equipment, and $9,343 for replacement of tools, canvas, exhibit furniture, and water pumps; $14,500 provides for replacement of one loader and finger lift, one 1½-ton truck, one 1½-ton dump truck, and two ½-ton pickup trucks; $13,450 provides for additional electric water coolers, canvas, pumps, street sweeper, and horizontal truck platform lift and dump body.

DIVISION OF STATE LANDS

Administers the public lands belonging to the State, consisting of school land, swamp, overflowed, salt marsh, tide, submerged and other sovereign lands. Principal revenue-producing function is the leasing of the public lands for the extraction of oil and minerals.

GENERAL ANALYSIS

Support

Number of positions	*61.8*	*67.5*	*67.5*	–

The increase of $36,711 consists primarily of a new item of $10,000 for geophysical exploration of possibilities of oil and gas production of state lands proposed for lease and the shifting of two items from other current expenses consisting of $15,000 for defense of quiet title actions and $5,000 for establishment of index of state lands under jurisdiction of the United States. The last two items of expenditure have been shifted to the support portion of this budget since they are continuing expenditures rather than special projects.

EQUIPMENT: Consists primarily of $1,725 for office engineering equipment; $1,300 for an automobile replacement; $706 for replacement of worn out and loaned office equipment, and $380 for field engineering equipment.

OTHER CURRENT EXPENSES: A decrease of $30,000 for Defense of Title to Tide and Submerged Lands is anticipated. It is expected that the judicial phase of the case will be concluded during the current year.

A new project is added—Arizona-California Colorado River Boundary Determination, $10,000. Recently the State was asked to join in a program developed by several federal agencies relating to the use of federal and state lands as a game refuge. The amount requested is for legal expenses and technical assistance in defending the state interest in property along the Colorado River boundary.

Funds for defense of quiet title actions and establishment of index of state lands under jurisdiction of the United States have been shifted to the support portion of the Budget for the 1953-54 Fiscal Year.

---

[a] Composed of savings in salaries and wages, $14,473; operating expenses, $22,273; equipment, $1,813; and excess reimbursements, $5,129.

[b] Composed of savings in operating expenses, $22,333; and loss in reimbursements, $10,000.

[c] Transferred to support portion of budget.

NAPA STATE FARM

The farm is under the control of the Department of Finance. Through cooperation with the state institution, it may be utilized for agricultural or horticultural purposes or as a stock or dairy farm and may distribute to state institutions the products of the farm or the livestock. The Rector Canyon Dam is located on the farm and is the water supply for the Veterans Home of California.

FRANCHISE TAX BOARD

This agency administers the Bank and Corporation Franchise Tax Law and the Personal Income Tax Law. Members of the board are the State Controller, Director of Finance, and Chairman of the State Board of Equalization. Direction of the agency's affairs is assigned to the Executive Officer of the Franchise Tax Board.

GENERAL ANALYSIS				
Number of positions	*624.6*	*683*	*747*	*64*

The total budget increase for 1953-54 over 1952-53 is $388,414, analyzed as follows:

SALARIES AND WAGES: The $324,024 increase in this category includes the following changes in work load and program:

	NUMBER OF POSITIONS	AMOUNT
1. Work Load Increase:		
(a) Permanent positions added	40	$127,776
(b) Temporary help increased	(22.4)	50,877
2. Special Investigation Program	1	5,232
3. Exempt Corporation Program:		
(a) Permanent positions added	1	4,740
(b) Temporary positions extended	(2)	–
4. Search for Corporations Failing to File Under the Bank and Corporation Tax Law:		
(a) Permanent positions added	2	6,540
(b) Temporary help increased	(1)	3,441
5. Rearrange Bank and Corporation Tax Files	5	12,000

OPERATING EXPENSES: The additional $46,245 provides for work load and cost increases throughout the agency.

EQUIPMENT: A total of $60,061 is proposed, which is an increase of $18,145 over 1952-53. Of the total required for 1953-54, $11,422 is related to the proposed new positions; $13,986 is for the replacement of worn out and obsolete items; and $34,653 is for work load increases and necessary improvements in service.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	52-53 (Auth.)	53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	

ADMINISTRATION

Analysis

In addition to the general administration of the state income and franchise tax programs, this division includes the agency's accounting, statistical, collection, legal, and special investigative functions.

The program reflects a continuance of the annual heavy increase in volume of personal income tax returns, as follows:

1. Personnel Unit—One intermediate typist-clerk to handle the work arising as a result of the increasing number of agency personnel shown as follows:

	ACTUAL 1946-47	1947-48	1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
Number of agency employees	426	495	790	970	1,070
Personnel unit positions	1.8	1.8	2.8	2.8	3.8
Load per clerk	237	275	282	346	282

2. Accounting Section—One bookkeeping machine operator, three junior clerks, and 6.8 man-years temporary help are justified by relating the staff to its work load.

---

[a] Composed of savings in salaries and wages, $38,436; operating expenses, $2,947; and equipment, $1,623.

[b] Composed of savings in equipment, $1,762.

FRANCHISE TAX BOARD—Continued

ADMINISTRATION—Continued

A. 6.8 Man-Years Temporary Help for Personal Income Tax Return Filing Period.

	ACTUAL				ESTIMATED	PROPOSED
	1948-49	1949-50	1950-51	1951-52	1952-53	1953-54
Personal income tax returns	972,784	1,543,548	1,813,603	2,225,000	2,600,000	2,850,000
Temporary help man-years	5	10.3	16.4	26.7	29.2	36
Permanent positions devoted to Personal Income Tax accounting	37	38	42	42	52*	52
Total	42	48.3	58.4	68.7	81.2	88
Load per clerk	23,161	31,957	31,055	32,387	32,020	32,387

* This includes 40 man-months of temporary help used because the 10 additional permanent positions were not established until November, 1952.

B. Four Permanent Positions for Year-Round Bookkeeping and Mailing Operations.

	ACTUAL			ESTIMATED	
	1949	1950	1951	1952	1953
No payment returns	6,420	15,943	19,035	37,500	44,000
Partly-paid returns	20,606	33,996	40,509	59,000	70,000
Delinquent returns	14,882	16,604	53,707	70,000	82,000

To handle these large increases required the addition of 6.7 man-years of temporary help in 1952-53 which will be continued in 1953-54 together with the four proposed new positions.

3. Appeals and Review—One junior counsel to assist in the processing of protests filed by income and franchise taxpayers. Despite an increase in protests decided by each reviewer, the backlog is continuing to rise as a result of the growth in the number of protests received.
4. Special Investigation Section—One investigator-reporter to record formal statements in question and answer form from one or more persons and to testify in court in connection with these statements. This procedure is followed in the case of tax prosecutions in the Federal Government and criminal cases in district attorneys' offices.

FRANCHISE TAX BOARD—Continued

FRANCHISE TAX DIVISION

Analysis

This division administers the Bank and Corporation Tax Law.

The following changes in program are proposed for the 1953-54 Fiscal Year:

1. Two temporary clerks are extended to June 30, 1954 and one permanent Income and Franchise Tax Examiner II is added for processing and reviewing an estimated 26,000 exempt corporation returns, as provided by Chapter 344, Statutes of 1951.
2. One accountant-auditor I and one intermediate typist-clerk for checking sources of information for locating taxpayers. An average of $105,000 in revenue has been obtained annually over the last 3¾ years from intermittent searches of trade journals, periodicals, etc. A permanent program is expected to realize a considerable amount of additional revenue.
3. Five junior clerk, for 1953-54 only, to rearrange tax returns and related material in bank and corporation file folders so as to reduce the time consumed by audit and administrative personnel, and facilitate the transfer of inactive material to storage.
4. One and one-half man years of temporary auditor and clerical help at a cost of $5,300 for an investigation of suspended corporations.

PERSONAL INCOME TAX DIVISION

Analysis

This division administers the Personal Income Tax Act.

Changes in the division's program for 1953-54 are based upon a continuing growth in the volume of personal income tax returns and information at source reports, as follows:

1. An additional 16 permanent positions and 18 temporary man-years of clerical help are required in headquarters to process the following estimated increase in tax returns:

	Actual 1949-50	1950-51	1951-52	Estimated 1952-53	1953-54
Total personal income tax returns	972,784	1,543,548	1,813,603	2,225,000	2,600,000
Clerical man-years, headquarters	149.6	185.7	222.4	278.6	312.5
Load per clerk	6,503	8,312	8,155	7,986	8,320

2. The two additional accountant-auditors are needed in the headquarters office to maintain a 50 percent audit of "small" returns, which was started in 1951-52 when 944,803 such returns were received. The estimate for 1953-54 is approximately 1,750,000 of these returns.
3. The one income and franchise tax examiner II for headquarters will process an increasing number of claims for refund. The seven examiners for the Los Angeles area and branch offices would reduce a growing backlog of field audit and residence cases, and would continue to increase the amount of proposed assessments which were $1,440,452 in the calendar year 1949 and $2,665,419 in 1951.
4. Two junior accountant-auditors and six clerks are needed in the Los Angeles and San Francisco offices for processing information at source reports. For the 1948 calendar year 2,295,903 reports were filed, 27,482 reports were investigated in the field, and $60,409 in tax and penalties was assessed. For the 1950 calendar year, 2,778,479 reports were received; 158,467 will have been investigated in 1951-52 and 1952-53, and assessments will exceed half a million dollars. For 1951, 3,542,995 reports have already been received, which will further increase the work load volume in the field offices during 1953-54.

GENERAL ANALYSIS

Number of positions	*42.7*	*41*	*41*	–

The State Treasurer's program for 1953-54 will be substantially the same as that provided for in the prior year.

The total budgeted increase for 1953-54 over 1952-53 is $8,505, consisting of small increases in operating expenses and equipment and a $6,500 increase in the printing of school building bonds due to the issuance of an additional $25,000,000 in bonds over the $75,000,000 issued in 1952-53.

---

[a] Composed of savings in salaries and wages, $4,269; operating expenses, $20,421; and equipment, $1,395.

[b] Composed of savings in operating expenses, $4,057; partly offset by deficit in reimbursements, $2,000.

[c] Trust and agency funds are not included in the over-all budget totals. See Schedule 3 for statement of balances in other treasury funds.

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
Number of positions	*1,904.1*	*1,961.7*	*2,181*	*219.3*

The principal changes from the current fiscal year are the proposed addition of 180 positions to the uniformed strength of the Highway Patrol to provide a more adequate degree of enforcement.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	NO. OF POSITIONS 52-53 (Auth.)	NO. OF POSITIONS 53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54

ADMINISTRATION

Analysis

This function includes the office of the commissioner and the following staff sections: general administration, accounting, personnel, office services, shops and stores, and mechanical analysis.

Five additional positions are proposed to meet increased work load.

Two additional clerical positions are required to continue producing by punched card method certain statistical information as provided by Chapter 3, Item 154.5, Statutes of 1952.

Increases in operating expenses are based on work load with the exception of the provision for payment of teletype services provided by the Department of Justice.

ENFORCEMENT

Analysis

This function includes all field personnel, field office operations, and the Los Angeles headquarters.

To achieve more adequate policing of the highways 17 additional traffic sergeants and 163 additional traffic officer positions are proposed. The number of uniformed personnel proposed is based on the capacity of the Training Academy.

The other additional positions proposed are: Three clerks for field offices based on work load; 15 dispatcher-clerks required to provide radio coverage in seven locations; one photographer to centralize all photographic work in Los Angeles County; two telephone operators to answer night phone calls in Los Angeles County; seven part-time janitor positions for new offices; and increased time for six janitors now authorized for expanded offices.

The remainder of the increase is attributable to operating expenses and equipment incidental to the augmented uniformed staff.

TECHNICAL SERVICES

Analysis

This function includes the planning section, traffic safety education, preparation of statistics and reports, and specialized law enforcement applicable to commercial vehicles.

Two additional positions are proposed; one supervising inspector to head up the division and one clerk based on work load.

Operating expenses and equipment reflect work load increases with the exception of an increase in the traffic safety program.

TRAINING ACADEMY

Analysis

The academy trains all new traffic officers and gives refresher training to all uniformed members of the Highway Patrol. Established as a separate division effective July 1, 1952. Increased expenditures are due to providing for full operation of the new facilities in the 1953-54 Fiscal Year.

DEPARTMENT OF INDUSTRIAL RELATIONS

The department administers the state laws relative to labor through its nine divisions. In general, it is the duty of the department "to foster, promote, and develop the welfare of the wage earners of California; to improve their work conditions; and to advance their opportunities for profitable employment."

GENERAL ANALYSIS				
Number of positions	*766.9*	*789.5*	*837.6*	*48.1*

This budget proposes increases due to program and work load changes and in some cases a combination of these factors. The increases are necessitated by the increasing industrialization of the State and the growing population and labor force. Changes are discussed in the budgets of the divisions where they occur.

---

[a] Federal aid receipts and the expenditures therefrom are not included in the over-all budget total.

[b] Composed of savings in salaries and wages, $11,761; operating expenses, $7,405; equipment, $1,115; and excess reimbursements of $9,111.

[c] Composed of savings in salaries and wages, $1,654; operating expenses, $15,675; and excess reimbursements of $4,005.

[d] Appropriation not segregated by category.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF ADMINISTRATION

Analysis

The Division of Administration is composed of the director's office, the Supervisor of Industrial Accident Self-Insurance Plans, and the accounting office. The functions also include all general housekeeping services and fiscal management.

This budget proposes a business service officer and a clerk to centralize the business service functions for all divisions in the Los Angeles area. One clerk and one half time telephone operator have been budgeted for the central services staff at San Francisco. An expansion of the program for enforcement of the workmen's compensation by two investigators is proposed. Pending possible law changes these positions are budgeted in the Division of Administration.

DIVISION OF CONCILIATION

Analysis

The functions of this unit consist of the investigation of labor disputes, mediation and conciliation, arbitration, selection of arbitration boards, and the prevention of work stoppages.

One additional conciliator is proposed to handle the increasing number of requests for service and to give more coverage to the area between Bakersfield and the northern border of the State.

DIVISION OF INDUSTRIAL ACCIDENTS

Analysis

The Industrial Accident Commission when exercising judicial functions is responsible for the adjudication of cases arising under the Workmen's Compensation Law.

This budget includes the district offices now in operation at San Diego and Sacramento. Two clerks are proposed, one for each office, however the entire district office operation will be reviewed before these positions are established.

The only program change is the addition of a Compensation Insurance Representative and a clerk to determine the feasibility of using this class of position on the processing of compromises and releases and the possibility of reducing the number of formal hearings by screening the applications.

The balance of the positions are proposed on a work load basis. This includes two referees, two hearing reporters, two stenographers, two clerks each for the compensation clerical units in Los Angeles and San Francisco, one rating specialist and one clerk for the Permanent Disability Rating Bureau, and $10,224 for part time medical officers to provide the same level of medical service in the district offices as now given at the main offices.

Funds for rent, additional equipment, and part, of the part time medical officer's time are provided in this budget for two additional district offices should they be established during the 1953-54 Fiscal Year.

DIVISION OF INDUSTRIAL SAFETY

Analysis

The Division of Industrial Safety is vested with supervisory and jurisdictional responsibilities necessary for the protection of employees from injuries connected with or arising out of their employment. The division administers laws pertaining to safety, issues safety orders, investigates and studies causes of industrial injuries, prepares and distributes information on prevention of accidents, and makes inspections of places of employment for compliance with minimum standards for safety.

This budget proposes two additional industrial, two construction, and one electrical safety engineers, one industrial hygiene engineer, and three clerical positions for work incident to the additional engineers. These positions combine elements of both work load and program changes.

The industrial hygiene engineer is of paramount importance to the occupational health program as it will supervise and direct the division's efforts in the Los Angeles area to the end that a geographically balanced program will be attained as well as a greater degree of coordination with the Bureau of Adult Health in the Department of Public Health.

The industrial safety engineers are to be stationed at Chico and Willits to develope a continuing safety program in one of our most hazardous occupations, lumbering and logging.

Two construction safety engineers are proposed to attempt to make one job inspection visit annually to each construction contractor.

The electrical safety engineer is to be stationed at Fresno to achieve uniform enforcement of the Electrical Safety Orders in the San Joaquin Valley.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF INDUSTRIAL WELFARE

Administration

Analysis

The Division of Industrial Welfare is responsible for the administration and enforcement of laws and the issuance of orders relating to minimum wages, the Eight Hour Law for Women, the Weight Lifting and Seating Law for Women, the Industrial Homework Act, etc. The work program consists of making inspection of establishments employing women and minors, issuing citations and holding hearings on disputed or controversial cases, and referring cases of wilful and persistent violators for prosecution.

One additional agent is proposed to handle the increase in the complaint case load.

Two agents are proposed to enable the division to accomplish its work in blighted areas such as Chinatown in San Francisco and to allow an adequate handling of the necessary inspections and other work arising out of the processing of complaints. A clerk is budgeted incident to the additional agents.

Revision of Minimum Wage Orders

Analysis

The purpose of this activity is to revise the minimum wage orders relating to the employment of women and minors. The orders are being rewritten as a result of changing economic conditions since the last revision. The Industrial Welfare Commission derives its authority for this action from Section 1173 of the Labor Code. These revisions have been completed.

DIVISION OF LABOR LAW ENFORCEMENT

Analysis

Responsible for the administration and enforcement of labor laws not specifically under the jurisdiction of other state agencies. Among these are laws relating to payment of wages, child labor laws, laws regulating private employment agencies, laws relating to ventilation and sanitary conditions of places of employment, weekly day of rest law, public works law, etc.

This budget proposes both program and workload expansions. The program changes include a new office and an additional clerk at Eureka to provide better and more efficient service, an investigator at Fresno to intensify investigation of farm labor contractors in the San Joaquin Valley, and a limited term half-time deputy labor commissioner for the purpose of compiling an up to date administrative manual.

The balance of the additions are attributable to workload changes. These include a clerk for employment agency controversies in Los Angeles, one clerk for the San Francisco licensing office and one-half time clerk at the Fresno field office.

DIVISION OF APPRENTICESHIP STANDARDS

Analysis

The establishment and functioning of the Division of Apprenticeship Standards is provided by the Shelly-Maloney Apprenticeship Labor Standards Act of 1939. This act creates an Apprenticeship Council, which includes the Director of Industrial Relations as an ex officio officer, and provides that the council will establish standards for minimum wages, maximum hours, working conditions for apprenticeship agreements and shall foster, promote, and develop the welfare of the apprentice in industry; improve the working conditions of apprentices; and advance their opportunities for profitable employment.

The division is the approving agency for apprenticeship and other training on-the-job and, as such contracts with the Veterans Administration for performing the required service to employers who are training veterans.

This budget includes two additional clerks for district offices. These positions were deleted from the budget during a period when federal clerical positions were available. A field representative and two clerks are included as proposed new positions for the draft deferment program. These positions were budgeted from emergency funds as of October, 1952 and it is proposed that they be continued contingent upon a re-analysis of the work load in June, 1953.

Though there is a reduction of $41,886 in federal funds the work load requires that the same level of services be budgeted, other than the increase due to the draft deferment.

DIVISION OF HOUSING

Analysis

The work of this division includes the administration and enforcement of laws relating to hotels, apartment houses, dwellings, auto courts, resorts, motels and labor and trailer camps. The division disseminates information regarding housing and construction to owners, architects, builders, and the general public and also investigates reports of substandard housing conditions throughout the State.

This budget includes two inspectors for the inspection of housing facilities at labor camps, necessary to carry out the provisions of the Mexican Labor Agreement.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF LABOR STATISTICS AND RESEARCH

Analysis

This division collects and compiles facts and statistics relative to the condition of labor in the State; publishes monthly statistics of employment, and, in cooperation with the Department of Employment, prepares monthly estimates and forecasts on civilian employment and unemployment within the State. It works in conjunction with other state agencies and the U. S. Bureau of Labor Statistics in the collection and presentation of this data. The division makes studies and investigations in the field of industrial relations. It compiles statistics of industrial accidents for use in accident prevention work; administrative statistics for the Industrial Accident Commission and performs similar services for other divisions of the department. All new factories are required by law to be registered with the division.

An additional account clerk is proposed to be used in the compilation of administrative statistics. These statistics have undergone considerable refinement in recent years with no additions to the staff for that purpose.

OFFICE OF FIRE MARSHAL

Enforces state fire prevention laws and regulations in the unincorporated areas of the State and assists the local authorities in the enforcement of state laws and regulations inside the corporate cities upon the request of the fire chief or the local government. Scope of work includes: general fire prevention, hospital inspections, flammable materials act enforcement, schools and night clubs, and inspections of state institutions.

GENERAL ANALYSIS

Number of positions	*45*	*45.5*	*48.5*	*3*

Three additional Deputy State Fire Marshal positions are required because of the heavy increase in population in recent years which has resulted in an increase in work load, especially in the inspection and survey of schools, public assemblages, and welfare institutions.

SALARIES AND WAGES: The increase of $16,719 is primarily due to the cost of the three proposed new deputy fire marshal positions.

OPERATING EXPENSES: The $2,690 increase is principally due to expenses related to the three proposed new positions, such as traveling, automobile operation, and postage.

EQUIPMENT: The amount of $10,936 requested is $641 for files, a table, and miscellaneous small items under office additional; $695 for 4 stenographer posture chairs, 2 typewriters and 3 films under office replacement; $3,200 for 2 new automobiles; $6,300 for replacement of 6 automobiles which will attain 100,000 miles during 1953-54; and $100 for miscellaneous additional laboratory equipment.

The following is a functional analysis of the agency's expenditures for comparative years:

Public and private school inspections	$61,834	$66,986	$73,619	$6,633
Welfare institution inspections	33,375	36,156	39,736	3,580

Department of Investment

DIVISION OF BANKING

Examines and supervises operating state banks and trust companies, grants or denies bank and branch applications and liquidates closed banks. Passes on legality of investments for savings banks and governs the deposit of securities with the State Treasurer by all trust departments and companies, both state and national, for the faithful performance of trust functions.

Revenue is derived primarily from an assessment of banks not to exceed .01 percent of total resources less secured deposits and bills payable.

GENERAL ANALYSIS

Number of positions	*35.9*	*40.1*	*46*	*5.9*

Provision is made for continuation of the previously authorized level of service with increases resulting from work load. The program involving examination of private trusts was not undertaken during the 1951-52 Fiscal Year due to difficulty in recruiting examiners and the urgent need for all available personnel on regular bank examinations. Two of the new positions are limited to June 30, 1954, pending determination of the actual work load in private trust examinations.

WORK LOAD June 30:	1948	1949	1950	1951	1952
Number of banks	115	117	107	116	121
Number of branches	185	194	198	213	221
Bank assets (thousands of dollars)	$3,616,136	$3,595,310	$3,706,217	$3,936,558	$4,256,605
Bank loans (thousands of dollars)	$1,063,509	$1,140,930	$1,258,307	$1,576,000	$1,647,540

SALARIES AND WAGES: The increase of $29,647 is due primarily to the four additional examiner positions and two new clerical positions.

OPERATING EXPENSES: The increase of $7,127 is due to provision for traveling expenses for the additional examiner positions and additional cost of printing and distributing the annual report which must include the listing of 10-year unclaimed bank deposits in the 1953-54 Fiscal Year.

EQUIPMENT: The amount of $7,123 includes replacement of wornout office machines and furniture plus additional equipment for the new positions.

REIMBURSEMENTS: It is anticipated that the liquidation of banks now in process will be completed during the current year and therefore no reimbursements should be received in the 1953-54 Fiscal Year.

GENERAL ANALYSIS

Number of positions	*23.6*	*23.2*	*25*	*1.8*

Provision is made for continuation of the existing level of service with the addition of one new examiner position based on increasing work load. Two limited term examiner positions are extended to permanent on the same basis.

WORK LOAD	ACTUAL 1950	ACTUAL 1951	ACTUAL 1952	ESTIMATED 1953
Number of building and loan associations, June 30	113	114	118	122
Number of loans in force, December 31	120,265	136,918	175,000 [c]	200,000

SALARIES AND WAGES: The increase is due to (1) the anticipation of the commissioner position being filled for the entire 1953-54 Fiscal Year, as compared to the vacancy in the past and current fiscal years, and (2) the proposed new examiner position.

OPERATING EXPENSES: The increase is due to additional costs related to the proposed new position and filling commissioner position.

EQUIPMENT: The amount of $2,350 provides for replacement of one automobile, an additional duplicating machine, furniture for the proposed new position, and miscellaneous items.

GENERAL ANALYSIS

Number of positions	*185.7*	*190.7*	*202*	*11.3*

Provision is made for continuation of the existing level of service. Increases result from additional work load caused by the continuing growth of the insurance business in California.

The principal increases are due to seven proposed new positions to handle increased work load in making financial examinations of insurers, two new positions to handle increased work load in the San Diego branch office, and one new clerical position to handle increases in connection with policy form analysis and processing of disputed policy claims.

WORK LOAD	ACTUAL 1950-51	ACTUAL 1951-52	ESTIMATED 1952-53	ESTIMATED 1953-54

ADMINISTRATION DIVISION

Analysis

This division handles the general administrative and staff functions of the department, including the direction of branch offices, actuarial work, and fiscal, personnel and office management services.

SALARIES AND WAGES: The increase is due primarily to the additional intermediate stenographer-clerk position proposed to handle increased stenographic work load in the San Diego office.

OPERATING EXPENSES: A decrease in total operating expenses results primarily from estimated completion of contractual attorney services in connection with litigation during the 1952-53 Fiscal Year.

EQUIPMENT: Major items are additional equipment for the new position, $582; an addressing machine, $1,731; and replacement of a worn-out postage meter mailing machine, $1,074; dictating equipment, $734; and a photo dryer, $300.

SALARIES AND WAGES	51-52	52-53	53-54	SALARY RANGE	1952-53	1953-54
Insurance Commissioner	1	1	1	$1,166	$14,000	$14,000

RATE REGULATION DIVISION

Analysis

This division enforces the fire and casualty rate regulation laws to the end that such rates shall not be excessive, inadequate, or unfairly discriminatory. It examines rating and other organizations and insurers for compliance with rating laws, analyzes rating plans, systems and formulas, reviews complaints regarding rates and rating plans. It performs analytical work in connection with approval of minimum workmen's compensation insurance rates. It reviews and approves workmen's compensation insurance policy forms and endorsements.

COMPLIANCE AND LEGAL DIVISION

Analysis

This division is responsible for the legal work of the department, including legal compliance of insurance companies, investigations, and disciplinary hearings. It grants authority to companies to do business in California; reviews and approves certain types of policy forms; makes investigations of licensees and license applicants to assure compliance with requirements; analyzes and adjusts disputed policy claims; makes legal preparations for hearings; acts for the department in hearings; renders legal advice to other divisions.

SALARIES AND WAGES: The principal increase is caused by two additional positions needed to meet work load increases. One senior insurance investigator is requested to assist in performing the increased number of investigations necessary in the San Diego area. An additional intermediate typist-clerk is proposed to handle increased correspondence work load in the San Francisco office.

EQUIPMENT: Major items include $1,708 for furniture, dictating equipment and a typewriter for the new positions; $2,449 for replacement of worn-out dictating and transcribing machines and other office equipment; $1,405 for purchase of legal and other library reference books.

LICENSE DIVISION

Analysis

This division gives qualifying tests and issues licenses to insurance production agencies (life agents, insurance agents, brokers, solicitors, bail agents, bail permittees). It prepares training manuals, approves training courses, and compiles written tests for license applicants. License records are maintained and all changes in license status are processed in this division.

The decrease is due to a nonrecurring expense in 1952-53 of purchasing initial supplies and employing temporary help for installation of a revised system of filing license documents.

DEPARTMENT OF INSURANCE—Continued

EXAMINATION AND FINANCIAL ANALYSIS DIVISION

Analysis

This division examines the financial condition, policies, and procedures of insurers for the purpose of determining their solvency, financial status, and compliance with applicable laws. The Examination Bureau makes field examinations of insurers. The Financial Analysis Bureau audits financial statements, computes the gross premium tax and surplus line brokers' tax, prepares an annual statistical report, and answers inquiries regarding insurance companies.

The increases result primarily from seven additional positions requested for increased work load.

Examination Bureau

CONSERVATION AND LIQUIDATION DIVISION

Analysis

This division takes possession of the assets and records of insolvent companies as directed by the Commissioner or by court order and administers the affairs of the companies until they have become financially sound or until their assets have been liquidated and distributed to creditors. The cost of operating this division is recovered from the assets of the companies being administered to the extent that such assets are available. The scale of operation of this division varies widely and is unpredictable.

GENERAL ANALYSIS

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
Number of positions	*100.5*	*110*	*118.5*	*8.5*

Provision is made for continuation of the present level of service with additional deputy and clerical positions for increases in work load. One additional position of special representative is proposed to make studies of special problems pertaining to subdivisions, mutual water companies, sanitation, drainage and other related projects.

During the current year additional funds were provided for temporary help to assist in converting files to new type folders and to eliminate a backlog in filing license applications.

WORK LOAD	ACTUAL 1949-50	ACTUAL 1950-51	ACTUAL 1951-52	ESTIMATED 1952-53	ESTIMATED 1953-54
Number of licensees	90,455	94,429	98,361	103,200	108,400
License examination applicants	15,126	13,474	14,407	15,400	16,500
Subdivisions filed	1,878	1,680	1,750	2,000	2,000

SALARIES AND WAGES: The increase is due primarily to the proposed new positions.

OPERATING EXPENSES: The increase results from additional traveling, automobile operation and mileage expense directly related to the new positions; additional office space required for expansion; the cost of preparing an orientation film to be shown to license candidates; and provision for the cost of review of a new filing system which was installed under a contractual agreement executed during the 1951-52 Fiscal Year. A reduction results in filing system supplies due to completion of the major conversion during the current year and in repairs to Kardex files which is a nonrecurring item.

EQUIPMENT: The amount of $11,098 provides for furniture and equipment for the proposed new positions, additional files for expansion of licenses and subdivision reports, film projection machines, legal books, a small contact printer, dictating equipment, and the replacement of two automobiles and worn out office furniture and machines.

Provision is made for continuation of the present level of service. The assistant executive secretary position, which was established January 1, 1952, to provide a training period in anticipation of the retirement of the executive secretary, is extended through the 1953-54 Fiscal Year on the basis of the present volume of work load. Provision is made for additional temporary clerical help to eliminate a backlog in the current year and continued at $1,500 in the 1953-54 Fiscal Year.

GENERAL ANALYSIS				
Number of positions	*476.1*	*545.5*	*553.8*	*8.3*

The proposed program for the 1953-54 Fiscal Year is a continuation of the program authorized for the 1952-53 Fiscal Year. No new services are requested nor is there an expansion of current services

---

[a] Expenditures for this project are reflected in the budget for the Division of Civil Law effective in the 1953-54 Fiscal Year.

[b] Expenditures for this project are reflected in the budget for the Division of Criminal Law and Enforcement effective in the 1952-53 Fiscal Year.

[c] Expenditures for the above project are reflected in the budget of the Division of State Lands and have been excluded from the totals of the budget of the Department of Justice. The amounts to be expended through the Department of Justice for legal services during the 1953-54 Fiscal Year has not been determined.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	52-53 (Auth.)	53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54

DIVISION OF GENERAL ADMINISTRATION

Analysis

Includes the Office of the Attorney General; the accounting and personnel sections, the stenographic pool, and other service functions; and the teletype section.

The additional intermediate clerk proposed in Los Angeles is to care for supplies, mail, mimeographing, and similar duties. In addition the position will assist in the keeping of docketing reports and the detail of deputy time reporting. This proposal is offset by the elimination of an intermediate clerk in the Bureau of Criminal Statistics.

Bureau of Criminal Statistics

Analysis

This bureau compiles and analyzes data relative to correctional institution population, parolees, crimes, arrests, and disposition of cases by superior courts.

Electric accounting machine rental is increased by $1,800 to more adequately provide for compiling data on disposition of cases by superior courts and the tabulation of attorney's time reports.

Bureau of Criminal Identification and Investigation

Analysis

This bureau maintains central files of fingerprints, modus operandi, crime records of felons, registrations of sex offenders, and furnishes information contained in such files to law enforcement agencies; provides expert, technical assistance to local law enforcement agencies through the staff of investigators and criminologists; and renders assistance to local law enforcement agencies in the specialized fields of questioned document examinations and polygraph (lie detector) operation.

No new positions are proposed but provision has been made for the continuation of positions added during the 1952-53 Fiscal Year in the Special Services Section to process 100 percent of crime and other reports.

No expansion of existing programs is proposed.

Bureau of Narcotic Enforcement

Analysis

This bureau enforces the provisions of the State Narcotic Act relative to use, sale, possession, or transportation of narcotics and harmful drugs.

The only increase is to provide radio equipment for all automobiles engaged in field work. This amounts to an increase of $2,750 in operating expenses and additional radio units costing $10,200.

FEES TO SPECIAL COUNSEL EMPLOYED PURSUANT TO SECTION 12520, GOVERNMENT CODE

Analysis

These special counsels provide for making investigations for discovery and recovery of property to which the State may be entitled by escheat and to conduct criminal prosecutions in counties where the district attorney is disqualified to conduct the prosecution. Continued at a nominal amount as has been the practice for several years.

ENFORCEMENT OF PROVISIONS OF CARTWRIGHT AND UNFAIR PRACTICES ACT

Analysis

This function provides for the enforcement of Sections 16601 to 17101 of the Business and Professions Code dealing with contracts in restraint of trade, fair trade contracts and unfair trade practices. This item was consolidated with the support budget of the Department of Justice effective July 1, 1952.

BANK TAX LITIGATION

Analysis

This function defends the State's position, in a pending suit filed by the banks, with respect to the present method of taxing banks under the provision of Section 4a, Bank and Corporation Franchise Tax Act. Included in the support budget of the Department of Justice for the 1953-54 Fiscal Year.

DEPARTMENT OF MENTAL HYGIENE—Continued

GENERAL ANALYSIS

The Department of Mental Hygiene's 1953-54 Fiscal Year budget for support operations provides a program for improved level of care in the mental hospitals and the mental defective homes, and includes the operation of a new institution at Porterville for mental defective patients, a maximum security institution at Atascadero, and the opening of receiving and treatment buildings at Napa and Stockton. Research projects included for continuation include the alcoholic (A. C. E.) project at Agnew State Hospital, and a sex crime research program at the Langley Porter Clinic. An expansion of the family care program is proposed for continuance and requires passage of a special bill to provide additional financing for this purpose in the 1952-53 Fiscal Year. Passage of a special bill is required to provide financing for the opening of the Porterville State Home for the reception of patients on May 1, 1953.

DEPARTMENTAL ADMINISTRATION, LANGLEY PORTER CLINIC, PSYCHIATRIC HOSPITAL CLINIC—LOS ANGELES, OUTPATIENT CLINICS

The analysis and expenditures for these agencies will be found under their respective budgets.

STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT

In this group are the following:

Seven state hospitals for the care of mental patients: Agnews, Camarillo, Mendocino, Napa, Norwalk, Patton, and Stockton.
One new state hospital for the care of maximum security patients at Atascadero to be in operation April 1, 1954.
Two institutions for the care of mentally defective patients: Pacific Colony, and Sonoma State Home.
One new institution for the care of mentally defective patients at Porterville to be in operation May 1, 1953.
Two hospitals for the care of both the mentally ill and mentally defective patients: DeWitt and Modesto.

These hospitals and homes provide hospitalization for the mentally ill, mentally defective, alcoholics, narcotic addicts, sexual psychopaths, and defective and psychopathic delinquents, with the emphasis being on treatment centers rather than merely custodial institutions.

POPULATION AND UNIT COSTS	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53
Average population	39,408	40,732	42,839	2,107 (5.2%)
Average per capita costs	$1,028	$1,133	$1,206	$73 (6.4%)

In general, the total increase of $5,531,389 (12 percent) over 1952-53 is the result of the following factors:

- (a) Population changes.
- (b) Standards of allowance for proposed additional positions:
  - 1. Population and work load changes.
  - 2. Staff for the new facilities:
    - Atascadero State Hospital
    - Porterville State Home
    - Napa Receiving and Treatment Building
    - Stockton Receiving and Treatment Building
  - 3. Program changes for increased level of service, primarily in treatment through additional nursing, therapists, and culinary personnel.
  - 4. Extension of the alcoholic research team at Agnews for one year to complete the study.
- (c) Price changes.
- (d) Increased ration allowances for patients' food and therapy supplies.
- (e) Need for replacement equipment and acquisition of additional epuipment.

The analysis and expenditures for Atascadero State Hospital and Porterville State Home will be found under their respective budgets.

The following proposals are common to the institution budgets and are, therefore, discussed as groups rather than individually under each institution.

SALARIES AND WAGES: The increase of $4,012,250 provides for the following 1,361 new positions at a cost of $3,468,989.

Psychiatric Technician and Nursing Personnel

23 Senior psychiatric nurse	$85,560
183 Psychiatric technician trainee	439,200

The senior psychiatric nurse and psychiatric technician personnel provide additional staff for the receiving and treatment buildings at Napa and Stockton.

(a) Twelve senior psychiatric nurses and ninety-four psychiatric technician trainee positions are required in addition to the revised authorized staff of 156 to provide a total ward staffing of 262 for the Napa receiving and treatment building, the same number that is authorized for the comparable receiving and treatment building at Camarillo State Hospital. The Napa and Camarillo receiving and treatment buildings each have a capacity of 714 beds.

(b) Eleven senior psychiatric nurses and eighty-nine psychiatric technician trainee positions are required in addition to the seventy-two existing authorized positions that will be reassigned to the Stockton receiving and treatment building as this unit replaces in part some of the old buildings such as the receiving, medical and surgical wards. The intensity of staffing of ward personnel is 2.7 in each of the receiving and treatment buildings located at Stockton, Napa, and Camarillo.

Senior psychiatric nurse (replace 41 senior psychiatric technician II)	20,664
Psychiatric nurse (replace 124 graduate nurse)	20,832
Psychiatric nurse (replace 56 psychiatric technician)	50,400

The senior psychiatric nurse positions are to replace 41 senior psychiatric technician positions to provide one head nurse in charge of each acute ward in all hospitals.

The 124 psychiatric nurse positions are to replace graduate nurses and the 56 psychiatric nurses are to replace psychiatric technicians and will augment the present psychiatric nurse staff and provide one psychiatric nurse in charge during the afternoon and night shifts in wards in the acute areas, which include receiving wards, hospital wards, wards for crippled and infirm, tubercular ward, and nursery wards. The full requirement to furnish the wards in the acute area is 636 psychiatric nurse positions. The number indicated by reclassification is the estimated number that can be recruited during the 1953-54 Fiscal Year.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

Psychiatric Technician and Nursing Personnel—Continued

2 Surgical nurse — $7,080

These positions are necessary as a part of the establishment and operation of the new Stockton receiving and treatment building with its central supply, major and minor surgical facilities. The present two nurses are engaged full time in the major surgery. One additional surgical nurse is required in the "central supply" to aid in the preparation of instruments, making sterile packs, keeping up sterile supplies for the surgery and other areas in the institution, and supervising the general cleaning of surgical equipment. The other surgical nurse will be established in the minor surgery and clinic assisting physicians in pre- and post-operative clinic; in the eye, ear, nose, and throat clinic; also in minor surgery, G. U. and gynecology clinic.

Surgical nurse II (reclassification of four surgical nurses) — 1,440

The reclassification of one surgical nurse is provided for at those institutions (Agnews, Camarillo, Napa, Patton) with a staff of four surgical nurses to establish the responsibility of head surgical nurse within the unit.

Medical

15 Physician and surgeon II — 113,568

Fifteen new positions will provide assistance for the additional work load resulting from increased numbers of admissions and resident population.

6 Psychiatric resident — 21,240

A psychiatric residency program is necessary to qualify hospitals for training purposes. These positions make it possible for doctors to qualify for the American Board of Neurology and Psychiatry. The institutions receive the benefit of the medical services while the doctors are qualifying and also provide additional highly qualified physicians for the service of the State. Three positions are assigned to Norwalk, one to Patton, and two to Pacific Colony.

12 Junior clinical psychologist — 44,640

Twelve new positions will provide assistance for the additional work load resulting from increased numbers of admissions and resident population. The increased work load requires one at Agnews, four at Camarillo, one at Modesto, three at Napa, one at Patton, and two at Stockton.

Other Professional and Special Groups

15 Recreation therapist — 55,800

7 Occupation therapist I — 24,780

The additional positions provide the necessary leadership and technical ability to instruct and supervise ward personnel in activity techniques as part of the rehabilitation program to affect an accelerated rate of leave of absences. Rehabilitation therapists translate and carry out prescriptions of doctors in therapeutic activities. This provision will provide some improvement in service in this staff which has been held at a relatively low level as compared with other areas of the departmental program.

1 Supervising psychiatric social worker — 4,980

16 Junior psychiatric social worker — 59,520

It is the responsibility of these positions to obtain information for medical use from relatives, help patients solve family problems, work closely with the doctor, and to survey the institutional population looking for possible placement material. These positions are required for work load increases attributable to the increase annual admissions and resident population growth.

1 Senior clinical laboratory technician — 3,540

2 Clinical laboratory technician — 6,744

1 X-ray technician — 3,216

One senior clinical laboratory technician is required for the Sonoma 184-bed tubercular hospital. Special laboratory examinations are required for this class of patient in addition to routine laboratory services, such as blood count, urinalysis, blood chemistries, precise work such as gastric analyses, tuberculosis cultures, and examination of sputum and body fluids.

One clinical laboratory technician position is required for the tubercular unit at Napa, and one for the increased load at the Camarillo receiving and treatment building.

One additional X-ray technician is required to perform this work at Agnews State Hospital.

2 Food administrator I — 8,184

A food administrator I position is provided for Agnews and Napa to care for the corrective diet work and provide relief and assistance to the food administrator II who has over-all responsibility for the daily food program. The department has been staffed with a food administrator II position at each of the institutions and an additional food administrator I at five of the institutions where there are unit hospitals or a considerable number of special diets in the institution as a whole. Agnews has many physically ill patients requiring special diets. At Napa the new receiving and treatment building will be functioning and a food administrator I will be required to care for all corrective diets in this active treatment center.

11 Dining room supervisor — 26,532

Provision of a general dining room supervisor (as distinct from supervisors assigned to a particular dining room) under the Food Administrator at each institution will facilitate making the best distribution of food and use of personnel and equipment. In the larger institutions, and particularly in those with a number of dining rooms, an additional type of supervision is needed. This would be supplied by a trained general dining room supervisor, service of food, who would supervise the entire service of food, directing and instructing the employed personnel and the large number of patients. Experienced dining room supervisors would be responsible for the immediate service of food in the particular dining rooms and the duties to be performed would include the responsibility for inspection and maintenance of sanitary conditions in the food department.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

Other Professional and Special Groups—Continued

32	Supervising cook I	$113,280

A supervising cook should be provided on each shift at each kitchen to give adequate supervision to the balance of the culinary staff. The supervising cooks do actual cooking and have the additional responsibility of organizing and directing the other cooks in the preparation and distribution of food and integrating the cooks in overlapping shifts. In addition, the supervising cook would direct the work of the kitchen helpers and patients assigned to the cooking areas. At present no responsible person is provided to act as a lead individual throughout the day. The possibilities of providing better meals and assuring standard quality production rest in the capabilities and capacities of the food administrators and supervising cooks.

29	Cook—large quantity	93,264
17	Assistant cook, effective October, 1953	33,660

The food department requires sufficient staffing for at least 12 to 14 hours daily in order to maintain good food standards and efficient kitchen operations. The mental institutions were found to be understaffed in the areas of the food department as revealed by survey. The number of personnel required to adequately staff a food department depend upon equipment, size and layout of the physical plant, and the number and type of patients and employees to be fed. This allowance provides the major part of the deficiency and is the number that can reasonably be expected to be recruited during the 1953-54 Fiscal Year.

12	Baker, effective October, 1953	28,944

To implement the baking staffs for daily operations as part of the general food preparation program.

3	Kitchen helper	7,200

The additional positions are required for Camarillo's new kitchen No. 3, which is to be placed in operation in the 1953-54 Fiscal Year.

4	Housekeeper	10,560
1	Janitor	2,640

Two housekeeper positions will be required to maintain the corridors, professional offices, clinic areas, lobbies and stairways of the large Napa receiving and treatment building. In addition, the areas to be cleaned in the administration section of the T units will be added to the load of the housekeepers. Two housekeeper positions and one janitor position are required to care for the cleaning of Stockton's new facilities including the auditorium, administration building, and receiving and treatment buildings. Janitorial services will be necessary in this large unit for the corridors, lobbies, and many treatment and office rooms, as well as the offices in the new administration building.

1	Laundryman	2,772
4	Laundress	10,560
2	Laundry helper	4,800
7		$18,132

Laundry survey reports made during 1950-51 established personnel requirements at all institutions for existing weekly loads. The loads and personnel requirements for Camarillo, Norwalk and Pacific Colony were 110,800 pounds requiring 20 employees, 60,300 pounds requiring 10 employees and 110,000 pounds requiring 15 employees respectively. Departmental estimated loads for 1953-54 for the above hospitals are 166,400 pounds, 73,202 pounds and 110,000 pounds respectively. Since personnel requirements depend on the number and quality of patient help the decline from 160 to 150 at Camarillo and from 50 to 20 at Pacific Colony affect personnel needs. Application of the formula indicating poundage per employee for various laundry operations to departmental estimated load requires 26 employees at Camarillo instead of the present 23 and 13 instead of 10 at Norwalk. The 1953-54 budgetary proposal is for three positions at Camarillo and two at Norwalk. A reduction of patient help on the presses at Pacific Colony from 20 to 5 is the justification for five employees instead of the three authorized.

Alcoholic Research Project—Agnews

1	Physician and surgeon II	$8,520
1	Junior clinical psychologist	3,900
1	Psychiatric nurse	3,720
1	Senior psychiatric social worker	4,740
2	Intermediate stenographer-clerk	5,544
		$26,424
	Operating expense (drugs and supplies)	5,500
	Additional equipment for clerks	710
	Total	$32,634

The 1952 session of the Legislature appropriated funds for the establishment of the Research in Alcoholism Project at Agnews State Hospital consisting of four positions. This is a program for the treatment of alcoholism which has been advanced in the past years in the use of new drugs such as ACE and ACTH and, also cortisone, to evaluate the effectiveness of the substances. Results of this type of treatment will be compared with the treatment programs that use conditioned reflex, antabuse, and other programs. This project will require additional time in order to determine the effectiveness of the use of the above-mentioned drugs. The additional positions requested consists of two intermediate stenographer-clerks, which are required to supply clerical assistance to the professional team engaged in the research project.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS AND HOMES FOR MENTALLY DEFICIENT—Continued

Clerical Personnel

6 Senior account clerk $19,296

9 Intermediate typist-clerk 23,760

Additional staff is needed at the institutions to file claims for the collection of funds from insurance, pensions, and other sources which result in payments to the patients. Funds collected are placed in the patients' personal accounts and are used to purchase items which in somes cases would otherwise be direct charges against the General Fund. The personal account of the patient in some cases provides financial security for the period of rehabilitation immediately after release which in many instances turns a temporary release into a permanent one. The Department of Mental Hygiene as guardian of veterans, whose estates consisted of money received in the form of compensation or pension paid as a result of a claim having been filed on his behalf, disbursed $118,130 for the veterans care and treatment for the 1951-52 Fiscal Year.

7 Intermediate file clerk 18,480

Seven additional positions are required (one each at Agnews, Napa, Norwalk, Patton, and Stockton, and two at Camarillo) to smooth filing operations in the patients clinical records units, eliminate reliance upon patients, and release time for direct stenographic work.

23 Intermediate typist-clerk 63,756

These positions are required for work-load increases in the doctors clerical pool which provides clerical help on a one for three ratio basis to professional staff members including psychiatrists, physicians, psychologists, nursing instructors, social workers, and chaplains.

1 Intermediate typist-clerk 2,640

This position is needed to provide typing services for the teaching principal and various teachers in the Sonoma State Home School Department. This position will allow the teaching principal to devote her specialized efforts to teaching and supervision rather than clerical work.

1 Intermediate typist-clerk 2,640

The additional position is required for the patient movement records at Camarillo due to the opening of the new units and the resultant growth in admissions and other patient movements.

Other Personnel

384 New positions established at Atascadero $505,166

505.7 New positions established at Porterville 1,449,235

Explanatory statements covering these positions will be found preceding the institution's budget.

16.3 Miscellaneous new positions 51,992

The miscellaneous positions are individually explained after each hospital's analysis.

Salary Savings

The increased expenditures for salaries and wages is due in part to decreased salary savings amounting to $64,341, and an increase in cost of authorized positions amounting to $960,061.

OPERATING EXPENSES: An increase of $1,681,825 is explained within the analysis of each hospital. Explanation of the changes common to all hospitals follows:

Food Ration Increase $947,938

A proposed ration change was previously submitted for consideration in the 1951-52 Budget to improve the ration as applied to the 39,621 patient population at July, 1950, prices. This was subsequently disapproved by the Legislature pending completion of a state-wide survey. The results of this survey as finally reviewed indicates, that from medical, psychiatric and psychological standpoints, on considering the feeding of patients in mental hospitals, factors beyond simple nutrition are desirable. From the psychiatric and psychological standpoint, importance is attached to such factors as food acceptability, environment, and personnel.

Food wastage fundamentally is due to a failure of food acceptance and results from disregard of factors important to food acceptance.

The increase in the food ration as proposed herein will cost approximately $947,938 in terms of estimated population for the 1953-54 Fiscal Year at July, 1952, prices.

Rehabilitation Therapy Supply Allowance 40,717

The department has established a very active rehabilitation therapy program in the institutions and with such an increase it is necessary for the therapists to have a minimum amount of operating expense funds for both group activity as well as ward activity. Previous allowances have averaged approximately $2.85 per mental hospital patient annually. The 1953-54 Budget provision averages $3.80 per patient for recreational, occupational, and music supplies, library books, etc., at an increased cost of $40,717.

The operation of two new institutions at Porterville and Atcascadero increased operating expenses for feeding, medical and other materials, services and supplies approximately $480,384 in 1953-54 over 1952-53 excluding the factors of increased cost due to an enriched food ration and an augmented allowance for rehabilitation therapy supplies.

EQUIPMENT: Equipment items totaling $1,145,977 are explained within the analysis of each hospital and represent replacement equipment of $635,376 or 4.8 percent of investment, and additional equipment of $510,601, a total decrease of $99,997 below 1952-53. The additional equipment requests in the several institutions include additional office equipment for new positions; additional feeding equipment for greater population and to improve conditions where there is insufficient equipment to meet existing needs; additional medical equipment to improve the level of medical care and treatment of patients and to make possible better application of modern techniques and treatment methods; additional maintenance equipment to provide improved and more maintenance work in many buildings and facilities, and certain farming equipment necessary in the operation of the institutional farms.

REIMBURSEMENTS: A total of $1,072,227 is estimated for 1953-54, an increase of $62,689 over 1952-53. The increase is attributable to services to employees primarily for meal sales and rental of quarters.

DEPARTMENT OF MENTAL HYGIENE—Continued

Under the administration function, the department carries on the activities of general direction of the hospitals, homes, clinics, special programs, fiscal accounting and budget control, collection activities, deportations and transfers, guardianships, statistics, personnel services, food administration, nursing service, maintenance service, community services, and private institution inspections.

[a] Composed of savings in salaries and wages, $1,987; operating expenses, $578; and equipment, $701.

[b] Composed of savings in salaries and wages, $16,855.

[c] Early passage of a special bill in the amount of $62,580 will be required to continue the family care program at its anticipated level during the 1952-53 Fiscal Year.

DEPARTMENT OF MENTAL HYGIENE—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

Programs to be further developed in the 1953-54 Fiscal Year include an expansion of the community services program and the family care program. Other special programs budgeted for continuance include a research project into sex crimes conducted in conjunction with the University of California at the Langley Porter Clinic, and a contract with the Department of Public Health for sanitation services.

Under the extramural care function, the field supervision of patients on leave of absence, industrial leave, and family care cases are carried on. This program is being adjusted for work load factors due to the increased number of leave cases.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 51-52 (Filled)	NO. OF POSITIONS 52-53 (Auth.)	NO. OF POSITIONS 53-54 (Auth.)	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54

ADMINISTRATION

Analysis

SALARIES AND WAGES: The increase of $267,138 is primarily due to the 46 new positions which cost $165,360. Increased cost of authorized positions and decreased estimated salary savings accounts for the balance of the increase.

Community Services:

1 Senior psychiatric social worker $4,512

This position is required to establish an information center for the mentally retarded at San Diego similar to the two already established in Los Angeles and San Francisco. The San Diego area has an unusually large waiting list for admission to Pacific Colony.

1 Intermediate stenographer-clerk 2,772

This stenographer is required to provide clerical services, on the authorized ratio, for the information center social workers. This position will be assigned to the San Diego office and the Los Angeles and San Francisco positions will continue to draw clerical assistance from the regional office clerical staffs.

1 Chief, mental health education 7,008

This position is required to head up an educational service staff. Duties of this position will include supervision of the production of educational media and its distribution within and outside the department, responsibility for numerous information requests, and acting as the department's expert in writing for public consumption.

1 Senior stenographer-clerk 3,216

This clerical position is required to provide clerical services for the new chief, mental health education.

Accounting:

1 Accounting technician II 3,216

1 Intermediate account clerk 2,640

The accounting technician II position is required to assist with the departmental budgeting and expenditures accounts and subsidiary accounting records.

The intermediate account clerk position is required to assist with the processing of claims and the work load of the payroll revolving fund and uncleared cash records in the accounting section.

Personnel:

1 Intermediate typist-clerk 2,640

This position is required to process the increased personnel transaction documents due to the new institutions at Porterville and Atascadero.

1 Intermediate stenographer-clerk 2,772

This position is to make available additional stenographic and clerical time to the personnel officer who is responsible for all major departmental conferences as part of his general responsibility for departmental training activities. Extensive clerical time is worked in making the arrangements, corresponding with speakers and participants, preparing agendas, taking, transcribing, and editing conference notes, and following up conference items. Additional time is spent in connection with the meetings and reports of the department's standing and special committees. Time is to be made available in the operation of the program of personnel administration to maintain records on position vacancies, job applications, and referrals, and status of eligible list.

Statistics:

1 Medical records coordinator 4,092

This position will supervise the reports unit with the Statistical Research Bureau including the processing of institutions' population reports and establish and maintain a centralized reporting system for medical statistics within the department (including mortality and autopsy rates, causes of death, selected physical disorders, etc.); collaborate with the State Department of Public Health in research projects involving the collection of morbidity and mortality statistics; furnish assistance to medical record librarians in the standardization of report forms and reporting procedures and furnish consultative advise to the department's committees on administration with regard to medical records; prepare and maintain a detailed manual of reporting procedures for the guidance of record room personnel in extramural operations and in reporting to Sacramento, and perform other duties.

1 Intermediate typist-clerk 2,640

This clerical position is required for the increased load in the statistical section resulting from the opening of two new institutions at Atascadero and Porterville.

Temporary help 2,520

Temporary clerical help is required to permit the statistical unit to provide information relating to the Bureau of Patent Accounts case reviews. This entails checking current reports from the institutions as well as processed IBM-card files. For the remainder of the cases, the statistical unit will be asked to furnish a complete record of all temporary separations under each case number. This does not include information currently being provided in the form of weekly IBM listings of admissions on flexoline strips for the bureau's convenience in maintaining its own roster of patients on record and the increased daily telephone requests.

Private Institution Inspection:

1 Intermediate stenographer-clerk 2,772

This position is required for the increased clerical work load in the private institution inspection office resulting from the continued increase in the licensing of new institutions. During 1951-52 there were approximately 800 inspections and investigations made in the field.

DEPARTMENT OF MENTAL HYGIENE—Continued

ADMINISTRATION—Continued

Analysis—Continued

SALARIES AND WAGES—Continued

Patients' Accounts:

3 Agent I	$11,364
1 Senior stenographer-clerk	3,216
5 Intermediate typist-clerk, range B	13,860
1 Intermediate office appliance operator	2,640

One agent I position and an intermediate typist-clerk is required for the increased load in the legal section for the review and processing of legal documents served on the bureau. Temporary assignment of personnel to this section has permitted rate increases leading to additional revenue for the General Fund.

Two agent I positions and an intermediate typist-clerk position are required for increased volume of case load work in the analysis section resulting from the increased number of patient admissions. In addition to the increased load from admissions the case load will be further augmented by a planned annual review of 15,000 patient cases who have been resident in the hospital for a year or more for which the existing charge is less than the maximum rate.

One intermediate typist-clerk position is required for the Los Angeles Regional Office to assist one other clerk transcribe dictation of five area agents and act as cashier, accounting for and issuing receipts for a substantial number of payments, make daily bank deposits, compile and balance the daily cash report and the general work of the office.

One senior stenographer-clerk position is required to supervise the stenographic pool operation. The supervisor of the accounts receivable and services section by reason of the heavy demands placed on her by the accounting and filing activities, cannot give to the stenographic pool the supervision and management it requires.

Two intermediate typist-clerk positions are required for the additional load increases of the three sections utilizing the pool. One of the six authorized positions formerly approved for the pool has been reassigned to handle the combined duties of receptionist, telephone operator, and window cashier in the Sacramento office. This person is also charged with the responsibility for preparing the daily bank deposit.

1 Intermediate office appliance operator has been established on a temporary basis to perform the mail function for the Bureau of Patients Accounts. This temporary establishment became imperative because of a separation of the bureau from the central office. It is now apparent that this position will be required permanently.

OPERATING EXPENSES: The increase of $21,840 is accounted for as follows: Additional travel costs for new positions, $1,600; postage for full year billings on a current basis in patients accounts section, $6,000; additional rental cost for more space at headquarters, $9,115; and additional allowance for education and community services, $5,000.

EQUIPMENT: The amount of $27,863 represents $1,691 for replacement equipment and $26,172 for additional equipment. Among the more significant items of additional equipment are complements for 25 new positions, $7,579; audio-visual equipment and films, $4,000; radio transcriptions, $1,000; and additional dictating equipment, $2,112.

DEPARTMENT OF MENTAL HYGIENE—Continued

EXTRAMURAL CARE—Continued

Analysis—Continued

SALARIES AND WAGES: The increase of $155,715 is accounted for by 25 new positions to the extent of $93,480. The balance of t increase is accounted for by increased cost of authorized positions and decreased estimates of salary savings.

2 Supervising psychiatric social workers are provided to continue supervision of case workers at the ratio of one to six.
15 Senior and junior psychiatric social workers are provided of whom 10 are required for case load increase and five to permit reduction of the field workers active case load from 83 to 79.1 to improve the level of service.
8 Intermediate stenographer-clerks to provide clerical service for the expanded staff at the current ratio of one to two-and-or half social workers.

OPERATING EXPENSES: The increase of $41,500 is primarily due to estimated increases in travel expenses and rent for the 1953- Fiscal Year.

EQUIPMENT: The amount of $31,978 includes complement equipment for new positions, $6,427; six additional automobiles for n positions, $10,100; dictating equipment for new positions and replacement items, $4,928; two electric mimeograph machines, $1,00 and miscellaneous equipment for the authorized and expanded staff.

TRANSPORTATION OF PATIENTS AND OTHER PERSONS COMMITTED TO STATE INSTITUTIONS

Analysis

This appropriation covers transportation costs, sheriffs' fees, and traveling expenses incidental to delivery of patients from counties to the institutions. The decrease in estimated reimbursements for the 1952-53 Fiscal Year relates to a lag in billing during the period of reorganization of the collection activity to a centralized basis.

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
OPERATING EXPENSES			
Transportation, traveling expenses and sheriffs' fees	$141,974	$147,562	$159,589
Charges to relatives and other legally responsible persons	*—38,852*	*—29,512*	*—38,301*
TOTAL EXPENDITURES	$103,122	$118,050	$121,288

OUT-OF-STATE DEPORTATIONS AND INSTITUTION TRANSFERS

Analysis

This provides for deportation of approximately 375 patients to their own state of legal residence and to transfer approximately 2,000 patients between mental institutions. The significant increase for the 1953-54 Fiscal Year is due primarily to transfers of patients to the new institutions at Porterville and Atascadero.

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
OPERATING EXPENSES			
Traveling	$78,900	$83,325	$113,625

FAMILY CARE

Analysis

The family care leave program of the Department of Mental Hygiene has increased rapidly during the first part of 1952-53 and is currently at a level considerably in excess of previous estimates. Based on the current situation, revised estimates indicate that there will be an average of 544 patients per month on family care leave during the 1952-53 Fiscal Year. Early passage of a special bill in the amount of $62,580 will be required to carry on this program at the revised level for the current year. The 1953-54 estimates reflect a continuation of the present trend to a level of 627 average family care leave cases per month.

	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54
OPERATING EXPENSES			
Allowance for subsistence and care of patients paroled to family home care	$253,932	$411,060	$493,400

RESEARCH INTO SEX CRIMES

Analysis

This study is being conducted by the superintendent of the Langley-Porter Clinic under the direction of the Department of Mental H giene. Additional funds are requested for the continuation of this study to include sociological survey, $19,572; study of the chi victim of the adult sex offender, $22,460; abstract and review of scientific literature and additional work, $6,500; general reportir executive administration, $4,540; a total of $53,072.

OPERATING EXPENSES						
Contractural services				$67,524	$75,000	$53,072

SANITATION SERVICE FROM PUBLIC HEALTH

Analysis

This request is to continue sanitation services to the institutions by the Department of Public Health, consisting of inspections, inves gations and consultations in the fields of food sanitation, water supply, insect and rodent control, garbage disposal, laundry sanit tion, and problems relating to new construction. These services are performed on a contractual basis by two public health sa tarians and one sanitary engineer.

GENERAL ANALYSIS

Number of positions	*75*	*80.6*	*83.8*	*3.2*

As administrator of National Mental Health Act funds for California, the Department of Mental Hygiene is responsible for the allocation of such funds to other state and local agencies and seeing that required standards of service are met and maintained.

The following schedule indicates the number of hours by clinic spent by the professional staff on direct treatment services to patients and preventive services to communities during the 1951-52 Fiscal Year. Of the direct professional time allocated, 83 percent was directed toward treatment services to patients and 17 percent toward preventive services to communities.

	ALL SERVICES		TREATMENT SERVICES TO PATIENTS	PREVENTIVE SERVICES TO COMMUNITIES	CLINIC OPERATION
CLINIC	Cost	Total hours	Number of visits by patients (in hrs.)	Number of hours *	Cost per service hour
All clinics (excludes LPC)	$408,165	35,573	29,408	6,165	$11.47
Los Angeles	111,363	9,691	8,803	888	11.47
San Diego	58,114	5,872	4,360	1,512	9.90
Fresno	48,879	3,745	2,185	1,560	13.05
Sacramento	55,063	4,365	3,767	598	12.61
Berkeley	55,564	8,335	7,637	698	6.67
Riverside	53,596	2,620	2,007	613	20.46
Chico	25,586	945	649	296	27.08

In conjunction with the rendering of these services, the Berkeley Clinic conducts an extensive training program for social workers, psychologists and psychiatrists. As indicated in the prceeding schedule, the Berkeley Clinic cost per service hour of $6.67 is significantly below the average for all clinics.

---

[a] Federal funds, neither receipts nor expenditures are included in the budget totals.

[b] Composed of savings in salaries and wages, $44,905; operating expenses, $4,287; equipment, $825; and a reimbursement shortage of —$2,958.

[c] Composed of savings in salaries and wages, $7,160; and operating expenses, $148.

* Estimated on basis of statistics for eight months.

OUTPATIENT MENTAL HYGIENE CLINICS—Continued

EXPENDITURES	ACTUAL 1951-52	ESTIMATED 1952-53	PROPOSED 1953-54	CHANGE FROM 1952-53

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The increase of $31,058 is due in part to increased cost of authorized positions and a reduction in estimated salary savings to an approximate 7 percent vacancy level.

OPERATING EXPENSES: A decrease of $2,485 is caused primarily by a decrease in estimated contracts with state and local agencies for mental health clinics and training, resulting from a decrease in estimated National Mental Health Act grants for California for the 1953-54 Fiscal Year.

EQUIPMENT: An amount of $6,122 is provided for 1953-54 and includes the following significant items: four 16 mm. sound movie projectors, and additional books for each of the clinics.
